Re: Steeplechase Manor

Dear Mr. Zach Cavendar:

The subject property, known as Steeplechase Manor (fka as Hunt Country Manor Apartments), is an existing affordable multifamily development located at 361 Roebling Street in Warrenton, Fauquier County, Virginia (PIN 6984-28-3495, 2318, 2237, 3392 & 3291). The subject property consists of 56 revenue-producing units originally constructed in 1955 and renovated in 1999 with tax-exempt bonds. The sponsor has proposed to renovate the property with an allocation of tax credits. The subject property is an open age community.

The subject property is proposed to consist of 56 revenue-producing units including 1 and 2-bedroom garden apartments. A total of 6 units are proposed to be income restricted to 40% of AMI; a total of 22 units are proposed to be income restricted to 50% of AMI; a total of 28 units are proposed to be income restricted to 60% of AMI; no units are proposed to be set aside as market rate units; no units are proposed to benefit from project-based rental assistance; no units are proposed to benefit from HOME financing. The rent and income restrictions associated with the proposed allocation of tax credits will run for the next 30 years.

The scope of this assignment consists of a comprehensive market analysis for the subject property. The market study was completed in accordance with VHDA, National Council for Housing Market Analyst (NCHMA) guidelines and the Uniform Standards of Professional Practice (USPAP). The completion of this report involved a site visit, interviews with local property managers, and the collection of market data through discussions with persons knowledgeable of the local real estate market.

The purpose, intended use, and function of the report is to assess the marketability of the subject property for tax credit application purposes. This report should not be used for any other purposes without the express written permission of Allen & Associates Consulting.

The report has been generated for the benefit of our client Arlington Partnership for Affordable Housing. VHDA is named as an additional user of the report. No other person or entity may use the report for any reason whatsoever without our express written permission.

A summary of our findings and conclusions is found in the following pages. The conclusions reported are based on the conditions that exist as of the effective date of this report. These factors are subject to change and may alter, or otherwise affect the findings and conclusions presented in this report.

To the best of our knowledge, this report presents an accurate evaluation of market conditions for the subject property as of the effective date of this report. While the analysis that follows is based upon information obtained from sources believed to be reliable, no guarantee is made of its accuracy.

Feel free to contact us with any questions or comments.

Respectfully submitted: ALLEN & ASSOCIATES CONSULTING

Jeff Carroll

EXECUTIVE SUMMARY

The following is a summary of our key findings and conclusions with respect to the subject property:

Project Description

The subject property, known as Steeplechase Manor (fka as Hunt Country Manor Apartments), is an existing affordable multifamily development located at 361 Roebling Street in Warrenton, Fauquier County, Virginia (PIN 6984-28-3495, 2318, 2237, 3392 & 3291). The subject property consists of 56 revenue-producing units originally constructed in 1955 and renovated in 1999 with tax-exempt bonds. The sponsor has proposed to renovate the property with an allocation of tax credits. The subject property is an open age community.

Proposed Unit Mix

The subject property is proposed to consist of 56 revenue-producing units including 1 and 2-bedroom garden apartments. A total of 6 units are proposed to be income restricted to 40% of AMI; a total of 22 units are proposed to be income restricted to 50% of AMI; a total of 28 units are proposed to be income restricted to 60% of AMI; no units are proposed to be set aside as market rate units; no units are proposed to benefit from project-based rental assistance; no units are proposed to benefit from HOME financing. The rent and income restrictions associated with the proposed allocation of tax credits will run for the next 30 years.

Proposed Unit Configuration									
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Gross Rent	UA	Net Rent			
1BR-1.5BA-878sf / 40% of AMI / 40% of AMI	No	No	1	\$879	\$52	\$827			
2BR-1BA-1018sf / 40% of AMI / 40% of AMI	No	No	5	\$1,055	\$68	\$987			
2BR-1BA-1018sf / 50% of AMI / 50% of AMI	No	No	22	\$1,218	\$68	\$1,150			
2BR-1BA-1018sf / 60% of AMI / 60% of AMI	No	No	19	\$1,218	\$68	\$1,150			
2BR-2BA-1029sf / 60% of AMI / 60% of AMI	No	No	9	\$1,268	\$68	\$1,200			
Total/Average			56	\$1,205	\$68	\$1,138			

Site Description

The subject property includes an irregular-shaped parcel consisting of approximately 2.436 acres and approximately 1000 feet of road frontage.

A total of 94 parking spaces are planned for this development (87 regular / 7 accessible / 1.68 spaces per unit). Privatelyowned parking areas are planned for the subject property. We normally see 1.5 to 2.0 spaces per unit for projects like the subject. Public transportation is found in the area. In our opinion, the current parking appears adequate for the subject property.

Additional Considerations:

Zoning	R3 Multifamily. Legal, conforming use.
Environmental	1964 construction. Suspected environmental conditions.
Topography	No issues detected.
Flood	Zone X. Outside the 100-year flood zone.
DDA Status	Fauquier, Virginia. Not designated as a Difficult to Develop Area.
QCT Status	Tract 9302.00. Not designated as a Qualified Census Tract.
Access	Very good. Located near heavily-traveled road.
Visibility	Good. Located off a moderately traaveled road.

In our opinion, the site is suitable for development.

Neighborhood Description

In our opinion, the subject property has a good to very good location relative to competing properties with respect to neighborhood characteristics.

In our opinion, the subject property has a very good location relative to competing properties with respect to area

Executive Summary

amenities.

Additional Considerations:

Crime	Higher crime rates than market average.
Schools	Higher graduation rates than market average.
Average Commute	Lower than market average.

In our opinion, the neighborhood is suitable for development.

Primary Market Area

We defined the primary market area by generating a 15-minute drive time zone around the subject property. We also considered existing concentrations of multifamily properties and the nearest census tract boundaries in our analysis.

The primary market area includes a population of 108,557 persons and covers a total of 335.7 square miles, making it 20.7 miles across on average.

We estimate that up to 20 percent of demand will come from areas outside of the primary market area.

Demogaphic Characteristics

We anticipate moderate population and household growth for the market area. Renter households are anticipated to increase modestly as well. Finally, we anticipate that rents will grow with CPI over the next few years. Additional details follow:

Population	Market area population currently stands at 108,557 and is projected to grow 1.6 percent this year.
Households	Market area households currently stand at 36,465 and is projected to grow 1.5 percent this year.
Renter Households	Market area renter households currently stand at 6,445 and is projected to grow 0.1 percent this year.
Renter Tenure Rent Growth	Market area renter tenure currently stands at 17.7 percent. Market area rents have grown 2.50% annually since 2010.

Regional Economic Outlook

We anticipate moderate economic growth for the region. Additional details follow:

Est Employment	Regional establishment employment currently stands at 314,799 and is projected to grow 1.9 percent this year.
Civ Employment	Regional civilian employment currently stands at 342,219 and is projected to grow 1.7 percent this year.
Empl by Industry	Regional establishment employment currently stands at 314,799. The data suggests that Retail Trade is the largest employment category accounting for 13.6% of total regional employment. Construction is the second largest category accounting for 10.9% of total employment. State and Local Government is the third largest category accounting for 10.3% of total employment. Health Care and Social Assistance is the fourth largest category accounting for 8.6% of total employment. Professional and Technical Services is the fifth largest category accounting for 8.6% of total employment.
Top Employers	The top employers include: (1) Pw County Dept Human Resources (3500 employees); (2) Invisible Confetti (1800 employees) and; (3) Sentara Northern VA Med Ctr (1143 employees).
Layoffs/Expansions	Major employers are currently hiring; none reported any pending layoffs.

Supply Analysis

Our analysis includes a total of 22 confirmed market area properties consisting of 1,556 units. The occupancy rate for these units currently stands at 99 percent. This rate reflects the occupancy for all confirmed market area units, regardless of project status (stabilized, under construction, proposed, etc.).

The following tables summarize our findings for this market area:

	B ::	11.15	N/	
Project Type	Properties	Units	Vacant	Occupancy

042	Rectory (The) Apartments at t	2	100%	1992	2012	Restricted	Family	7.71

Achievable Rents

In the following table we present our concluded achievable rents and rent advantage for the subject property:

	Achievable Rents								
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Achievable	Proposed	Advantage			
1BR-1.5BA-878sf / 40% of AMI / 40% of AMI	No	No	1	\$827	\$827	0.0%			
2BR-1BA-1018sf / 40% of AMI / 40% of AMI	No	No	5	\$987	\$987	0.0%			
2BR-1BA-1018sf / 50% of AMI / 50% of AMI	No	No	22	\$1,150	\$1,150	0.0%			
2BR-1BA-1018sf / 60% of AMI / 60% of AMI	No	No	19	\$1,150	\$1,150	0.0%			
2BR-2BA-1029sf / 60% of AMI / 60% of AMI	No	No	9	\$1,200	\$1,200	0.0%			
Total / Average			56	\$1,138	\$1,138	0.0%			

Our analysis suggests an average achievable rent of \$1,138 for the subject property. This is compared with an average proposed rent of \$1,138, yielding an achievable rent advantage of 0 percent. Overall, the subject property appears to be priced at or below achievable rents for the area.

NCHMA Demand Analysis

In the following tables we present our concluded demand, capture rate, penetration rate and absorption period estimates for the subject property using the NCHMA demand methodology:

Unit Type / Rent Type / Income Limit	Vac Units at Market Entry	Gross Demand	Vacant & Pipeline Units	Capture Rate Gross	Capture Rate Net	Penetration Rate	Absorption Pd (Mos)
1-Bedroom / Restricted / 40% of AMI	1	155	0	0.6%	0.6%	0.6%	<1
2-Bedroom / Restricted / 40% of AMI	2	107	0	1.9%	1.9%	3.7%	<1
2-Bedroom / Restricted / 50% of AMI	11	258	1	4.3%	4.3%	15.5%	3
2-Bedroom / Restricted / 60% of AMI	14	655	3	2.1%	2.1%	55.1%	2
	Project-Wide Gross Capture Rate Project-Wide Net Capture Rate Project-Wide Penetration Rate Stabilized Occupancy Project-Wide Absorption Period			2.4% 2.4% 35.3% 97% 3 mos			

In our opinion, the estimated project-level capture rate suggests an appropriate number of units for the subject property. The unit level capture rates suggest an appropriate mix of units for the subject property.

In our opinion, the estimated project-level penetration rate suggest an appropriate number of units for the subject property. The unit-level penetration rates suggest an appropriate mix of units for the subject property.

Our analysis suggests that the subject property will stabilize at 97 percent occupancy. We estimate 3 months of absorption and an average absorption rate of 9.9 units per month for this project. In our opinion, the absorption period suggests an appropriate number and mix of units for the subject property.

It is important to note that this analysis does not account for pent-up demand, pre-leasing efforts or rent concessions. In our opinion, an effective pre-leasing effort could result in a month-for-month reduction in the estimated absorption period for this project. In addition, any concessions or rent subsidies not accounted for already in this analysis could cut capture rates and absorption periods significantly.

VHDA Demand Analysis

In the following table we present our concluded capture rate and absorption period estimates for the subject property using the VHDA demand methodology:

Project-Wide Capture Rate - LIHTC Units	13.4%
Project-Wide Capture Rate - Market Units	0.0%
Project-Wide Capture Rate - All Units	13.4%
Project-Wide Absorption Period (Months)	3 mos

Conclusion

In conclusion, the subject property appears to be feasible from a market standpoint. The units appear to be priced appropriately and we anticipate a rapid lease-up after construction.

Because of the demonstrated depth of demand in this area, we do not believe the construction of this property will have an adverse impact on existing projects in the market area.

PROJECT OVERVIEW

Project Description

The subject property, known as Steeplechase Manor (fka as Hunt Country Manor Apartments), is an existing affordable multifamily development located at 361 Roebling Street in Warrenton, Fauquier County, Virginia (PIN 6984-28-3495, 2318, 2237, 3392 & 3291). The subject property consists of 56 revenue-producing units originally constructed in 1955 and renovated in 1999 with tax-exempt bonds. The sponsor has proposed to renovate the property with an allocation of tax credits. The subject property is an open age community.

Select project details are summarized below:

Project Description	on
Property Name	Steeplechase Manor
Street Number	361
Street Name	Roebling
Street Type	Street
City	Warrenton
County	Fauquier County
State	Virginia
Zip	20186
Units	56
Year Built	1964
Project Rent	Restricted
Project Type	Family
Project Status	Prop Rehab
Financing Type	Tax Credit

Scope of Renovation

The subject property is currently in fair condition. The sponsor has proposed to rehabilitate the subject property to bring it up to "like new" condition using tax credit financing. The contemplated rehabilitation scope includes roof, parking lot, landscape, appliance, cabinet, HVAC and tile repairs and/or replacement. Tenants will be temporarily displaced as renovation progresses for this property.

Construction and Lease-Up Schedule

We anticipate a 12-month construction period for this project. Assuming a September 1, 2019 closing, this yields a date of completion of September 1, 2020. Our demand analysis (found later in this report) suggests a 3-month absorption period. This yields a date of stabilization of December 1, 2020.

Unit Configuration

The subject property currently consists of 56 revenue-producing units including 1 and 2-bedroom garden apartments. A total of 56 units are currently income restricted to 60% of AMI; no units are currently set aside as market rate units; no units currently benefit from project-based rental assistance. The subject property currently stands at 96% occupancy.

	Current Unit Configuration									
			Unit	Income	Rent	HOME	Subs	Total	Gross	Net

The income limits found above were based (in part) on HUD's published median household income for the area. The table below shows how this statistic has increased/decreased over the past several years:

Hist	Historical Median Income								
Year	\$	Change							
2008	\$99,000	4.8%							
2009	\$102,700	3.7%							
2010	\$103,500	0.8%							
2011	\$106,100	2.5%							
2012	\$107,500	1.3%							
2013	\$107,300	-0.2%							
2014	\$107,000	-0.3%							
2015	\$109,200	2.1%							
2016	\$108,600	-0.5%							
2017	\$110,300	1.6%							
2018	\$117,200	6.3%							
	Source: HUD								

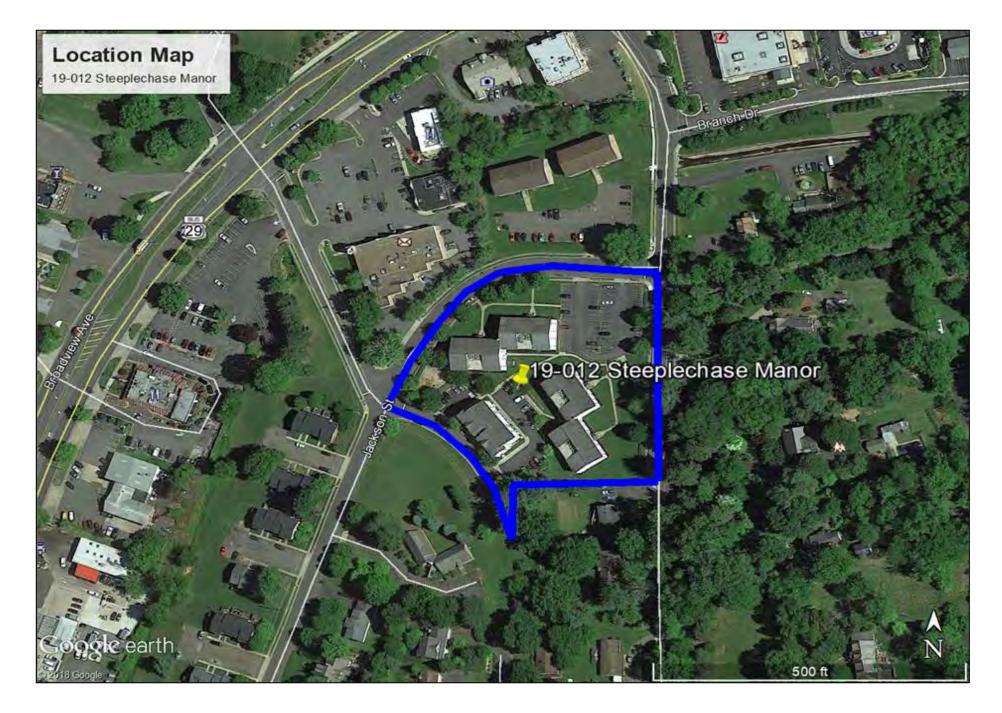

The subject property is operated subject to certain rent restrictions. The following table gives the maximum housing expense (net rent limit + tenant-paid utilities) for this area:

	Maximum Housing Expense									
Unit Type	30% of AMI	40% of AMI	50% of AMI	60% of AMI	70% of AMI	80% of AMI				
0 Bedroom	\$615	\$821	\$1,026	\$1,231	\$1,436	\$1,642				
1 Bedroom	\$659	\$879	\$1,099	\$1,319	\$1,539	\$1,759				
2 Bedroom	\$791	\$1,055	\$1,318	\$1,582	\$1,846	\$2,110				
3 Bedroom	\$914	\$1,219	\$1,523	\$1,828	\$2,133	\$2,438				
4 Bedroom	\$1,020	\$1,360	\$1,700	\$2,040	\$2,380	\$2,720				
			Source: HUD							

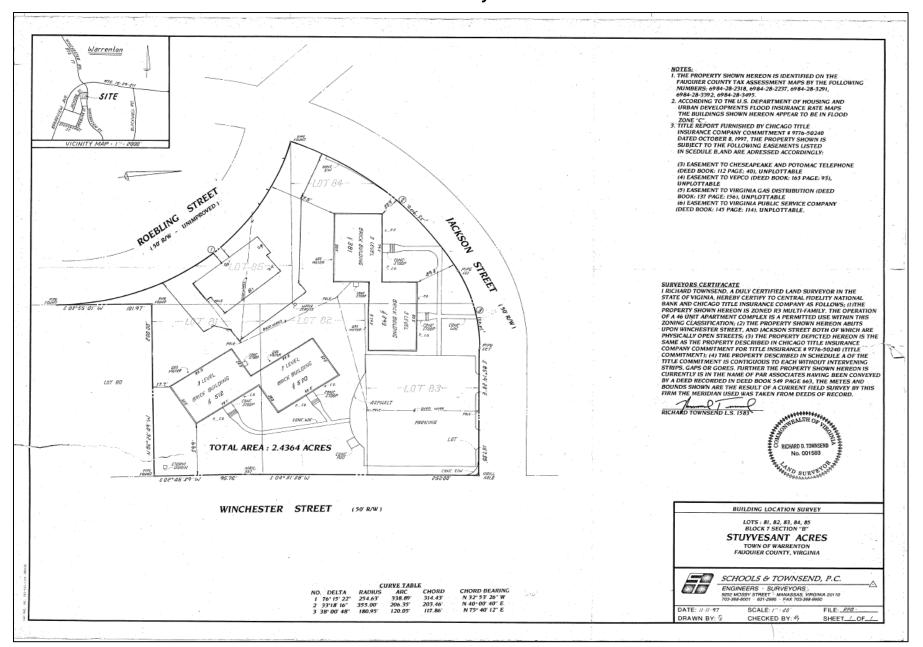

The following table sets forth the gross fair market rents (net fair market rents + tenant-paid utilities) that would apply to any Section 8 voucher recipients or any units benefiting from HOME financing at the subject property:

Fair Market Rents								
Unit Type		Gross Rent						
0 Bedroom		\$1,170						
1 Bedroom		\$1,230						
2 Bedroom		\$1,420						
3 Bedroom		\$1,870

Survey

IMPROVEMENT DESCRIPTION & ANALYSIS

Our improvement analysis includes an evaluation of the following factors with respect to the subject property: (1) Building Features; (2) Unit Features; (3) Project Amenities, (4) Utility Configuration; and (5) Useful Life Analysis.

Building Features

The subject property currently consists of 56 revenue-producing units in 5 residential buildings and 0 non-residential buildings. The development currently includes approximately 56,967 square feet of net rentable area and 60,160 square feet of gross building area.

Additional information regarding the subject property's major building systems is found below.

Foundation - Concrete Slab, Basements, Crawl Spaces, etc. The subject property includes slab on grade foundations.

Structural Frame - Floor, Wall, Roof Structural Systems, etc.

The subject property is constructed with wood frame surfaced with plywood. Floor/ceiling assemblies consist of wood joists & plywood or concrete subfloors. Roof assmeblies consist of wood trusses & plywood sheathing.

Exterior Wall - Exterior Finishes, Doors, Windows, Exterior Stairs, etc.

The subject currently includes brick veneer, double hung vinyl double pane windows, and steel clad insulated sixpanel unit entry doors. The sponsor proposes to replace the siding, windows and exterior doors as part of the planned renovation.

<u>Roof - Sheathing, Coverings, Warranties, Gutters & Downspouts, Soffit & Fascia, etc.</u> The subject includes gabled asphalt shingle roofs. The sponsor proposes to replace the roofs as part of the planned renovation.

<u>Vertical Transportation - Elevator, Interior Stair Systems</u> None.

Plumbing - Sanitary, Storm, Sewer, Fixtures, Domestic Hot Water

Domestic water piping is constructed of CPVC pipe and fittings. Wastewater lines consist of PVC pipe and fittings. Potable hot water is supplied via individual electric hot water heaters. The sponsor proposes to replace the water heaters as part of the planned renovation.

HVAC - Heating, Air Conditioning, Ventilation

The subject property currently includes individual interior-mounted electric heat, individual exterior-mounted a/c compressors with interior-mounted air handlers. New HVAC systems are proposed as part of the planned renovation.

Electrical and Communications - Distribution, Aluminum Wiring, etc.

Buildings receive electrical power from exterior pad-mounted transformers. Electrical service to units consists of 120/240V AC with 100 amps available for each panel. Electrical wiring is made of copper. Properly grounded, three-prong outlets are found in each dwelling unit. The outlets located in the wet areas are Ground Fault Circuit Interrupter (GFCI) outlets. Surface-mounted flourescent & LED fixtures are proposed after renovation.

Fire Suppression

The subject property is not currently equipped with an NFPA-13 fully automatic fire suppression (sprinkler) system. However, hard-wired smoke detectors with battery backup are found in each bedroom area. The sponsor proposes to replace the smoke detectors as part of the planned renovation.

Unit Features

The subject property currently contains 56 revenue-producing units including 53 regular units and 3 accessible units including 111 bedrooms, 66 full bathrooms and 0 half bathrooms.

The subject property is proposed to contain 56 revenue-producing units including 50 regular units and 6 accessible units, including 111 bedrooms, 65 full bathrooms and 1 half bathrooms.

Additional information regarding the subject property's unit features is found below.

Walls / Ceilings / Interior Doors

Subject property units include 8 foot ceilings, painted gypsum wallboard & ceilings, wood solid-core flat panel interior doors and wood solid-core flat panel or louvered bi-fold closet doors. The sponsor proposes to replace the interior doors as part of the planned renovation. Wood solid-core flat panel closet doors are planned post renovation.

Floor Covering

Floor covering currently consists of woor parquet in the entryways, kitchens, living areas & bedrooms along with ceramic tile in the bathrooms. Some units include wall-to-wall carpeting in the living areas and bedrooms. The sponsor proposes to replace the flooring as part of the planned renovation.

Kitchens

Kitchens currently include electric or gas four-top ranges, range hoods, frost-free refrigerators, disposals, wood cabinets, laminated countertops and stainless steel sinks. The sponsor proposes to replace the appliances, cabinets and countertops as part of the planned renovation.

Bathrooms

Bathrooms currently include porcelain sinks & toilets, along with enamel coated cast iron tubs and ceramic tile surrounds. The bathrooms also include exhaust fans and other accessories. The sponsor proposes to repair or replace these components as needed as part of the planned renovation.

Project Amenities

A discussion of the development's project amenities is found below.

Site & Common Area Amenities

A community center, playground, and sports court are currently found at the subject property.

Parking

Open parking is found at the subject property.

Laundry

Central laundry facilities are currently found at the subject property.

Security 5 1

No security amenities are currently found at the subject property.

Services

No additional services are currently found at the subject property.

Tables comparing the subject property's amenities to that of the most comparable properties are found at the end of this section.

Utility Configuration

The subject property currently includes electric heat. Some units include gas hot water (paid by the owner) others include electric hot water (paid by the resident). For purposes of this analysis, we assume that all units will include electric hot water. Consequently, we assume that all utilities - with the exception of cold water, sewer and trash - are currently paid by the resident.

In the table that follows we compare the subject's proposed utility allowances (also known as tenant paid utilities) to the estimated allowances using the HUD Utility Schedule Model:

	Utility Allowances									
BR	BA	SF	Unit Type	Inc Lmt	Rnt Lmt	HOME	Subs	Units	UA	HUD UA
1	1.5	878	Garden/Flat	40% of AMI	40% of AMI	No	No	1	\$52	\$52
2	1.0	1,018	Garden/Flat	40% of AMI	40% of AMI	No	No	5	\$68	\$68
2	1.0	1,018	Garden/Flat	50% of AMI	50% of AMI	No	No	22	\$68	\$68
2	1.0	1,018	Garden/Flat	60% of AMI	60% of AMI	No	No	19	\$68	\$68
2	2.0	1,029	Garden/Flat	60% of AMI	60% of AMI	No	No	9	\$68	\$68
Total/Ave	rage							56	\$68	\$68

The HUD utility allowances are a good measure of the energy costs for a given property. Our analysis suggests that the proposed utility allowances are equivalent to those established using the HUD model.

Tables comparing the subject property's utility configuration to that of the most comparable properties are found at the end of this section. Outputs from the HUD Utility Schedule Model are also found there.

Useful Life Analysis

The subject property was originally constructed in 1964 and is currently in fair condition. In our opinion, the subject has a remaining useful life & remaining economic life of 20 years in its current condition. Assuming the scope of work described above, we anticipate a remaining useful life & remaining economic life of 50 years after renovation. Finally, we estimate a post-renovation effective age of 10 years for this project.

In the course of completing this study, we rated the condition of the subject property and the most comparable properties on a 1-5 scale (1 being the worst and 5 being the best). We also evaluated the actual and effective ages of the subject and select comparables. A table summarizing our findings is found below:

	Actual Age Effective Age Condition

SITE DESCRIPTION & ANALYSIS

Our assessment of the site included an evaluation of the following factors with respect to the subject property: (1) Survey; (2) Site Plan; (3) Nuisances, Hazards, Detrimental Influences & Environmental; (4) Topography; (5) Flood Zone; (6) Difficult to Develop Area Status; (7) Qualified Census Tract Status; and (8) Traffic Patterns, Access & Visibility.

Survey

A survey for the subject property was not provided to the analyst for review. Current surveys should be evaluated to ascertain whether there are any easements encumbering the subject property.

Site Plan

A site plan for the subject property was not provided to the analyst for review. Site plans are necessary to analyze the site improvements, parking configuration, internal traffic flow, location of building improvements and landscaping improvements for the subject property. The developer did provide us with a description of the development's site features. A summary of these features is found below.

Acres / Lot Shape / Frontage

The subject property includes an irregular-shaped parcel consisting of approximately 2.436 acres and approximately 1000 feet of road frontage.

Zoning

According to the sponsor, the subject property is currently zoned R3 Multifamily. It is our understanding that the current zoning for the subject is a legal, conforming use.

Parking / Streets / Curbs / Sidewalks

A total of 94 parking spaces are planned for this development (87 regular / 7 accessible / 1.68 spaces per unit). Privately-owned parking areas are planned for the subject property. We normally see 1.5 to 2.0 spaces per unit for projects like the subject. Public transportation is found in the area. In our opinion, the current parking appears adequate for the subject property.

Dumpsters / Dumpster Enclosures

The subject includes 2 publicly-owned dumpsters along with 2 privately-owned wood enclosures.

Landscaping / Perimeter Fence / Retaining Walls / Entry Sign

Trees, shrubs & lawns are found at the subject property. A perimeter fence is not found at the subject property. Retaining walls are not found at this property. One unlighted entry sign is found at this property.

Stormwater Management / Site Lighting / Water Service / Wastewater Service

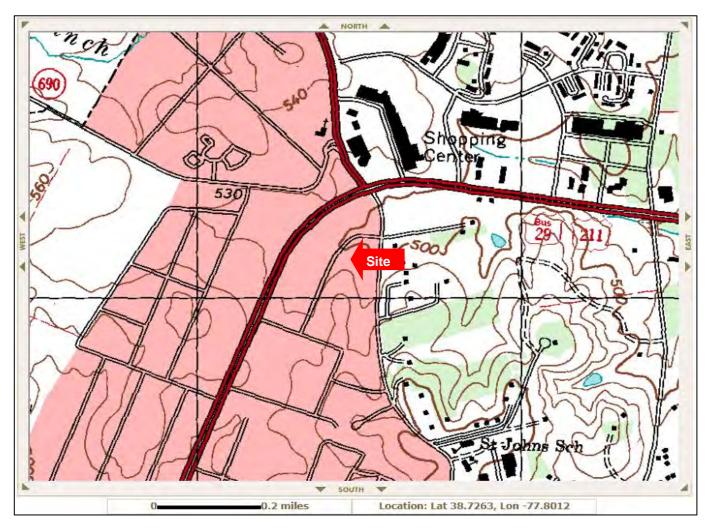

Stormwater management consists of catch basins and concrete pipe connecting to a public system. Site lighting consists of publicly-owned HID poles. Domestic water service to buildings consists of ductile iron pipe connecting to a public system. Wastewater service to buildings consists of PVC pipe connecting to a public system.

Nuisances, Hazards, Detrimental Influences & Environmental

We did not observe any nuisances, hazards, detrimental influences or recognized environmental conditions on our inspection of the subject property. The subject property was originally constructed in 1964, prior to the 1978 ban on lead and asbestos containing construction materials. Consequently, we recommend that the sponsor obtain a comprehensive environmental assessment from a qualified professional.

Topography

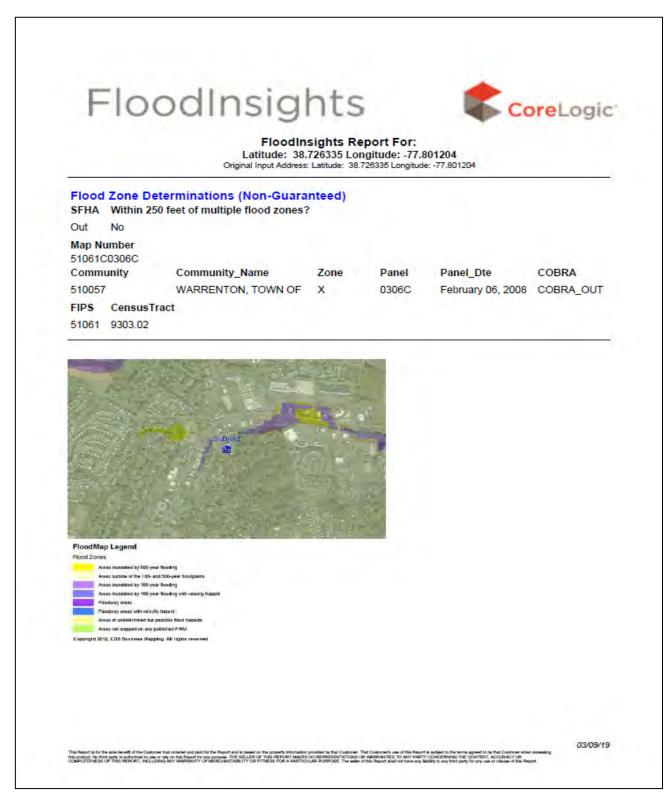

The USGS map showing the topography of the subject property and surrounding area is found below:

The topographic map shows that the site is flat and drains to adjacent properties to the north and east. In our opinion, there do not appear to be any topographic issues with respect to the subject property.

Flood Zone

The map showing the location of the subject property relative to nearby areas prone to flooding (identified in purple) is found below:

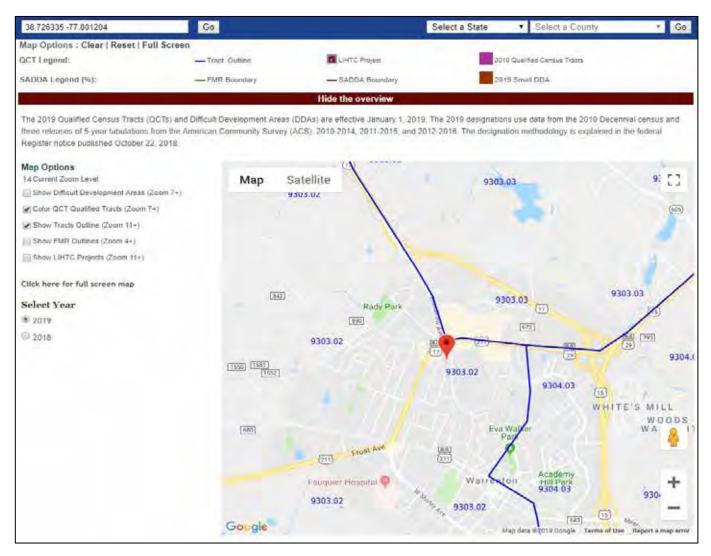

According to FEMA map number 51061C0306C dated February 06, 2008, the subject property is located in Zone X. This is an area that is identified as being located outside the 100-year flood zone.

Difficult to Develop Area Status

The subject proprterty is located in Fauquier County, Virginia - an area that is not designated as a Difficult to Develop Area. Consequently, the subject property does not appear to qualify for special DDA funding under state and federal programs.

Qualified Census Tract Status

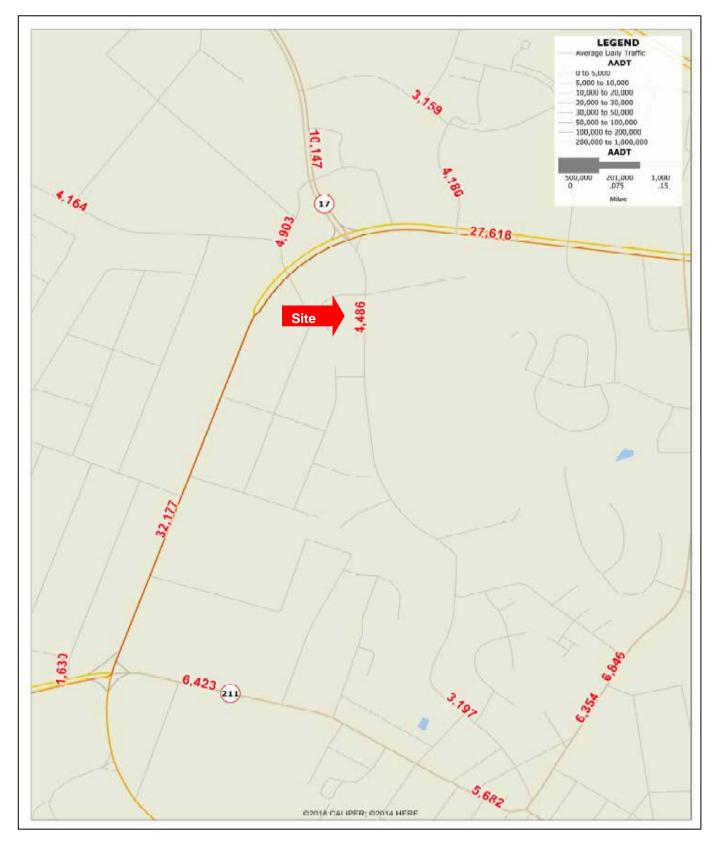

The federal government has identified census tracts throughout the United States that include high concentrations of low-income households and substandard housing units. These areas, known as Qualified Census Tracts, qualify for special funding under various state and federal programs. A QCT map showing the location of the subject property is found below:

The subject property is located in Census Tract 9303.02 - an area that is not designated as a Qualified Census Tract. Consequently, the subject property does not appear to qualify for special QCT funding under state and federal programs.

Traffic Patterns, Access & Visibility

A traffic map identifying the subject property is found below:

Access

The subject property is located on Roebling Street, approximately 1 block south of US Highway 211 in Warrenton, Virginia. US Highway 211 is a heavily-traveled road carrying approximately 30,000 vehicles per day. We did not observe any road or infrastructure improvements taking place in the immediate vicinity of the subject property. In our opinion, therefore, accessibility is very good by virtue of the location of the subject property relative to existing streets and thoroughfares.

Visibility

The subject property is visible from Roebling Street with significant frontage and a modest volume of drive-by traffic. Consequently, in our opinion visibility is good by virtue of the exposure of the subject property to existing drive-by traffic volumes.

In the course of completing this study, we rated the access and visibility for the subject property and the most comparable properties on a 1-5 scale (1 being the worst and 5 being the best). A table summarizing our findings is found below:

	Access & Vis	ibility			
	Rating			Ra	ank
Key	Project Name	Access	Visibility	Access	Visibility

NEIGHBORHOOD DESCRIPTION & ANALYSIS

Neighborhood

Our assessment of the neighborhood includes an evaluation of the following factors with respect to the subject property: (1) Life Cycle; (2) Surrounding Properties; (3) Economic Characteristics; (4) Crime Rates; (5) Educational Attainment; and (6) Commuting Patterns.

Life Cycle

Neighborhoods are sometimes thought to evolve through four distinct stages:

- Growth A period during which the area gains public favor and acceptance.
- Stability A period of equilibrium without marked gains or loses.
- Decline A period of diminishing demand.
- Revitalization A period of renewal, redevelopment, modernization, and increasing demand.

Based on our evaluation of the neighborhood, the subject property is located in an area that appears to be in the stability stage of its life cycle. Modest population growth is anticipated for the next several years.

Surrounding Properties

The subject property is located in Warrenton, Virginia. The immediate area consists of residential land uses.

Multifamily in good condition is located to the north and south of the subject property; a church in good condition is located to the south; commercial in good to very good condition is located to the east and west of the subject property. Neighboring land uses appear to be complimentary to the use of the subject property. The condition of the neighboring properties appears to be complimentary as well.

Surrounding property uses are summarized in the table found below:

	Surrounding Properties	
Direction	Use	Condition
North	Multifamily	Good
South	Multifamily/Church	Good
East	Commercial	Good
West	Commercial	Very Good
	Source: Allen & Associates	

Source: Allen & Associates

Economic Characteristics

The subject property is located in an area with average household incomes of \$74,759 (in 2015 dollars); this is compared with \$72,215 for the most comparable properties included in this analysis.

In addition, the subject property is located in an area with median cash rents of \$1,134 (in 2015 dollars); this is compared with \$1,171 for the most comparable properties included in this analysis.

Finally, the subject property is located in an area with median single family home values of \$328,900 (in 2015 dollars); this is compared with \$325,793 for the most comparable properties included in this analysis.

Crime Rates

The subject property is located in an area with personal crime rates of 2.3%. Personal crime includes offenses such as rape, murder, robbery and assault. Our research suggests that the average personal crime rate for the most comparable properties stands at 1.8%.

In addition, the subject property is located in an area with property crime rates of 18.6%. Property crimes include offenses such as burglary, larceny and theft. Our research suggests that the average property crime rate for the most

comparable properties stands at 6.3%.

Please note: The crime statistics included in this analysis are historical area-wide figures. These statistics make no consideration for changing demographics or the implementation of an affirmative crime prevention program at the subject property.

Educational Attainment

The subject property is located in an area with high school graduation rates of 94.2%; this is compared with 90.8% for the most comparable properties included in this analysis.

In addition, the subject property is located in an area with college graduation rates of 40.9%; this is compared with 34.1% for the most comparable properties included in this analysis.

Commuting Patterns

The subject property is located in an area with an average drive to work of 31.1 minutes; this is compared with 38.4 minutes for the most comparable properties included in this analysis.

In addition, the subject property is located in an area with an average of 1.54 vehicles per household; this is compared with 1.83 vehicles per household for the most comparable properties included in this analysis.

Conclusion

In our opinion, the subject property has a good to very good location relative to competing properties with respect to neighborhood characteristics.

Proximity to Area Amenities

Our assessment included an evaluation of the proximity of various amenities to the subject and the most comparable properties. We looked at the following amenities in our analysis: (1) Banks; (2) Grocery; (3) Emergency Clinics; (4) Pharmacies; and (5) Discount Stores.

A listing of some of the area amenities is found below. An amenity map is found in the following pages:

	Proximity to Area Amenities	
Amenity	Name	Miles
Bank	BB&T	0.1 mi NE
Grocery	Safeway	0.4 mi NE
Emergency Clinic	Warrenton Urgent Care	0.5 mi NE
Pharmacy	Walgreens Pharmacy	0.1 mi NE
Discount Store	Peebles	0.1 mi NE
Elementary School	C M Bradley Elementary School	0.6 mi N
Middle School	Warrenton Middle School	0.7 mi S
High School	Fauquier High School	0.8 mi SW
Bus Stop	Circuit Rider	0.1 mi N
	Source: Google Maps	

BB&T, Safeway, Walgreens, and Peebles are all located less than 0.5 miles away from the subject property. Warrenton Urgent Care is located 0.5 miles away.

Number of Area Amenities

We utilized Microsoft Streets & Trips to evaluate the subject and the most comparable properties with respect to the number of amenities in the immediate area.

- Microsoft Streets & Trips identified 15 banks within 2.0 miles of the subject property. The subject is ranked 1 out of the 15 properties included in this analysis.
- A total of 10 grocery stores are in the vicinity of the subject property. The subject is ranked 1 for the area.
- A total of 2 hospital are in the vicinity of the subject property. The subject is ranked 1 for the area.
- A total of 8 pharmacies are in the vicinity of the subject property. The subject is ranked 3 for the area.
- A total of 41 shopping centers are in the vicinity of the subject property. The subject is ranked 3 for the area.

Nearest Area Amenities

We utilized Microsoft Streets & Trips to evaluate the subject and the most comparable properties with respect to the nearest area amenities.

- According to Microsoft Streets & Trips, the nearest bank is 0.16 miles away from the subject property. The subject is ranked 5 out of the 15 properties included in this analysis.
- The nearest grocery store is 0.16 miles away from the subject property. The subject is ranked 7 for the area.
- The nearest hospital is 0.97 miles away from the subject property. The subject is ranked 3 for the area.
- The nearest pharmacy is 0.16 miles away from the subject property. The subject is ranked 5 for the area.
- The nearest shopping center is 0.11 miles away from the subject property. The subject is ranked 5 for the area.

Conclusion

In our opinion, the subject property has a very good location relative to competing properties with respect to area amenities.

Tables comparing the subject property's proximity to area amenities to that of the most comparable properties is found on the next page. Maps showing the proximity of the subject property to area amenities and area employers is also found in the following pages.

In the course of completing this study, we rated the neighborhood and the proximity to area amenities for the subject property and the most comparable properties on a 1-5 scale (1 being the worst and 5 being the best). The tables on the following pages give these ratings.

MARKET AREA

Overview

Market areas are influenced by a variety of interrelated factors. These factors include site location, economic, and demographic characteristics (tenure, income, rent levels, etc.), local transportation patterns, physical boundaries (rivers, streams, topography, etc.), census geographies, and the location of comparable and/or potentially competing communities.

In areas where the county seat is the largest city, centrally located, and draws from the entire county, the county may be the market area. In the case where there are potentially competing communities in one county, the market area may be part of the county. In fact, the market area could include portions of adjacent counties. In this case, a combination of county subdivisions may be used to define the market area. In urban or suburban areas, the market area will be adjacent to the site extending to all locations of similar character with residents or potential residents likely to be interested in the project. In this case, county subdivisions, townships, or a combination of census tracts may be used to define the market area.

Allen & Associates recently conducted a series of property management interviews to better understand market areas and resident moving patterns for multifamily properties. Our study suggested that markets may be classified into the following general categories: urban, suburban and rural. Renters in urban markets are typically willing to move 5 to 10 minutes when looking for a new apartment. Our research also shows that renters in suburban markets are normally willing to move 10 to 15 minutes when looking for a new place to live. Renters in rural markets are typically willing to move 15 to 20 minutes when looking for a new apartment. We considered these general guidelines in our evaluation of the subject property.

Our study suggested that secondary market areas were generally a function of whether the proposed development was family or elderly. Our research suggested that secondary market demand for family properties ranged from 10 to 30 percent. Secondary market demand for elderly properties ranged from 10 to 50 percent. Although seniors move less frequently than younger renters, they are often willing to move longer distances when looking for housing. We considered these general secondary market guidelines in our evaluation of the subject property.

Our primary and secondary market area definitions are found below.

Primary Market Area

We defined the primary market area by generating a 15-minute drive time zone around the subject property. We also considered existing concentrations of multifamily properties and the nearest census tract boundaries in our analysis.

Primary market area, drive time and existing multifamily maps are found in the following pages. The primary market area included all or part of the following census tracts:

51153901510	Prince William County	Virginia

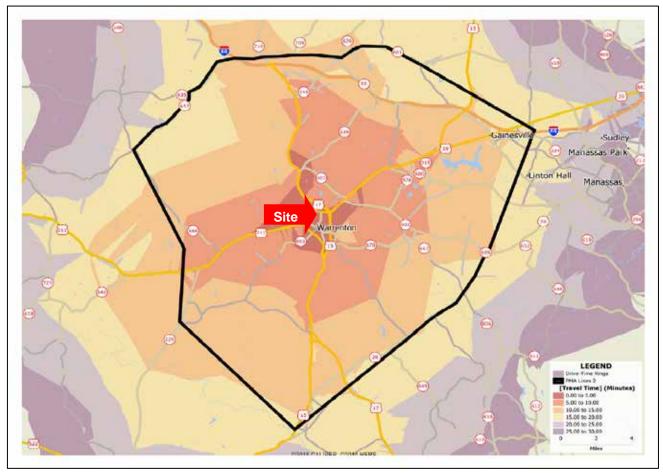

The primary market area includes a population of 108,557 persons and covers a total of 335.7 square miles, making it 20.7 miles across on average.

Secondary Market Area

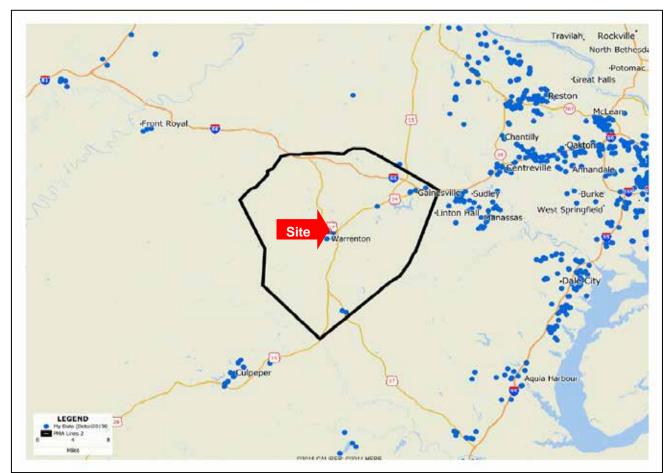

We estimate that up to 20 percent of demand will come from areas outside of the primary market area.

Professional And Technical Services Employment	27,042	8.6%	6.9%
Management Of Companies And Enterprises Employment	2,001	0.6%	1.3%
Administrative And Waste Services Employment	19,715	6.3%	6.0%
Educational Services Employment	5,689	1.8%	2.4%
Health Care And Social Assistance Employment	27,126	8.6%	11.6%
Arts, Entertainment, And Recreation Employment	6,927	2.2%	2.2%
Accommodation And Food Services Employment	23,198	7.4%	7.5%
Other Services, Except Public Administration Employment	21,438	6.8%	5.8%
Federal Civilian Government Employment	8,326	2.6%	1.4%
Federal Military Employment	9,269	2.9%	0.9%
State And Local Government Employment	32,486	10.3%	9.8%
Establishment Employment	314,799	100.0%	100.0%

Source: W&P Economics

Regional establishment employment currently stands at 314,799. The data suggests that Retail Trade is the largest employment category accounting for 13.6% of total regional employment. Construction is the second largest category accounting for 10.9% of total employment. State and Local Government is the third largest category accounting for 10.3% of total employment. Health Care and Social Assistance is the fourth largest category accounting for 8.6% of total employment. Professional and Technical Services is the fifth largest category accounting for 8.6% of total employment.

Economists generally classify employment two ways: basic and non-basic. Basic employment, which is considered to be the engine of a local economy, includes industries that rely on external factors to fuel demand. For instance, mining, logging and manufacturers are frequently considered basic employers. Goods for these industries are shipped outside the location where they are produced. Non-basic employers depend largely on local demand and usually employ local workers. For example, grocery stores and restaurants are sometimes considered non-basic employers.

The Location Quotient (LQ) technique is the most common method of identifying basic industries for a given economy. The LQ technique compares the share of workers in each industry of a given economy with that of a larger reference economy. If the number of workers in the given economy is greater than that of the reference economy, these are considered to be basic industries because they fill needs beyond those of the reference community.

In the table above we highlight the basic industries for the region. The distribution of employment in these industries exceeds that for the United States. These basic industries represent about 217,272 employees or about 69.0% of total regional employment. These are the industries that drive the regional economy.

Earnings by Industry

The Bureau of Labor Statistics (BLS) tracks average earnings by major industry. In the table below we present the current breakdown and rank. The data set comes from the Bureau of Labor Statistics (BLS) via Woods & Pool Economics.

Average Earnings (2009 \$)				
Industry	Earnings	Rank		
Farm Employment	\$3,294	23		
Forestry, Fishing, Related Activities And Other Employment	\$26,411	18		
Mining Employment	\$30,224	15		
Utilities Employment	\$122,676	1		
Construction Employment	\$53,077	9		
Manufacturing Employment	\$67,408	6		
Wholesale Trade Employment	\$72,973	5		
Retail Trade Employment	\$26,891	17		
Transportation And Warehousing Employment	\$34,519	13		
Information Employment	\$51,555	10		
Finance And Insurance Employment	\$39,353	12		
Real Estate And Rental And Lease Employment	\$20,159	20		
Professional And Technical Services Employment	\$66,395	7		
Management Of Companies And Enterprises Employment	\$89,349	3		
Administrative And Waste Services Employment	\$30,131	16		
Educational Services Employment	\$24,084	19		
Health Care And Social Assistance Employment	\$48,545	11		
Arts, Entertainment, And Recreation Employment	\$17,692	22		
Accommodation And Food Services Employment	\$19,963	21		
Other Services, Except Public Administration Employment	\$31,341	14		
Federal Civilian Government Employment	\$117,674	2		
Federal Military Employment	\$88,447	4		
State And Local Government Employment	\$65,566	8		
Establishment Employment	\$45,725	$>\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!$		

Source: W&P Economics

The data suggests that Utilities is the highest paid industry averaging \$122,676 per employee. Federal Civilian Government is the second highest paid industry averaging \$117,674 per employee. Management of Companies is the third highest paid profession averaging \$89,349 per employee. Federal Military is the fourth highest paid industry averaging \$88,447 per employee. Wholesale trade is the fifth highest paid category averaging \$72,973 per employee. These figures are compared with regional Average Earnings of \$45,725 per employee.

The highlighted industries represent basic industries for the region. Average earnings for these basic industries comes to \$51,737 or 13.1% higher than average for the region.

Top Employers

The table below gives a listing of the region's top employers. The data comes from InfoUSA and includes a primary industry description for each employer.

		Top Employers		
Name	Employees	SIC Code	Industry Description	Location Type
Pw County Dept Human Resources	3,500	9121-03	Government Offices-County	-

Population increased from 571,421 in 2010 to 653,356 in 2018 and is anticipated to increase to 711,300 in 2023.

Establishment Employment

In this section we present establishment employment data for the region. The table and graph below show historic data since 2010 along with a forecast through 2023. The historic data comes from the Bureau of Labor Statistics (BLS); the forecast comes from Woods & Pool Economics.

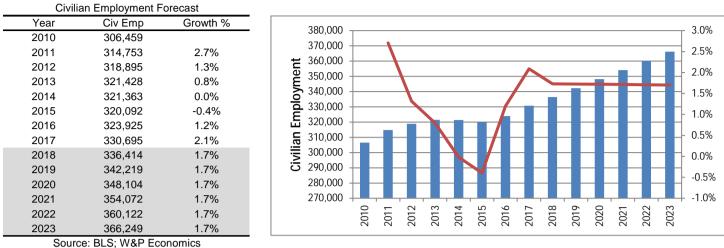

Source: BLS; W&P Economics

Establishment employment increased from 248,792 in 2010 to 308,965 in 2018 and is anticipated to increase to 337,869 in 2023.

Civilian Employment

In this section we present civilian employment data for the region. The table and graph below show historic data since 2010 along with a forecast through 2023. The historic data comes from the Bureau of Labor Statistics (BLS); the forecast utilizes data from Woods & Pool Economics.

Civilian employment increased from 306,459 in 2010 to 330,695 in 2017 and is anticipated to increase to 366,249 in 2023.

Labor Force and Unemployment

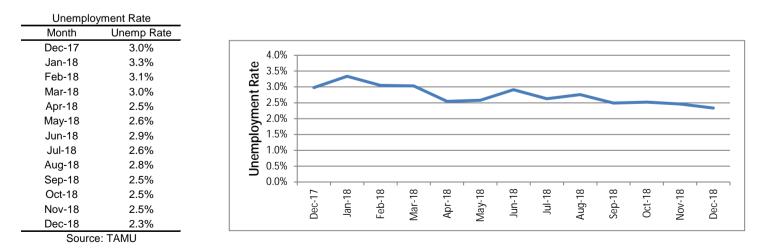

In this section we take a look at the labor force and unemployment. The table below shows civilian employment, unemployment and labor force statistics for the region since 2010. The data set comes from the Bureau of Labor Statistics (BLS) via the Texas A&M Real Estate Center.

	Labor F	orce & Unemplo	oyment	
Year	Civ Emp	Unemp	Lab Force	Unemp Rate
2010	306,459	19,154	287,305	6.3%
2011	314,753	18,011	296,742	5.7%
2012	318,895	16,954	301,941	5.3%
2013	321,428	16,713	304,715	5.2%
2014	321,363	15,705	305,658	4.9%
2015	320,092	13,216	306,876	4.1%
2016	323,925	11,905	312,020	3.7%
2017	330,695	11,247	319,448	3.4%

Source: BLS; Texas A&M Real Estate Center

Unemployment decreased from 19,154 in 2010 to 11,247 in 2017. The unemployment rate decreased from 6.3% in 2010 to 3.4% in 2017.

The table and graph below show the unemployment rate for the region for the past 12 months.

The Unemployment Rate for the Region came in at 3.0% in December 2017 and 2.3% in December 2018.

Building Permits

In this section we look at building permits. The table and graph below show historical data for the region since 2000. The data set comes from the US Census.

		Building Permits		
Year	1 Family	2-4 Family	5+ Family	Total
2000	4,911	5	970	5,886
2001	5,284	12	459	5,755
2002	6,344	14	1,164	7,522
2003	6,712	240	1,463	8,415
2004	7,469	252	568	8,289
2005	7,563	10	404	7,977
2006	4,834	4	389	5,227
2007	3,588	8	20	3,616
2008	2,160	2	250	2,412
2009	1,932	158	212	2,302
2010	1,898	0	490	2,388
2011	1,604	2	294	1,900
2012	1,812	82	528	2,422
2013	2,060	2	808	2,870
2014	1,826	0	17	1,843
2015	2,007	0	396	2,403
2016	1,867	0	732	2,599
2017	2,074	0	435	2,509
	S	ource: US Census	6	

Building permits for the region increased from 5,755 in 2001 to 8,415 in 2003, before decreasing to 1,843 in 2014 and increasing to 2,509 in 2017.

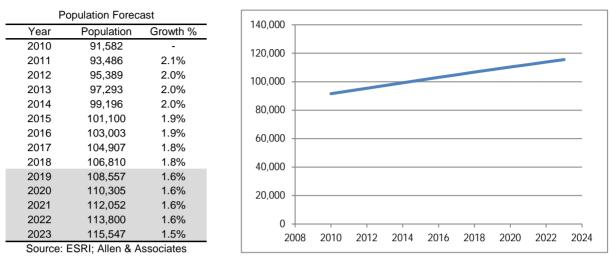

Conclusion

We anticipate moderate economic growth accompanied by modest population growth for the region over the next several years.

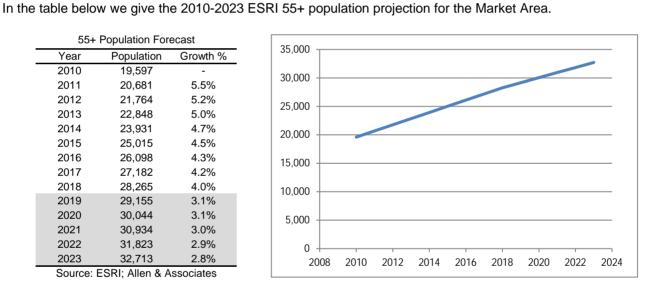

DEMOGRAPHIC CHARACTERISTICS

Overburdened Renter Households

The following tables give overburdened renter household data for the Market Area. The data set comes from the U.S. Census Bureau.

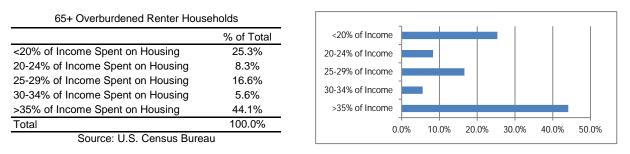

Our research suggests that 25.7 percent of the renter households in this market area are overburdened, paying more than 35 percent of their income towards housing-related costs. Our research also suggests that 34.5 percent of the renter households are overburdened to 30 percent of income.

Source: U.S. Census Bureau

Our research suggests that 39.1 percent of the 55+ renter households in this market area are overburdened, paying more than 35 percent of their income towards housing-related costs. Our research also suggests that 44.5 percent of the 55+ renter households are overburdened to 30 percent of income.

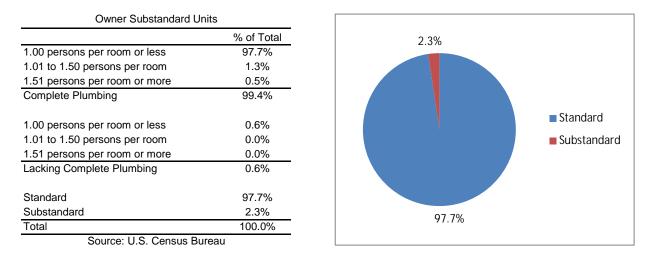

Our research suggests that 44.1 percent of the 65+ renter households in this market area are overburdened, paying more than 35 percent of their income towards housing-related costs. Our research also suggests that 49.7 percent of the 65+ renter households are overburdened to 30 percent of income.

Owner Substandard Units

The U.S. Census Bureau defines substandard housing units as follows: (1) Units without complete plumbing; or (2) Units with 1.00 or more persons per room.

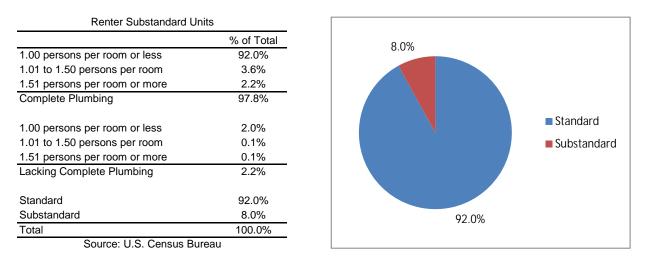

The following tables give owner substandard housing unit data for occupied housing units in the nation, state, region and market area. The data comes from the U.S. Census Bureau:

Our research suggests that 2.3 percent of occupied owner housing units in the market area are substandard.

Renter Substandard Units

The following tables give renter substandard housing unit data for occupied housing units in the nation, state, region and market area. The data comes from the U.S. Census Bureau:

Our research suggests that 8.0 percent of renter owner housing units in the market area are substandard.

Owner Movership

The following tables give owner household movership data for the market area with an estimated breakout by household size. The data comes from the U.S. Census Bureau and the American Housing Survey:

Owner Movership, by Size										
Market Area										
	1 Person	2 Person	3 Person	4 Person	5 Person	6 Person	7+ Person	Total		
Owner to Owner	4.2%	6.6%	8.6%	8.5%	9.2%	10.0%	11.6%	7.1%		
Owner to Renter	4.0%	3.8%	6.8%	6.3%	6.3%	9.5%	14.5%	5.2%

Source: U.S. Census, American Housing Survey; Allen & Associates

Our research suggests an elderly renter movership rate of 8.0 percent.

SUPPLY ANALYSIS

In conducting our analysis, we began by attempting to compile a list of every multifamily property with 10 or more units in the market area. We included conventionally-financed multifamily communities as well as properties financed by the local housing authority and the state housing finance agency in our listing. We even included properties financed by and/or subsidized by USDA and/or HUD. Finally, we included properties that are either proposed or currently under construction. The result was a listing of projects with 10 or more units - whether existing, under construction, or proposed - for this area. Our rental property inventory listing is found in the pages that follow.

A map showing the location of the properties included in the rental property inventory is found in the pages that follow. Properties identified with red pushpins have 100 percent market rate units (market rate properties), properties identified with yellow pushpins have a mixture of market rate / restricted / subsidized units (restricted properties), and properties identified with blue pushpins have 100 percent project-based rental assistance (subsidized properties).

After accounting for any unconfirmed properties and any properties that are located outside the defined market area, we arrived at a list of confirmed market area properties. This was the listing of properties upon which our analysis is based. In our opinion, the properties included on this list give a credible picture of market conditions as of the effective date of this report. This listing is found in the pages that follow.

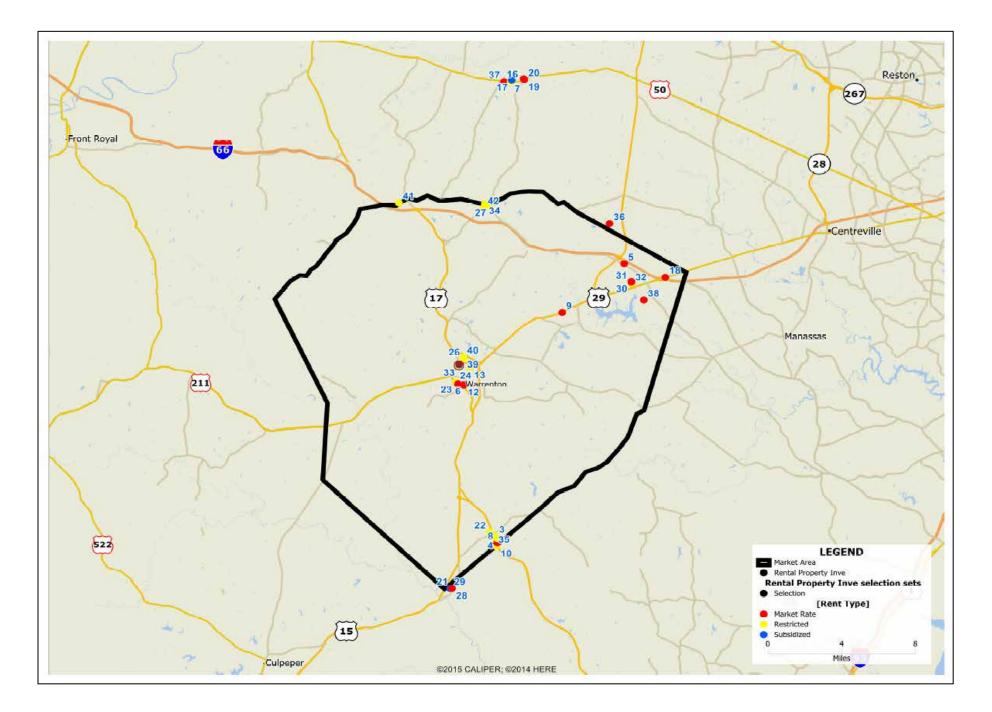

Our next step was to compile a master list of unrestricted market rate rent comparables from the listing of confirmed properties. We eliminated any properties which were either under construction, being renovated, in lease up, or which were unstabilized for one reason or another. We identified market rate properties of similar age and condition to the subject property. If we were unable to identify a sufficient number of market rate comparables in the market area, we included market rate properties from outside the market area. If we were still unable to identify a sufficient number of market rate comparables, we included rent restricted properties - provided, however, that the rents charged at these properties were below statuatory limits and similar to the rents charged at the market rate properties in the market area (suggesting that these rent restricted properties were *de facto* market rate properties).

Finally, we compiled a master list of restricted rent comparables from the listing of confirmed properties. We used the same approach described above for unrestricted market rate properties.

The resulting master lists of rent comparables and accompanying locator maps are found in this section as well. Detailed write-ups for the properties included on these lists are found in the Appendix. We include write-ups for *all* of the rent comparables identified on our master lists, regardless of whether they ended up being selected as one of the *best* rent comparables. We did this for two reasons: (1) To be transparent; and (2) To provide the reader with context regarding our selection process.

The balance of this section includes a breakdown of confirmed market area properties by rent type, project status, year built, and financing source. We also include a rent, unit mix, and amenity summary for confirmed market area properties. Finally, we provide summary of vouchers, concessions, and waiting lists for the properties included in this report.

Our analysis includes a total of 22 confirmed market area properties consisting of 1,556 units. The occupancy rate for these units currently stands at 99 percent. This rate reflects the occupancy for all confirmed market area units, regardless of project status (stabilized, under construction, proposed, etc.).

Confirmed market area properties break down by rent type and tenure as shown in the tables above.

Rental Property Inventory, Confirmed, Inside Market Area

Our survey includes a total of 22 stabilized market area properties consisting of 1,556 units standing at 99 percent occupancy.

Our research suggests that there are no properties in the market area that are not yet stabilized. Unstabilized units (also referred to as pipeline units) include vacant units in lease up, construction, rehabilitation, proposed new construction, and units with proposed renovation plans.

Occupancies of stabilized market area properties broken out by occupancy type (elderly or family) and rent type (subsidized, restricted or market rate) are found below:

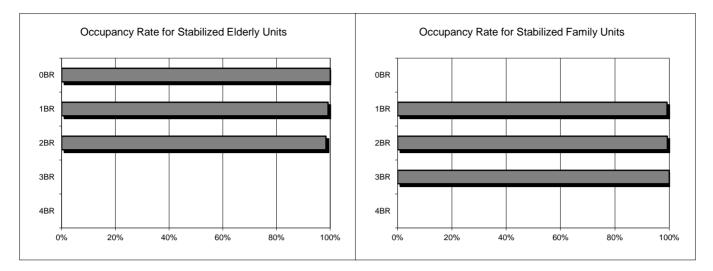

Our research suggests the following occupancy levels for the 387 stabilized elderly units in this market area:

- Subsidized, 100 percent (68 units in survey)
- Restricted, 99 percent (319 units in survey)
- Market Rate, not applicable (0 units in survey)

Our research suggests the following occupancy levels for the 1,169 stabilized family units in this market area:

- Subsidized, 100 percent (31 units in survey)
- Restricted, 99 percent (622 units in survey)
- Market Rate, 100 percent (516 units in survey)

Occupancy rates for stabilized market area properties broken out by occupancy type (elderly or family) and unit type are found below (supporting data is found in the pages that follow):

Our research suggests the following occupancy levels for the 387 stabilized elderly units in this market area:

- 0-Bedroom, 100 percent (16 units in survey)
- 1-Bedroom, 99 percent (246 units in survey)
- 2-Bedroom, 98 percent (125 units in survey)
- 3-Bedroom, not applicable (0 units in survey)
- 4-Bedroom, not applicable (0 units in survey)

Our research suggests the following occupancy levels for the 1,169 stabilized family units in this market area:

- 0-Bedroom, not applicable (0 units in survey)
- 1-Bedroom, 99 percent (256 units in survey)
- 2-Bedroom, 99 percent (710 units in survey)
- 3-Bedroom, 100 percent (203 units in survey)
- 4-Bedroom, not applicable (0 units in survey)

Our research suggests the following unit mix for the 387 confirmed elderly units located in this market area:

- 0-Bedroom, 4 percent (16 units in survey)
- 1-Bedroom, 64 percent (246 units in survey)
- 2-Bedroom, 32 percent (125 units in survey)
- 3-Bedroom, not applicable (0 units in survey)
- 4-Bedroom, not applicable (0 units in survey)

Our research suggests the following unit mix for the 1,169 confirmed family units located in this market area:

- 0-Bedroom, not applicable (0 units in survey)
- 1-Bedroom, 22 percent (256 units in survey)
- 2-Bedroom, 61 percent (710 units in survey)
- 3-Bedroom, 17 percent (203 units in survey)
- 4-Bedroom, not applicable (0 units in survey)

Rental Property Inventory, Confirmed, Inside Market Area, Amenity Summary

In the table found below we present a summary of amenities found at confirmed market area properties:

	Confirmed,	Inside Market Area, Amenity Sur	mary		
Building Type		Air Conditioning			
1 Story	5%	Central	100%		
2-4 Story	95%	Wall Units	0%

Source: Allen & Associates

Our research suggests that 5 percent of confirmed market area properties are 1 story in height, 95 percent are 2-4 stories in height, 0 percent are 5-10 stories in height, and 0 percent are over 10 stories in height. In addition, surveyed properties benefit from the following project amenities: 32 percent have a business/computer center, 50 percent have a community center, 36 percent have a fitness center, 45 percent have a playground, and 18 percent have a sports court.

Our research also suggests that the following unit amenities are present at surveyed properties: 95 percent have blinds, 95 percent have carpeting, 55 percent have patios/balconies, and 9 percent have outside storage. Surveyed properties also include the following kitchen amenities: 100 percent have a stove, 100 percent have a refrigerator, 86 percent have a disposal, 77 percent have a dishwasher, and 27 percent have a microwave.

In addition, 100 percent of confirmed market area properties have central heat while 100 percent have central air. Our research also suggests that 100 percent of surveyed properties have open parking. A total of 50 percent of area properties have central laundry facilities, while 5 percent have washer/dryer hookups, and 59 percent have washer/dryer units in each residential unit.

A total of 27 percent of confirmed market area properties have call buttons, 36 percent have controlled access, and 5 percent have security alarms.

It is also our understanding that the majority of confirmed market area properties provide cable access.

Finally, in the following pages we provide a summary of vouchers, concessions and waiting lists for the confirmed market area properties included in this report. We also include any absorption information we have uncovered as part of our research.

RENT COMPARABILITY ANALYSIS

In this section we develop restricted and unrestricted market rent conclusions for the subject property on an "as if complete & stabilized" basis. Our analysis begins with an evaluation of unrestricted market rents.

Unrestricted Rent Analysis

In this section we develop an unrestricted market rent conclusion for the subject property units. Our analysis began by selecting comparable rentals to use to develop estimates of market rents for the units at the subject property, assuming that the subject was an unrestricted property. Our selection of comparables was based on location, age, condition, unit mix and amenities of the comparable properties relative to the subject property.

Rental Property Inventory, by Unit Type

In the following pages we present an inventory of properties included in this analysis. Rents for these properties, broken out by unit type, were used in selecting the rent comparables used in this analysis.

The properties that we consider to be comparable to the subject property are highlighted in the tables found in the following pages. We attempted to select stabilized market rate properties as comparables for purposes of our rent comparability analysis.

Comparables with restricted rents are used when a sufficient number of market rent comparables are not available and when maximum allowable rents for properties with restricted rents exceed prevailing rents in the area. In the event that program rental rates exceed market rental rates, restricted units are, in fact, *de facto* market rate units.

Rent Comparables, Market Rate, Map

A map showing the location of the properties selected as comparables in this analysis is found in the following pages. Properties identified with red pushpins have market rents, properties identified with yellow pushpins have restricted rents, and properties identified with blue pushpins have subsidized rents. Detailed write-ups for the select rent comparables are found in the Appendix to this report.

Rent Comparability Grids

Our analysis employed the use of rent comparability grids and resulted in an unrestricted market rent estimate for each of the subject's unit types. These grids and a narrative describing our rent adjustments are found in the following pages.

	Ov	erview							Re	nts			
Key Property Name	Built	Renovated	Rent Type	Occ Type	Status	Sub	20%	30%	40%	50%	60%	80%	Mkt

Rent Adjustments

Our analysis included a property management survey and a technique known as "statistical extraction" to help us identify the best adjustments to use. Statistical extraction, which is similar to the matched pair method, helped us derive the optimal adjustments for our particular data set.

Here's a hypothetical example to illustrate how we derived our rent adjustments. Assume that property managers tell us we should expect rent adjustments ranging from \$0.00 to \$0.50 per square foot for a particular market. Next, assume that we select 25 rent comparables with an adjusted sample standard deviation (a statistical measure of variability) of \$100. We employ a square foot rent adjustment of \$0.10 for each comparable resulting in an adjusted sample standard deviation of \$90. This tells us that the assumed adjustment "explained" some of the variability in the data. We repeat this process for adjustments of \$0.20, \$0.30, \$0.40 and \$0.50 which yielded adjusted sample standard deviations of \$80, \$70, \$65 and \$75, respectively. The \$0.40 square foot adjustment "explains" the most variability because any other adjustment yields a higher adjusted sample standard deviation. Consequently, a \$0.40 rent adjustment is the best adjustment for purposes of this example. This is a simplified example because we actually adjusted for numerous variables simultaneously in our analysis.

Many adjustments (bedroom count, bathroom count and square footage) are highly interrelated. Statistical extraction helped us unravel the interrelationships between these variables. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is superior a "plus" adjustment is made. If the subject is inferior a "minus" adjustment is made.

We used the Excel Solver function to help us with our analysis. The Solver function was programmed to minimize the adjusted standard deviation for our data set. We evaluated a total of 62 variables in 22 categories (AC systems, heating systems, technology, bedrooms, bathrooms, square feet, visibility, access, neighborhood, area amenities, condition, effective age, project amenities, elevator, unit amenities, storage, kitchen amenities, parking, laundry, security, on-site management, on-site maintenance) in an effort to identify the mix of adjustments that explained the most variability found in our raw data.

A discussion of our surveyed and concluded adjustments is found below.

Concessions

The first step in our analysis was to account for any concessions at the subject and the comparables. We considered the advertised street rent and concessions being offered and derived a net nent estimate for each comparable. Net rent, defined as advertised street rent minus monthly concessions, represents the cash rent paid by new residents at the various properties. This is the best measure of market value (prior to any other adjustments) for the comparables included in this analysis.

Tenant-Paid Utilities

The next step in our analysis was to account for differences in tenant-paid utilities between the comparable properties and the subject. We used the HUD Utility Schedule Model to derive our adjustments. The HUD model includes a current utility rate survey for the area. In the event that the tenant-paid utilities associated with a particular property are higher or lower than the subject, adjustments were made to account for the differences. Adjustments reflect the difference between the tenant-paid utilities for the comparable property minus that for the subject.

Technology

We accounted for technology (cable and internet access) offered in the rent for each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0 per month for cable; internet access was valued at \$0.

	Technology									
Adjustment Survey Range Concluded										
Cable	\$0	\$50	\$0							
Internet	\$0	\$50	\$0							

Bedrooms

Our analysis also included an adjustment for the number of bedrooms at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$100 per bedroom.

Bedrooms									
Adjustment	Survey Range Concluded								
Bedrooms	\$0	\$200	\$100						

Bathrooms

Our analysis also included an adjustment for the number of bathrooms at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0 per bathroom.

	Bathrooms									
Adjustment	Survey	/ Range	Concluded							
Bathrooms	\$0	\$100	\$0							

Square Feet

Our analysis also included an adjustment for square footage at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.10 per square foot.

Square Feet				
Adjustment	Survey Range Concluded			
Square Feet	\$0.00	\$2.00	\$0.10	

Visibility

We also accounted for differences in visibility at each of the comparables as compared to the subject property in our analysis. Based on our field review, we assigned a visibility rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in visibility ratings between the subject and the comparables.

Visibility				
Adjustment	Survey	/ Range	Concluded	
Rating	\$0	\$100	\$0	

Access

Our analysis also included an adjustment for access at each of the comparables as compared to the subject property. Based on our field review, we assigned an access rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in access ratings between the subject and the comparables.

Access				
Adjustment	Survey	/ Range	Concluded	
Rating	\$0	\$100	\$0	

Neighborhood

We considered differences in neighborhood at each of the comparables as compared to the subject property in our analysis. Based on our field review and our evaluation of local demographic and crime data (presented earlier in this report), we assigned a neighborhood rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in neighborhood ratings between the subject and the comparables.

Neighborhood				
Adjustment	Survey	/ Range	Concluded	
Rating	\$0	\$100	\$0	

Area Amenities

We also accounted for area amenities for each of the comparables as compared to the subject property in our analysis. Based on our field review and our evaluation of local amenity data (presented earlier in this report), we assigned a local amenity rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in amenity ratings between the subject and the comparables.

Area Amenities				
Adjustment	Survey	/ Range	Concluded	
Rating	\$0	\$100	\$0	

Median Household Income

Our analysis also included an adjustment for median household income for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.0032 per dollar of median household income.

Median Household Income				
Adjustment	Adjustment Survey Range Concluded			
Med HH Inc	\$0.0000 \$0.010	0 \$0.0032		

Average Commute

Our analysis also included an adjustment for average commute for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$2.00 per each minute of commute.

Average Commute				
Adjustment	Survey	Range	Concluded	
Avg Commute	\$0.00	\$20.00	\$2.00	

Public Transportation

Our analysis also included an adjustment for the existence of public transportation within walking distance of each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.00 for public transportation.

Public Transportation				
Adjustment	Survey Range Concluded			
Public Trans	\$0.00	\$200.00	\$0.00	

Personal Crime

Our analysis also included an adjustment for personal crime rates for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0 per 0.01 percentage points.

Personal Crime			
Adjustment	Surve	y Range	Concluded
Personal Crime	\$0	\$50,000	\$0

Condition

Our analysis also included an adjustment for the condition of each comparable as compared to the subject property. Based on our field review, we assigned a condition rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$10 per point for differences in condition ratings between the subject and the comparables.

Condition			
Adjustment	Survey	Range	Concluded
Rating	\$10	\$50	\$10

Effective Age

We considered differences in effective age in our analysis. Based on our field review, we estimated the effective age for each of the properties included in this analysis. Our estimates reflected the condition-adjusted age and remaining useful life of each property. Statistical extraction resulted in an adjustment of \$5.00 per year for differences in effective age between the subject and the comparables.

Effective Age				
Adjustment	Survey Range Concluded			
Rating	\$1.00	\$5.00	\$5.00	

Project Amenities

We considered the presence of various project amenities at the comparables as compared to the subject property. Project amenities include ball fields, BBQ areas, billiards, business/computer centers, car care centers, community centers, elevators, fitness centers, gazebos, hot tubs/Jacuzzis, horseshoe pits, lakes, libraries, movie theatres, picnic areas, playgrounds, pools, saunas, sports courts and walking trails. The survey range and our concluded adjustment for each amenity is summarized below.

Project Amenities					
Adjustment	Survey	Range	Concluded		
Ball Field	\$2	\$10	\$2		
BBQ Area	\$2	\$10	\$2		
Billiards	\$2	\$10	\$2		
Bus/Comp Ctrs	\$2	\$10	\$2		
Car Care Center	\$2	\$10	\$2		
Community Center	\$2	\$10	\$2		
Elevator	\$10	\$100	\$10		
Fitness Center	\$2	\$10	\$2		
Gazebo	\$2	\$10	\$2		
Hot Tub/Jacuzzi	\$2	\$10	\$2		
Horseshoe Pit	\$2	\$10	\$2		
Lake	\$2	\$10	\$2		
Library	\$2	\$10	\$2		
Movie Theatre	\$2	\$10	\$2		
Picnic Area	\$2	\$10	\$2		
Playground	\$2	\$10	\$2		
Pool	\$2	\$10	\$2		
Sauna	\$2	\$10	\$2		
Sports Court	\$2	\$10	\$2		
Walking Trail	\$2	\$10	\$2		

Unit Amenities

We considered the presence of various unit amenities at the comparables as compared to the subject property. Unit amenities include blinds, ceiling fans, carpeting/upgraded flooring, fireplaces, patios/balconies and storage. The survey range and our concluded adjustment for each amenity is summarized below.

Unit Amenities							
Adjustment	Survey	Range	Concluded				
Blinds	\$2	\$10	\$2				
Ceiling Fans	\$2	\$10	\$2				
Carpeting	\$2	\$10	\$2				
Fireplace	\$2	\$10	\$2				
Patio/Balcony	\$2	\$10	\$2				
Storage	\$10	\$50	\$10				

Kitchen Amenities

We considered the presence of various kitchen amenities at the comparables as compared to the subject property. Kitchen amenities include stoves, refrigerators, disposals, dishwashers and microwaves. The survey range and our concluded adjustment for each amenity is summarized below.

Kitchen Amenities							
Adjustment	Survey	[,] Range	Concluded				
Stove	\$2	\$10	\$2				
Refrigerator	\$2	\$10	\$2				
Disposal	\$2	\$10	\$2				
Dishwasher	\$2	\$10	\$2				
Microwave	\$2	\$10	\$2				

Parking

We also adjusted for differing types of parking configurations. We classified parking five ways: (1) Garage, (2) Covered; (3) Assigned, (4) Open and (5) No parking offered. Statistical extraction resulted in an adjustment of \$50 per month for garages; covered parking was valued at \$20; assigned parking was valued at \$10; open parking was valued at \$0; no parking was valued at \$0.

Parking								
Adjustment	Survey	[,] Range	Concluded					
Garage	\$50	\$200	\$50					
Covered	\$20	\$100	\$20					
Assigned	\$10 \$50		\$10					
Open	\$0	\$0	\$0					
None	\$0	\$0	\$0					

Laundry

We also evaluated differing types of laundry configurations. We classified laundry amenities three ways: (1) Central Laundry, (2) Washer/Dryer Units; and (3) Washer/Dryer Hookups. Our analysis resulted in an adjustment of \$5 per month for central laundries; washer/dryer units were valued at \$10; washer/dryer hookups were valued at \$5.

Laundry							
Adjustment	Survey	Range	Concluded				
Central	\$5	\$25	\$5				
W/D Units	\$10	\$50	\$10				
W/D Hookups	\$5	\$25	\$5				

Security

We considered the presence of various security amenities at the comparables as compared to the subject property. Security amenities include call buttons, controlled access, courtesy officers, monitoring, security alarms and security patrols. The survey range and our concluded adjustment for each amenity is summarized below.

	Sec	curity	
Adjustment	Survey	/ Range	Concluded
Call Buttons	\$2	\$10	\$2
Controlled Access	\$2	\$10	\$2
Courtesy Officer	\$2	\$10	\$2
Monitoring	\$2	\$10	\$2
Security Alarms	\$2	\$10	\$2
Security Patrols	\$2	\$10	\$2

Rent Conclusion, 1BR-1.5BA-878sf

The development of our rent conclusion for the 1BR-1.5BA-878sf units is found below.

Our analysis included the evaluation of a total of 9 unit types found at 4 properties. We selected the 9 most comparable units to utilize as rent comparables for purposes of this analysis. A write-up for each of the properties included in this analysis is found in the Appendix.

Our analysis included the adjustments developed in the previous section. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is better, a "plus" adjustment is made. If the subject is inferior, a "minus" adjustment is made. In the table below, we summarize the adjustments and the resulting indicated rent for the top 9 comparables included in this analysis. The units that we consider most comparable are highlighted for the reader's reference.

		Rent 0	Conclusion						
	Comparable		Una	adjusted R	ent		Adjust	ed Rent	
Property-Unit Key	Property Name	Unit Type	Street Rent	Concessions	Net Rent	Gross Adjustments	Net Adjustments	Adjusted Rent	Rank
Sub-01	Steeplechase Manor	1BR-1.5BA-878sf	\$827	\$0	\$827	-	\$0	\$827	-

015-03	Jackson Street Apartments	3BR-1BA-1379sf	\$1,200	\$0	\$1,200	\$461	-\$47	\$1,153	9

Adjusted Rent, Minimum	\$1,140
Adjusted Rent, Maximum	\$1,165
Adjusted Rent, Average	\$1,151
Adjusted Rent, Modified Average	\$1,151
Rent, Concluded	\$1,150

Our analysis suggests a rent of \$1,150 for the 1BR-1.5BA-878sf units at the subject property.

In our opinion, the 1BR-1BA-600sf units at Jackson Street Apartments (Property # 015), the 1BR-1BA-584sf units at Aspen Apartments South (Property # 002), the 1BR-1BA-600sf units at Green Street Apartments (Property # 012), the 2BR-1BA-775sf units at Jackson Street Apartments (Property # 015), and the 2BR-1BA-775sf units at Green Street Apartments (Property # 012) are the best comparables for the units at the subject property.

Rent Conclusion, As Is

In the table below we derive our "as is" rent conclusion using the "as renovated" rent conclusion developed above:

Rent Con	clusion, As	ls		
	Conc	As	As	\$
Adjustment	Adj	Ren	ls	Adj
Tenant Paid Utilities	0	\$52	\$64	-\$12
Condition	\$10	4.00	2.50	-\$15
Effective Age	\$5.00	2009	1985	-\$120
Adjustments				-\$147
Adjusted Rent, Minimum				\$993
Adjusted Rent, Maximum				\$1,018
Adjusted Rent, Average				\$1,004
Adjusted Rent, Modified Average				\$1,004
Rent, Concluded, As Is				\$1,005

Our analysis suggests an "as is" rent of \$1,005 for the 1BR-1.5BA-878sf units at the subject property.

Rent Conclusion, 2BR-1BA-1018sf

The development of our rent conclusion for the 2BR-1BA-1018sf units is found below.

Our analysis included the evaluation of a total of 9 unit types found at 4 properties. We selected the 9 most comparable units to utilize as rent comparables for purposes of this analysis. A write-up for each of the properties included in this analysis is found in the Appendix.

Our analysis included the adjustments developed in the previous section. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is better, a "plus" adjustment is made. If the subject is inferior, a "minus" adjustment is made. In the table below, we summarize the adjustments and the resulting indicated rent for the top 9 comparables included in this analysis. The units that we consider most comparable are highlighted for the reader's reference.

		Rent C	Conclusion						
	Comparable		Una	djusted R	ent		Adjust	ed Rent	
Property-Unit Key	Property Name	Unit Type	Street Rent	Concessions	Net Rent	Gross Adjustments	Net Adjustments	Adjusted Rent	Rank

015-01	Jackson Street Apartments	1BR-1BA-600sf	\$975	\$0	\$975	\$271	\$263	\$1,238	5
015-02	Jackson Street Apartments	2BR-1BA-775sf	\$1,075	\$0	\$1,075	\$184	\$176	\$1,251	1
015-03	Jackson Street Apartments	3BR-1BA-1379sf	\$1,200	\$0	\$1,200	\$331	\$51	\$1,251	9

Adjusted Rent, Minimum	\$1,238
Adjusted Rent, Maximum	\$1,263
Adjusted Rent, Average	\$1,249
Adjusted Rent, Modified Average	\$1,249
Rent, Concluded	\$1,250

Our analysis suggests a rent of \$1,250 for the 2BR-1BA-1018sf units at the subject property.

In our opinion, the 2BR-1BA-775sf units at Jackson Street Apartments (Property # 015), the 2BR-1BA-775sf units at Green Street Apartments (Property # 012), the 2BR-2BA-742sf units at Aspen Apartments South (Property # 002), the 2BR-1BA-850sf units at Doctor Helvey's Apartments (Property # 011), and the 1BR-1BA-600sf units at Jackson Street Apartments (Property # 015) are the best comparables for the units at the subject property.

Rent Conclusion, As Is

In the table below we derive our "as is" rent conclusion using the "as renovated" rent conclusion developed above:

Rent Conclusion, As Is								
	Conc	As	As	\$				
Adjustment	Adj	Ren	ls	Adj				
Tenant Paid Utilities	0	\$68	\$61	\$7				
Condition	\$10	4.00	2.50	-\$15				
Effective Age	\$5.00	2009	1985	-\$120				
Adjustments				-\$128				
Adjusted Rent, Minimum				\$1,11				
Adjusted Rent, Maximum				\$1,13				
Adjusted Rent, Average				\$1,12				
Adjusted Rent, Modified Average				\$1,12				
Rent, Concluded, As Is				\$1,12				

Our analysis suggests an "as is" rent of \$1,120 for the 2BR-1BA-1018sf units at the subject property.

Rent Conclusion, 2BR-2BA-1029sf

The development of our rent conclusion for the 2BR-2BA-1029sf units is found below.

Our analysis included the evaluation of a total of 9 unit types found at 4 properties. We selected the 9 most comparable units to utilize as rent comparables for purposes of this analysis. A write-up for each of the properties included in this analysis is found in the Appendix.

Our analysis included the adjustments developed in the previous section. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is better, a "plus" adjustment is made. If the subject is inferior, a "minus" adjustment is made. In the table below, we summarize the adjustments and the resulting indicated rent for the top 9 comparables included in this analysis. The units that we consider most comparable are highlighted for the reader's reference.

		Rent C	Conclusion							
	Comparable		Una	djusted R	ent	Adjusted Rent				
Property-Unit Key	Property Name	Unit Type	Street Rent	Concessions	Net Rent	Gross Adjustments	Net Adjustments	Adjusted Rent	Rank	
Sub-05	Steeplechase Manor	2BR-2BA-1029sf	\$1,200	\$0	\$1,200	-	\$0	\$1,200	-	
	Aspen Apartments South Aspen Apartments South	1BR-1BA-584sf 2BR-2BA-742sf	\$1,075 \$1,150	\$0 \$0	\$1,075 \$1,150	\$289 \$203	\$189 \$102	\$1,264 \$1,252	6 3	
	Doctor Helvey's Apartments	2BR-1BA-850sf	\$1,000	\$0	\$1,000	\$263	\$239	\$1,239	4	
	Green Street Apartments	1BR-1BA-600sf	\$975	\$0	\$975	\$291	\$283	\$1,258	7	
012-02	Green Street Apartments	2BR-1BA-775sf	\$1,075	\$0	\$1,075	\$191	\$183	\$1,258	2	
012-03	Green Street Apartments	3BR-1BA-1379sf	\$1,200	\$0	\$1,200	\$317	\$39	\$1,239	8	
015-01	Jackson Street Apartments	1BR-1BA-600sf	\$975	\$0	\$975	\$272	\$264	\$1,239	5	
015-02	Jackson Street Apartments	2BR-1BA-775sf	\$1,075	\$0	\$1,075	\$185	\$177	\$1,252	1	
015-03	Jackson Street Apartments	3BR-1BA-1379sf	\$1,200	\$0	\$1,200	\$330	\$52	\$1,252	9	

Adjusted Rent, Minimum	\$1,239
Adjusted Rent, Maximum	\$1,264
Adjusted Rent, Average	\$1,250
Adjusted Rent, Modified Average	\$1,250
Rent, Concluded	\$1,275

Our analysis suggests a rent of \$1,275 for the 2BR-2BA-1029sf units at the subject property.

In our opinion, the 2BR-1BA-775sf units at Jackson Street Apartments (Property # 015), the 2BR-1BA-775sf units at Green Street Apartments (Property # 012), the 2BR-2BA-742sf units at Aspen Apartments South (Property # 002), the 2BR-1BA-850sf units at Doctor Helvey's Apartments (Property # 011), and the 1BR-1BA-600sf units at Jackson Street Apartments (Property # 015) are the best comparables for the units at the subject property.

Rent Conclusion, As Is

In the table below we derive our "as is" rent conclusion using the "as renovated" rent conclusion developed above:

Rent Con	clusion, As	ls		
	Conc	As	As	\$
Adjustment	Adj	Ren	ls	Adj
Tenant Paid Utilities	0	\$68	\$82	-\$14
Condition	\$10	4.00	2.50	-\$15
Effective Age	\$5.00	2009	1985	-\$120
Adjustments				-\$149
Adjusted Rent, Minimum				\$1,090
Adjusted Rent, Maximum				\$1,115
Adjusted Rent, Average				\$1,101
Adjusted Rent, Modified Average				\$1,101
Rent, Concluded, As Is				\$1,125

Our analysis suggests an "as is" rent of \$1,125 for the 2BR-2BA-1029sf units at the subject property.

Unrestricted Market Rent Conclusion

Based on our evaluation of the rents at the select comparable properties, and considering the location, quality and amenities of the subject property, we conclude the following market rents for the subject property units, assuming that the subject were an unrestricted property:

	Unrestri	cted Market Rent Co	nclusion			
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Market	Proposed	Advantage
1BR-1.5BA-878sf / 40% of AMI / 40% of AMI	No	No	1	\$1,150	\$827	28.1%
2BR-1BA-1018sf / 40% of AMI / 40% of AMI	No	No	5	\$1,250	\$987	21.0%
2BR-1BA-1018sf / 50% of AMI / 50% of AMI	No	No	22	\$1,250	\$1,150	8.0%
2BR-1BA-1018sf / 60% of AMI / 60% of AMI	No	No	19	\$1,250	\$1,150	8.0%
2BR-2BA-1029sf / 60% of AMI / 60% of AMI	No	No	9	\$1,275	\$1,200	5.9%
Total / Average			56	\$1,252	\$1,138	9.1%

Our analysis suggests an average unrestricted market rent of \$1,252 for the subject property. This is compared with an average proposed rent of \$1,138, yielding an unrestricted market rent advantage of 9.1 percent. Overall, the subject property appears to be priced at or below unrestricted market rents for the area.

We selected a total of 4 properties as comparables for purposes of our analysis. The average occupancy at the select rent comparables currently stands at 100 percent.

Occupancy rates for the selected rent comparables are broken out below:

			Occupano	y Rate, Select Co	mparables			
	Subsidized	20% of AMI	30% of AMI	40% of AMI	50% of AMI	60% of AMI	80% of AMI	Market
0-Bedroom								
1-Bedroom								100%
2-Bedroom								100%
3-Bedroom								
4-Bedroom								
Total								100%

Occupancy rates for all stabilized market area properties are broken out below:

	Bedroom 100% 97% 100% 99% -Bedroom 100% 100% 97% 99% 100% -Bedroom 100% 100% 100% 100% 100%												
	Subsidized	20% of AMI	30% of AMI	40% of AMI	50% of AMI	60% of AMI	80% of AMI	Market					
0-Bedroom	100%												
1-Bedroom	100%			97%	100%			99%					
2-Bedroom	100%		100%	97%	99%			100%

4-Bedroom													
Total	100%		100%	97%	99%			100%					

HUD conducts an annual rent survey to derive Fair Market Rent estimates for an area. Based on this, 2bedroom rents for the area grew from \$1494 to \$1793 since 2010. This represents an average 2.5% annual increase over this period.

Fair market rent data for the area is found below:

Unrestricted Market Rent Conclusion, As Is

In the table found below we summarize the market rents for the subject property units on an "as is" basis, assuming that the subject were an unrestricted property:

	Unrestricte	d Market Rent Concl	usion, As Is			
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Market	Proposed	Advantage
1BR-2BA-878sf / 60% of AMI / 60% of AMI	No	No	1	\$1,005	\$933	7.2%
2BR-1BA-1018sf / 60% of AMI / 60% of AMI	No	No	46	\$1,120	\$950	15.2%
2BR-2BA-1029sf / 60% of AMI / 60% of AMI	No	No	9	\$1,125	\$1,010	10.2%
Total / Average			56	\$1,119	\$959	14.2%

Restricted Rent Analysis

In this section we develop a restricted market rent conclusion and an achievable rent conclusion for the subject property units. Our analysis began by selecting comparable rentals to use to develop estimates of market rents for the units at the subject property, assuming that the subject was a restricted property. Our selection of comparables was based on location, age, condition, unit mix and amenities of the comparable properties relative to the subject property.

Rental Property Inventory, by Unit Type

In the following pages we present an inventory of properties included in this analysis. Rents for these properties, broken out by unit type, were used in selecting the rent comparables used in this analysis.

The properties that we consider to be comparable to the subject property are highlighted in the tables found in the following pages. We attempted to select stabilized restricted rent properties as comparables for purposes of our rent comparability analysis.

Comparables with market rents are used when a sufficient number of restricted rent comparables are not available and when maximum allowable rents for properties with restricted rents exceed prevailing rents in the area. In the event that program rental rates exceed market rental rates, restricted units are, in fact, *de facto* market rate units.

Rent Comparables, Restricted Rent, Map

A map showing the location of the properties selected as comparables in this analysis is found in the following pages. Properties identified with red pushpins have market rents, properties identified with yellow pushpins have restricted rents, and properties identified with blue pushpins have subsidized rents. Detailed write-ups for the select rent comparables are found in the Appendix to this report.

Rent Comparability Grids

Our analysis employed the use of rent comparability grids and resulted in a restricted market rent estimate for each of the subject's unit types. These grids and a narrative describing our rent adjustments are found in the following pages.

	Ov	rview							Re	nts

Rent Adjustments

Our analysis included a property management survey and a technique known as "statistical extraction" to help us identify the best adjustments to use. Statistical extraction, which is similar to the matched pair method, helped us derive the optimal adjustments for our particular data set.

Here's a hypothetical example to illustrate how we derived our rent adjustments. Assume that property managers tell us we should expect rent adjustments ranging from \$0.00 to \$0.50 per square foot for a particular market. Next, assume that we select 25 rent comparables with an adjusted sample standard deviation (a statistical measure of variability) of \$100. We employ a square foot rent adjustment of \$0.10 for each comparable resulting in an adjusted sample standard deviation of \$90. This tells us that the assumed adjustment "explained" some of the variability in the data. We repeat this process for adjustments of \$0.20, \$0.30, \$0.40 and \$0.50 which yielded adjusted sample standard deviations of \$80, \$70, \$65 and \$75, respectively. The \$0.40 square foot adjustment "explains" the most variability because any other adjustment yields a higher adjusted sample standard deviation. Consequently, a \$0.40 rent adjustment is the best adjustment for purposes of this example. This is a simplified example because we actually adjusted for numerous variables simultaneously in our analysis.

Many adjustments (bedroom count, bathroom count and square footage) are highly interrelated. Statistical extraction helped us unravel the interrelationships between these variables. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is superior a "plus" adjustment is made. If the subject is inferior a "minus" adjustment is made.

We used the Excel Solver function to help us with our analysis. The Solver function was programmed to minimize the adjusted standard deviation for our data set. We evaluated a total of 62 variables in 22 categories (AC systems, heating systems, technology, bedrooms, bathrooms, square feet, visibility, access, neighborhood, area amenities, condition, effective age, project amenities, elevator, unit amenities, storage, kitchen amenities, parking, laundry, security, on-site management, on-site maintenance) in an effort to identify the mix of adjustments that explained the most variability found in our raw data.

A discussion of our surveyed and concluded adjustments is found below.

Concessions

The first step in our analysis was to account for any concessions at the subject and the comparables. We considered the advertised street rent and concessions being offered and derived a net nent estimate for each comparable. Net rent, defined as advertised street rent minus monthly concessions, represents the cash rent paid by new residents at the various properties. This is the best measure of market value (prior to any other adjustments) for the comparables included in this analysis.

Tenant-Paid Utilities

The next step in our analysis was to account for differences in tenant-paid utilities between the comparable properties and the subject. We used the HUD Utility Schedule Model to derive our adjustments. The HUD model includes a current utility rate survey for the area. In the event that the tenant-paid utilities associated with a particular property are higher or lower than the subject, adjustments were made to account for the differences. Adjustments reflect the difference between the tenant-paid utilities for the comparable property minus that for the subject.

Technology

We accounted for technology (cable and internet access) offered in the rent for each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0 per month for cable; internet access was valued at \$0.

Technology				
Adjustment	Survey	Concluded		
Cable	\$0	\$50	\$0	
Internet	\$0	\$50	\$0	

Bedrooms

Our analysis also included an adjustment for the number of bedrooms at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$50 per bedroom.

Bedrooms				
Adjustment	Surve	y Range	Concluded	
Bedrooms	\$0	\$200	\$50	

Bathrooms

Our analysis also included an adjustment for the number of bathrooms at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$60 per bathroom.

	Bath	rooms	
Adjustment	Survey Range Concluded		
Bathrooms	\$0	\$100	\$60

Square Feet

Our analysis also included an adjustment for square footage at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.50 per square foot.

Square Feet				
Adjustment	Survey Range Concluded			
Square Feet	\$0.00	\$2.00	\$0.50	

Visibility

We also accounted for differences in visibility at each of the comparables as compared to the subject property in our analysis. Based on our field review, we assigned a visibility rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in visibility ratings between the subject and the comparables.

	Vis	ibility	
Adjustment	Survey Range Concluded		
Rating	\$0	\$100	\$0

Access

Our analysis also included an adjustment for access at each of the comparables as compared to the subject property. Based on our field review, we assigned an access rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in access ratings between the subject and the comparables.

	Ac	cess	
Adjustment	Survey	/ Range	Concluded
Rating	\$0	\$100	\$0

Neighborhood

We considered differences in neighborhood at each of the comparables as compared to the subject property in our analysis. Based on our field review and our evaluation of local demographic and crime data (presented earlier in this report), we assigned a neighborhood rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$100 per point for differences in neighborhood ratings between the subject and the comparables.

Neighborhood				
Adjustment	Survey	/ Range	Concluded	
Rating	\$0	\$100	\$100	

Area Amenities

We also accounted for area amenities for each of the comparables as compared to the subject property in our analysis. Based on our field review and our evaluation of local amenity data (presented earlier in this report), we assigned a local amenity rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in amenity ratings between the subject and the comparables.

	Area A	menities	
Adjustment	Survey Range Concluded		
Rating	\$0	\$100	\$0

Median Household Income

Our analysis also included an adjustment for median household income for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.0023 per dollar of median household income.

Median Household Income				
Adjustment Survey Range Concluded				
Med HH Inc	\$0.0000 \$0.0100	\$0.0023		

Average Commute

Our analysis also included an adjustment for average commute for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$1.00 per each minute of commute.

Average Commute				
Adjustment	Survey Range Concluded			
Avg Commute	\$0.00	\$20.00	\$1.00	

Public Transportation

Our analysis also included an adjustment for the existence of public transportation within walking distance of each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.00 for public transportation.

Public Transportation				
Adjustment	Survey Range Concluded			
Public Trans	\$0.00	\$200.00	\$0.00	

Personal Crime

Our analysis also included an adjustment for personal crime rates for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0 per 0.01 percentage points.

Personal Crime			
Adjustment	Surve	y Range	Concluded
Personal Crime	\$0	\$50,000	\$0

Condition

Our analysis also included an adjustment for the condition of each comparable as compared to the subject property. Based on our field review, we assigned a condition rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$50 per point for differences in condition ratings between the subject and the comparables.

Condition				
Adjustment	Survey	Range	Concluded	
Rating	\$10	\$50	\$50	

Effective Age

We considered differences in effective age in our analysis. Based on our field review, we estimated the effective age for each of the properties included in this analysis. Our estimates reflected the condition-adjusted age and remaining useful life of each property. Statistical extraction resulted in an adjustment of \$5.00 per year for differences in effective age between the subject and the comparables.

Effective Age				
Adjustment	Survey Range		Concluded	
Rating	\$1.00	\$5.00	\$5.00	

Project Amenities

We considered the presence of various project amenities at the comparables as compared to the subject property. Project amenities include ball fields, BBQ areas, billiards, business/computer centers, car care centers, community centers, elevators, fitness centers, gazebos, hot tubs/Jacuzzis, horseshoe pits, lakes, libraries, movie theatres, picnic areas, playgrounds, pools, saunas, sports courts and walking trails. The survey range and our concluded adjustment for each amenity is summarized below.

Project Amenities				
Adjustment	Survey	Range	Concluded	
Ball Field	\$2	\$10	\$2	
BBQ Area	\$2	\$10	\$2	
Billiards	\$2	\$10	\$2	
Bus/Comp Ctrs	\$2	\$10	\$10	
Car Care Center	\$2	\$10	\$2	
Community Center	\$2	\$10	\$2	
Elevator	\$10	\$100	\$10	
Fitness Center	\$2	\$10	\$10	
Gazebo	\$2	\$10	\$2	
Hot Tub/Jacuzzi	\$2	\$10	\$2	
Horseshoe Pit	\$2	\$10	\$2	
Lake	\$2	\$10	\$2	
Library	\$2	\$10	\$10	
Movie Theatre	\$2	\$10	\$2	
Picnic Area	\$2	\$10	\$10	
Playground	\$2	\$10	\$2	
Pool	\$2	\$10	\$10	
Sauna	\$2	\$10	\$2	
Sports Court	\$2	\$10	\$2	
Walking Trail	\$2	\$10	\$2	

Unit Amenities

We considered the presence of various unit amenities at the comparables as compared to the subject property. Unit amenities include blinds, ceiling fans, carpeting/upgraded flooring, fireplaces, patios/balconies and storage. The survey range and our concluded adjustment for each amenity is summarized below.

Unit Amenities					
Adjustment	Survey Range		Concluded		
Blinds	\$2	\$10	\$2		
Ceiling Fans	\$2	\$10	\$10		
Carpeting	\$2	\$10	\$10		
Fireplace	\$2	\$10	\$2		
Patio/Balcony	\$2	\$10	\$2		
Storage	\$10	\$50	\$10		

Kitchen Amenities

We considered the presence of various kitchen amenities at the comparables as compared to the subject property. Kitchen amenities include stoves, refrigerators, disposals, dishwashers and microwaves. The survey range and our concluded adjustment for each amenity is summarized below.

Kitchen Amenities					
Adjustment	Survey Range		Concluded		
Stove	\$2	\$10	\$2		
Refrigerator	\$2	\$10	\$2		
Disposal	\$2	\$10	\$2		
Dishwasher	\$2	\$10	\$10		
Microwave	\$2	\$10	\$2		

Parking

We also adjusted for differing types of parking configurations. We classified parking five ways: (1) Garage, (2) Covered; (3) Assigned, (4) Open and (5) No parking offered. Statistical extraction resulted in an adjustment of \$50 per month for garages; covered parking was valued at \$20; assigned parking was valued at \$10; open parking was valued at \$0; no parking was valued at \$0.

Parking					
Adjustment	Survey Range		Concluded		
Garage	\$50	\$200	\$50		
Covered	\$20	\$100	\$20		
Assigned	\$10	\$50	\$10		
Open	\$0	\$0	\$0		
None	\$0	\$0	\$0		

Laundry

We also evaluated differing types of laundry configurations. We classified laundry amenities three ways: (1) Central Laundry, (2) Washer/Dryer Units; and (3) Washer/Dryer Hookups. Our analysis resulted in an adjustment of \$25 per month for central laundries; washer/dryer units were valued at \$10; washer/dryer hookups were valued at \$5.

Laundry				
Adjustment	Survey Range		Concluded	
Central	\$5	\$25	\$25	
W/D Units	\$10	\$50	\$10	
W/D Hookups	\$5	\$25	\$5	

Security

We considered the presence of various security amenities at the comparables as compared to the subject property. Security amenities include call buttons, controlled access, courtesy officers, monitoring, security alarms and security patrols. The survey range and our concluded adjustment for each amenity is summarized below.

Security					
Adjustment	Survey Range		Concluded		
Call Buttons	\$2	\$10	\$2		
Controlled Access	\$2	\$10	\$2		
Courtesy Officer	\$2	\$10	\$2		
Monitoring	\$2	\$10	\$2		
Security Alarms	\$2	\$10	\$2		
Security Patrols	\$2	\$10	\$2		

Rent Conclusion, 1BR-1.5BA-878sf

The development of our rent conclusion for the 1BR-1.5BA-878sf units is found below.

Our analysis included the evaluation of a total of 19 unit types found at 10 properties. We selected the 19 most comparable units to utilize as rent comparables for purposes of this analysis. A write-up for each of the properties included in this analysis is found in the Appendix.

Our analysis included the adjustments developed in the previous section. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is better, a "plus" adjustment is made. If the subject is inferior, a "minus" adjustment is made. In the table below, we summarize the adjustments and the resulting indicated rent for the top 19 comparables included in this analysis. The units that we consider most comparable are highlighted for the reader's reference.

		Rent (Conclusion							
	Comparable		Una	adjusted R	lent	Adjusted Rent

042-02	Rectory (The) Apartments at the Pla	2BR-1BA-1000sf	\$1,250	\$0	\$1,250	\$372	-\$23	\$1,227	7	
	Adjusted Rent, Min	nimum				\$1,005				
	Adjusted Rent, Ma	ximum				\$1,314				

Adjusted Rent, Minimum	\$1,005
Adjusted Rent, Maximum	\$1,314
Adjusted Rent, Average	\$1,117
Adjusted Rent, Modified Average	\$1,112
Rent, Concluded	\$1,125

Our analysis suggests a rent of \$1,125 for the 1BR-1.5BA-878sf units at the subject property.

In our opinion, the 1BR-2BA-878sf units at Hunt Country Manor Apartments (Property # 014), the 1BR-1BA-636sf units at Moffett Manor Apartments (Property # 023), the 1BR-1BA-761sf units at Somerset Pointe Phases 1 & 2 (Property # 032), the 1BR-1BA-681sf units at Warrenton Manor Phase 2 (Property # 040), and the 1BR-1BA-600sf units at Oaks Apartments, Phase 1 (Property # 025) are the best comparables for the units at the subject property.

Rent Conclusion, As Is

In the table below we derive our "as is" rent conclusion using the "as renovated" rent conclusion developed above:

Rent Conclusion, As Is											
	Conc	As	As	\$							
Adjustment	Adj	Ren	ls	Adj							
Tenant Paid Utilities	0	\$52	\$64	-\$12							
Bathrooms	\$60	1.50	2.00	\$30							
Condition	\$50	4.00	2.50	-\$75							
Effective Age	\$5.00	2009	1985	-\$120							
Adjustments				-\$177							
Adjusted Rent, Minimum				\$828							
Adjusted Rent, Maximum				\$1,13							
Adjusted Rent, Average				\$940							
Adjusted Rent, Modified Average				\$935							
Rent, Concluded, As Is				\$950							

Our analysis suggests an "as is" rent of \$950 for the 1BR-1.5BA-878sf units at the subject property.

Rent Conclusion, 2BR-1BA-1018sf

The development of our rent conclusion for the 2BR-1BA-1018sf units is found below.

Our analysis included the evaluation of a total of 19 unit types found at 10 properties. We selected the 19 most comparable units to utilize as rent comparables for purposes of this analysis. A write-up for each of the properties included in this analysis is found in the Appendix.

Our analysis included the adjustments developed in the previous section. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is better, a "plus" adjustment is made. If the subject is inferior, a "minus" adjustment is made. In the table below, we summarize the adjustments and the resulting indicated rent for the top 19 comparables included in this analysis. The units that we consider most comparable are highlighted for the reader's reference.

	Rent Conclusion

	Rectory (The) Apartments at the Pla	2BR-1BA-1000sf	\$1,250	\$0	\$1,250	\$224	\$51	\$1,301	3			

Adjusted Rent, Minimum	\$1,079
Adjusted Rent, Maximum	\$1,388
Adjusted Rent, Average	\$1,191
Adjusted Rent, Modified Average	\$1,186
Rent, Concluded	\$1,150

Our analysis suggests a rent of \$1,150 for the 2BR-1BA-1018sf units at the subject property.

In our opinion, the 2BR-1BA-1018sf units at Hunt Country Manor Apartments (Property # 014), the 2BR-1.5BA-970sf units at Moffett Manor Apartments (Property # 023), the 2BR-1BA-1000sf units at Rectory (The) Apartments at the Plains (Property # 042), the 2BR-1BA-960sf units at Mintbrook Senior Apartments (Property # 022), and the 2BR-1BA-816sf units at Countryside Townhomes (Property # 010) are the best comparables for the units at the subject property.

Rent Conclusion, As Is

In the table below we derive our "as is" rent conclusion using the "as renovated" rent conclusion developed above:

Rent Conclusion, As Is											
	Conc	As	As	\$							
Adjustment	Adj	Ren	ls	Adj							
Tenant Paid Utilities	0	\$68	\$61	\$7							
Condition	\$50	4.00	2.50	-\$75							
Effective Age	\$5.00	2009	1985	-\$120							
Adjustments				-\$188							
Adjusted Rent, Minimum				\$891							
Adjusted Rent, Maximum				\$1,200							
Adjusted Rent, Average				\$1,003							
Adjusted Rent, Modified Average				\$998							
Rent, Concluded, As Is				\$960							

Our analysis suggests an "as is" rent of \$960 for the 2BR-1BA-1018sf units at the subject property.

Rent Conclusion, 2BR-2BA-1029sf

The development of our rent conclusion for the 2BR-2BA-1029sf units is found below.

Our analysis included the evaluation of a total of 19 unit types found at 10 properties. We selected the 19 most comparable units to utilize as rent comparables for purposes of this analysis. A write-up for each of the properties included in this analysis is found in the Appendix.

Our analysis included the adjustments developed in the previous section. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is better, a "plus" adjustment is made. If the subject is inferior, a "minus" adjustment is made. In the table below, we summarize the adjustments and the resulting indicated rent for the top 19 comparables included in this analysis. The units that we consider most comparable are highlighted for the reader's reference.

042-02	Rectory (The) Apartments at the Pla	2BR-1BA-1000sf	\$1,250	\$0	\$1,250	\$290	\$117	\$1,367	5			

Adjusted Rent, Minimum	\$1,144
Adjusted Rent, Maximum	\$1,454
Adjusted Rent, Average	\$1,256
Adjusted Rent, Modified Average	\$1,251
Rent, Concluded	\$1,200

Our analysis suggests a rent of \$1,200 for the 2BR-2BA-1029sf units at the subject property.

In our opinion, the 2BR-2BA-1029sf units at Hunt Country Manor Apartments (Property # 014), the 2BR-1.5BA-970sf units at Moffett Manor Apartments (Property # 023), the 2BR-2BA-979sf units at Aspen Club Apartments (Property # 003), the 2BR-1BA-1000sf units at Rectory (The) Apartments at the Plains (Property # 042), and the 2BR-1BA-960sf units at Mintbrook Senior Apartments (Property # 022) are the best comparables for the units at the subject property.

Rent Conclusion, As Is

In the table below we derive our "as is" rent conclusion using the "as renovated" rent conclusion developed above:

Rent Conclusion, As Is											
	Conc	As	As	\$							
Adjustment	Adj	Ren	ls	Adj							
Tenant Paid Utilities	0	\$68	\$82	-\$14							
Condition	\$50	4.00	2.50	-\$75							
Effective Age	\$5.00	2009	1985	-\$120							
Adjustments				-\$209							
Adjusted Rent, Minimum				\$935							
Adjusted Rent, Maximum				\$1,245							
Adjusted Rent, Average				\$1,047							
Adjusted Rent, Modified Average				\$1,042							
Rent, Concluded, As Is				\$990							

Our analysis suggests an "as is" rent of \$990 for the 2BR-2BA-1029sf units at the subject property.

Restricted Market Rent Conclusion

Based on our evaluation of the rents at the select comparable properties, and considering the location, quality and amenities of the subject property, we conclude the following market rents for the subject property units, assuming that the subject were a restricted property:

Restrie	cted Market Rent C	Conclusion		
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Market
1BR-1.5BA-878sf / 40% of AMI / 40% of AMI	No	No	1	\$1,125
2BR-1BA-1018sf / 40% of AMI / 40% of AMI	No	No	5	\$1,150
2BR-1BA-1018sf / 50% of AMI / 50% of AMI	No	No	22	\$1,150
2BR-1BA-1018sf / 60% of AMI / 60% of AMI	No	No	19	\$1,150
2BR-2BA-1029sf / 60% of AMI / 60% of AMI	No	No	9	\$1,200
Total / Average			56	\$1,158

Our analysis suggests an average restricted market rent of \$1,158 for the subject property.

We selected a total of 10 properties as comparables for purposes of our analysis. The average occupancy at the select rent comparables currently stands at 99 percent.

The occupancy rate of the selected rent compatrables is broken out in the tables below:

			Occupanc	y Rate, Select Co	mparables			
	Subsidized	20% of AMI	30% of AMI	40% of AMI	50% of AMI	60% of AMI	80% of AMI	Market
0-Bedroom								
1-Bedroom				100%	100%			
2-Bedroom				97%	98%			
3-Bedroom								
4-Bedroom								
Total				99%	99%			

Occupancy rates for all stabilized market area properties are broken out below:

			Occupanc	y Rate, Stabilized	Properties			
	Subsidized	20% of AMI	30% of AMI	40% of AMI	50% of AMI	60% of AMI	80% of AMI	Market
0-Bedroom	100%							
1-Bedroom	100%			97%	100%			99%
2-Bedroom	100%		100%	97%	99%			100%
3-Bedroom	100%		100%	100%	100%			100%
4-Bedroom								
Total	100%		100%	97%	99%			100%

Rents at rent restricted properties tend to move with median household incomes for an area. Given HUD's published median incomes, we derived 1, 2 and 3-bedroom 60% of AMI rent limits since 2006. According to our analysis, maximum 2-bedroom rents for the area grew from \$1397 to \$1582 since 2010. This represents an average 1.7% annual increase over this period.

		Rent			Change	
Year	1BR	2BR	3BR	1BR	2BR	3BR
2006	\$1,016	\$1,219	\$1,409	-	-	-
2007	\$1,063	\$1,276	\$1,474	4.6%	4.7%	4.6%
2008	\$1,114	\$1,337	\$1,544	4.8%	4.8%	4.7%
2009	\$1,155	\$1,386	\$1,602	3.7%	3.7%	3.8%
2010	\$1,164	\$1,397	\$1,615	0.8%	0.8%	0.8%
2011	11 \$1,194 \$1,432		\$1,655	2.6%	2.5%	2.5%
2012	\$1,209	\$1,451	\$1,677	1.3%	1.3%	1.3%
2013	\$1,207	\$1,449	\$1,674	-0.2%	-0.1%	-0.2%
2014	\$1,204	\$1,445	\$1,669	-0.2%	-0.3%	-0.3%
2015	\$1,228	\$1,474	\$1,704	2.0%	2.0%	2.1%

Restricted Market Rent Conclusion, As Is

In the table found below we summarize the market rents for the subject property units on an "as is" basis, assuming that the subject were a restricted property:

Restricted	d Market Rent Con	clusion, As Is		
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Market
1BR-2BA-878sf / 60% of AMI / 60% of AMI	No	No	1	\$950
2BR-1BA-1018sf / 60% of AMI / 60% of AMI	No	No	46	\$960
2BR-2BA-1029sf / 60% of AMI / 60% of AMI	No	No	9	\$990
Total / Average			56	\$965

Achievable Rent Conclusion

The next step in our analysis is to develop an achievable rent conclusion for the subject property. Achievable rents represent the absolute highest rent permissible for the area, considering market rents, program rent limits, and any other applicable rent restrictions on the subject property.

Our analysis begins by establishing the applicable program rent limits for the subject property. Program rent limits include any applicable LIHTC and FMR rent limits. LIHTC rent limits typically apply to units benefitting from tax credit and/or bond financing. The LIHTC rent limits for applicable units at the subject property follow:

	LIHTC Rent	Limits				
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Gross Rent	Utilities	Net Rent
1BR-1.5BA-878sf / 40% of AMI / 40% of AMI	No	No	1	\$879	\$52	\$827
2BR-1BA-1018sf / 40% of AMI / 40% of AMI	No	No	5	\$1,055	\$68	\$987
2BR-1BA-1018sf / 50% of AMI / 50% of AMI	No	No	22	\$1,318	\$68	\$1,250
2BR-1BA-1018sf / 60% of AMI / 60% of AMI	No	No	19	\$1,582	\$68	\$1,514
2BR-2BA-1029sf / 60% of AMI / 60% of AMI	No	No	9	\$1,582	\$68	\$1,514
Total / Average			56	\$1,419	\$68	\$1,351

Our analysis suggests an average net LIHTC rent limit of \$1,351 for 56 applicable units at the subject property.

FMR rent limits typically apply to units benefitting from HOME funds. The FMR rent limits for applicable units at the subject property follow:

	FMR Rent	Limits				
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Gross Rent	Utilities	Net Rent
1BR-1.5BA-878sf / 40% of AMI / 40% of AMI	No	No	-	-	-	-
2BR-1BA-1018sf / 40% of AMI / 40% of AMI	No	No	-	-	-	-
2BR-1BA-1018sf / 50% of AMI / 50% of AMI	No	No	-	-	-	-
2BR-1BA-1018sf / 60% of AMI / 60% of AMI	No	No	-	-	-	-
2BR-2BA-1029sf / 60% of AMI / 60% of AMI	No	No	-	-	-	-
Total / Average			-	-	-	-

HOME funding is not proposed for the subject property.

Units benefitting exclusively from tax credits and/or bond financing are subject to LIHTC rent limits. Units benefitting from HOME funds in addition to tax credit and/or bond financing are subject to the lesser of LIHTC rent limits or FMR rent limits. Units benefitting from project-based rental assistance are normally limited to unrestricted market rent. With these parameters in mind, the following table sets forth the concluded program rent limits for applicable units at the subject property:

		Program Rent L	imits				
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	LIHTC	FMR	Market	Program
1BR-1.5BA-878sf / 40% of AMI / 40% of AMI	No	No	1	\$827	-	-	\$827
2BR-1BA-1018sf / 40% of AMI / 40% of AMI	No	No	5	\$987	-	-	\$987
2BR-1BA-1018sf / 50% of AMI / 50% of AMI	No	No	22	\$1,250	-	-	\$1,250
2BR-1BA-1018sf / 60% of AMI / 60% of AMI	No	No	19	\$1,514	-	-	\$1,514
2BR-2BA-1029sf / 60% of AMI / 60% of AMI	No	No	9	\$1,514	-	-	\$1,514
Total / Average			56	\$1,351	-	-	\$1,351

Our analysis suggests an average program rent limit of \$1,351 for 56 applicable units at the subject property.

Now that we have established program rent limits, we are in a position to develop an achievable rent conclusion for the subject property. Achievable rents represent the absolute highest rent permissible for the area, considering unrestricted and restricted market rents, program rent limits, and any other applicable rent restrictions on the subject property. The following table summarizes our findings:

		Д	chievable R	ents					
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Program	Unrestricted	Restricted	Achievable	Proposed	Advantage
1BR-1.5BA-878sf / 40% of AMI / 40% of AMI	No	No	1	\$827	\$1,150	\$1,125	\$827	\$827	0.0%
2BR-1BA-1018sf / 40% of AMI / 40% of AMI	No	No	5	\$987	\$1,250	\$1,150	\$987	\$987	0.0%
2BR-1BA-1018sf / 50% of AMI / 50% of AMI	No	No	22	\$1,250	\$1,250	\$1,150	\$1,150	\$1,150	0.0%
2BR-1BA-1018sf / 60% of AMI / 60% of AMI	No	No	19	\$1,514	\$1,250	\$1,150	\$1,150	\$1,150	0.0%
2BR-2BA-1029sf / 60% of AMI / 60% of AMI	No	No	9	\$1,514	\$1,275	\$1,200	\$1,200	\$1,200	0.0%
Total / Average			56	\$1,351	\$1,252	\$1,158	\$1,138	\$1,138	0.0%

Our analysis suggests an average achievable rent of \$1,138 for the subject property. This is compared with an average proposed rent of \$1,138, yielding an achievable rent advantage of 0 percent. Overall, the subject property appears to be priced at or below achievable rents for the area.

DEMAND ANALYSIS

Overview

In this section we evaluate demand for the subject property using the recommended demand methodology promulgated by the National Council of Housing Market Analysts (NCHMA). For purposes of this analysis, we define demand as the number of income-qualified renter households (by household size and unit type) that would qualify to live at the subject property at the lesser of the developer's proposed rents or achievable rents.

Our analysis begins by developing a breakdown of the number of renter households, by income, by size as of the date of market entry for this development. This breakdown, which utilizes demographic data presented earlier in this report, is presented below:

	2019	\$				2020			
Min		Max	1 Person	2 Person	3 Person	4 Person	5 Person	6+ Person	Total
\$0	to	\$9,999	136	39	33	20	16	7	252
\$0	to	\$19,999	317	116	139	63	40	11	687
\$0	to	\$29,999	480	177	214	120	64	18	1,074
\$0	to	\$39,999	728	301	281	182	98	35	1,624
\$0	to	\$49,999	874	551	320	227	151	63	2,185
\$0	to	\$59,999	1,006	656	381	282	195	87	2,608
\$0	to	\$74,999	1,186	859	503	369	291	143	3,352
\$0	to	\$99,999	1,377	1,108	722	517	374	195	4,293
\$0	to	\$124,999	1,500	1,270	821	656	452	235	4,932
\$0	to	\$149,999	1,693	1,373	864	812	480	247	5,468
\$0	to	\$199,999	, ,		1,002	880	574	296	6,003
\$0	or	more	1,931	1,580	1,046	953	629	316	6,455

Source: ESRI & Ribbon Demographics

Our analysis includes an estimate of demand along with capture rate and penetration rate estimates. Capture rates were computed two ways: (1) On a <u>gross</u> basis (the number of proposed units divided by qualified demand) and (2) On a <u>net</u> basis (the number of proposed units divided by qualified demand minus competing & pipeline units). Penetration rates are defined as the number of proposed units plus competing & pipeline units divided by incomequalified demand. In the following pages we provide detailed listings of competing & pipeline units in the market area broken by unit type.

	Demand Es	timate		258						

Our analysis suggests demand for a total of 258 size- and income-qualified units in the market area.

Demand Estimate, 2-Bedroom, Restricted, 60% of AMI

In this section we estimate demand for the 2-Bedroom / Restricted / 60% of AMI units at the subject property. Our analysis assumes a total of 28 units, 14 of which are anticipated to be vacant on market entry in 2020. Our analysis assumes a 35% income qualification ratio and 4-person households.

Unit Details							
Target Population	Family Households						
Unit Type	2-Bedroom						
Rent Type	Restricted						
Income Limit	60% of AMI						
Total Units	28						
Vacant Units at Market Entry	14						
Minimum Qualified Income

Our analysis suggests project-level demand for a total of 1,150 size- and income-qualified units in the market area.

Capture Rates

In this section, we summarize our demand conclusions and estimate the capture rate for the subject property. Our analysis begins by summarizing the estimated number of vacant subject property units on the date of market entry.

Subject Property Units (Total)											
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot		
0BR											
1BR			1						1		
2BR			5	22	28				55		
3BR											
4BR											
Tot			6	22	28				56		

	Subject Property Units (Vacant at Market Entry)											
1	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot			
0BR												
1BR			1						1			
2BR			2	11	14				27			
3BR												
4BR												
Tot			3	11	14				28			

The next step in our analysis is to summarize the demand conclusions derived previously. For purposes of this analysis, we define demand as age- and income- qualified renter households for each of the unit types proposed at the subject property. Unit-level demand estimates are found in the body of the chart found below; project-level demand estimates are found in the column and row totals.

Please note: Because of income-band overlap, unit-level demand may not add up to project-level demand. The overlap, which was quantified in the demand estimates presented earlier, has been accounted for in our estimates of project-level demand.

	Gross Demand												
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot				
0BR													
1BR			155						155				
2BR			107	258	655				1,020				
3BR													
4BR													
Tot			244	258	655				1,150				

The next step in our analysis is to compute the capture rate for the project. For purposes of this computation, we define capture rate as the number of subject property units divided by gross demand. Underwriters often utilize capture rate limits of 10 to 25 percent using this methodology. Our estimates are presented below:

	Capitile Rales (Subject Property Onlis / Gloss Demand)											
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot			
0BR												
1BR			0.6%						0.6%			
2BR			1.9%	4.3%	2.1%				2.6%			
3BR												
4BR												
Tot			1.2%	4.3%	2.1%				2.4%			

Capture Rates (Subject Property Units / Gross Demand)

The next step in our analysis is to tabulate the number of vacant competing & pipeline units in the market area by

unit/income type. This information will be used to further refine our capture rate estimate for the subject property. A table showing the distribution of vacant competing & pipeline units is found below.

	Vacant Competing & Pipeline Units											
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot			
0BR												
1BR												
2BR				1	3				4			
3BR												
4BR												
Tot				1	3				4			

Vacant Competing & Pipeline Units

The next step in our analysis is to subtract the number of vacant competing & pipeline units from gross demand to arrive at a net demand estimate for the subject property units. As described earlier, unit-level net demand estimates are found in the body of the chart found below; project-level net demand estimates are found in the column and row totals.

Please note: Because of income-band overlap, unit-level net demand may not add up to project-level net demand. The overlap, which was quantified in the demand estimates presented earlier, has been accounted for in our estimates of project-level net demand.

	Net Demand (Closs Demand - Vacant Competing & Epeine Onits)										
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot		
0BR											
1BR			155						155		
2BR			107	257	652				1,016		
3BR											
4BR											
Tot			244	257	652				1,146		

The next step in our analysis is to compute the capture rate for the project. For purposes of this computation, we define capture rate as the number of subject property units divided by net demand. A capture rate in excess of 20 percent is considered excessive using this methodology. Our estimates are presented below:

	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot			
0BR												
1BR			0.6%						0.6%			
2BR			1.9%	4.3%	2.1%				2.7%			
3BR												
4BR												
Tot			1.2%	4.3%	2.1%				2.4%			

Capture Rates (Subject Property Units / Net Demand)

In our opinion, the estimated project-level capture rate suggests an appropriate number of units for the subject property. The unit level capture rates suggest an appropriate mix of units for the subject property.

Penetration Rates

In this section, we summarize our demand conclusions and estimate the penetration rate for the subject property. Our analysis begins by summarizing the estimated number of vacant subject property units on the date of market entry.

Subject Property Units (Total)											
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot		
0BR											
1BR			1						1		
2BR			5	22	28				55		
3BR											
4BR											
Tot			6	22	28				56		

 Subject Property Units (Vacant at Market Entry)											
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot		
 0BR											
1BR			1						1		
2BR			2	11	14				27		
3BR											
 4BR											
 Tot			3	11	14				28		

The next step in our analysis is to summarize the demand conclusions derived previously. For purposes of this analysis, we define demand as age- and income- qualified renter households for each of the unit types proposed at the subject property. Unit-level demand estimates are found in the body of the chart found below; project-level demand estimates are found in the column and row totals.

Please note: Because of income-band overlap, unit-level demand may not add up to project-level demand. The overlap, which was quantified in the demand estimates presented earlier, has been accounted for in our estimates of project-level demand.

	Gross Demand												
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot				
0BR													
1BR			155						155				
2BR			107	258	655				1,020				
3BR													
4BR													
Tot			244	258	655				1,150				

The next step in our analysis is to tabulate the number of competing & pipeline units in the market area by unit/income type. This information will be used to derive our penetration rate estimate for the subject property. A table showing the distribution of competing & pipeline units is found below.

	Competing & Pipeline Units											
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot			
0BR												
1BR												
2BR			2	29	347				378			
3BR												
4BR												
Tot			2	29	347				378			

The next step in our analysis is to compute inclusive supply for the market area by unit/income type. Inclusive

supply will be taken into account in our penetration rate estimate for the subject property. For purposes of this estimate, inclusive supply consists of vacant subject property units plus competing & pipeline units.

	inclusive Supply (Subject Floperty Onlis + Competing & Flopente Onlis)											
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot			
0BR												
1BR			1						1			
2BR			4	40	361				405			
3BR												
4BR												
Tot			5	40	361				406			

Inclusive Supply (Subject Property Units + Competing & Pipeline Units)

The next step in our analysis is to compute the penetration rate for the project. For purposes of this computation, penetration rate is defined as inclusive supply divided by gross demand. A penetration rate in excess of 100 percent is considered excessive using this methodology. Our estimates are presented below:

							/		
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot
0BR									
1BR			0.6%						0.6%
2BR			3.7%	15.5%	55.1%				39.7%
3BR									
4BR									
Tot			2.0%	15.5%	55.1%				35.3%

Penetration Rates (Inclusive Supply / Gross Demand)

In our opinion, the estimated project-level penetration rate suggest an appropriate number of units for the subject property. The unit-level penetration rates suggest an appropriate mix of units for the subject property.

Absorption Period

In this section, we estimate the absorption period for the subject property. Our analysis begins by summarizing the estimated number of vacant subject property units on the date of market entry.

	Sub	30%	40%	50%	60%	70%	80%	Mkt		
0BR										
1BR			1							
2BR			5	22	28					
3BR										
4BR										

	Subject Property Units (Vacant at Market Entry)												
	Sub	30%	40%	50%	60%	70%	80%	Mkt					
0BR													
1BR			1										
2BR			2	11	14								
3BR													
4BR													

The next step in our analysis is to summarize the demand conclusions derived previously. For purposes of this analysis, we define demand as age- and income- qualified renter households for each of the unit types proposed at the subject property. Our analysis uses the unit-level demand estimates derived previously.

	Gross Demand											
	Sub	30%	40%	50%	60%	70%	80%	Mkt				
0BR												
1BR			155									
2BR			107	258	655							
3BR												
4BR												

The next step in our analysis is to apply an annual growth & movership rate to derive an annual rental household growth & movership estimate for the market area. Our estimates are found in the tables below.

Annual Growth & Mover	ship Rate
Growth	0.1%
Movership	35.9%
Total	36.1%

Growth & Movership Estimate

	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR			56					
2BR			39	93	236			
3BR								
4BR								

The next step in our analysis is to account for secondary market area migration in our annual rental household growth & movership estimate for the market area. Our estimates are found in the tables below.

> Secondary Market Area 20%

	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR			70					
2BR			48	116	295			
3BR								
4BR								

The next step in our analysis is to estimate fair share, or the proportion of growth and movership that we would expect the subject property to capture. The fair share analysis is used extensively in single-family, multifamily, commercial, and retail market studies. The books entitled <u>Market Analysis for Valuation Appraisals</u> (1994, Appraisal Institute) and <u>Market Analysis and Highest & Best Use</u> (2005, Appraisal institute) provide a good overview of this technique and its application to a variety of property types.

Based on our review of the subject and competing properties, along with their relative conditions/locations, we arrive at the following fair share estimates for the various unit/income types at the subject property.

	Competing Properties											
	Sub	30%	40%	50%	60%	70%	80%	Mkt				
0BR												
1BR	1				2			5				
2BR	1		1	2	6			6				
3BR	1		1	2	5			4				
4BR												

Fair Share											
	Sub	30%	40%	50%	60%	70%	80%	Mkt			
0BR											
1BR			50.0%								
2BR			50.0%	40.0%	30.0%						
3BR											
4BR											

Applying the concluded fair share estimates to annual growth & movership and dividing by twelve yields the following monthly absorption rate estimates for the various unit/income types at the subject property.

_	Montally Absolption Nate Estimate								
_		Sub	30%	40%	50%	60%	70%	80%	Mkt
_	0BR								
	1BR			2.9					
	2BR			2.0	3.9	7.4			
	3BR								
	4BR								

The next step in our analysis is to estimate stabilized occupancy by unit/income type for the subject property. These estimates, which were based on data previously presented in the supply analysis and rent comparability analysis sections of this report, are found below.

	Rental Property Inventory, Confirmed, Inside Market Area, Family, Stabilized Occupancy							
	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR	100%				99%			99%
2BR	100%		100%	97%	99%			100%
3BR	100%		100%	100%	100%			100%
4BR								

Rental Property Inventory.	Confirmed, Insid	e Market Area.	Family, Stabilized	d Occupanc

	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR				100%	100%			100%
2BR				97%	98%			100%
3BR								
4BR								

Concluded Stabilized Occupancy Rate

	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR			97%					
2BR			97%	97%	97%			
3BR								
4BR								

Applying the stabilized occupancy rate estimates to the number of vacant subject property units at market entry, yields the number of occupied units by unit/income type at stabilization as set forth below.

Occupied Units at Stabilization

	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR			1					
2BR			2	11	14			
3BR								
4BR								

Dividing the number of occupied units at stabilization by the monthly absorption rate yields an absorption period estimate by unit/income type for the various units at the subject property. Underwriters often utilize absorption period limits of 12 to 18 months for projects similar to the subject property. Our absorption period estimates are found below.

	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR			<1					
2BR			<1	3	2			
3BR								
4BR								

Absorption Period (Months to Stabilization)

Our analysis suggests that the subject property will stabilize at 97 percent occupancy. We estimate 3 months of absorption and an average absorption rate of 9.9 units per month for this project. In our opinion, the absorption period suggests an appropriate number and mix of units for the subject property.

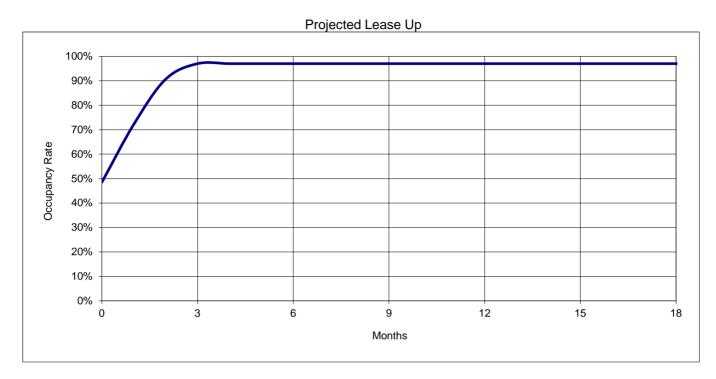

Absorption rates for multifamily properties depend on a variety of factors: (1) The competitive environment in which the property resides; (2) The pricing of the subject property units relative to competing units, (3) The presence of rent or income restrictions at the subject property; and (4) The availability of any rent concessions or rental assistance at the subject property. Subsidized properties normally lease up at a rate of 15-20 units per month. Unsubsidized properties with rent and income restrictions tyically fill at a rate of 5-10 units per month. Market rate properties normally lease up at a rate of 10-15 units per month.

As part of our analysis, we inquired about the absorption history for every property we surveyed. The following list summarizes our findings:

Key	Project	Built	Renovated	Rent Type	Осс Туре	Tot Units	Ab Rte
027	Piedmont Lane Apartments	2012	na	Restricted	Family	16	2.7
040	Warrenton Manor Phase 2	2016	na	Restricted	Elderly	30	15.0
041	Washburn Place	2018	na	Restricted	Family	30	20.0

Absorption Analysis

In this section, we analyze the anticipated lease up for the subject property. We begin our analysis by taking the the absorption period conclusions from the previous section and restating them graphically as illustrated below.

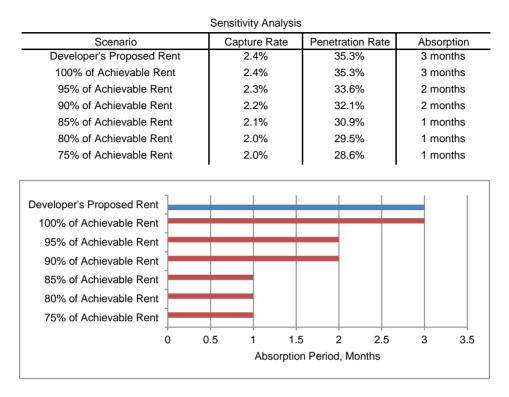

Our analysis suggests that the subject property will achieve 70 percent occupancy in 0 months, 80 percent occupancy in 1 months, and 90 percent occupancy in 1 months. We anticipate that the subject property will stabilize at 97 percent occupancy in 3 months.

It is important to note that this analysis does not account for pent-up demand, pre-leasing efforts or rent concessions. In our opinion, an effective pre-leasing effort could result in a month-for-month reduction in the estimated absorption period for this project. In addition, any concessions or rent subsidies not accounted for already in this analysis could cut capture rates and absorption periods significantly.

Sensitivity Analysis

We also explored the relationship between rent level, capture rates, penetration rates, and absorption period. For purposes of this analysis, we forecasted demand and fill rates at 75%, 80%, 85%, 90%, 95% and 100% of achievable rent (derived earlier in this report). Our analysis is summarized below:

Our analysis suggests the following relationship between rent levels and fill rates: At the developer's proposed rent we anticipate a 3-month absorption period; at 100% of achievable rent we anticipate a 3-month absorption period; at 75% of achievable rent we anticipate a 1-month absorption period.

VHDA DEMAND ANALYSIS

Overview

In this section we evaluate demand for the subject property using the VHDA demand methodology. For purposes of this analysis, we define VHDA demand as the number of new income-qualified and existing income-qualified overburdened and substandard renter households that would qualify to live at the subject property at the lesser of achievable rents or the sponsor's proposed rents. Our analysis accounts for any rent subsidies for the subject property.

Our analysis begins by developing a breakdown of the number of renter households, by income, by size as of the date of market entry for this development. This breakdown, which utilizes demographic data presented earlier in this report, is presented below:

	2019	\$				2019			
Min		Max	1 Person	2 Person	3 Person 4 Person 5 Person			6+ Person	Total
\$0	to	\$9,999	136	39	33	20	16	7	251
\$0	to	\$19,999	317	116	139	63	40	11	686
\$0	to	\$29,999	479	177	214	120	64	18	1,072

Please note: This demand estimate does not account for income band overlap at the project level. A demand estimate taking this into consideration will be developed later.

Demand Estimate

In this section, we derive our overburdened demand and capture rate estimates for the subject property. Our analysis, which begins with the income-qualified renter household estimates developed above, is found below.

 Income Qualified Renter Households									
	Sub	30%	40%	50%	60%	70%	80%	Mkt	
 Tot			242	257	655				

The next step in our analysis is to account for 2 years of growth to estimate the demand stemming from new income qualified rental households. Our estimates are found below.

Annual Renter Household Growth Rate	
-------------------------------------	--

0.1%

New Rental Households								
	Sub	30%	40%	50%	60%	70%	80%	Mkt
Tot			1	1	2			

The next step in our analysis is to estimate existing demand stemming from income-qualified overburdened renter households in this market area. Our estimates are found below.

Overburdened Renter Households

25.7%

Existing Households - Rent Overburdened									
	Sub	30%	40%	50%	60%	70%	80%	Mkt	
Tot			62	66	169				

The next step in our analysis is to estimate existing demand stemming from income-qualified substandard renter households in this market area. Our estimates are found below.

Substandard Renter Households	
-------------------------------	--

8.0%

Existing Households - Substandard								
	Sub	30%	40%	50%	60%	70%	80%	Mkt
Tot			19	21	53			

The next step in our analysis is to account for elderly homeowners likely to convert to rental housing. This component may not comprise more than 20 percent of total demand. Our estimates are found below.

Elderly Homeowners Likely to Convert to Rental Housing

	Sub	30%	40%	50%	60%	70%	80%	Mkt
Tot								

The next step in our analysis is to account for existing qualifying tenants likely to remain after renovation. Our estimates are found below.

Subject Property Units (Total)								
	Sub	30%	40%	50%	60%	70%	80%	Mkt
Tot			6	22	28			

	<u> </u>	-		- ·		D
Existina	Qualifving	Tenants	Likelv to	Remain	after	Renovation

	Sub	30%	40%	50%	60%	70%	80%	Mkt
Tot			3	11	14			

The next step in our analysis is to tally up total demand for the subject property. Our estimates are found below.

				Total Demand				
	Sub	30%	40%	50%	60%	70%	80%	Mkt
Tot			85	99	237			

The next step in our analysis is to tabulate the number of vacant competing & pipeline units in the market area by unit/income type. This information will be used to further refine our capture rate estimate for the subject property. A table showing the distribution of vacant competing & pipeline units is found below.

Vacant Competing & Pipeline Units								
	Sub	30%	40%	50%	60%	70%	80%	Mkt
Tot				1	3			

The next step in our analysis is to subtract the number of vacant competing & pipeline units from total demand to arrive at a net demand estimate for the subject property. Our estimates are found below.

Net Demand (Total Demand - Vacant Competing & Pipeline Units)

		Hot Bollian	a (Total Bollian		sinpoling a r ip			
	Sub	30%	40%	50%	60%	70%	80%	Mkt
Tot			85	98	234			

The next step in our analysis is to compute the capture rate for the project. For purposes of this computation, we define capture rate as the total number of subject property units divided by net demand. Underwriters often utilize capture rate limits of 10 to 20 percent using this methodology. Our estimates are presented below:

Capture Rates (Subject Property Units / Net Demand)

	Sub	30%	40%	50%	60%	70%	80%	Mkt
Tot			7.0%	22.6%	12.0%			

Our findings are summarized below.

Project-Wide Capture Rate - LIHTC Units	13.4%
Project-Wide Capture Rate - Market Units	
Project-Wide Capture Rate - All Units	13.4%
Project-Wide Absorption Period (Months)	3 months

Please note: Project-wide capture rate estimates do not account for income band overlap at the project level.

Aspen Apartments South is an existing multifamily development located at 11166 Willow Drive in Bealeton, Virginia. The property, which consists of 100 apartment units, was originally constructed in 1983 with conventional financing. All units are set aside as market rate units. The property currently stands at 100 percent occupancy.

Rectory (The) Apartments at the Plains is an existing multifamily development located at 4341 Fauquier Avenue in Plains, Virginia. The property, which consists of 2 apartment units, was originally constructed in 1992. This property is currently operated as a rent restricted property. The property currently stands at 100 percent occupancy.

STATEMENT OF ASSUMPTIONS & LIMITING CONDITIONS

- The title to the subject property is merchantable, and the property is free and clear of all liens and encumbrances, except as noted.
- No liability is assumed for matters legal in nature.
- Ownership and management are assumed to be in competent and responsible hands.
- No survey has been made by the appraiser. Dimensions are as supplied by others and are assumed to be correct.
- The report was prepared for the purpose so stated and should not be used for any other reason.
- All direct and indirect information supplied by the owner and their representatives concerning the subject property is assumed to be true and accurate.
- No responsibility is assumed for information supplied by others and such information is believed to be reliable and correct. This includes zoning and tax information provided by Municipal officials.
- The signatories shall not be required to give testimony or attend court or be at any governmental hearing with respect to the subject property unless prior arrangements have been made with the client.
- Disclosure of the contents of this report is governed by the By-Laws and Regulations of the Appraisal Institute.
- The legal description is assumed to be accurate.
- This report specifically assumes that there are no site, subsoil, or building contaminates present resulting from residual substances or construction materials, such as asbestos, radon gas, PCB, etc. Should any of these factors exist, the appraiser reserves the right to review these findings, review the value estimates, and change the estimates, if deemed necessary.
- The Americans with Disabilities Act (ADA) became effective January 26, 1992. We have not made a specific compliance survey and analysis of this property to determine whether or not it is in conformity with
- This analysis specifically assumes that the subject property is operated as described in this report.
- This analysis specifically assumes that the subject property is constructed/rehabilitated as described in this report.
- This analysis specifically assumes that the subject property is financed as described in this report.
- This analysis specifically assumes the timing set forth in this report.

CERTIFICATION

I certify that, to the best of my knowledge and belief:

- The statements of fact contained in this report are true and correct.
- The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
- I have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved.
- I have performed no services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.
- I have no bias with respect to the property that is the subject of this report or to the parties involved with this assignment.
- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of the appraisal.
- The reported analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the requirements of the Uniform Standards of Professional Appraisal Practice.
- I made a personal inspection of the property that is the subject of this report.
- No one provided significant real property appraisal assistance to the person signing this certification.
 Debbie Rucker and Frank Victory (Allen & Associates Consulting) assisted in compiling the data used in this report.
- The reported analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the requirements of the Code of Professional Ethics and Standards of Professional Appraisal Practice of the Appraisal Institute.
- The use of this report is subject to the requirements of the Appraisal Institute relating to review by its duly authorized representatives.
- As of the date of this report, I have completed the Standards and Ethics Education Requirements for Members of the Appraisal Institute.
- I am presently licensed in good standing as a Certified General Real Estate Appraiser in the states of Delaware, Georgia, Maryland, North Carolina, South Carolina, and Virginia, allowing me to appraise all types of real estate.

Respectfully submitted: ALLEN & ASSOCIATES CONSULTING, INC.

Jeff Carroll

VHDA CERTIFICATION

I affirm the following:

1) I have made a physical inspection of the site and market area.

2) The appropriate information has been used in the comprehensive evaluation of the need and demand for the proposed rental units.

3) To the best of my knowledge the market can support the demand shown in this study. I understand that any misrepresentation in this statement may result in the denial of participation in the Low Income Housing Tax Credit Program in Virginia as administered by the VHDA.

4) Neither I nor anyone at my firm has any interest in the proposed development or a relationship with the ownership entity.

5) Neither I nor anyone at my firm nor anyone acting on behalf of my firm in connection with the preparation of this report has communicated to others that my firm is representing VHDA or in any way acting for, at the request of, or on behalf of VHDA.

6) Compensation for my services is not contingent upon this development receiving a LIHTC reservation or allocation.

March 8, 2019

Jeff Carroll

NCHMA MARKET STUDY INDEX

Introduction: Members of the National Council of Housing Market Analysts provide the following checklist referencing various components necessary to conduct a comprehensive market study for rental housing. By completing the following checklist, the NCHMA Analyst certifies that he or she has performed all necessary work to support the conclusions included within the comprehensive market study. By completion of this checklist, the analyst asserts that he/she has completed all required items per section.

JEFFREY B. CARROLL P.O. Box 79196 Charlotte, North Carolina 28271 Phone: 704-905-2276 | Fax: 704-220-0470 E-Mail: jcarroll@mba1988.hbs.edu

Summary

Founder of Tartan Residential, a firm specializing in the development of workforce and affordable housing.

Co-founder of Delphin Properties, a firm specializing in the acquisition and development of manufactured home communities.

Founder of Allen & Associates Consulting, a development consulting firm specializing in workforce and affordable housing.

Wrote articles on workforce and affordable housing, development, property management, market feasibility, and financial analysis for <u>Urban Land</u> magazine, <u>The Journal of Property Management</u>, <u>Community Management</u> magazine, <u>Merchandiser</u> magazine, <u>HousingThink</u>, and a publication of the Texas A&M Real Estate Research Center known as <u>Terra Grande</u>.

Conducted seminars on workforce and affordable housing, development, property management, market feasibility, and financial analysis for the American Planning Association, Community Management magazine, the Georgia Department of Community Affairs, the Manufactured Housing Institute, the National Association of State and Local Equity Funds, the Virginia Community Development Corporation, and the National Council of Housing Market Analysts.

Specialties: Specialties include workforce and affordable housing, low-income housing tax credits, taxexempt bond transactions, multifamily, manufactured housing, development, development consulting, feasibility studies, market analysis, rent comparability studies, appraisals, capital needs assessments, and utility studies.

Experience

President | Tartan Residential, Inc. | Charlotte, NC | 1997 - present

Founder of Tartan Residential, a firm specializing in the development of workforce and affordable housing. Major projects include:

- Buchanan's Crossing Subdivision A 40-unit duplex development serving families in Kansas City, KS. The estimated cost of this three-phase project is \$8.0 million. This mixed income project, targeting families between 50% and 120% of area median income, is financed with a mixture of conventional debt and tax credit equity. Construction commenced in 2016.
- Davidson's Landing A proposed 115-unit garden apartment community serving families in Kansas City, KS. The estimated cost of this project is \$19 million. This workforce housing development project, which targets families between 30% and 80% of area median income, is proposed to be financed with tax-exempt bonds. Construction is planned to begin in 2019.
- Fraser Court A proposed 120-unit garden apartment community serving families in Monroe, NC. The estimated cost of this project is \$20 million. This workforce housing development project, which targets families between 40% and 80% of area median income, is proposed to be financed with tax-exempt bonds. Construction is planned to begin in 2019.
- Graham Ridge A proposed 96-unit garden apartment community serving families in Charlotte, NC. The estimated cost of this project is \$16 million. This workforce housing development project,

which targets families between 40% and 80% of area median income, is proposed to be financed with tax-exempt bonds. Construction is planned to begin in 2019.

Co-Founder | Delphin Properties LLC | Charlotte, NC | 1998 - present

Co-founder of Delphin Properties, a firm specializing in the acquisition and development of manufactured home communities. Major projects include:

- Crystal Lakes A 338-unit manufactured home community serving seniors in Fort Myers, Florida. Purchased the partially-constructed development, completed construction, and sold it for a \$1 million profit.
- Mahler's Glen A 348-unit development originally planned as a manufactured home community serving families in Garner, North Carolina. Secured zoning and site plan approval, engineered the property (including a private wastewater treatment facility), and sold it to a national homebuilder for a \$2 million profit.
- Beacon Wood A 363-unit development originally planned as a manufactured home community serving families in Crockery Township, Michigan. Secured zoning and site plan approval, engineered the property, and sold it to a regional homebuilder for a \$1 million profit.

President | Allen & Associates Consulting, Inc. | Charlotte, NC | 2000 - present

Founder of Allen & Associates Consulting, a real estate advisory firm specializing in workforce and affordable housing. Practice areas include low-income housing tax credits, tax-exempt bond transactions, HUD assisted and financed multifamily, USDA-RD assisted and financed properties, public housing, historic tax credits, conventional multifamily, and manufactured housing. Services include development consulting, feasibility studies, market analysis, rent comparability studies, appraisals, capital needs assessments, and utility studies. Performed over 3000 development consulting assignments in 46 states since 2000. Major projects include:

- Market Analysis Completed market studies for 13 proposed tax credit apartment developments on behalf of the Georgia Department of Community Affairs. The portfolio included 5 family and 8 senior communities. Our analysis identified the 4 best deals for the housing finance agency to consider funding.
- Appraisals Developed a disposition plan for a 30-property portfolio of apartments on behalf of a private owner. The 921-unit portfolio (located in MD, DE, PA and VA) was valued at \$23 million. Our client relied on our valuations and advice to maximize sales proceeds for the portfolio.
- Capital Needs Assessments Completed capital needs assessments for an 8-property portfolio of RD-financed apartments on behalf of a private developer. The portfolio (located in FL) included 6 family and 2 senior communities. Our client utilized our assessments to develop a scope of work for the proposed acquisition and renovation of the 214-unit portfolio.
- Utility Allowance Studies Completed utility allowance studies for a portfolio of tax credit apartments on behalf of a large national owner/developer. The portfolio (located in CT, DC, IL, IN, MA, NC, OH, PA and VA) included 31 properties. Our client utilized our research to maximize rents and net operating income for the portfolio.
- Underwriting Conducted a financial review on behalf of a local housing authority for the proposed redevelopment of a vacant historic textile mill into loft apartments. Our client had been asked to issue \$4 million in tax-exempt bonds for the \$15 million project. Our assistance in underwriting the transaction resulted in the green light for the development.

Development Director | Clayton, Williams & Sherwood, Inc. | Austin, TX | 1995 - 1997

Development Director for Clayton, Williams & Sherwood, a privately-owned operator of manufactured home communities and apartment complexes. Major projects included:

- Multifamily Development Managed the construction and lease-up of two apartment communities consisting of 564 units and valued at \$38 million. Each property leased up in excess of 25 units per month.
- Manufactured Home Community Development Put together development plans for 4 manufactured home communities and 2 manufactured home subdivisions consisting of 2047 units and valued at \$63 million.

Assistant to the President | Southwest Property Trust | Dallas, TX | 1993 - 1995

Assistant to the President for Southwest Property Trust, a large apartment REIT. Provided support to management personnel operating a 12,000-unit apartment portfolio.

Investment Analyst/Manager | GE Capital | Dallas, TX | 1991 - 1993

Investment Analyst/Manager for GE Capital's Residential Construction Lending business. Assisted in the management of a \$500 million investment portfolio including 30 single family residential land development investments and 70 single family construction lines of credit.

<u>Regional Manager | Clayton, Williams & Sherwood, Inc. | Newport Beach, CA | 1989 - 1991</u> Regional Manager for Clayton, Williams & Sherwood, a privately-owned operator of manufactured home communities and apartment complexes. Major projects included:

- Multifamily Management Management of a 1200-unit apartment portfolio valued at over \$72 million. Implemented a portfolio-wide 10 percent rent increase while cutting operating expenses 3 percent resulting in a \$7 million increase in portfolio value.
- Manufactured Home Community Management Management of a 1200-unit manufactured home community portfolio valued at over \$36 million. Implemented a 15 percent rent increase in a 500-unit community resulting in a \$4 million increase in property value.

Education

Harvard Business School | MBA, General Management, Real Estate, Economics | 1986 - 1988 Graduated in 1988 with an MBA from Harvard Business School. Emphasis in General Management and Real Estate with a minor concentration in Economics.

Clemson University | BS, Engineering, Economics | 1978 - 1983

Graduated in 1983 with a BS in Engineering from Clemson University. Minor concentration in Economics. Honors included Dean's List and Alpha Lambda Delta honorary. Elected officer for Phi Delta Theta social fraternity. Awarded scholarship on Clemson's varsity wrestling team.

Certifications, Designations and Affiliations

Mr. Carroll is a certified general appraiser, licensed to appraise real estate in the states of Delaware, Georgia, Maryland, North Carolina, South Carolina and Virginia. Mr. Carroll is also a designated member of the Appraisal Institute (MAI).

Mr. Carroll is a peer-reviewed member of the National Council of Housing Market Analysts (NCHMA), where he served on the Executive Committee and chaired the Data and Ethics Committees.

FY 2019 FAIR MARKET RENT DOCUMENTATION SYSTEM

The FY 2019 Culpeper County, VA HUD Metro FMR Area / Washington-Arlington-Alexandria, DC-VA-MD HUD Metro FMR Area Small Area FMRs

The following are the steps used to calculate the 2-bedroom rent of \$1,420 for ZIP Code 20186.

- 1. Evaluate the current 5-year ACS Adjusted Standard Quality (ASQ) 40th percentile 2-bedroom gross rent. If the estimate has a margin of error ratio of less than 50% and at least one hundred survey cases, use this as the ZCTA base rent for the SAFMR for the current year.
- 2. If the 2-Bedroom rent is not reliable, evaluate the 1-Bedroom gross rent. If this estimate is reliable, convert it to a 2-bedroom rent using the appropriate bedroom ratio of the parent HUD metropolitan area.
- 3. If the 2 and 1-Bedroom rents are not reliable, evaluate the 3-Bedroom gross rent. If this estimate is reliable, convert it to a 2-bedroom rent using the appropriate bedroom ratio of the parent HUD metropolitan area.
- 4. Repeat the above three steps for the previous two ACS years. If a ZIP code has reliable 2-Bedroom equivalent rents in at least two or the three ACS years, update the non-current year ACS estimates for inflation, and take the average of the reliable estimates as the base rent for FY2019.
- 5. Calculate a FY2019 Small Area Fair Market Rent by multiplying this base rent by the recent mover factor, the CPI gross rent update factor, and the national trend factor.
- 6. If the ZIP code does not have a reliable base rent, evaluate the quality if its 5-year ACS Adjusted Standard Quality (ASQ) median all bedroom gross rent for the previous three ACS years. If at least two of these three estimates are reliable, calculate ratios of the ZIP code median gross rent estimate to that of the ZIP code's parent HUD metropilitan area. Take the average of these ratios. If the ZIP code does not have reliable ZIP code median gross rents, examine the reliability of the ZIP code's parent county. If at least two of these three estimates are reliable, calculate ratios of the county median gross rent estimate to that of the county's parent HUD metropilitan area. If county level estimates are not reliable, set the ratio to 1.
- 7. If necessary apply the ZIP code rent ratio the the FY2019 2-Bedroom Fair Market Rent for the ZIP code's parent HUD metropolitan area.
- 8. Ensure that the 2-Bedroom SAFMR does not exceed 150% of the parent HUD metropolitan FMR.
- 9. Ensure the 2-Bedroom SAFMR is not lower than the ZIP code's parent state minimum FMR.
- 10. Calculate SAFMRs for other bedroom sizes using the bedroom ratios for the ZIP code's parent metropolitan area.
- 11. Ensure that the SAFMRs do not fall below the appropriate 90% floor.

The FY 2019 Culpeper County, VA HUD Metro FMR Area / Washington-Arlington-Alexandria, DC-VA-MD HUD Metro FMR Area Small Area FMRs for All Bedroom Sizes in ZIP Code 20186

FY2019 SAFMRs By Unit Bedrooms						
Efficiency	One-Bedroom	Two-Bedroom	Three-Bedroom	Four-Bedroom		
\$1,170	\$1,230	\$1,420	\$1,870	\$2,320		

The remainder of this page provides complete documentation of the development of the Final FY 2019 2 Bedroom Small Area Fair Market Rent (FMR) for 20186 within the Culpeper County, VA HUD Metro FMR Area / Washington-Arlington-Alexandria, DC-VA-MD HUD Metro FMR Area. 1. Evaluate the bedroom size estimates of 40th percentile gross rent for 20186.

ACS Release	Bedroom Size	Adjusted Standard Quality Estimate of 40 th Percentile Gross Rent for 20186	Adjusted Standard Quality Margin of Error of 40 th Percentile Gross Rent for 20186	Adjusted Standard Quality count indicator of 40 th Percentile Gross Rent for 20186	Margin of Error Ratio	Reliable?	Two Bedroom Adjustment, if applicable	Inflation Adjustment, if applicable
	2-Bedroom	\$1,085	\$44	1	\$44 / \$1,085 = 0.04	No	N/A	N/A
2016	1-Bedroom	\$846	\$81	1	\$81 / \$846 = 0.10	No	\$1,070	N/A
	3-Bedroom	\$1,444	\$191	1	\$191 / \$1,444 = 0.13	No	\$1,010	N/A
	2-Bedroom	\$1,082	\$37	1	\$37 / \$1,082 = 0.03	No	N/A	N/A
2015	1-Bedroom	\$819	\$86	1	\$86 / \$819 = 0.11	No	\$1,036	N/A
	3-Bedroom	\$1,366	\$90	1	\$90 / \$1,366 = 0.07	No	\$955	N/A
	2-Bedroom	\$1,090	\$37	1	\$37 / \$1,090 = 0.03	No	N/A	N/A
2014	1-Bedroom	\$782	\$45	1	\$45 / \$782 = 0.06	No	\$989	N/A
	3-Bedroom	\$1,411	\$133	1	\$133 / \$1,411 = 0.09	No	\$987	N/A

2. Since 20186 does not have a useable bedroom base rent, its SAFMR will be based on a rent ratio.

3. ZCTA level estimates of median gross rent will be used as the numerator for the small area rent ratio provided at least 2 of the most recent 3 estimates from 5-Year ACS samples are statistically reliable. Reliability is determined by calculating a margin of error ratio for each estimate. If the margin of error is less than 50% of the estimate, then it is considered reliable.

ACS Release	Adjusted Standard Quality Estimate of Median Gross Rent for 20186	Adjusted Standard Ouality Margin of Error of Median Gross Rent for 20186	Margin of Error Ratio	Reliable?	Adjusted Standard Quality Estimate of Median Gross Rent for Culpeper County, VA HUD Metro FMR Area / Washington-Arlington- Alexandria, DC-VA-MD HUD Metro FMR Area	ZIP Code / Metro Ratio
2016	\$1,222	\$102	\$102 / \$1,222 = 0.08	Yes	\$1,581	\$1,222 / \$1,581 0.773
2015	\$1,189	\$74	\$74 / \$1,189 = 0.06	Yes	\$1,539	\$1,189 / \$1,539 0.772
2014	\$1,199	\$76	\$76 / \$1,199 = 0.06	Yes	\$1,512	\$1,199 / \$1,512 0.793

4. Because 3 out of 3 ZCTA level estimates are reliable, their average will be used as the numerator for the small area rent ratio.

2014 Ratio	2015 Ratio	2016 Ratio	Average of Reliable Ratios (Small Area Rent Ratio)
0.793	0.772	0.773	0.780

 Apply the Small Area Rent Ratio for 20186 to the FY 2019 Metropolitan Fair Market Rent for Culpeper County, VA HUD Metro FMR Area / Washington-Arlington-Alexandria, DC-VA-MD HUD Metro FMR Area, Rounding to the Nearest \$10

ZIP Code 20186	Metropolitan Fair Market Rent for Culpeper County, VA	Preliminary 2 Bedroom

Before using the numbers from the Rent & Income Limit Calculator©, we strongly recommend that you check with the applicable state housing agency to verify that the state agrees with the numbers. The numbers round down to the nearest \$1.

This Rent & Income Limit Calculator© does not calculate low-income housing tax credit (LIHTC) limits greater than 50% LIHTC or 60% LIHTC limits, depending on the minimum set-aside elected with the IRS on Form 8609 in accordance with Internal Revenue Code Section 42(i)(3)(A). In other words, if the 20/50 minimum set-aside was elected then 50% LIHTC is the maximum rent calculated and allowed to qualify as a tax credit unit; or if the 40/60 minimum set-aside was elected then 60% LIHTC is the maximum allowed to qualify as a tax credit unit.

<u>Revenue Ruling 89-24</u> require that the LIHTC rent & income levels start their calculations with the HUD published very low-income (VLI) amounts because the HUD published VLI amounts include certain HUD adjustments, such as high housing cost for high FMR areas to increase income, and state non-metropolitan median income to provide a floor for income limits. The result is that many counties have VLI amounts that are different than 50% of the AMI published by HUD (the 4-person AMGI we have shown above). The Novogradac Rent & Income Calculator© starts by default with the HUD published VLI amounts in accordance with <u>Revenue Ruling 89-24</u>.

⁽¹⁾ The rent and income limits for each year are effective beginning with the effective date shown above. There is a grace period for 45 days to implement the new rent and income limits, which means that the old limits can be relied upon for 45 days after the effective date of the new limits. For example income limits effective 12/04/2012, can be relied on until 1/17/2013. For more information, see <u>Revenue Ruling 94-57</u>.

IRS LIHC Newsletter #48 and IRS LIHC Newsletter #50 clarify that for projects placed in service during the 45-day grace period, the owner may choose the new or the old income limits. For example, if a project was placed in service on 1/8/2013 and the 2012 income limits are higher than the 2013 income limits, an owner may use the higher income limits from 2012 to income qualify tenants and set rents accordingly because the project was placed in service with the 45-day grace period.

Please note, the Rent & Income Limit Calculator does not apply a 45-day grace period automatically. The user needs to indicate that the placed in service date and/or gross rent floor date occurred 45 days earlier (in the prior HUD Fiscal Year) if they want to apply the 45-day rule under <u>Revenue Ruling 94-57</u> that allows owners to rely on the prior year. Therefore, projects that were placed in service during the 45-day grace period, and want to use the prior year, should select that they were placed in service as of the prior year. For example, if a project placed in service on 1/8/2013, and the project wanted to use the 45-day grace period, the user should select that their project was in service prior to 12/4/2012. Similarly, projects that have a gross rent floor effective as of the carryover allocation date (or reservation letter date for bond projects) during the 45-day grace period, and want to use the prior year, should select that the gross rent floor was effective as of the prior year. For example, if a project received a carryover allocation letter on 1/8/2013, and the owner did not elect placed in service date as the gross rent floor, and the project wanted to use the 45-day grace period, and want to use the prior year, should select that the gross rent floor was effective as of the prior year. For example, if a project received a carryover allocation letter on 1/8/2013, and the owner did not elect placed in service date as the gross rent floor, and the project wanted to use the 45-day grace period, the user should select that their gross rent floor was effective prior to 12/4/2012.

⁽²⁾ For HUD FY 2013 HUD originally issued income limits on December 4, 2012 then issued revised income limits on December 11, 2012. In <u>IRS LIHC Newsletter #50</u>, the IRS has stated that the effective date for the revised FY 2013 income limits is December 4, 2012. Based on this guidance, the Rent & Income Limit Calculator© uses December 4, 2013 for the effective date for the revised FY 2013 limits. Please see <u>IRS LIHC Newsletter #50</u> for more detail.

⁽³⁾ An area may lose its rural area status. There is no clear guidance that a project is held harmless at the national nonmetropolitan income limits when an area loses its rural status. The Rent & Income Limit Calculator© assumes that a project that is not indicated as rural in the current year was also not rural in the prior year, and therefore, does not receive hold harmless treatment based on the prior year national non-metro amount.

Please consult your state agency and tax advisor for further clarification.

⁽⁴⁾ USDA may change their determination of what projects qualify as rural during the course of a year. Please periodically check with USDA to determine the continued rural eligibility of your project.

The national non-metropolitan median income has been adjusted for household size based on the family size adjustments outlined in the HUD Briefing Materials and as shown in each year's <u>HUD FAQ</u>. The IRS did not specify whether or not to round to the nearest \$50, however, the Rent & Income Limit Calculator© will round to the nearest \$50 in accordance with the methodology referenced in HUD Briefing Materials.

⁽⁵⁾ A project uses HERA Special if income was determined prior to 1/1/2009 and the project is in a HERA Special county. A project's income limits are held harmless at the prior year income limits if income was determined in the prior year or earlier and the income limits have decreased. Please note that the IRS has informally indicated that the definition of "determined" for purposes of the HERA Special and MTSP Hold Harmless income limits means that a project was placed in service. Please see IRS LIHC Newsletter #35 for more information about "determined" and

projects with buildings that were placed in service before and after HUD income limit effective dates. Therefore, projects placed in service prior to 1/1/2009 are generally eligible for HERA Special. Please see footnote 7 for information about acquisition/rehabilitation projects.

⁽⁶⁾ Internal Revenue Code Section 142(d)(2)(i) indicates that hold harmless applies on a calendar year. The Rent & Income Limit Calculator© assumes that "calendar year" in the hold harmless rule means the HUD Fiscal Year. For example, the 2009 calendar year means the HUD Fiscal Year from 3/19/2009 through 5/13/2010. In other words, the Rent & Income Limit Calculator© assumes that "calendar year" in the hold harmless rule means the highest income level achieved during any HUD Fiscal Year.

The Rent & Income Limit Calculator© assumes that a rural project will receive hold harmless treatment at the national non-metro amount based on the prior year national non-metro amount if the national non-metro median income were to fall from year to year. If a rural project qualifies for HERA Special and the HERA Special is higher than the national non-metro, then the HERA Special amount will be used. Please note that the IRS has not issued guidance that specifically allows hold harmless treatment at the national non-metro amount for rural projects, however, Internal Revenue Code 42(g)(4) by reference to Internal Revenue Code 142(d)(2)(E) implies that hold harmless treatment would apply at the national non-metro amount for rural projects. Please consult your tax advisor for further clarification.

⁽⁷⁾ Please note that for acquisition/rehabilitation projects, the IRS guidance indicates that income and rent limits are determined at the later of the acquisition date or when management begins income-qualifying households in the project. For example, if a project was acquired in 2011, the rehabilitation was placed-in-service in 2012, and management began income-qualifying households in 2011 then the project would be considered placed in service in 2011, for income and rent purposes. If a project was acquired in 2011, the rehabilitation was placed-in-service in 2012, and management began income-qualifying households when the rehabilitation placed-in-service in 2012, then the project would be considered placed in service in 2012, and management began income-qualifying households when the rehabilitation placed-in-service in 2012, then the project would be considered placed in service in 2012 for income and rent purposes. Please see <u>IRS LIHC Newsletter #35</u> for more detail. Please consult your tax advisor for further clarification.

⁽⁸⁾ <u>Revenue Procedure 94-57</u> gives guidance on the gross rent floor election.

Tax credit projects without bond financing:

"The Internal Revenue Service will treat the gross rent floor in section 42(g)(2)(A) as taking effect on the date an Agency initially allocates a housing credit dollar amount to the building [generally referred to as the 42M letter] under section 42(h)(1). However, the Service will treat the gross rent floor as taking effect on a building's placed in service date if the building owner designates that date as the date on which the gross rent floor will take effect for the building. An owner must make this designation to use the placed in service date and inform the Agency that made the allocation to the building is placed in service."

Tax credit projects with bond financing:

"The Service will treat the gross rent floor as taking effect on a building's placed in service date if the building owner designates that date as the date on which the gross rent floor will take effect for the building. An owner must make this designation to use the placed in service date and inform the Agency that issued the determination letter to the building no later than the date on which the building is placed in service."

⁽⁹⁾ The Rent & Income Limit Calculator© assumes all buildings in a project have a rent floor effective date under <u>Revenue Procedure 94-57</u> in the same HUD Fiscal Year. However, if your buildings have rent floor effective dates under <u>Revenue Procedure 94-57</u> in different HUD Fiscal Years, then you should run the calculator separately for each group of buildings in a particular HUD Fiscal Year.

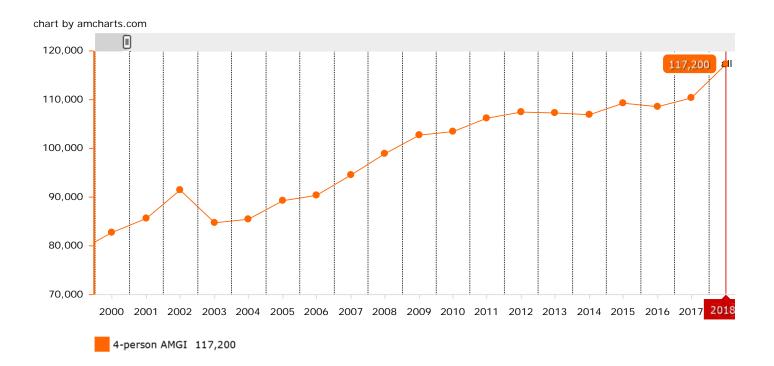

The Rent & Income Limit Calculator© assumes that different AMGI limits (40%, 35%, 30%, etc.) chosen by the user will also have a rent floor election under <u>Revenue Procedure 94-57</u> from the same HUD Fiscal Year that applies to the federal level of 50% or 60%.

⁽¹⁰⁾ The Consolidated Appropriations Act of 2014 changed how the 30% income limits is calculated. The 30% limit, which is now called the extremely low income limit, is determined by taking the greater of the 30% income limit as calculated by HUD or the poverty level as determined by the Department of Health and Human Services, which is then capped at the 50% Very Low Income Limit ('VLI') published by HUD. HUD has only published the data up to 8 people. For household sizes above 8 people please visit the following website: http://www.huduser.org/portal/datasets/il/il14/index_il2014.html

* Income Limit for any project in a HUD impacted area whose current limit would be less than last year or less than its FY2008 limit times the Current Year Median (FY2018) over the FY2008 median. HUD impacted areas are areas with Section 8 Income Limits held harmless by HUD in FY2007 or FY2008.
