Mr. Bill DeWorken Epoch Properties, Inc. 611 Research Road, Suite C North Chesterfield, Virginia 23236

Re: Omni Park Place Senior

Dear Mr. Bill DeWorken:

The subject property, known as Omni Park Place Senior, is an existing affordable multifamily development located at 101 Omni Road in Ashland, Hanover County, Virginia. The subject property consists of 61 revenue-producing units originally constructed in 2002. The sponsor has proposed to renovate the property with tax-exempt bond financing. The subject property is a 55+ age-restricted community.

The subject property is proposed to consist of 61 revenue-producing units including 1 and 2-bedroom garden apartments. A total of 11 units are proposed to be income restricted to 50% of AMI; a total of 50 units are proposed to be income restricted to 60% of AMI; no units are proposed to be set aside as market rate units; no units are proposed to benefit from project-based rental assistance; a total of 11 units are proposed to benefit from HOME financing. The rent and income restrictions associated with the proposed tax-exempt bond financing will run for the next 30 years.

The scope of this assignment consists of a comprehensive market analysis for the subject property. The market study was completed in accordance with VHDA, National Council for Housing Market Analyst (NCHMA) guidelines and the Uniform Standards of Professional Practice (USPAP). The completion of this report involved a site visit, interviews with local property managers, and the collection of market data through discussions with persons knowledgeable of the local real estate market.

The purpose, intended use, and function of the report is to assess the marketability of the subject property for tax-exempt bond application purposes. This report should not be used for any other purposes without the express written permission of Allen & Associates Consulting.

The report has been generated for the benefit of our client Epoch Properties, Inc. VHDA and VCDC are named as additional users of the report. No other person or entity may use the report for any reason whatsoever without our express written permission.

A summary of our findings and conclusions is found in the following pages. The conclusions reported are based on the conditions that exist as of the effective date of this report. These factors are subject to change and may alter, or otherwise affect the findings and conclusions presented in this report.

To the best of our knowledge, this report presents an accurate evaluation of market conditions for the subject property as of the effective date of this report. While the analysis that follows is based upon information obtained from sources believed to be reliable, no guarantee is made of its accuracy.

Feel free to contact us with any questions or comments.

Respectfully submitted: ALLEN & ASSOCIATES CONSULTING

Jeff Carroll

EXECUTIVE SUMMARY

The following is a summary of our key findings and conclusions with respect to the subject property:

Project Description

The subject property, known as Omni Park Place Senior, is an existing affordable multifamily development located at 101 Omni Road in Ashland, Hanover County, Virginia. The subject property consists of 61 revenue-producing units originally constructed in 2002. The sponsor has proposed to renovate the property with tax-exempt bond financing. The subject property is a 55+ age-restricted community.

Proposed Unit Mix

The subject property is proposed to consist of 61 revenue-producing units including 1 and 2-bedroom garden apartments. A total of 11 units are proposed to be income restricted to 50% of AMI; a total of 50 units are proposed to be income restricted to 60% of AMI; no units are proposed to be set aside as market rate units; no units are proposed to benefit from project-based rental assistance; a total of 11 units are proposed to benefit from HOME financing. The rent and income restrictions associated with the proposed tax-exempt bond financing will run for the next 30 years.

Proposed Unit Configuration						
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Gross Rent	UA	Net Rent
1BR-1BA-516sf / 50% of AMI / 50% of AMI	Yes	No	7	\$810	\$51	\$759
1BR-1BA-516sf / 50% of AMI / 50% of AMI	Yes	No	4	\$810	\$51	\$759
1BR-1BA-516sf / 60% of AMI / 60% of AMI	No	No	41	\$881	\$51	\$830
2BR-2BA-773sf / 60% of AMI / 60% of AMI	No	No	9	\$1,018	\$53	\$965
Total/Average			61	\$888	\$51	\$837

Site Description

The subject property includes an irregular-shaped parcel consisting of approximately 4.0 acres and approximately 820 feet of road frontage.

A total of 92 parking spaces are planned for this development (87 regular / 5 accessible / 1.51 spaces per unit). Privately-owned parking areas are planned for the subject property. We normally see 1.5 to 2.0 spaces per unit for projects like the subject. Public transportation is not found within walking distance. In our opinion, the current parking appears adequate for the subject property.

Additional Considerations:

Zoning	R-5 Residential Multifamily District. Legal, conforming use.
Environmental	2002 construction. No suspected environmental conditions.
Topography	No issues detected.
Flood	Zone X. Outside the 100-year flood zone.
DDA Status	Hanover County, Virginia. Designated as a Difficult to Develop Area.
QCT Status	Tract 3206.01. Not designated as a Qualified Census Tract.
Access	Good. Located near a heavily-traveled road.
Visibility	Good. Significant road frontage.

In our opinion, the site is suitable for development.

Neighborhood Description

In our opinion, the subject property has a fair to good location relative to competing properties with respect to neighborhood characteristics.

In our opinion, the subject property has a very good location relative to competing properties with respect to area amenities.

Additional Considerations:

Executive Summary

Crime Schools Average Commute Lower crime rates than market average. Lower graduation rates than market average. Longer commute than market average.

In our opinion, the neighborhood is suitable for development.

Primary Market Area

We defined the primary market area by generating a 15-minute drive time zone around the subject property. We also considered existing concentrations of multifamily properties and the nearest census tract boundaries in our analysis.

The primary market area includes a population of 61,743 persons and covers a total of 168.4 square miles, making it 14.6 miles across on average.

We estimate that up to 40 percent of demand will come from areas outside of the primary market area.

Demogaphic Characteristics

We anticipate moderate population and household growth for the market area. Renter households are anticipated to increase modestly as well. Finally, we anticipate that rents will grow with CPI over the next few years. Additional details follow:

Population	Market area population currently stands at 60,822 and is projected to grow 1.5 percent this year.
Households	Market area households currently stand at 21,261 and is projected to grow 1.4 percent this year.
Renter Households	Market area renter households currently stand at 4,499 and is projected to grow 1.4 percent this year.
Renter Tenure Rent Growth	Market area renter tenure currently stands at 21.2 percent. Market area rents have grown 1.64% annually since 2010.

Regional Economic Outlook

We anticipate moderate economic growth for the region. Additional details follow:

Est Employment	Regional establishment employment currently stands at 338,536 and is projected to grow 2.7 percent this year.
Civ Employment	Regional civilian employment currently stands at 235,680 and is projected to grow 1.1 percent this year.
Empl by Industry	Regional establishment employment currently stands at 347,073. The data suggests that Health Care and Social Assistance is the largest employment category accounting for 12.1% of total regional employment. Retail Trade is the second largest category accounting for 10.8% of total employment. Finance and Insurance is the third largest category accounting for 9.2% of total employment. Professional and Technical Services is the fourth largest category accounting for 8.3% of total employment. Administrative and Waste Services is the fifth largest category accounting for 8.1% of total employment.
Top Employers	The top employers include: (1) Kings Dominion & Soak City (4000 employees); (2) Service Partners LLC (2400 employees) and; (3) St Mary's Hospital (2304 employees).
Layoffs/Expansions	Major employers are currently hiring; none reported any pending layoffs.

Supply Analysis

Our analysis includes a total of 13 confirmed market area properties consisting of 2,086 units. The occupancy rate for these units currently stands at 97 percent. This rate reflects the occupancy for all confirmed market area units, regardless of project status (stabilized, under construction, proposed, etc.).

The following tables sur	nmarize our findings for this market area:

Grand Total							
Project Type Properties Units Vacant Occu							
Market Rate	8	1,616	48	97%

018	Terraces at Bellevue	144	99%	1930	2018	Restricted	Family	9.84
048	Greens At Virginia Center	180	95%	1998	2015	Restricted	Family	5.51
083	Overlook at Brook Run Apartn	156	97%	2001	na	Restricted	Family	8.76
085	Parham Park Place Senior Ap	86	100%	1999	na	Restricted	Elderly	8.01
091	Quarter Mill Apartments	266	95%	1990	2006	Restricted	Family	9.14

Achievable Rents

In the following table we present our concluded achievable rents and rent advantage for the subject property:

	Achievable Rents							
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Achievable	Proposed	Advantage		
1BR-1BA-516sf / 50% of AMI / 50% of AMI	Yes	No	7	\$787	\$759	3.6%		
1BR-1BA-516sf / 50% of AMI / 50% of AMI	Yes	No	4	\$787	\$759	3.6%		
1BR-1BA-516sf / 60% of AMI / 60% of AMI	No	No	41	\$955	\$830	13.1%		
2BR-2BA-773sf / 60% of AMI / 60% of AMI	No	No	9	\$1,154	\$965	16.4%		
Total / Average			61	\$954	\$837	12.3%		

Our analysis suggests an average achievable rent of \$954 for the subject property. This is compared with an average proposed rent of \$837, yielding an achievable rent advantage of 12.3 percent. Overall, the subject property appears to be priced at or below achievable rents for the area.

NCHMA Demand Analysis

In the following tables we present our concluded demand, capture rate, penetration rate and absorption period estimates for the subject property using the NCHMA demand methodology:

Unit Type / Rent Type / Income Limit	Vac Units at Market Entry	Gross Demand	Vacant & Pipeline Units	Capture Rate Gross	Capture Rate Net	Penetration Rate	Absorption Pd (Mos)
1-Bedroom / Restricted / 50% of AMI	5	250	0	2.0%	2.0%	2.0%	2
1-Bedroom / Restricted / 60% of AMI	20	321	1	6.2%	6.3%	22.4%	8
2-Bedroom / Restricted / 60% of AMI	4	266	0	1.5%	1.5%	4.5%	2
	Project-Wide Gross Capture Rate Project-Wide Net Capture Rate			8.0% 8.1%			
	Project-Wide Pe	enetration Ra	te	24.7%			
	Stabilized Occupancy			97%			
	Project-Wide Ab	sorption Per	iod	8 mos			

In our opinion, the estimated project-level capture rate suggests an appropriate number of units for the subject property. The unit level capture rates suggest an appropriate mix of units for the subject property.

In our opinion, the estimated project-level penetration rate suggest an appropriate number of units for the subject property. The unit-level penetration rates suggest an appropriate mix of units for the subject property.

Our analysis suggests that the subject property will stabilize at 97 percent occupancy. We estimate 8 months of absorption and an average absorption rate of 3.7 units per month for this project. In our opinion, the absorption period suggests an appropriate number and mix of units for the subject property.

It is important to note that this analysis does not account for pent-up demand, pre-leasing efforts or rent concessions. In our opinion, an effective pre-leasing effort could result in a month-for-month reduction in the estimated absorption period for this project. In addition, any concessions or rent subsidies not accounted for already in this analysis could cut capture rates and absorption periods significantly.

VHDA Demand Analysis

In the following table we present our concluded capture rate and absorption period estimates for the subject property using the VHDA demand methodology:

Project-Wide Capture Rate - LIHTC Units	20.3%
Project-Wide Capture Rate - Market Units	0.0%
Project-Wide Capture Rate - All Units	20.3%
Project-Wide Absorption Period (Months)	8 mos

Conclusion

In conclusion, the subject property appears to be feasible from a market standpoint. Because of the demonstrated depth of demand in this area and the current occupied status of the subject property, we do not believe the renovation of this property will have an adverse impact on existing projects in the market area. The units appear to be priced appropriately and we anticipate a rapid lease-up after renovation.

As of today's date (April 23, 2020) much of the United States is under a COVID-19 lockdown. The effects associated with this are enormous, but have not yet worked their way through the marketplace. The long-term effect of COVID-19 is not yet known. We could be looking at a strong V-shaped recovery. We could be looking at a long, slow recovery. That said, the reader is cautioned that the opinions presented in this report do not reflect any of these effects.

PROJECT OVERVIEW

Project Description

The subject property, known as Omni Park Place Senior, is an existing affordable multifamily development located at 101 Omni Road in Ashland, Hanover County, Virginia. The subject property consists of 61 revenue-producing units originally constructed in 2002. The sponsor has proposed to renovate the property with tax-exempt bond financing. The subject property is a 55+ age-restricted community.

Select project details are summarized below:

Project Description					
Property Name	Omni Park Place Senior				
Street Number	101				
Street Name	Omni				
Street Type	Road				
City	Ashland				
County	Hanover County				
State	Virginia				
Zip	23005				
Units	61				
Year Built	2002				
Project Rent	Restricted				
Project Type	Elderly				
Project Status	Prop Rehab				
Financing Type	Tax Credit				

Scope of Renovation

The subject property is currently in fair to good condition. The sponsor has proposed to rehabilitate the subject property to bring it up to "like new" condition using tax credit financing. The contemplated rehabilitation scope includes roof, parking lot, landscape, appliance, cabinet, HVAC and tile repairs and/or replacement. Tenants will be temporarily displaced as renovation progresses for this property.

Construction and Lease-Up Schedule

We anticipate a 12-month construction period for this project. Assuming a June 1, 2020 closing, this yields a date of completion of June 1, 2021. Our demand analysis (found later in this report) suggests a 8-month absorption period. This yields a date of stabilization of February 1, 2022.

Unit Configuration

The subject property currently consists of 60 revenue-producing units including 1 and 2-bedroom garden apartments. A total of 60 units are currently income restricted to 60% of AMI; no units are currently set aside as market rate units; no units currently benefit from project-based rental assistance. The subject property currently stands at 98% occupancy. The current rent and income restrictions will remain in place for the next 12 years.

	Current Unit Configuration									
			Unit	Income	Rent	HOME	Subs	Total	Gross	Net
BR	BA	SF	Туре	Limit	Limit	Units	Units	Units	Rent	Rent

Unit Plans (Continued)

IMPROVEMENT DESCRIPTION & ANALYSIS

Our improvement analysis includes an evaluation of the following factors with respect to the subject property: (1) Building Features; (2) Unit Features; (3) Project Amenities, (4) Utility Configuration; and (5) Useful Life Analysis.

Building Features

The subject property currently consists of 60 revenue-producing units in 1 residential building and 0 non-residential buildings. The development currently includes approximately 33,016 square feet of net rentable area and 55,797 square feet of gross building area.

The subject property is proposed to consist of 61 revenue-producing units in 1 residential building and 0 nonresidential buildings. The development is proposed to include approximately 33,789 square feet of net rentable area and 57,060 square feet of gross building area.

Additional information regarding the subject property's major building systems is found below.

<u>Foundation - Concrete Slab, Basements, Crawl Spaces, etc.</u> The subject property includes slab on grade foundations.

Structural Frame - Floor, Wall, Roof Structural Systems, etc.

The subject property is constructed with wood frame surfaced with plywood. Floor/ceiling assemblies consist of wood joists & plywood or concrete subfloors. Roof assmeblies consist of wood trusses & plywood sheathing.

Exterior Wall - Exterior Finishes, Doors, Windows, Exterior Stairs, etc.

The subject currently includes vinyl siding, double hung aluminum double pane windows, steel clad insulated six-panel unit entry doors, and sliding glass patio doors. The sponsor proposes to replace the siding, windows and exterior doors as part of the planned renovation.

<u>Roof - Sheathing, Coverings, Warranties, Gutters & Downspouts, Soffit & Fascia, etc.</u> The subject includes gabled asphalt shingle roofs. The sponsor proposes to replace the roofs as part of the planned renovation.

<u>Vertical Transportation - Elevator, Interior Stair Systems</u> Elevators with common area interior stairwells are found at the subject property.

Plumbing - Sanitary, Storm, Sewer, Fixtures, Domestic Hot Water

Domestic water piping is constructed of CPVC pipe and fittings. Wastewater lines consist of PVC pipe and fittings. Potable hot water is supplied via individual electric hot water heaters. The sponsor proposes to replace the water heaters as part of the planned renovation.

HVAC - Heating, Air Conditioning, Ventilation

The subject property currently includes individual interior-mounted electric heat, individual exterior-mounted a/c compressors with interior-mounted air handlers. New HVAC systems are proposed as part of the planned renovation.

Electrical and Communications - Distribution, Aluminum Wiring, etc.

Buildings receive electrical power from exterior pad-mounted transformers. Electrical service to units consists of 120/240V AC with 100 amps available for each panel. Electrical wiring is made of copper. Properly grounded, three-prong outlets are found in each dwelling unit. The outlets located in the wet areas are Ground Fault Circuit Interrupter (GFCI) outlets. Surface-mounted flourescent & LED fixtures are proposed after renovation.

Fire Suppression

The subject property is not currently equipped with an NFPA-13 fully automatic fire suppression (sprinkler) system. However, hard-wired smoke detectors with battery backup are found in each bedroom area. The sponsor proposes to replace the smoke detectors as part of the planned renovation.

Unit Features

The subject property currently contains 60 revenue-producing units including 58 regular units and 2 accessible units including 68 bedrooms, 68 full bathrooms and 0 half bathrooms.

The subject property is proposed to contain 61 revenue-producing units including 54 regular units and 7 accessible units, including 70 bedrooms, 70 full bathrooms and 0 half bathrooms.

Additional information regarding the subject property's unit features is found below.

Walls / Ceilings / Interior Doors

Subject property units include 8 foot ceilings, painted gypsum wallboard & ceilings, wood hollow-core flat panel interior doors and wood hollow-core flat panel closet doors. The sponsor proposes to replace the interior doors as part of the planned renovation.

Floor Covering

Floor covering currently consists of vinyl tile in the entryways, bathrooms & kitchens along with wall-to-wall carpeting in the living areas & bedrooms. The sponsor proposes to replace the flooring as part of the planned renovation.

Kitchens

Kitchens currently include electric four-top ranges, range hoods, frost-free refrigerators, disposals, dishwashers, composite wood cabinets, laminated countertops and stainless steel sinks. The sponsor proposes to replace the appliances, cabinets and countertops as part of the planned renovation.

Bathrooms

Bathrooms currently include composite wood vanities, cultured marble countertops, porcelain sinks & toilets, along with fiberglass tubs & surrounds. The bathrooms also include exhaust fans and other accessories. The sponsor proposes to replace these components as part of the planned renovation.

Project Amenities

A discussion of the development's project amenities is found below.

Site & Common Area Amenities

A business/computer center, community center, elevator, fitness center, gazebo/patio, herb garden, and library are currently found at the subject property.

Parking

Open parking is found at the subject property.

Laundry

Central laundry facilities are currently found at the subject property.

Security

Call buttons, controlled access, and monitoring are currently found at the subject property.

Services

Transportation services services are currently found at the subject property.

Tables comparing the subject property's amenities to that of the most comparable properties are found at the end of this section.

Utility Configuration

The subject property currently includes electric heat, electric cooking and electric hot water. All utilities - including cold water, sewer and trash - are currently paid by the resident.

In the table that follows we compare the subject's proposed utility allowances (also known as tenant paid utilities) to

the estimated allowances using the HUD Utility Schedule Model:

				Utility Al	lowances					
BR	BA	SF	Unit Type	Inc Lmt	Rnt Lmt	HOME	Subs	Units	UA	HUD UA
1	1.0	516	Garden/Flat	50% of AMI	50% of AMI	Yes	No	7	\$51	\$9
1	1.0	516	Garden/Flat	50% of AMI	50% of AMI	Yes	No	4	\$51	\$9
1	1.0	516	Garden/Flat	60% of AMI	60% of AMI	No	No	41	\$51	\$9
2	2.0	773	Garden/Flat	60% of AMI	60% of AMI	No	No	9	\$53	\$12
otal/Ave	rage							61	\$51	\$9

The HUD utility allowances are a good measure of the energy costs for a given property. Our analysis suggests that the proposed utility allowances are higher than those established using the HUD model.

Tables comparing the subject property's utility configuration to that of the most comparable properties are found at the end of this section. Outputs from the HUD Utility Schedule Model are also found there.

Useful Life Analysis

The subject property was originally constructed in 2002 and is currently in good condition. In our opinion, the subject has a remaining useful life & remaining economic life of 30 years in its current condition. Assuming the scope of work described above, we anticipate a remaining useful life & remaining economic life of 50 years after renovation. Finally, we estimate a post-renovation effective age of 10 years for this project.

In the course of completing this study, we rated the condition of the subject property and the most comparable properties on a 1-5 scale (1 being the worst and 5 being the best). We also evaluated the actual and effective ages of the subject and select comparables. A table summarizing our findings is found below:

	Actual Age Effective Age Condition

SITE DESCRIPTION & ANALYSIS

Our assessment of the site included an evaluation of the following factors with respect to the subject property: (1) Survey; (2) Site Plan; (3) Nuisances, Hazards, Detrimental Influences & Environmental; (4) Topography; (5) Flood Zone; (6) Difficult to Develop Area Status; (7) Qualified Census Tract Status; and (8) Traffic Patterns, Access & Visibility.

Survey

A survey for the subject property was not provided to the analyst for review. Current surveys should be evaluated to ascertain whether there are any easements encumbering the subject property.

Site Plan

A site plan for the subject property was not provided to the analyst for review. Site plans are necessary to analyze the site improvements, parking configuration, internal traffic flow, location of building improvements and landscaping improvements for the subject property. The developer did provide us with a description of the development's site features. A summary of these features is found below.

Acres / Lot Shape / Frontage

The subject property includes an irregular-shaped parcel consisting of approximately 4.0 acres and approximately 820 feet of road frontage.

<u>Zoning</u>

According to the sponsor, the subject property is currently zoned R-5 Residential Multifamily. It is our understanding that the current zoning for the subject is a legal, conforming use.

Parking / Streets / Curbs / Sidewalks

A total of 92 parking spaces are planned for this development (87 regular / 5 accessible / 1.51 spaces per unit). Privately-owned parking areas are planned for the subject property. We normally see 1.5 to 2.0 spaces per unit for projects like the subject. Public transportation is not found within walking distance. In our opinion, the current parking appears adequate for the subject property.

Dumpsters / Dumpster Enclosures

The subject includes a central trash compactor.

Landscaping / Perimeter Fence / Retaining Walls / Entry Sign

Trees, shrubs & lawns are found at the subject property. A perimeter fence is not found at the subject property. Retaining walls are not found at this property. One unlighted entry sign is found at this property.

Stormwater Management / Site Lighting / Water Service / Wastewater Service

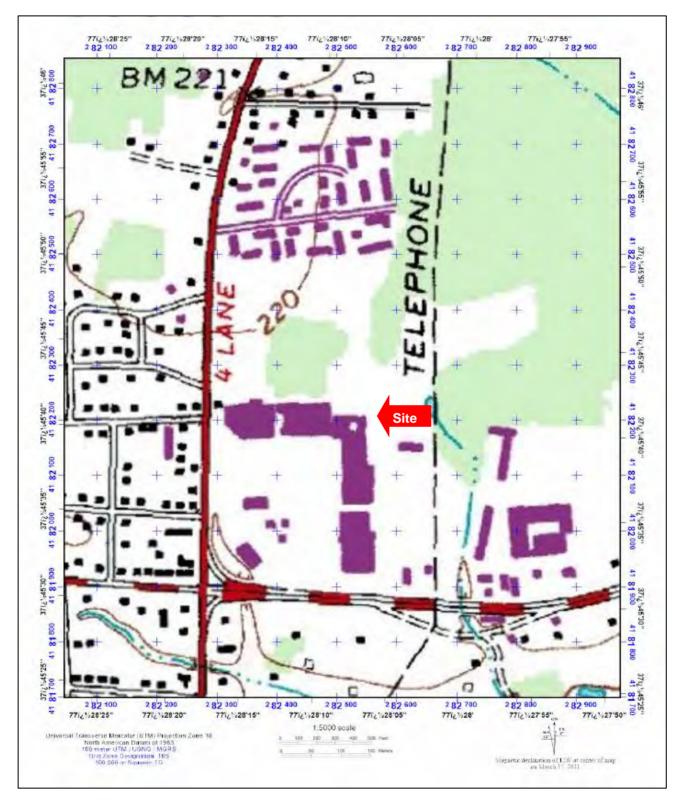

Stormwater management consists of catch basins and concrete pipe connecting to a public system. Site lighting consists of publicly-owned HID poles. Domestic water service to buildings consists of ductile iron pipe connecting to a public system. Wastewater service to buildings consists of PVC pipe connecting to a public system.

Nuisances, Hazards, Detrimental Influences & Environmental

We did not observe any nuisances, hazards, detrimental influences or recognized environmental conditions on our inspection of the subject property. The subject property was originally constructed in 2002, after the 1978 ban on lead and asbestos containing construction materials. Nevertheless, we recommend that the sponsor obtain a comprehensive environmental assessment from a qualified professional.

Topography

The USGS map showing the topography of the subject property and surrounding area is found below:

The topographic map shows that the site is flat and drains to adjacent properties to the south. In our opinion, there do not appear to be any topographic issues with respect to the subject property.

Flood Zone

The map showing the location of the subject property relative to nearby areas prone to flooding (identified in purple) is found below:

Zone Determination Re	eport		
Zone Determination:	TUC		
SFHA (FLOOD ZONE)	OUT	WITHIN 250 FEET OF FLOOD ZONI	e NO
FLOOD ZONE	×	COMMUNITY	510075
COMMUNITY NAME	ASHLAND, TOWN OF	PANEL	01908
PANEL DATE	December 02, 2008	COBRA	OUT
MAPNUMBER	510850190B	FIPS CODE	51085
Randor	Iskaneland In Macon Iege Ugiwdat	D Zone	

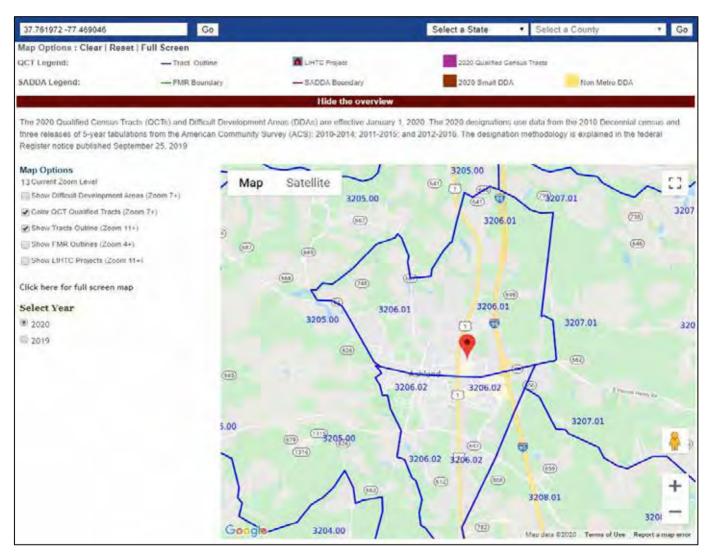

According to FEMA map number 510850190B dated December 02, 2008, the subject property is located in Zone X. This is an area that is identified as being located outside the 100-year flood zone.

Difficult to Develop Area Status

The subject proprterty is located in Hanover County, Virginia - an area that is not designated as a Difficult to Develop Area. Consequently, the subject property does not appear to qualify for special DDA funding under state and federal programs.

Qualified Census Tract Status

The federal government has identified census tracts throughout the United States that include high concentrations of low-income households and substandard housing units. These areas, known as Qualified Census Tracts, qualify for special funding under various state and federal programs. A QCT map showing the location of the subject property is found below:

The subject property is located in Census Tract 3206.01 - an area that is not designated as a Qualified Census Tract. Consequently, the subject property does not appear to qualify for special QCT funding under state and federal programs.

Traffic Patterns, Access & Visibility

A traffic map identifying the subject property is found below:

Access

The subject property is located on Omni Road, approximately 2 blocks north of Route 54 in Ashland, Virginia. Route 54 is a heavily-traveled east-west road carrying approximately 24,000 vehicles per day. We did not observe any road or infrastructure improvements taking place in the immediate vicinity of the subject property. In our opinion, therefore, accessibility is good by virtue of the location of the subject property relative to existing streets and thoroughfares.

Visibility

The subject property is visible from Omni Road with significant frontage and a limited volume of drive-by traffic. Consequently, in our opinion visibility is good by virtue of the exposure of the subject property to existing drive-by traffic volumes.

In the course of completing this study, we rated the access and visibility for the subject property and the most comparable properties on a 1-5 scale (1 being the worst and 5 being the best). A table summarizing our findings is found below:

	Access & Visibility				
	Rating			Ra	ank

NEIGHBORHOOD DESCRIPTION & ANALYSIS

Neighborhood

Our assessment of the neighborhood includes an evaluation of the following factors with respect to the subject property: (1) Life Cycle; (2) Surrounding Properties; (3) Economic Characteristics; (4) Crime Rates; (5) Educational Attainment; and (6) Commuting Patterns.

Life Cycle

Neighborhoods are sometimes thought to evolve through four distinct stages:

- Growth A period during which the area gains public favor and acceptance.
- Stability A period of equilibrium without marked gains or loses.
- Decline A period of diminishing demand.
- Revitalization A period of renewal, redevelopment, modernization, and increasing demand.

Based on our evaluation of the neighborhood, the subject property is located in an area that appears to be in the stability stage of its life cycle. Modest population growth is anticipated for the next several years.

Surrounding Properties

The subject property is located in Ashland, Virginia. The immediate area consists of residential land uses.

Multifamily in good condition is located to the north, south, east, and west of the subject property. Neighboring land uses appear to be complimentary to the use of the subject property. The condition of the neighboring properties appears to be complimentary as well.

Surrounding Properties

Surrounding property uses are summarized in the table found below:

	Carroanang rioportioo	
Direction	Use	Condition
North	Multifamily	Good
South	Multifamily	Good
East	Multifamily	Good
West	Multifamily	Good

Source: Allen & Associates

Economic Characteristics

The subject property is located in an area with average household incomes of \$33,281 (in 2015 dollars); this is compared with \$66,349 for the most comparable properties included in this analysis.

In addition, the subject property is located in an area with median cash rents of \$924 (in 2015 dollars); this is compared with \$1,105 for the most comparable properties included in this analysis.

Finally, the subject property is located in an area with median single family home values of \$172,700 (in 2015 dollars); this is compared with \$267,790 for the most comparable properties included in this analysis.

Crime Rates

The subject property is located in an area with personal crime rates of 0.8%. Personal crime includes offenses such as rape, murder, robbery and assault. Our research suggests that the average personal crime rate for the most comparable properties stands at 3.8%.

In addition, the subject property is located in an area with property crime rates of 4.0%. Property crimes include offenses such as burglary, larceny and theft. Our research suggests that the average property crime rate for the most comparable properties stands at 5.4%.

Please note: The crime statistics included in this analysis are historical area-wide figures. These statistics make no consideration for changing demographics or the implementation of an affirmative crime prevention program at the subject property.

Educational Attainment

The subject property is located in an area with high school graduation rates of 77.5%; this is compared with 88.4% for the most comparable properties included in this analysis.

In addition, the subject property is located in an area with college graduation rates of 18.3%; this is compared with 40.2% for the most comparable properties included in this analysis.

Commuting Patterns

The subject property is located in an area with an average drive to work of 27.1 minutes; this is compared with 23.5 minutes for the most comparable properties included in this analysis.

In addition, the subject property is located in an area with an average of 1.34 vehicles per household; this is compared with 1.59 vehicles per household for the most comparable properties included in this analysis.

Conclusion

In our opinion, the subject property has a fair to good location relative to competing properties with respect to neighborhood characteristics.

Proximity to Area Amenities

Our assessment included an evaluation of the proximity of various amenities to the subject and the most comparable properties. We looked at the following amenities in our analysis: (1) Banks; (2) Grocery; (3) Emergency Clinics; (4) Pharmacies; and (5) Discount Stores.

A listing of some of the area amenities is found below. An amenity map is found in the following pages:

Amenity	Name	Miles
Bank	Sonabank	0.1 mi SW
Grocery	Food Lion	0.1 mi SW
Emergency Clinic	BetterMed Urgent Care	0.1 mi SW
Pharmacy	Walgreens Pharmacy	0.3 mi SW
Discount Store	Family Dollar	0.1 mi S
Elementary School	Henry Clay Elementary School	1.1 mi SW
Middle School	Liberty Jr High School	0.6 mi SW
High School	Gandy High School	0.6 mi NW
Bus Stop	Junction + S Washington Hwy	0.4 mi S

Source: Google Maps

Sonabank, Food Lion, Walgreens Pharmacy, and Family Dollar are all located less than 0.5 miles away from the subject property. BetterMed Urgent Care is located 0.1 miles away.

Number of Area Amenities

We utilized Microsoft Streets & Trips to evaluate the subject and the most comparable properties with respect to the number of amenities in the immediate area.

- Microsoft Streets & Trips identified 7 banks within 2.0 miles of the subject property. The subject is ranked 5 out of the 16 properties included in this analysis.
- A total of 12 grocery stores are in the vicinity of the subject property. The subject is ranked 4 for the area.
- A total of 0 hospital are in the vicinity of the subject property. The subject is ranked 4 for the area.
- A total of 4 pharmacies are in the vicinity of the subject property. The subject is ranked 5 for the area.
- A total of 24 shopping centers are in the vicinity of the subject property. The subject is ranked 9 for the area.

Nearest Area Amenities

We utilized Microsoft Streets & Trips to evaluate the subject and the most comparable properties with respect to the nearest area amenities.

- According to Microsoft Streets & Trips, the nearest bank is 0.15 miles away from the subject property. The subject is ranked 2 out of the 16 properties included in this analysis.
- The nearest grocery store is 0.15 miles away from the subject property. The subject is ranked 3 for the area.
- The nearest hospital is 9.42 miles away from the subject property. The subject is ranked 15 for the area.
- The nearest pharmacy is 0.15 miles away from the subject property. The subject is ranked 2 for the area.
- The nearest shopping center is 0.15 miles away from the subject property. The subject is ranked 4 for the area.

Conclusion

In our opinion, the subject property has a very good location relative to competing properties with respect to area amenities.

Tables comparing the subject property's proximity to area amenities to that of the most comparable properties is found on the next page. Maps showing the proximity of the subject property to area amenities and area employers is also found in the following pages.

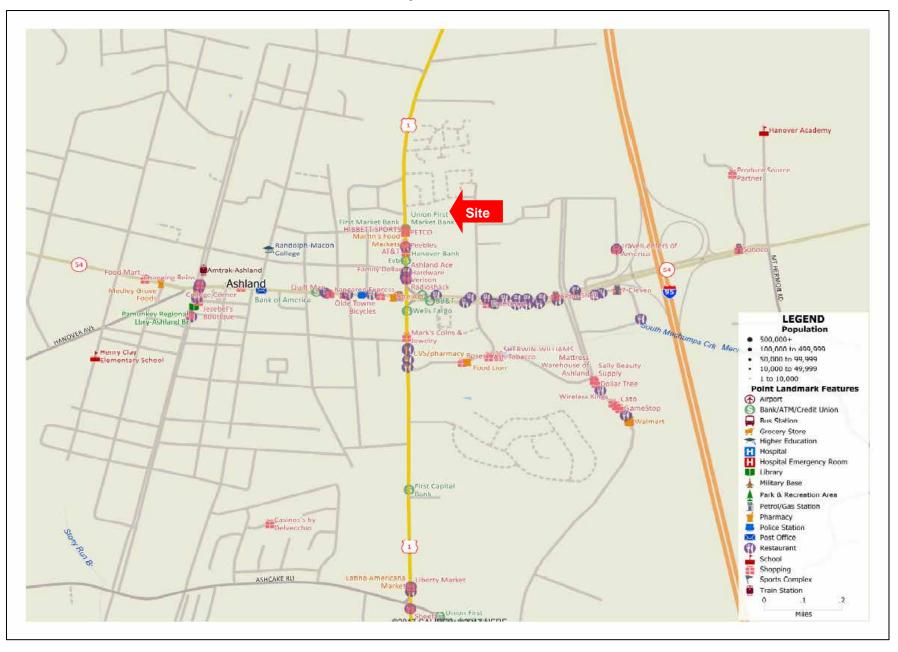

In the course of completing this study, we rated the neighborhood and the proximity to area amenities for the subject property and the most comparable properties on a 1-5 scale (1 being the worst and 5 being the best). The tables on the following pages give these ratings.

							Neighborho	ood Rating	s

MARKET AREA

Overview

Market areas are influenced by a variety of interrelated factors. These factors include site location, economic, and demographic characteristics (tenure, income, rent levels, etc.), local transportation patterns, physical boundaries (rivers, streams, topography, etc.), census geographies, and the location of comparable and/or potentially competing communities.

In areas where the county seat is the largest city, centrally located, and draws from the entire county, the county may be the market area. In the case where there are potentially competing communities in one county, the market area may be part of the county. In fact, the market area could include portions of adjacent counties. In this case, a combination of county subdivisions may be used to define the market area. In urban or suburban areas, the market area will be adjacent to the site extending to all locations of similar character with residents or potential residents likely to be interested in the project. In this case, county subdivisions, townships, or a combination of census tracts may be used to define the market area.

Allen & Associates recently conducted a series of property management interviews to better understand market areas and resident moving patterns for multifamily properties. Our study suggested that markets may be classified into the following general categories: urban, suburban and rural. Renters in urban markets are typically willing to move 5 to 10 minutes when looking for a new apartment. Our research also shows that renters in suburban markets are normally willing to move 10 to 15 minutes when looking for a new place to live. Renters in rural markets are typically willing to move 15 to 20 minutes when looking for a new apartment. We considered these general guidelines in our evaluation of the subject property.

Our study suggested that secondary market areas were generally a function of whether the proposed development was family or elderly. Our research suggested that secondary market demand for family properties ranged from 10 to 30 percent. Secondary market demand for elderly properties ranged from 10 to 50 percent. Although seniors move less frequently than younger renters, they are often willing to move longer distances when looking for housing. We considered these general secondary market guidelines in our evaluation of the subject property.

Our primary and secondary market area definitions are found below.

Primary Market Area

We defined the primary market area by generating a 15-minute drive time zone around the subject property. We also considered existing concentrations of multifamily properties and the nearest census tract boundaries in our analysis.

Primary market area, drive time and existing multifamily maps are found in the following pages. The primary market area included all or part of the following census tracts:

Census Tract	County	State
51085320100	Hanover County	Virginia
51085320200	Hanover County	Virginia
51085320400	Hanover County	Virginia
51085320500	Hanover County	Virginia
51085320601	Hanover County	Virginia
51085320602	Hanover County	Virginia
51085320701	Hanover County	Virginia
51085320702	Hanover County	Virginia
51085320801	Hanover County	Virginia
51085320803	Hanover County	Virginia
51085320804	Hanover County	Virginia
51085320805	Hanover County	Virginia
51085320900	Hanover County	Virginia
51087200406	Henrico County	Virginia

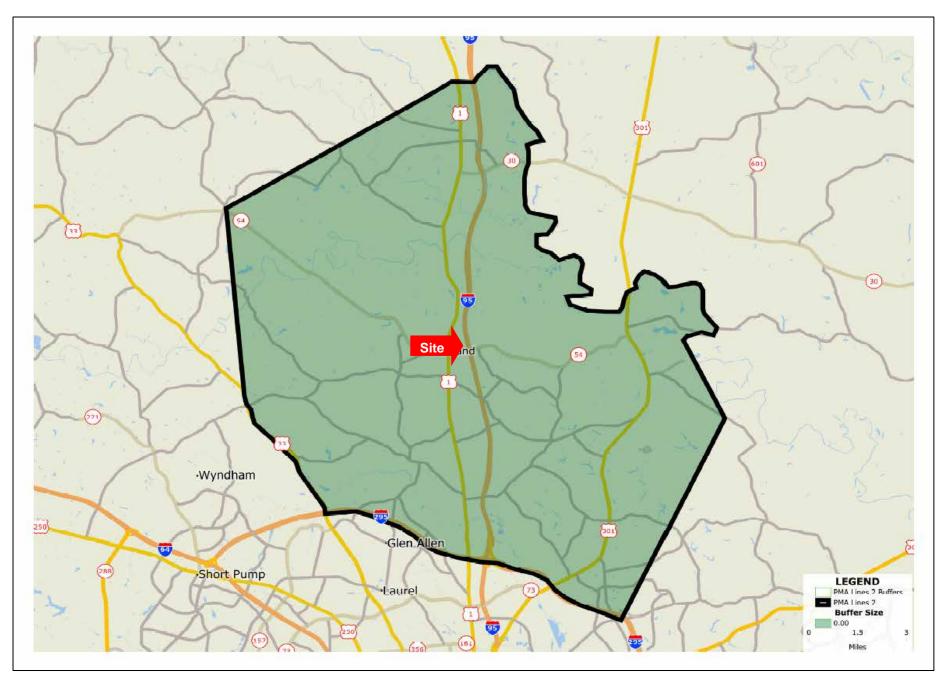

51087200903	Henrico County	Virginia
51087200904	Henrico County	Virginia
51087200906	Henrico County	Virginia

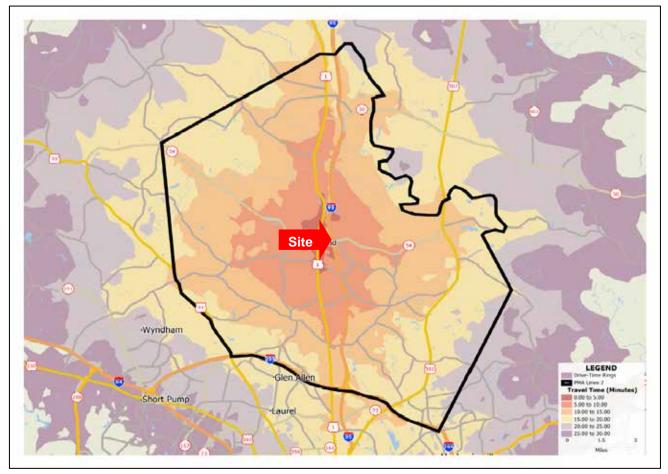

The primary market area includes a population of 61,743 persons and covers a total of 168.4 square miles, making it 14.6 miles across on average.

Secondary Market Area

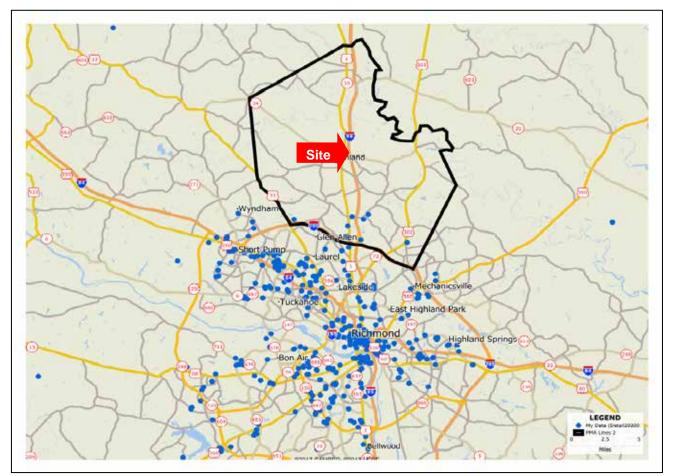

We estimate that up to 40 percent of demand will come from areas outside of the primary market area.

Existing Multifamily

ECONOMIC OUTLOOK

In this section we conduct an analysis of the regional economy. For purposes of our analysis, we define the region as Hanover and Henrico, Virginia. A map depicting the Region is found below.

Employment by Industry

The Bureau of Labor Statistics (BLS) tracks establishment employment by major industry. In the table below we present the current breakdown and percent distribution. The data set comes from the Bureau of Labor Statistics (BLS) via Woods & Pool Economics.

Establishment Employment				
Industry	Region	Reg %	US %	
Farm Employment	983	0.3%	1.3%	
Forestry, Fishing, Related Activities And Other Employment	397	0.1%	0.5%	
Mining Employment	544	0.2%	0.7%	
Utilities Employment	490	0.1%	0.3%	
Construction Employment	19,851	5.7%	5.5%	
Manufacturing Employment	11,832	3.4%	6.7%	
Wholesale Trade Employment	17,392	5.0%	3.6%	
Retail Trade Employment	37,655	10.8%	10.3%	
Transportation And Warehousing Employment	7,695	2.2%	3.5%	
Information Employment	4,904	1.4%	1.7%	
Finance And Insurance Employment	31,797	9.2%	5.3%	
Real Estate And Rental And Lease Employment	18,790	5.4%	4.7%	
Professional And Technical Services Employment	28,855	8.3%	6.9%	
Management Of Companies And Enterprises Employment	10,232	2.9%	1.3%	
Administrative And Waste Services Employment	28,280	8.1%	6.0%	
Educational Services Employment	5,843	1.7%	2.4%	
Health Care And Social Assistance Employment	41,977	12.1%	11.6%	
Arts, Entertainment, And Recreation Employment	7,880	2.3%	2.2%	
Accommodation And Food Services Employment	23,697	6.8%	7.5%	
Other Services, Except Public Administration Employment	19,884	5.7%	5.8%	
Federal Civilian Government Employment	2,632	0.8%	1.4%	
Federal Military Employment	1,368	0.4%	0.9%	
State And Local Government Employment	24,095	6.9%	9.8%	
Establishment Employment	347,073	100.0%	100.0%	

Source: W&P Economics

Regional establishment employment currently stands at 347,073. The data suggests that Health Care and Social Assistance is the largest employment category accounting for 12.1% of total regional employment. Retail Trade is the second largest category accounting for 10.8% of total employment. Finance and Insurance is the third largest category accounting for 9.2% of total employment. Professional and Technical Services is the fourth largest category accounting for 8.3% of total employment. Administrative and Waste Services is the fifth largest category accounting for 8.1% of total employment.

Economists generally classify employment two ways: basic and non-basic. Basic employment, which is considered to be the engine of a local economy, includes industries that rely on external factors to fuel demand. For instance, mining, logging and manufacturers are frequently considered basic employers. Goods for these industries are shipped outside the location where they are produced. Non-basic employers depend largely on local demand and usually employ local workers. For example, grocery stores and restaurants are sometimes considered non-basic employers.

The Location Quotient (LQ) technique is the most common method of identifying basic industries for a given economy. The LQ technique compares the share of workers in each industry of a given economy with that of a larger reference economy. If the number of workers in the given economy is greater than that of the reference economy, these are considered to be basic industries because they fill needs beyond those of the reference community.

In the table above we highlight the basic industries for the region. The distribution of employment in these industries exceeds that for the United States. These basic industries represent about 242,709 employees or about 69.9% of total regional employment. These are the industries that drive the regional economy.

Earnings by Industry

The Bureau of Labor Statistics (BLS) tracks average earnings by major industry. In the table below we present the current breakdown and rank. The data set comes from the Bureau of Labor Statistics (BLS) via Woods & Pool Economics.

Average Earnings (2009 \$)			
Industry	Earnings	Rank	
Farm Employment	\$5,017	23	
Forestry, Fishing, Related Activities And Other Employment	\$31,176	17	
Mining Employment	\$10,715	22	
Utilities Employment	\$114,076	2	
Construction Employment	\$59,605	10	
Manufacturing Employment	\$67,058	7	
Wholesale Trade Employment	\$73,602	5	
Retail Trade Employment	\$31,784	15	
Transportation And Warehousing Employment	\$41,666	13	
Information Employment	\$64,780	8	
Finance And Insurance Employment	\$77,097	4	
Real Estate And Rental And Lease Employment	\$25,458	18	
Professional And Technical Services Employment	\$69,301	6	
Management Of Companies And Enterprises Employment	\$118,440	1	
Administrative And Waste Services Employment	\$45,366	12	
Educational Services Employment	\$24,588	19	
Health Care And Social Assistance Employment	\$61,019	9	
Arts, Entertainment, And Recreation Employment	\$16,728	21	
Accommodation And Food Services Employment	\$21,875	20	
Other Services, Except Public Administration Employment	\$33,530	14	
Federal Civilian Government Employment	\$90,541	3	
Federal Military Employment	\$31,654	16	
State And Local Government Employment	\$58,963	11	
Establishment Employment	\$52,783	$>\!$	

Source: W&P Economics

The data suggests that Management of Companies is the highest paid industry averaging \$118,440 per employee. Utilities is the second highest paid industry averaging \$114,076 per employee. Federal Civilian Government is the third highest paid profession averaging \$90,541 per employee. Finance and Insurance is the fourth highest paid industry averaging \$77,097 per employee. Wholesale trade is the fifth highest paid category averaging \$73,602 per employee. These figures are compared with regional Average Earnings of \$52,783 per employee.

The highlighted industries represent basic industries for the region. Average earnings for these basic industries comes to \$57,840 or 9.6% higher than average for the region.

Top Employers

The table below gives a listing of the region's top employers. The data comes from InfoUSA and includes a primary industry description for each employer.

Source: InfoUSA

The top employers include: (1) Kings Dominion & Soak City (4000 employees); (2) Service Partners LLC (2400 employees) and; (3) St Mary's Hospital (2304 employees).

Population

In this section we present population data for the region. The table and graph below show historic data since 2010. The historic data comes from the US Census; the forecast comes from Woods & Pool Economics.

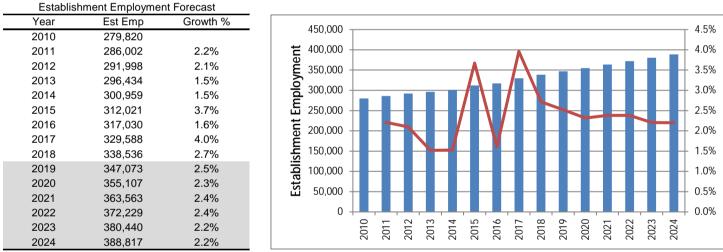

Source: US Census; W&P Economics

Population increased from 407,572 in 2010 to 444,285 in 2018 and is anticipated to increase to 487,568 in 2024.

Establishment Employment

In this section we present establishment employment data for the region. The table and graph below show historic data since 2010. The historic data comes from the Bureau of Labor Statistics (BLS); the forecast comes from Woods & Pool Economics.

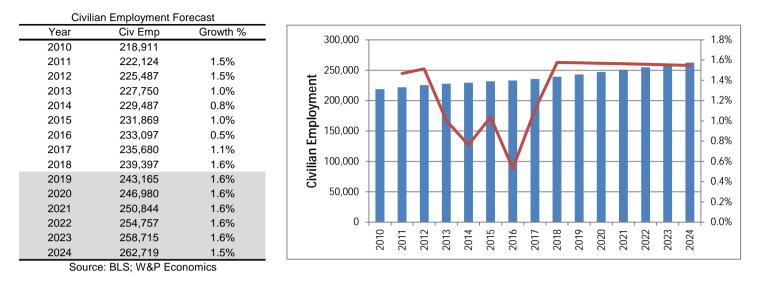

Source: BLS; W&P Economics

Establishment employment increased from 279,820 in 2010 to 338,536 in 2018 and is anticipated to increase to 388,817 in 2024.

Civilian Employment

In this section we present civilian employment data for the region. The table and graph below show historic data since 2010. The historic data comes from the Bureau of Labor Statistics (BLS); the forecast utilizes data from Woods & Pool Economics.

Civilian employment increased from 218,911 in 2010 to 239,397 in 2018 and is anticipated to increase to 262,719 in 2024.

Labor Force and Unemployment

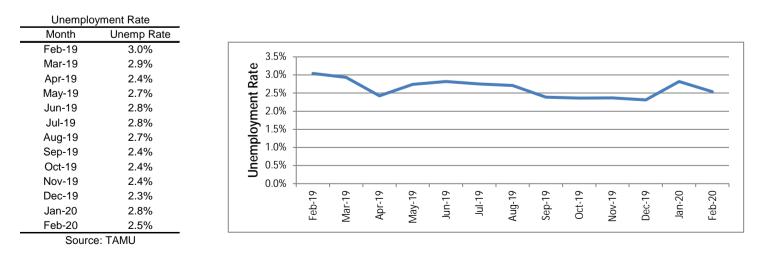

In this section we take a look at the labor force and unemployment. The table below shows civilian employment, unemployment and labor force statistics for the region since 2010. The data set comes from the Bureau of Labor Statistics (BLS) via the Texas A&M Real Estate Center.

	Labor Force & Unemployment			
Year	Civ Emp	Unemp	Lab Force	Unemp Rate
2010	218,911	15,589	203,322	7.1%
2011	222,124	14,554	207,569	6.6%
2012	225,487	13,347	212,140	5.9%

Source: BLS; Texas A&M Real Estate Center

Unemployment decreased from 15,589 in 2010 to 6,918 in 2018. The unemployment rate decreased from 7.1% in 2010 to 2.9% in 2018.

The table and graph below show the unemployment rate for the region for the past 12 months.

The Unemployment Rate for the Region came in at 3.0% in February 2019 and 2.5% in February 2020.

Building Permits

In this section we look at building permits. The table and graph below show historical data for the region since 2000. The data set comes from the US Census.

		Building Permits		
Year	1 Family	2-4 Family	5+ Family	Total
2000	2,457	0	75	2,532
2001	2,540	104	938	3,582
2002	2,840	0	590	3,430
2003	2,629	81	353	3,063
2004	2,377	90	55	2,522
2005	2,400	30	271	2,701
2006	1,978	2	5	1,985
2007	1,747	4	15	1,766
2008	1,204	0	0	1,204
2009	724	0	0	724
2010	905	8	5	918
2011	927	0	27	954
2012	1,062	0	84	1,146
2013	1,422	0	122	1,544
2014	1,215	0	0	1,215
2015	1,386	0	701	2,087
2016	1,307	0	235	1,542
2017	1,584	0	639	2,223
2018	1,485	232	248	1,965
	S	ource: US Census	6	

Building permits for the region increased from 2,532 in 2000 to 3,430 in 2002, before decreasing to 724 in 2009 and increasing to 1,965 in 2018.

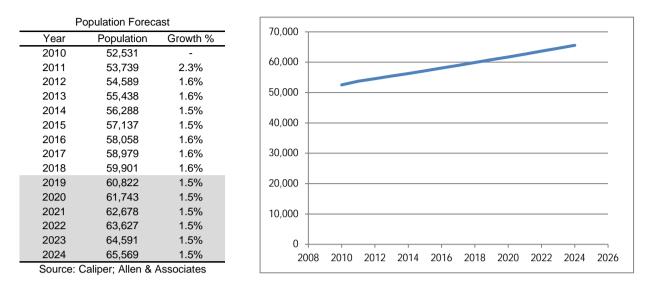

Conclusion

As of today's date (April 22, 2020) much of the United States is under a COVID-19 lockdown. The economic effects associated with this are enormous, but have not yet been published by the BLS and the US Census. The long-term effect of COVID-19 is not yet known. We could be looking at a strong V-shaped recovery. We could be looking at a long, slow recovery. That said, the reader is cautioned that the numbers presented above do not reflect any of these effects.

Overburdened Renter Households

The following tables give overburdened renter household data for the Market Area. The data set comes from the U.S. Census Bureau.

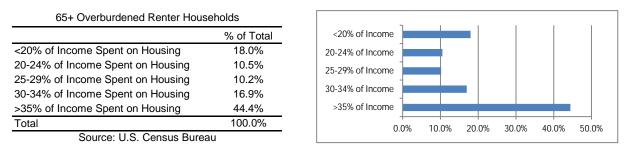

Our research suggests that 22.8 percent of the renter households in this market area are overburdened, paying more than 35 percent of their income towards housing-related costs. Our research also suggests that 35.4 percent of the renter households are overburdened to 30 percent of income.

Our research suggests that 28.6 percent of the 55+ renter households in this market area are overburdened, paying more than 35 percent of their income towards housing-related costs. Our research also suggests that 47.9 percent of the 55+ renter households are overburdened to 30 percent of income.

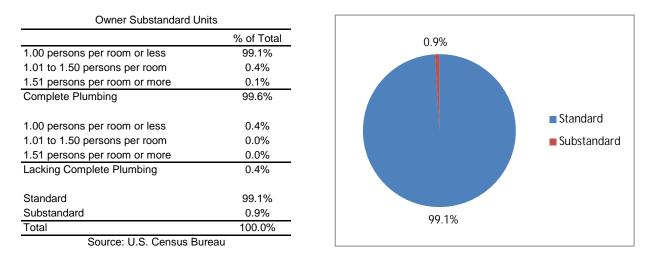

Our research suggests that 44.4 percent of the 65+ renter households in this market area are overburdened, paying more than 35 percent of their income towards housing-related costs. Our research also suggests that 61.4 percent of the 65+ renter households are overburdened to 30 percent of income.

Owner Substandard Units

The U.S. Census Bureau defines substandard housing units as follows: (1) Units without complete plumbing; or (2) Units with 1.00 or more persons per room.

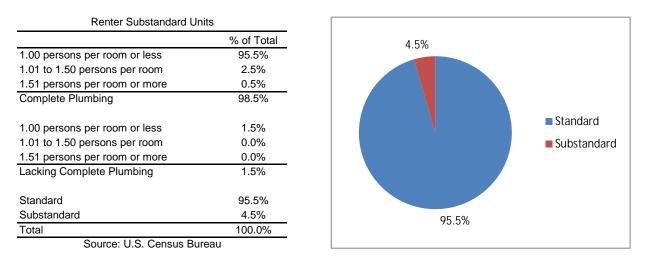

The following tables give owner substandard housing unit data for occupied housing units in the nation, state, region and market area. The data comes from the U.S. Census Bureau:

Our research suggests that 0.9 percent of occupied owner housing units in the market area are substandard.

Renter Substandard Units

The following tables give renter substandard housing unit data for occupied housing units in the nation, state, region and market area. The data comes from the U.S. Census Bureau:

Our research suggests that 4.5 percent of renter owner housing units in the market area are substandard.

Owner Movership

The following tables give owner household movership data for the market area with an estimated breakout by household size. The data comes from the U.S. Census Bureau and the American Housing Survey:

Source: U.S. Census, American Housing Survey; Allen & Associates

Our research suggests an elderly renter movership rate of 8.0 percent.

SUPPLY ANALYSIS

In conducting our analysis, we began by attempting to compile a list of every multifamily property with 10 or more units in the market area. We included conventionally-financed multifamily communities as well as properties financed by the local housing authority and the state housing finance agency in our listing. We even included properties financed by and/or subsidized by USDA and/or HUD. Finally, we included properties that are either proposed or currently under construction. The result was a listing of projects with 10 or more units - whether existing, under construction, or proposed - for this area. Our rental property inventory listing is found in the pages that follow.

A map showing the location of the properties included in the rental property inventory is found in the pages that follow. Properties identified with red pushpins have 100 percent market rate units (market rate properties), properties identified with yellow pushpins have a mixture of market rate / restricted / subsidized units (restricted properties), and properties identified with blue pushpins have 100 percent project-based rental assistance (subsidized properties).

After accounting for any unconfirmed properties and any properties that are located outside the defined market area, we arrived at a list of confirmed market area properties. This was the listing of properties upon which our analysis is based. In our opinion, the properties included on this list give a credible picture of market conditions as of the effective date of this report. This listing is found in the pages that follow.

Our next step was to compile a master list of unrestricted market rate rent comparables from the listing of confirmed properties. We eliminated any properties which were either under construction, being renovated, in lease up, or which were unstabilized for one reason or another. We identified market rate properties of similar age and condition to the subject property. If we were unable to identify a sufficient number of market rate comparables in the market area, we included market rate properties from outside the market area. If we were still unable to identify a sufficient number of market rate comparables, we included rent restricted properties - provided, however, that the rents charged at these properties were below statuatory limits and similar to the rents charged at the market rate properties in the market area (suggesting that these rent restricted properties were *de facto* market rate properties).

Finally, we compiled a master list of restricted rent comparables from the listing of confirmed properties. We used the same approach described above for unrestricted market rate properties.

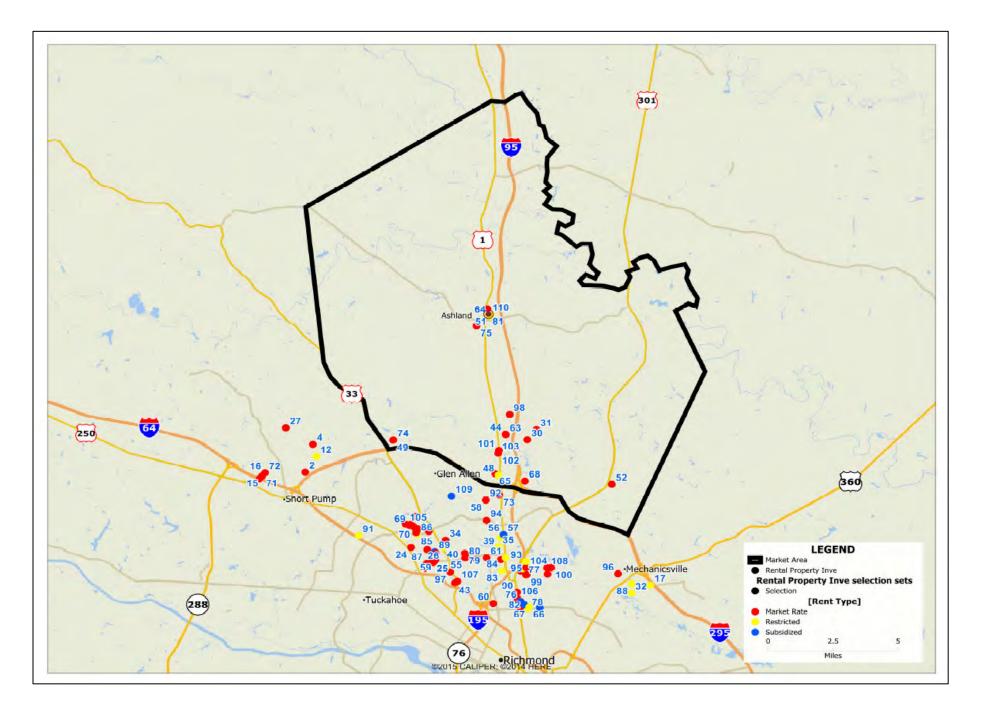

The resulting master lists of rent comparables and accompanying locator maps are found in this section as well. Detailed write-ups for the properties included on these lists are found in the Appendix. We include writeups for *all* of the rent comparables identified on our master lists, regardless of whether they ended up being selected as one of the *best* rent comparables. We did this for two reasons: (1) To be transparent; and (2) To provide the reader with context regarding our selection process.

The balance of this section includes a breakdown of confirmed market area properties by rent type, project status, year built, and financing source. We also include a rent, unit mix, and amenity summary for confirmed market area properties. Finally, we provide summary of vouchers, concessions, and waiting lists for the properties included in this report.

Source: Allen & Associates

Our analysis includes a total of 13 confirmed market area properties consisting of 2,086 units. The occupancy rate for these units currently stands at 97 percent. This rate reflects the occupancy for all confirmed market area units, regardless of project status (stabilized, under construction, proposed, etc.).

Confirmed market area properties break down by rent type and tenure as shown in the tables above.

Occupancies of stabilized market area properties broken out by occupancy type (elderly or family) and rent type (subsidized, restricted or market rate) are found below:

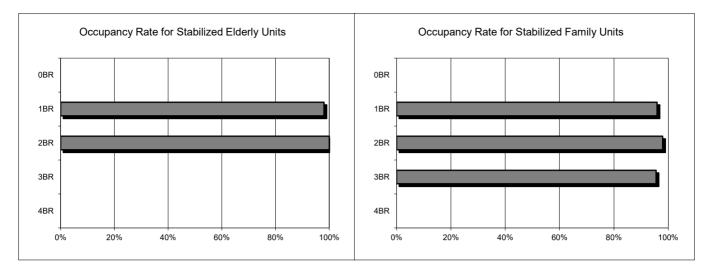

Our research suggests the following occupancy levels for the 60 stabilized elderly units in this market area:

- Subsidized, not applicable (0 units in survey)
- Restricted, 98 percent (60 units in survey)
- Market Rate, not applicable (0 units in survey)

Our research suggests the following occupancy levels for the 2,026 stabilized family units in this market area:

- Subsidized, 100 percent (20 units in survey)
- Restricted, 97 percent (390 units in survey)
- Market Rate, 97 percent (1616 units in survey)

Occupancy rates for stabilized market area properties broken out by occupancy type (elderly or family) and unit type are found below (supporting data is found in the pages that follow):

Our research suggests the following occupancy levels for the 60 stabilized elderly units in this market area:

- 0-Bedroom, not applicable (0 units in survey)
- 1-Bedroom, 98 percent (52 units in survey)
- 2-Bedroom, 100 percent (8 units in survey)
- 3-Bedroom, not applicable (0 units in survey)
- 4-Bedroom, not applicable (0 units in survey)

Our research suggests the following occupancy levels for the 2,026 stabilized family units in this market area:

- 0-Bedroom, not applicable (0 units in survey)
- 1-Bedroom, 96 percent (510 units in survey)
- 2-Bedroom, 98 percent (1271 units in survey)
- 3-Bedroom, 96 percent (245 units in survey)
- 4-Bedroom, not applicable (0 units in survey)

Source: Allen & Associates

Our research suggests that 0 percent of confirmed market area properties are 1 story in height, 100 percent are 2-4 stories in height, 0 percent are 5-10 stories in height, and 0 percent are over 10 stories in height. In addition, surveyed properties benefit from the following project amenities: 23 percent have a business/computer center, 69 percent have a community center, 54 percent have a fitness center, 77 percent have a playground, and 38 percent have a sports court.

Our research also suggests that the following unit amenities are present at surveyed properties: 100 percent have blinds, 100 percent have carpeting, 92 percent have patios/balconies, and 38 percent have outside storage. Surveyed properties also include the following kitchen amenities: 100 percent have a stove, 100 percent have a refrigerator, 69 percent have a disposal, 85 percent have a dishwasher, and 31 percent have a microwave.

In addition, 92 percent of confirmed market area properties have central heat while 92 percent have central air. Our research also suggests that 85 percent of surveyed properties have open parking. A total of 54 percent of area properties have central laundry facilities, while 15 percent have washer/dryer hookups, and 46 percent have washer/dryer units in each residential unit.

A total of 8 percent of confirmed market area properties have call buttons, 38 percent have controlled access, and 0 percent have security alarms.

It is also our understanding that the majority of confirmed market area properties provide cable access.

Finally, in the following pages we provide a summary of vouchers, concessions and waiting lists for the confirmed market area properties included in this report. We also include any absorption information we have uncovered as part of our research.

Supply Analysis

RENT COMPARABILITY ANALYSIS

In this section we develop restricted and unrestricted market rent conclusions for the subject property on an "as if complete & stabilized" basis. Our analysis begins with an evaluation of unrestricted market rents.

Unrestricted Rent Analysis

In this section we develop an unrestricted market rent conclusion for the subject property units. Our analysis began by selecting comparable rentals to use to develop estimates of market rents for the units at the subject property, assuming that the subject was an unrestricted property. Our selection of comparables was based on location, age, condition, unit mix and amenities of the comparable properties relative to the subject property.

Rental Property Inventory, by Unit Type

In the following pages we present an inventory of properties included in this analysis. Rents for these properties, broken out by unit type, were used in selecting the rent comparables used in this analysis.

The properties that we consider to be comparable to the subject property are highlighted in the tables found in the following pages. We attempted to select stabilized market rate properties as comparables for purposes of our rent comparability analysis.

Comparables with restricted rents are used when a sufficient number of market rent comparables are not available and when maximum allowable rents for properties with restricted rents exceed prevailing rents in the area. In the event that program rental rates exceed market rental rates, restricted units are, in fact, *de facto* market rate units.

The subject property is located in an area with very few market rate elderly developments. Consequently, we have elected to use general occupancy properties in our analysis of market rents. This is appropriate because most of the existing elderly renters currently reside in general occupancy units creating a linkage between the two property types. Our research suggests that the majority of elderly renter households in the market area currently reside in general occupancy housing. This is consistent with a 1995 AARP member survey which found that 80 percent of respondents resided in general occupancy properties. Because such a high percentage of seniors reside in general occupancy housing, the subject property will need to be priced competitively to attract these renters. Consequently, it is not only appropriate - but prudent - to address general occupancy rents when determining market rents for age-restricted units in this market.

Rent Comparables, Market Rate, Map

A map showing the location of the properties selected as comparables in this analysis is found in the following pages. Properties identified with red pushpins have market rents, properties identified with yellow pushpins have restricted rents, and properties identified with blue pushpins have subsidized rents. Detailed write-ups for the select rent comparables are found in the Appendix to this report.

Rent Comparability Grids

Our analysis employed the use of rent comparability grids and resulted in an unrestricted market rent estimate for each of the subject's unit types. These grids and a narrative describing our rent adjustments are found in the following pages.

Rent Adjustments

Our analysis included a property management survey and a technique known as "statistical extraction" to help us identify the best adjustments to use. Statistical extraction, which is similar to the matched pair method, helped us derive the optimal adjustments for our particular data set.

Here's a hypothetical example to illustrate how we derived our rent adjustments. Assume that property managers tell us we should expect rent adjustments ranging from \$0.00 to \$0.50 per square foot for a particular market. Next, assume that we select 25 rent comparables with an adjusted sample standard deviation (a statistical measure of variability) of \$100. We employ a square foot rent adjustment of \$0.10 for each comparable resulting in an adjusted sample standard deviation of \$90. This tells us that the assumed adjustment "explained" some of the variability in the data. We repeat this process for adjustments of \$0.20, \$0.30, \$0.40 and \$0.50 which yielded adjusted sample standard deviations of \$80, \$70, \$65 and \$75, respectively. The \$0.40 square foot adjustment "explains" the most variability because any other adjustment yields a higher adjusted sample standard deviation. Consequently, a \$0.40 rent adjustment is the best adjustment for purposes of this example. This is a simplified example because we actually adjusted for numerous variables simultaneously in our analysis.

Many adjustments (bedroom count, bathroom count and square footage) are highly interrelated. Statistical extraction helped us unravel the interrelationships between these variables. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is superior a "plus" adjustment is made. If the subject is inferior a "minus" adjustment is made.

We used the Excel Solver function to help us with our analysis. The Solver function was programmed to minimize the adjusted standard deviation for our data set. We evaluated a total of 62 variables in 22 categories (AC systems, heating systems, technology, bedrooms, bathrooms, square feet, visibility, access, neighborhood, area amenities, condition, effective age, project amenities, elevator, unit amenities, storage, kitchen amenities, parking, laundry, security, on-site management, on-site maintenance) in an effort to identify the mix of adjustments that explained the most variability found in our raw data.

A discussion of our surveyed and concluded adjustments is found below.

Concessions

The first step in our analysis was to account for any concessions at the subject and the comparables. We considered the advertised street rent and concessions being offered and derived a net nent estimate for each comparable. Net rent, defined as advertised street rent minus monthly concessions, represents the cash rent paid by new residents at the various properties. This is the best measure of market value (prior to any other adjustments) for the comparables included in this analysis.

Tenant-Paid Utilities

The next step in our analysis was to account for differences in tenant-paid utilities between the comparable properties and the subject. We used the HUD Utility Schedule Model to derive our adjustments. The HUD model includes a current utility rate survey for the area. In the event that the tenant-paid utilities associated with a particular property are higher or lower than the subject, adjustments were made to account for the differences. Adjustments reflect the difference between the tenant-paid utilities for the comparable property minus that for the subject.

Technology

We accounted for technology (cable and internet access) offered in the rent for each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0 per month for cable; internet access was valued at \$0.

Technology								
Adjustment	Survey	Range	Concluded					
Cable	\$0	\$50	\$0					
Internet	\$0	\$50	\$0					

Bedrooms

Our analysis also included an adjustment for the number of bedrooms at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0 per bedroom.

Bedrooms								
Adjustment	Surve	y Range	Concluded					
Bedrooms	\$0	\$200	\$0					

Bathrooms

Our analysis also included an adjustment for the number of bathrooms at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$25 per bathroom.

Bathrooms							
Adjustment	Survey	/ Range	Concluded				
Bathrooms	\$0	\$100	\$25				

Square Feet

Our analysis also included an adjustment for square footage at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.80 per square foot.

Square Feet								
Adjustment	Survey	Range	Concluded					
Square Feet	\$0.00	\$2.00	\$0.80					

Visibility

We also accounted for differences in visibility at each of the comparables as compared to the subject property in our analysis. Based on our field review, we assigned a visibility rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$70 per point for differences in visibility ratings between the subject and the comparables.

Visibility							
Adjustment	Survey	/ Range	Concluded				
Rating	\$0	\$100	\$70				

Access

Our analysis also included an adjustment for access at each of the comparables as compared to the subject property. Based on our field review, we assigned an access rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$100 per point for differences in access ratings between the subject and the comparables.

Access							
Adjustment	Survey	/ Range	Concluded				
Rating	\$0	\$100	\$100				

Neighborhood

We considered differences in neighborhood at each of the comparables as compared to the subject property in our analysis. Based on our field review and our evaluation of local demographic and crime data (presented earlier in this report), we assigned a neighborhood rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in neighborhood ratings between the subject and the comparables.

Neighborhood								
Adjustment	Survey	/ Range	Concluded					
Rating	\$0	\$100	\$0					

Area Amenities

We also accounted for area amenities for each of the comparables as compared to the subject property in our analysis. Based on our field review and our evaluation of local amenity data (presented earlier in this report), we assigned a local amenity rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in amenity ratings between the subject and the comparables.

Area Amenities							
Adjustment	Survey	/ Range	Concluded				
Rating	\$0	\$100	\$0				

Median Household Income

Our analysis also included an adjustment for median household income for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.0000 per dollar of median household income.

Median Household Income								
Adjustment	Survey Range	Concluded						
Med HH Inc	\$0.0000 \$0.0000	\$0.0000						

Average Commute

Our analysis also included an adjustment for average commute for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.00 per each minute of commute.

Average Commute								
Adjustment	Survey	Range	Concluded					
Avg Commute	\$0.00	\$0.00	\$0.00					

Public Transportation

Our analysis also included an adjustment for the existence of public transportation within walking distance of each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.00 for public transportation.

Public Transportation					
Adjustment	Survey	Concluded			
Public Trans	\$0.00 \$0.00		\$0.00		

Personal Crime

Our analysis also included an adjustment for personal crime rates for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0 per 0.01 percentage points.

	Persona	al Crime	
Adjustment	Survey	Range	Concluded
Personal Crime	\$0	\$0	\$0

Condition

Our analysis also included an adjustment for the condition of each comparable as compared to the subject property. Based on our field review, we assigned a condition rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$35 per point for differences in condition ratings between the subject and the comparables.

	Cond	dition	
Adjustment	Survey	Range	Concluded
Rating	\$10	\$50	\$35

Effective Age

We considered differences in effective age in our analysis. Based on our field review, we estimated the effective age for each of the properties included in this analysis. Our estimates reflected the condition-adjusted age and remaining useful life of each property. Statistical extraction resulted in an adjustment of \$10.00 per year for differences in effective age between the subject and the comparables.

Effective Age				
Adjustment	Survey	Range	Concluded	
Rating	\$1.00	\$5.00	\$10.00	

Project Amenities

We considered the presence of various project amenities at the comparables as compared to the subject property. Project amenities include ball fields, BBQ areas, billiards, business/computer centers, car care centers, community centers, elevators, fitness centers, gazebos, hot tubs/Jacuzzis, horseshoe pits, lakes, libraries, movie theatres, picnic areas, playgrounds, pools, saunas, sports courts and walking trails. The survey range and our concluded adjustment for each amenity is summarized below.

Project Amenities					
Adjustment	Survey	Range	Concluded		
Ball Field	\$2	\$10	\$2		
BBQ Area	\$2	\$10	\$2		
Billiards	\$2	\$10	\$10		
Bus/Comp Ctrs	\$2	\$10	\$10		
Car Care Center	\$2	\$10	\$2		
Community Center	\$2	\$10	\$2		
Elevator	\$10	\$100	\$10		
Fitness Center	\$2	\$10	\$2		
Gazebo	\$2	\$10	\$2		
Hot Tub/Jacuzzi	\$2	\$10	\$2		
Horseshoe Pit	\$2	\$10	\$2		
Lake	\$2	\$10	\$2		
Library	\$2	\$10	\$2		
Movie Theatre	\$2	\$10	\$10		
Picnic Area	\$2	\$10	\$2		
Playground	\$2	\$10	\$2		
Pool	\$2	\$10	\$2		
Sauna	\$2	\$10	\$2		
Sports Court	\$2	\$10	\$10		
Walking Trail	\$2	\$10	\$2		

Unit Amenities

We considered the presence of various unit amenities at the comparables as compared to the subject property. Unit amenities include blinds, ceiling fans, carpeting/upgraded flooring, fireplaces, patios/balconies and storage. The survey range and our concluded adjustment for each amenity is summarized below.

Unit Amenities							
Adjustment	Survey	Range	Concluded				
Blinds	\$2	\$10	\$2				
Ceiling Fans	\$2	\$10	\$2				
Carpeting	\$2	\$10	\$2				
Fireplace	\$2	\$10	\$2				
Patio/Balcony	\$2	\$10	\$2				
Storage	\$10	\$50	\$10				

Kitchen Amenities

We considered the presence of various kitchen amenities at the comparables as compared to the subject property. Kitchen amenities include stoves, refrigerators, disposals, dishwashers and microwaves. The survey range and our concluded adjustment for each amenity is summarized below.

Kitchen Amenities						
Adjustment	Survey	Range	Concluded			
Stove	\$2	\$10	\$2			
Refrigerator	\$2	\$10	\$2			
Disposal	\$2	\$10	\$2			
Dishwasher	\$2	\$10	\$2			
Microwave	\$2	\$10	\$10			

Parking

We also adjusted for differing types of parking configurations. We classified parking five ways: (1) Garage, (2) Covered; (3) Assigned, (4) Open and (5) No parking offered. Statistical extraction resulted in an adjustment of \$50 per month for garages; covered parking was valued at \$20; assigned parking was valued at \$10; open parking was valued at \$0; no parking was valued at \$0.

Parking							
Adjustment	Survey	[,] Range	Concluded				
Garage	\$50	\$200	\$50				
Covered	\$20	\$100	\$20				
Assigned	\$10	\$50	\$10				
Open	\$0 \$0		\$0				
None	\$0 \$0		\$0				

Laundry

We also evaluated differing types of laundry configurations. We classified laundry amenities three ways: (1) Central Laundry, (2) Washer/Dryer Units; and (3) Washer/Dryer Hookups. Our analysis resulted in an adjustment of \$5 per month for central laundries; washer/dryer units were valued at \$10; washer/dryer hookups were valued at \$5.

Laundry						
	Adjustment	Survey	Range	Concluded		
	Central	\$5	\$25	\$5		
	W/D Units	\$10	\$50	\$10		
	W/D Hookups	\$5	\$25	\$5		

Security

We considered the presence of various security amenities at the comparables as compared to the subject property. Security amenities include call buttons, controlled access, courtesy officers, monitoring, security alarms and security patrols. The survey range and our concluded adjustment for each amenity is summarized below.

Security						
Adjustment	Survey	/ Range	Concluded			
Call Buttons	\$2	\$10	\$2			
Controlled Access	\$2	\$10	\$10			
Courtesy Officer	\$2	\$10	\$2			
Monitoring	\$2	\$10	\$2			
Security Alarms	\$2	\$10	\$2			
Security Patrols	\$2	\$10	\$2			

Rent Conclusion, 1BR-1BA-516sf

The development of our rent conclusion for the 1BR-1BA-516sf units is found below.

Our analysis included the evaluation of a total of 39 unit types found at 7 properties. We selected the 39 most comparable units to utilize as rent comparables for purposes of this analysis. A write-up for each of the properties included in this analysis is found in the Appendix.

Our analysis included the adjustments developed in the previous section. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is better, a "plus" adjustment is made. If the subject is inferior, a "minus" adjustment is made. In the table below, we summarize the adjustments and the resulting indicated rent for the top 39 comparables included in this analysis. The units that we consider most comparable are highlighted for the reader's reference.

	Rent Conclusion									
	Comparable		Un	Unadjusted Rent			Adjusted Rent

Adjusted Rent, Minimum	\$766
Adjusted Rent, Maximum	\$1,370
Adjusted Rent, Average	\$969
Adjusted Rent, Modified Average	\$963
Rent, Concluded	\$900

Our analysis suggests a rent of \$900 for the 1BR-1BA-516sf units at the subject property.

In our opinion, the 1BR-1BA-704sf units at Addison At Wyndham (Property # 004), the 1BR-1BA-727sf units at Charleston Ridge Apartments (Property # 030), the 1BR-1BA-752sf units at Charter Creek Apartments (Property # 031), the 1BR-1BA-751sf units at Legends At Virginia Center (Property # 065), and the 1BR-1BA-802sf units at Hamptons At Hunton Park (Property # 049) are the best comparables for the units at the subject property.

Rent Conclusion, As Is

In the table below we derive our "as is" rent conclusion using the "as renovated" rent conclusion developed above:

Rent Co	nclusion, As	ls		
	Conc	As	As	\$
Adjustment	Adj	Ren	ls	Adj
Condition	\$35	4.00	3.50	-\$18
Effective Age	\$10.00	2010	2005	-\$50
Call Buttons	\$2	no	yes	\$2
Adjustments				-\$66
Adjusted Rent, Minimum				\$700
Adjusted Rent, Maximum				\$1,304
Adjusted Rent, Average				\$903
Adjusted Rent, Modified Average				\$898
Rent, Concluded, As Is				\$835

Our analysis suggests an "as is" rent of \$835 for the 1BR-1BA-516sf units at the subject property.

Rent Conclusion, 2BR-2BA-773sf

The development of our rent conclusion for the 2BR-2BA-773sf units is found below.

Our analysis included the evaluation of a total of 39 unit types found at 7 properties. We selected the 39 most comparable units to utilize as rent comparables for purposes of this analysis. A write-up for each of the properties included in this analysis is found in the Appendix.

Our analysis included the adjustments developed in the previous section. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is better, a "plus" adjustment is made. If the subject is inferior, a "minus" adjustment is made. In the table below, we summarize the adjustments and the resulting indicated rent for the top 39 comparables included in this analysis. The units that we consider most comparable are highlighted for the reader's reference.

	\$ 00.4
Adjusted Rent, Minimum	\$994
Adjusted Rent, Maximum	\$1,598
Adjusted Rent, Average	\$1,197
Adjusted Rent, Modified Average	\$1,192
Rent, Concluded	\$1,145

Our analysis suggests a rent of \$1,145 for the 2BR-2BA-773sf units at the subject property.

In our opinion, the 2BR-2BA-898sf units at Charleston Ridge Apartments (Property # 030), the 2BR-2BA-992sf units at Charter Creek Apartments (Property # 031), the 2BR-2BA-990sf units at King's Crossing Apartments (Property # 062), the 2BR-2BA-1060sf units at Addison At Wyndham (Property # 004), and the 2BR-2BA-1097sf units at Legends At Virginia Center (Property # 065) are the best comparables for the units at the subject property.

Rent Conclusion, As Is

In the table below we derive our "as is" rent conclusion using the "as renovated" rent conclusion developed above:

Rent Con	clusion, As	ls		
	Conc	As	As	\$
Adjustment	Adj	Ren	ls	Adj
Condition	\$35	4.00	3.50	-\$18
Effective Age	\$10.00	2010	2005	-\$50
Call Buttons	\$2	no	yes	\$2
Adjustments				-\$66
Adjusted Rent, Minimum				\$929
Adjusted Rent, Maximum				\$1,533
Adjusted Rent, Average				\$1,132
Adjusted Rent, Modified Average				\$1,127
Rent, Concluded, As Is				\$1,080

Our analysis suggests an "as is" rent of \$1,080 for the 2BR-2BA-773sf units at the subject property.

Unrestricted Market Rent Conclusion

Based on our evaluation of the rents at the select comparable properties, and considering the location, quality and amenities of the subject property, we conclude the following market rents for the subject property units, assuming that the subject were an unrestricted property:

	Unrestri	cted Market Rent Co	nclusion			
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Market	Proposed	Advantage
1BR-1BA-516sf / 50% of AMI / 50% of AMI	Yes	No	7	\$900	\$759	15.7%
1BR-1BA-516sf / 50% of AMI / 50% of AMI	Yes	No	4	\$900	\$759	15.7%
1BR-1BA-516sf / 60% of AMI / 60% of AMI	No	No	41	\$900	\$830	7.8%
2BR-2BA-773sf / 60% of AMI / 60% of AMI	No	No	9	\$1,145	\$965	15.7%
Total / Average			61	\$936	\$837	10.6%

Our analysis suggests an average unrestricted market rent of \$936 for the subject property. This is compared with an average proposed rent of \$837, yielding an unrestricted market rent advantage of 10.6 percent. Overall, the subject property appears to be priced at or below unrestricted market rents for the area.

We selected a total of 7 properties as comparables for purposes of our analysis. The average occupancy at the select rent comparables currently stands at 98 percent.

Occupancy rates for the selected rent comparables are broken out below:

			Occupano	y Rate, Select Co	mparables			
	Subsidized	20% of AMI	30% of AMI	40% of AMI	50% of AMI	60% of AMI	80% of AMI	Market
0-Bedroom								
1-Bedroom								98%
2-Bedroom								98%
3-Bedroom								
4-Bedroom								
Total								98%

Occupancy rates for all stabilized market area properties are broken out below:

Occupancy Rate, Stabilized Properties

			Occupant	y reace, etablized	Поронаоо			
	Subsidized	20% of AMI	30% of AMI	40% of AMI	50% of AMI	60% of AMI	80% of AMI	Market
0-Bedroom								
1-Bedroom	100%		100%		98%			96%
2-Bedroom	100%		100%		98%			98%
3-Bedroom					94%			96%
4-Bedroom								
Total	100%		100%		97%			97%

HUD conducts an annual rent survey to derive Fair Market Rent estimates for an area. Based on this, 2bedroom rents for the area grew from \$930 to \$1067 since 2010. This represents an average 1.6% annual increase over this period.

Fair market rent data for the area is found below:

		HL	JD Fair Market Re	nts			
		Rent		Change	Change

Unrestricted Market Rent Conclusion, As Is

In the table found below we summarize the market rents for the subject property units on an "as is" basis, assuming that the subject were an unrestricted property:

	Unrestricted	d Market Rent Concl	usion, As Is			
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Market	Proposed	Advantage
1BR-1BA-516sf / 60% of AMI / 60% of AMI	No	No	52	\$835	\$830	0.6%
2BR-2BA-773sf / 60% of AMI / 60% of AMI	No	No	8	\$1,080	\$965	10.6%
Total / Average			60	\$868	\$848	2.3%

Restricted Rent Analysis

In this section we develop a restricted market rent conclusion and an achievable rent conclusion for the subject property units. Our analysis began by selecting comparable rentals to use to develop estimates of market rents for the units at the subject property, assuming that the subject was a restricted property. Our selection of comparables was based on location, age, condition, unit mix and amenities of the comparable properties relative to the subject property.

Rental Property Inventory, by Unit Type

In the following pages we present an inventory of properties included in this analysis. Rents for these properties, broken out by unit type, were used in selecting the rent comparables used in this analysis.

The properties that we consider to be comparable to the subject property are highlighted in the tables found in the following pages. We attempted to select stabilized restricted rent properties as comparables for purposes of our rent comparability analysis.

Comparables with market rents are used when a sufficient number of restricted rent comparables are not available and when maximum allowable rents for properties with restricted rents exceed prevailing rents in the area. In the event that program rental rates exceed market rental rates, restricted units are, in fact, *de facto* market rate units.

The subject property is located in an area with very few market rate elderly developments. Consequently, we have elected to use general occupancy properties in our analysis of market rents. This is appropriate because most of the existing elderly renters currently reside in general occupancy units creating a linkage between the two property types. Our research suggests that the majority of elderly renter households in the market area currently reside in general occupancy housing. This is consistent with a 1995 AARP member survey which found that 80 percent of respondents resided in general occupancy properties. Because such a high percentage of seniors reside in general occupancy housing, the subject property will need to be priced competitively to attract these renters. Consequently, it is not only appropriate - but prudent - to address general occupancy rents when determining market rents for age-restricted units in this market.

Rent Comparables, Restricted Rent, Map

A map showing the location of the properties selected as comparables in this analysis is found in the following pages. Properties identified with red pushpins have market rents, properties identified with yellow pushpins have restricted rents, and properties identified with blue pushpins have subsidized rents. Detailed write-ups for the select rent comparables are found in the Appendix to this report.

Rent Comparability Grids

Our analysis employed the use of rent comparability grids and resulted in a restricted market rent estimate for each of the subject's unit types. These grids and a narrative describing our rent adjustments are found in the following pages.

Rent Adjustments

Our analysis included a property management survey and a technique known as "statistical extraction" to help us identify the best adjustments to use. Statistical extraction, which is similar to the matched pair method, helped us derive the optimal adjustments for our particular data set.

Here's a hypothetical example to illustrate how we derived our rent adjustments. Assume that property managers tell us we should expect rent adjustments ranging from \$0.00 to \$0.50 per square foot for a particular market. Next, assume that we select 25 rent comparables with an adjusted sample standard deviation (a statistical measure of variability) of \$100. We employ a square foot rent adjustment of \$0.10 for each comparable resulting in an adjusted sample standard deviation of \$90. This tells us that the assumed adjustment "explained" some of the variability in the data. We repeat this process for adjustments of \$0.20, \$0.30, \$0.40 and \$0.50 which yielded adjusted sample standard deviations of \$80, \$70, \$65 and \$75, respectively. The \$0.40 square foot adjustment "explains" the most variability because any other adjustment yields a higher adjusted sample standard deviation. Consequently, a \$0.40 rent adjustment is the best adjustment for purposes of this example. This is a simplified example because we actually adjusted for numerous variables simultaneously in our analysis.

Many adjustments (bedroom count, bathroom count and square footage) are highly interrelated. Statistical extraction helped us unravel the interrelationships between these variables. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is superior a "plus" adjustment is made. If the subject is inferior a "minus" adjustment is made.

We used the Excel Solver function to help us with our analysis. The Solver function was programmed to minimize the adjusted standard deviation for our data set. We evaluated a total of 62 variables in 22 categories (AC systems, heating systems, technology, bedrooms, bathrooms, square feet, visibility, access, neighborhood, area amenities, condition, effective age, project amenities, elevator, unit amenities, storage, kitchen amenities, parking, laundry, security, on-site management, on-site maintenance) in an effort to identify the mix of adjustments that explained the most variability found in our raw data.

A discussion of our surveyed and concluded adjustments is found below.

Concessions

The first step in our analysis was to account for any concessions at the subject and the comparables. We considered the advertised street rent and concessions being offered and derived a net nent estimate for each comparable. Net rent, defined as advertised street rent minus monthly concessions, represents the cash rent paid by new residents at the various properties. This is the best measure of market value (prior to any other adjustments) for the comparables included in this analysis.

Tenant-Paid Utilities

The next step in our analysis was to account for differences in tenant-paid utilities between the comparable properties and the subject. We used the HUD Utility Schedule Model to derive our adjustments. The HUD model includes a current utility rate survey for the area. In the event that the tenant-paid utilities associated with a particular property are higher or lower than the subject, adjustments were made to account for the differences. Adjustments reflect the difference between the tenant-paid utilities for the comparable property minus that for the subject.

Technology

We accounted for technology (cable and internet access) offered in the rent for each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$40 per month for cable; internet access was valued at \$40.

Technology							
Adjustment	Survey	Range	Concluded				
Cable	\$0	\$50	\$40				
Internet	\$0	\$50	\$40				

Bedrooms

Our analysis also included an adjustment for the number of bedrooms at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$95 per bedroom.

Bedrooms						
Adjustment	Surve	y Range	Concluded			
Bedrooms	\$0	\$200	\$95			

Bathrooms

Our analysis also included an adjustment for the number of bathrooms at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$40 per bathroom.

	Bath	rooms	
Adjustment	Survey	/ Range	Concluded
Bathrooms	\$0	\$100	\$40

Square Feet

Our analysis also included an adjustment for square footage at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.20 per square foot.

Square Feet						
Adjustment	Survey	Range	Concluded			
Square Feet	\$0.00	\$2.00	\$0.20			

Visibility

We also accounted for differences in visibility at each of the comparables as compared to the subject property in our analysis. Based on our field review, we assigned a visibility rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$50 per point for differences in visibility ratings between the subject and the comparables.

	Vis	ibility	
Adjustment	Survey	/ Range	Concluded
Rating	\$0	\$100	\$50

Access

Our analysis also included an adjustment for access at each of the comparables as compared to the subject property. Based on our field review, we assigned an access rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$50 per point for differences in access ratings between the subject and the comparables.

	Ac	cess	
Adjustment	Survey	/ Range	Concluded
Rating	\$0	\$100	\$50

Neighborhood

We considered differences in neighborhood at each of the comparables as compared to the subject property in our analysis. Based on our field review and our evaluation of local demographic and crime data (presented earlier in this report), we assigned a neighborhood rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$20 per point for differences in neighborhood ratings between the subject and the comparables.

Neighborhood						
Adjustment	Survey	/ Range	Concluded			
Rating	\$0	\$100	\$20			

Area Amenities

We also accounted for area amenities for each of the comparables as compared to the subject property in our analysis. Based on our field review and our evaluation of local amenity data (presented earlier in this report), we assigned a local amenity rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$75 per point for differences in amenity ratings between the subject and the comparables.

	Area A	menities	
Adjustment	Survey	/ Range	Concluded
Rating	\$0	\$100	\$75

Median Household Income

Our analysis also included an adjustment for median household income for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.0000 per dollar of median household income.

Median Household Income						
Adjustment Survey Range Concluded						
Med HH Inc	\$0.0000 \$0.0000	\$0.0000				

Average Commute

Our analysis also included an adjustment for average commute for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.00 per each minute of commute.

Average Commute						
Adjustment	Survey	Range	Concluded			
Avg Commute	\$0.00	\$0.00	\$0.00			

Public Transportation

Our analysis also included an adjustment for the existence of public transportation within walking distance of each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.00 for public transportation.

Public Transportation						
Adjustment Survey Range Concluded						
Public Trans	\$0.00	\$0.00	\$0.00			

Personal Crime

Our analysis also included an adjustment for personal crime rates for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0 per 0.01 percentage points.

Personal Crime				
Adjustment	Survey Range		Concluded	
Personal Crime	\$0	\$0	\$0	

Condition

Our analysis also included an adjustment for the condition of each comparable as compared to the subject property. Based on our field review, we assigned a condition rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$50 per point for differences in condition ratings between the subject and the comparables.

Condition				
Adjustment	Survey Range		Concluded	
Rating	\$10	\$50	\$50	

Effective Age

We considered differences in effective age in our analysis. Based on our field review, we estimated the effective age for each of the properties included in this analysis. Our estimates reflected the condition-adjusted age and remaining useful life of each property. Statistical extraction resulted in an adjustment of \$4.60 per year for differences in effective age between the subject and the comparables.

Effective Age				
Adjustment	Survey Range		Concluded	
Rating	\$1.00	\$5.00	\$4.60	

Project Amenities

We considered the presence of various project amenities at the comparables as compared to the subject property. Project amenities include ball fields, BBQ areas, billiards, business/computer centers, car care centers, community centers, elevators, fitness centers, gazebos, hot tubs/Jacuzzis, horseshoe pits, lakes, libraries, movie theatres, picnic areas, playgrounds, pools, saunas, sports courts and walking trails. The survey range and our concluded adjustment for each amenity is summarized below.

Project Amenities				
Adjustment	Survey	Range	Concluded	
Ball Field	\$2	\$10	\$2	
BBQ Area	\$2	\$10	\$2	
Billiards	\$2	\$10	\$10	
Bus/Comp Ctrs	\$2	\$10	\$10	
Car Care Center	\$2	\$10	\$2	
Community Center	\$2	\$10	\$10	
Elevator	\$10	\$100	\$45	
Fitness Center	\$2	\$10	\$2	
Gazebo	\$2	\$10	\$2	
Hot Tub/Jacuzzi	\$2	\$10	\$2	
Horseshoe Pit	\$2	\$10	\$2	
Lake	\$2	\$10	\$2	
Library	\$2	\$10	\$10	
Movie Theatre	\$2	\$10	\$2	
Picnic Area	\$2	\$10	\$2	
Playground	\$2	\$10	\$2	
Pool	\$2	\$10	\$2	
Sauna	\$2	\$10	\$2	
Sports Court	\$2	\$10	\$10	
Walking Trail	\$2	\$10	\$2	

Unit Amenities

We considered the presence of various unit amenities at the comparables as compared to the subject property. Unit amenities include blinds, ceiling fans, carpeting/upgraded flooring, fireplaces, patios/balconies and storage. The survey range and our concluded adjustment for each amenity is summarized below.

Unit Amenities					
Adjustment	Survey Range		Concluded		
Blinds	\$2	\$10	\$2		
Ceiling Fans	\$2	\$10	\$2		
Carpeting	\$2	\$10	\$2		
Fireplace	\$2	\$10	\$2		
Patio/Balcony	\$2	\$10	\$3		
Storage	\$10	\$50	\$10		

Kitchen Amenities

We considered the presence of various kitchen amenities at the comparables as compared to the subject property. Kitchen amenities include stoves, refrigerators, disposals, dishwashers and microwaves. The survey range and our concluded adjustment for each amenity is summarized below.

Kitchen Amenities					
Adjustment	Survey Range		Concluded		
Stove	\$2	\$10	\$2		
Refrigerator	\$2	\$10	\$2		
Disposal	\$2	\$10	\$10		
Dishwasher	\$2	\$10	\$10		
Microwave	\$2	\$10	\$9		

Parking

We also adjusted for differing types of parking configurations. We classified parking five ways: (1) Garage, (2) Covered; (3) Assigned, (4) Open and (5) No parking offered. Statistical extraction resulted in an adjustment of \$50 per month for garages; covered parking was valued at \$20; assigned parking was valued at \$10; open parking was valued at \$0; no parking was valued at \$0.

Parking					
Adjustment	Survey Range		Concluded		
Garage	\$50	\$200	\$50		
Covered	\$20	\$100	\$20		
Assigned	\$10	\$50	\$10		
Open	\$0	\$0	\$0		
None	\$0	\$0	\$0		

Laundry

We also evaluated differing types of laundry configurations. We classified laundry amenities three ways: (1) Central Laundry, (2) Washer/Dryer Units; and (3) Washer/Dryer Hookups. Our analysis resulted in an adjustment of \$25 per month for central laundries; washer/dryer units were valued at \$10; washer/dryer hookups were valued at \$5.

Laundry					
_	Adjustment	Survey Range		Concluded	
	Central	\$5	\$25	\$25	
	W/D Units	\$10	\$50	\$10	
	W/D Hookups	\$5	\$25	\$5	

Security

We considered the presence of various security amenities at the comparables as compared to the subject property. Security amenities include call buttons, controlled access, courtesy officers, monitoring, security alarms and security patrols. The survey range and our concluded adjustment for each amenity is summarized below.

Security					
Adjustment	Survey Range		Concluded		
Call Buttons	\$2	\$10	\$10		
Controlled Access	\$2	\$10	\$10		
Courtesy Officer	\$2	\$10	\$10		
Monitoring	\$2	\$10	\$2		
Security Alarms	\$2	\$10	\$2		
Security Patrols	\$2	\$10	\$10		

Rent Conclusion, 1BR-1BA-516sf

The development of our rent conclusion for the 1BR-1BA-516sf units is found below.

Our analysis included the evaluation of a total of 20 unit types found at 8 properties. We selected the 20 most comparable units to utilize as rent comparables for purposes of this analysis. A write-up for each of the properties included in this analysis is found in the Appendix.

Our analysis included the adjustments developed in the previous section. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is better, a "plus" adjustment is made. If the subject is inferior, a "minus" adjustment is made. In the table below, we summarize the adjustments and the resulting indicated rent for the top 20 comparables included in this analysis. The units that we consider most comparable are highlighted for the reader's reference.

Rent, Concluded		

Our analysis suggests a rent of \$965 for the 1BR-1BA-516sf units at the subject property.

Adjusted Rent, Modified Average

In our opinion, the 1BR-1BA-620sf units at Atlantic (The) at Brook Run (Property # 011), the 1BR-1BA-595sf units at Atlantic At Twin Hickory (Property # 012), the 2BR-1BA-790sf units at Parham Park Place Senior Apartments Phase 1 (Property # 085), the 1BR-1BA-540sf units at Terraces at Bellevue (Property # 018), and the 1BR-1BA-664sf units at Quarter Mill Apartments (Property # 091) are the best comparables for the units at the subject property.

\$975

\$965

Rent Conclusion, As Is

In the table below we derive our "as is" rent conclusion using the "as renovated" rent conclusion developed above:

Rent Co	nclusion, As	ls		
	Conc	As	As	\$
Adjustment	Adj	Ren	ls	Adj
Neighborhood	\$20	2.70	3.00	\$6
Area Amenities	\$75	4.20	3.25	-\$71
Condition	\$50	4.00	3.50	-\$25
Effective Age	\$4.60	2010	2005	-\$23
Call Buttons	\$10	no	yes	\$10
Adjustments				-\$103
Adjusted Rent, Minimum				\$809
Adjusted Rent, Maximum				\$908
Adjusted Rent, Average				\$871
Adjusted Rent, Modified Average				\$872
Rent, Concluded, As Is				\$860

Our analysis suggests an "as is" rent of \$860 for the 1BR-1BA-516sf units at the subject property.

Rent Conclusion, 2BR-2BA-773sf

The development of our rent conclusion for the 2BR-2BA-773sf units is found below.

Our analysis included the evaluation of a total of 20 unit types found at 8 properties. We selected the 20 most comparable units to utilize as rent comparables for purposes of this analysis. A write-up for each of the properties included in this analysis is found in the Appendix.

Our analysis included the adjustments developed in the previous section. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is better, a "plus" adjustment is made. If the subject is inferior, a "minus" adjustment is made. In the table below, we summarize the adjustments and the resulting indicated rent for the top 20 comparables included in this analysis. The units that we consider most comparable are highlighted for the reader's reference.

						.			

Our analysis suggests a rent of \$1,155 for the 2BR-2BA-773sf units at the subject property.

Rent, Concluded

In our opinion, the 2BR-2BA-835sf units at Atlantic (The) at Brook Run (Property # 011), the 2BR-2BA-835sf units at Atlantic At Twin Hickory (Property # 012), the 2BR-1BA-790sf units at Parham Park Place Senior Apartments Phase 1 (Property # 085), the 2BR-2BA-1029sf units at Greens At Virginia Center (Property # 048), and the 2BR-2BA-1000sf units at Overlook at Brook Run Apartments Phase 1 (Property # 083) are the best comparables for the units at the subject property.

\$1,155

Rent Conclusion, As Is

In the table below we derive our "as is" rent conclusion using the "as renovated" rent conclusion developed above:

clusion, As	ls		
Conc	As	As	\$
Adj	Ren	ls	Adj
\$20	2.70	3.00	\$6
\$75	4.20	3.25	-\$71
\$50	4.00	3.50	-\$25
\$4.60	2010	2005	-\$23
\$10	no	yes	\$10
			-\$103
			\$993
			\$1,092
			\$1,055
			\$1,056
			\$1,050
	Conc Adj \$20 \$75 \$50 \$4.60	Adj Ren \$20 2.70 \$75 4.20 \$50 4.00 \$4.60 2010	Conc As As Adj Ren Is \$20 2.70 3.00 \$75 4.20 3.25 \$50 4.00 3.50 \$4.60 2010 2005

Our analysis suggests an "as is" rent of \$1,050 for the 2BR-2BA-773sf units at the subject property.

Restricted Market Rent Conclusion

Based on our evaluation of the rents at the select comparable properties, and considering the location, quality and amenities of the subject property, we conclude the following market rents for the subject property units, assuming that the subject were a restricted property:

Restricted Market Rent Conclusion								
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Market				
1BR-1BA-516sf / 50% of AMI / 50% of AMI	Yes	No	7	\$965				
1BR-1BA-516sf / 50% of AMI / 50% of AMI	Yes	No	4	\$965				
1BR-1BA-516sf / 60% of AMI / 60% of AMI	No	No	41	\$965				
2BR-2BA-773sf / 60% of AMI / 60% of AMI	No	No	9	\$1,155				
Total / Average			61	\$993				

Our analysis suggests an average restricted market rent of \$993 for the subject property.

We selected a total of 8 properties as comparables for purposes of our analysis. The average occupancy at the select rent comparables currently stands at 97 percent.

The occupancy rate of the selected rent compatrables is broken out in the tables below:

Occupancy Rate, Select Comparables									
	Subsidized	20% of AMI	30% of AMI	40% of AMI	50% of AMI	60% of AMI	80% of AMI	Market	
0-Bedroom									
1-Bedroom					97%				
2-Bedroom				100%	97%				
3-Bedroom									
4-Bedroom									
Total				100%	97%				

Occupancy rates for all stabilized market area properties are broken out below:

			Occupanc	y Rate, Stabilized	Properties			
	Subsidized	20% of AMI	30% of AMI	40% of AMI	50% of AMI	60% of AMI	80% of AMI	Market
0-Bedroom								
1-Bedroom	100%		100%		98%			96%
2-Bedroom	100%		100%		98%			98%
3-Bedroom					94%			96%
4-Bedroom								
Total	100%		100%		97%			97%

Rents at rent restricted properties tend to move with median household incomes for an area. Given HUD's published median incomes, we were able to derive 1, 2 and 3-bedroom 60% of AMI rent limits for the subject's primary market area. According to our analysis, maximum 2-bedroom rents for the area grew from \$998 to \$1166 since 2010. This represents an average 1.9% annual increase over this period.

Maximum tax credit rent data for the area is found below:	

		Rent		Change					
Year	1BR	2BR	3BR	1BR	2BR	3BR			
2007	\$773	\$927	\$1,072	-	-	-			
2008	\$780	\$936	\$1,081	0.9%	1.0%	0.8%			
2009	\$824	\$988	\$1,142	5.6%	5.6%	5.6%			
2010	\$831	\$998	\$1,153	0.8%	1.0%	1.0%			
2011	\$839	\$1,007	\$1,164	1.0%	0.9%	1.0%			
2012	\$851	\$1,021	\$1,179	1.4%	1.4%	1.3%			
2013	\$831	\$998	\$1,153	-2.4%	-2.3%	-2.2%			
2014	\$820	\$984	\$1,137	-1.3%	-1.4%	-1.4%			
2015	\$835	\$1,002	\$1,158	1.8%	1.8%	1.8%			
2016	\$814	\$977	\$1,129	-2.5%	-2.5%	-2.5%			
2017	\$885	\$1,062	\$1,228	8.7%	8.7%	8.8%			
2018	\$936	\$1,123	\$1,298	5.8%	5.7%	5.7%			
2019	\$972	\$1,166	\$1,348	3.8%	3.8%	3.9%			

Restricted Market Rent Conclusion, As Is

In the table found below we summarize the market rents for the subject property units on an "as is" basis, assuming that the subject were a restricted property:

Restricted Market Rent Conclusion, As Is									
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Market					
1BR-1BA-516sf / 60% of AMI / 60% of AMI	No	No	52	\$860					
2BR-2BA-773sf / 60% of AMI / 60% of AMI	No	No	8	\$1,050					
Total / Average			60	\$885					

Rent Comparability Analysis

Achievable Rent Conclusion

The next step in our analysis is to develop an achievable rent conclusion for the subject property. Achievable rents represent the absolute highest rent permissible for the area, considering market rents, program rent limits, and any other applicable rent restrictions on the subject property.

Our analysis begins by establishing the applicable program rent limits for the subject property. Program rent limits include any applicable LIHTC and FMR rent limits. LIHTC rent limits typically apply to units benefitting from tax credit and/or bond financing. The LIHTC rent limits for applicable units at the subject property follow:

	LIHTC Rent	Limits				
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Gross Rent	Utilities	Net Rent
1BR-1BA-516sf / 50% of AMI / 50% of AMI	Yes	No	7	\$838	\$51	\$787
1BR-1BA-516sf / 50% of AMI / 50% of AMI	Yes	No	4	\$838	\$51	\$787
1BR-1BA-516sf / 60% of AMI / 60% of AMI	No	No	41	\$1,006	\$51	\$955
2BR-2BA-773sf / 60% of AMI / 60% of AMI	No	No	9	\$1,207	\$53	\$1,154
Total / Average			61	\$1,005	\$51	\$954

Our analysis suggests an average net LIHTC rent limit of \$954 for 61 applicable units at the subject property.

FMR rent limits typically apply to units benefitting from HOME funds. The FMR rent limits for applicable units at the subject property follow:

	FMR Rent	Limits				
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Gross Rent	Utilities	Net Rent
1BR-1BA-516sf / 50% of AMI / 50% of AMI	Yes	No	7	\$932	\$51	\$881
1BR-1BA-516sf / 50% of AMI / 50% of AMI	Yes	No	4	\$932	\$51	\$881
1BR-1BA-516sf / 60% of AMI / 60% of AMI	No	No	-	-	-	-
2BR-2BA-773sf / 60% of AMI / 60% of AMI	No	No	-	-	-	-
Total / Average			11	\$932	\$51	\$881

Our analysis suggests an average net FMR rent limit of \$881 for 11 applicable units at the subject property.

Units benefitting exclusively from tax credits and/or bond financing are subject to LIHTC rent limits. Units benefitting from HOME funds in addition to tax credit and/or bond financing are subject to the lesser of LIHTC rent limits or FMR rent limits. Units benefitting from project-based rental assistance are normally limited to unrestricted market rent. With these parameters in mind, the following table sets forth the concluded program rent limits for applicable units at the subject property:

		Program Rent L	imits				
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	LIHTC	FMR	Market	Program
1BR-1BA-516sf / 50% of AMI / 50% of AMI	Yes	No	7	\$787	\$881	-	\$787
1BR-1BA-516sf / 50% of AMI / 50% of AMI	Yes	No	4	\$787	\$881	-	\$787
1BR-1BA-516sf / 60% of AMI / 60% of AMI	No	No	41	\$955	-	-	\$955
2BR-2BA-773sf / 60% of AMI / 60% of AMI	No	No	9	\$1,154	-	-	\$1,154
Total / Average			61	\$954	\$881	-	\$954

Our analysis suggests an average program rent limit of \$954 for 61 applicable units at the subject property.

Now that we have established program rent limits, we are in a position to develop an achievable rent conclusion for the subject property. Achievable rents represent the absolute highest rent permissible for the area, considering unrestricted and restricted market rents, program rent limits, and any other applicable rent restrictions on the subject property. The following table summarizes our findings:

		A	chievable R	ents					
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Program	Unrestricted	Restricted	Achievable	Proposed	Advantage
1BR-1BA-516sf / 50% of AMI / 50% of AMI	Yes	No	7	\$787	\$900	\$965	\$787	\$759	3.6%
1BR-1BA-516sf / 50% of AMI / 50% of AMI	Yes	No	4	\$787	\$900	\$965	\$787	\$759	3.6%
1BR-1BA-516sf / 60% of AMI / 60% of AMI	No	No	41	\$955	\$900	\$965	\$955	\$830	13.1%
2BR-2BA-773sf / 60% of AMI / 60% of AMI	No	No	9	\$1,154	\$1,145	\$1,155	\$1,154	\$965	16.4%
Total / Average			61	\$954	\$936	\$993	\$954	\$837	12.3%

Our analysis suggests an average achievable rent of \$954 for the subject property. This is compared with an average proposed rent of \$837, yielding an achievable rent advantage of 12.3 percent. Overall, the subject property appears to be priced at or below achievable rents for the area.

As of today's date (April 22, 2020) much of the United States is under a COVID-19 lockdown. The effects associated with this are enormous, but have not yet worked their way through the rental marketplace. The long-term effect of COVID-19 is not yet known. We could be looking at a strong V-shaped recovery. We could be looking at a long, slow recovery. That said, the reader is cautioned that the numbers presented above do not reflect any of these effects.

DEMAND ANALYSIS

Overview

In this section we evaluate demand for the subject property using the recommended demand methodology promulgated by the National Council of Housing Market Analysts (NCHMA). For purposes of this analysis, we define demand as the number of 55+ income-qualified renter households (by household size and unit type) that would qualify to live at the subject property at the lesser of the developer's proposed rents or achievable rents.

Our analysis begins by developing a breakdown of the number of renter households, by income, by size as of the date of market entry for this development. This breakdown, which utilizes demographic data presented earlier in this report, is presented below:

	2020	\$				2021			
Min		Max	1 Person	2 Person	3 Person	4 Person	5 Person	6+ Person	Total
\$0	to	\$9,999	72	7	0	5	5	0	89
\$0	to	\$19,999	277	16	40	10	10	0	354
\$0	to	\$29,999	434	42	42	12	17	0	547
\$0	to	\$39,999	553	104	51	17	21	0	746
\$0	to	\$49,999	636	125	56	26	27	0	870
\$0	to	\$59,999	698	142	80	27	32	0	979
\$0	to	\$74,999	761	206	95	28	37	0	1,128
\$0	to	\$99,999	796	277	102	34	45	3	1,257
\$0	to	\$124,999	856	294	108	37	59	7	1,362
\$0	to	\$149,999	909	306	113	39	63	7	1,437
\$0	to	\$199,999	935	313	120	43	65	7	1,484
\$0	or	more	990	329	126	44	70	7	1,566

55+ Renter Households, by Income, by Size

Source: ESRI & Ribbon Demographics

Our analysis includes an estimate of demand along with capture rate and penetration rate estimates. Capture rates were computed two ways: (1) On a <u>gross</u> basis (the number of proposed units divided by qualified demand) and (2) On a <u>net</u> basis (the number of proposed units divided by qualified demand minus competing & pipeline units). Penetration rates are defined as the number of proposed units plus competing & pipeline units divided by incomequalified demand. In the following pages we provide detailed listings of competing & pipeline units in the market area broken by unit type.

Demand Estimate, 1-Bedroom, Restricted, 50% of AMI

In this section we estimate demand for the 1-Bedroom / Restricted / 50% of AMI units at the subject property. Our analysis assumes a total of 11 units, 5 of which are anticipated to be vacant on market entry in 2021. Our analysis assumes a 50% income qualification ratio and 2-person households.

	Demand Est	timate		321			

Our analysis suggests demand for a total of 321 size- and income-qualified units in the market area.

Demand Estimate, 2-Bedroom, Restricted, 60% of AMI

In this section we estimate demand for the 2-Bedroom / Restricted / 60% of AMI units at the subject property. Our analysis assumes a total of 9 units, 4 of which are anticipated to be vacant on market entry in 2021. Our analysis assumes a 50% income qualification ratio and 2-person households.

Subtotal			267	94	0	0	0	0

Our analysis suggests project-level demand for a total of 361 size- and income-qualified units in the market area.

Capture Rates

In this section, we summarize our demand conclusions and estimate the capture rate for the subject property. Our analysis begins by summarizing the estimated number of vacant subject property units on the date of market entry.

			Su	bject Prope	rty Units (To	tal)			
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot
0BR									
1BR				11	41				52
2BR					9				9
3BR									
4BR									
Tot				11	50				61

	Subject Property Units (Vacant at Market Entry)											
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot			
0BR												
1BR				5	20				25			
2BR					4				4			
3BR												
4BR												
Tot				5	24				29			

The next step in our analysis is to summarize the demand conclusions derived previously. For purposes of this analysis, we define demand as age- and income- qualified renter households for each of the unit types proposed at the subject property. Unit-level demand estimates are found in the body of the chart found below; project-level demand estimates are found in the column and row totals.

Please note: Because of income-band overlap, unit-level demand may not add up to project-level demand. The overlap, which was quantified in the demand estimates presented earlier, has been accounted for in our estimates of project-level demand.

	Gross Demand											
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot			
0BR												
1BR				250	321				571			
2BR					266				266			
3BR												
4BR												
Tot				250	321				361			

The next step in our analysis is to compute the capture rate for the project. For purposes of this computation, we define capture rate as the number of subject property units divided by gross demand. Underwriters often utilize capture rate limits of 10 to 25 percent using this methodology. Our estimates are presented below:

	Sub	30%	40%	50%	60%	70%	, 80%	Mkt	Tot
0BR	Cub	0070	1070	0070	0070	1070	0070	ivite	100
1BR				2.0%	6.2%				4.4%
2BR					1.5%				1.5%
3BR									
4BR									
Tot				2.0%	7.5%				8.0%

Capture Rates (Subject Property Units / Gross Demand)

The next step in our analysis is to tabulate the number of vacant competing & pipeline units in the market area by

unit/income type. This information will be used to further refine our capture rate estimate for the subject property. A table showing the distribution of vacant competing & pipeline units is found below.

		Vacant Competing & Pipeline Units								
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot	
0BR										
1BR					1				1	
2BR										
3BR										
4BR										
Tot					1				1	

Vacant Competing & Pipeline Units

The next step in our analysis is to subtract the number of vacant competing & pipeline units from gross demand to arrive at a net demand estimate for the subject property units. As described earlier, unit-level net demand estimates are found in the body of the chart found below; project-level net demand estimates are found in the column and row totals.

Please note: Because of income-band overlap, unit-level net demand may not add up to project-level net demand. The overlap, which was quantified in the demand estimates presented earlier, has been accounted for in our estimates of project-level net demand.

	Net Demand (Gloss Demand - Vacant Competing & Fipeline Onits)									
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot	
0BR										
1BR				250	320				570	
2BR					266				266	
3BR										
4BR										
Tot				250	320				360	
				250	320				36	

The next step in our analysis is to compute the capture rate for the project. For purposes of this computation, we define capture rate as the number of subject property units divided by net demand. A capture rate in excess of 20 percent is considered excessive using this methodology. Our estimates are presented below:

	Capitale Rates (Cabjeer Poperty Childs / Net Demandy									
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot	
0BR										
1BR				2.0%	6.3%				4.4%	
2BR					1.5%				1.5%	
3BR										
4BR										
Tot				2.0%	7.5%				8.1%	

In our opinion, the estimated project-level capture rate suggests an appropriate number of units for the subject property. The unit level capture rates suggest an appropriate mix of units for the subject property.

Penetration Rates

In this section, we summarize our demand conclusions and estimate the penetration rate for the subject property. Our analysis begins by summarizing the estimated number of vacant subject property units on the date of market entry.

	Subject Property Units (Total)											
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot			
0BR												
1BR				11	41				52			
2BR					9				9			
3BR												
4BR												
Tot				11	50				61			

	Subject Property Units (Vacant at Market Entry)												
	Sub 30% 40% 50% 60% 70% 80% Mkt Tot												
0BR													
1BR				5	20				25				
2BR					4				4				
3BR													
4BR													
Tot				5	24				29				

The next step in our analysis is to summarize the demand conclusions derived previously. For purposes of this analysis, we define demand as age- and income- qualified renter households for each of the unit types proposed at the subject property. Unit-level demand estimates are found in the body of the chart found below; project-level demand estimates are found in the column and row totals.

Please note: Because of income-band overlap, unit-level demand may not add up to project-level demand. The overlap, which was quantified in the demand estimates presented earlier, has been accounted for in our estimates of project-level demand.

	Gross Demand											
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot			
0BR												
1BR				250	321				571			
2BR					266				266			
3BR												
4BR												
Tot				250	321				361			

The next step in our analysis is to tabulate the number of competing & pipeline units in the market area by unit/income type. This information will be used to derive our penetration rate estimate for the subject property. A table showing the distribution of competing & pipeline units is found below.

			С	ompeting &	Pipeline Un	its			
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot
0BR									
1BR					52				52
2BR					8				8
3BR									
4BR									
Tot					60				60

The next step in our analysis is to compute inclusive supply for the market area by unit/income type. Inclusive

supply will be taken into account in our penetration rate estimate for the subject property. For purposes of this estimate, inclusive supply consists of vacant subject property units plus competing & pipeline units.

			uppiy (Oubje	or i topony		ipeting a r ip			
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot
0BR									
1BR				5	72				77
2BR					12				12
3BR									
4BR									
Tot				5	84				89

Inclusive Supply (Subject Property Units + Competing & Pipeline Units)

The next step in our analysis is to compute the penetration rate for the project. For purposes of this computation, penetration rate is defined as inclusive supply divided by gross demand. A penetration rate in excess of 100 percent is considered excessive using this methodology. Our estimates are presented below:

	r chetration rates (molesive Supply / Stoss Demandy									
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot	
0BR										
1BR				2.0%	22.4%				13.5%	
2BR					4.5%				4.5%	
3BR										
4BR										
Tot				2.0%	26.2%				24.7%	

Penetration Rates (Inclusive Supply / Gross Demand)

In our opinion, the estimated project-level penetration rate suggest an appropriate number of units for the subject property. The unit-level penetration rates suggest an appropriate mix of units for the subject property.

Absorption Period

In this section, we estimate the absorption period for the subject property. Our analysis begins by summarizing the estimated number of vacant subject property units on the date of market entry.

-

			Subject	Property Units	s (Total)			
	Sub	30%	40%	50%	60%	70%	80%	Mkt

	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR				5	20			
2BR					4			
3BR								
4BR								

The next step in our analysis is to summarize the demand conclusions derived previously. For purposes of this analysis, we define demand as age- and income- qualified renter households for each of the unit types proposed at the subject property. Our analysis uses the unit-level demand estimates derived previously.

				Gross Deman	b			
	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR				250	321			
2BR					266			
3BR								
4BR								

The next step in our analysis is to apply an annual growth & movership rate to derive an annual rental household growth & movership estimate for the market area. Our estimates are found in the tables below.

Annual Growth & Movers	hip Rate
Growth	3.5%
Movership	8.0%
Total	11.5%

Growth & Movership Estimate

	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR				29	37			
2BR					31			
3BR								
4BR								

The next step in our analysis is to account for secondary market area migration in our annual rental household growth & movership estimate for the market area. Our estimates are found in the tables below.

> Secondary Market Area 40%

	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR				48	62			
2BR					51			
3BR								
4BR								

The next step in our analysis is to estimate fair share, or the proportion of growth and movership that we would expect the subject property to capture. The fair share analysis is used extensively in single-family, multifamily, commercial, and retail market studies. The books entitled <u>Market Analysis for Valuation Appraisals</u> (1994, Appraisal Institute) and <u>Market Analysis and Highest & Best Use</u> (2005, Appraisal institute) provide a good overview of this technique and its application to a variety of property types.

Based on our review of the subject and competing properties, along with their relative conditions/locations, we arrive at the following fair share estimates for the various unit/income types at the subject property.

			Cor	mpeting Prope	rties			
	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR					1

0BR								
1BR				50.0%	50.0%			
2BR					50.0%			
3BR								
4BR								

Applying the concluded fair share estimates to annual growth & movership and dividing by twelve yields the following monthly absorption rate estimates for the various unit/income types at the subject property.

Monthly Absorption	Rate Estimate

	Sub	30%	40%	50%	60%	70%	80%	Mkt	
0BR									
1BR				2.0	2.6				
2BR					2.1				
3BR									
4BR									

The next step in our analysis is to estimate stabilized occupancy by unit/income type for the subject property. These estimates, which were based on data previously presented in the supply analysis and rent comparability analysis sections of this report, are found below.

	Rental Property Inventory, Commed, Inside Market Area, Eldeny, Stabilized Occupancy							
	Sub	30%	40%	50%	60%	70%	80%	Mkt

Applying the stabilized occupancy rate estimates to the number of vacant subject property units at market entry, yields the number of occupied units by unit/income type at stabilization as set forth below.

Occupied Units at Stabilization

2BR					4			
3BR								
4BR								

Dividing the number of occupied units at stabilization by the monthly absorption rate yields an absorption period estimate by unit/income type for the various units at the subject property. Underwriters often utilize absorption period limits of 12 to 18 months for projects similar to the subject property. Our absorption period estimates are found below.

	Sub	30%	40%	50%	60%	70%	80%	Mkt	
0BR									
1BR				2	8				
2BR					2				
3BR									
4BR									

Absorption Period (Months to Stabilization)

Our analysis suggests that the subject property will stabilize at 97 percent occupancy. We estimate 8 months of absorption and an average absorption rate of 3.7 units per month for this project. In our opinion, the absorption period suggests an appropriate number and mix of units for the subject property.

Absorption rates for age-restricted multifamily properties depend on a variety of factors: (1) The competitive environment in which the property resides; (2) The pricing of the subject property units relative to competing units, (3) The presence of rent or income restrictions at the subject property; and (4) The availability of any rent concessions or rental assistance at the subject property. Subsidized elderly properties normally lease up at a rate of 12-16 units per month. Unsubsidized elderly properties with rent and income restrictions tyically fill at a rate of 4-8 units per month. Market rate elderly properties normally lease up at a rate of 8-12 units per month.

As part of our analysis, we inquired about the absorption history for every property we surveyed. The following list summarizes our findings:

Key	Project	Built	Renovated	Rent Type	Осс Туре	Tot Units	Ab Rte
002	Abberly At Twin Hickory	2001	na	Market Rate	Family	378	-

Absorption Analysis

In this section, we analyze the anticipated lease up for the subject property. We begin our analysis by taking the the absorption period conclusions from the previous section and restating them graphically as illustrated below.

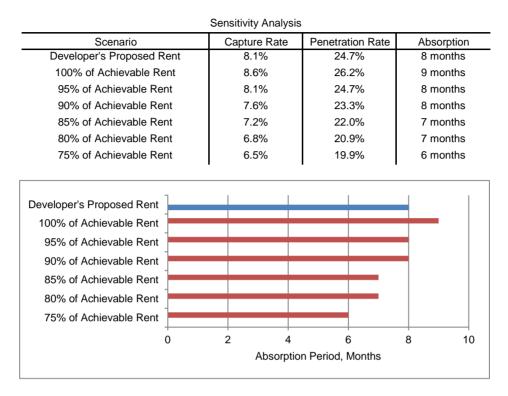

Our analysis suggests that the subject property will achieve 70 percent occupancy in 1 months, 80 percent occupancy in 3 months, and 90 percent occupancy in 6 months. We anticipate that the subject property will stabilize at 97 percent occupancy in 8 months.

It is important to note that this analysis does not account for pent-up demand, pre-leasing efforts or rent concessions. In our opinion, an effective pre-leasing effort could result in a month-for-month reduction in the estimated absorption period for this project. In addition, any concessions or rent subsidies not accounted for already in this analysis could cut capture rates and absorption periods significantly.

Sensitivity Analysis

We also explored the relationship between rent level, capture rates, penetration rates, and absorption period. For purposes of this analysis, we forecasted demand and fill rates at 75%, 80%, 85%, 90%, 95% and 100% of achievable rent (derived earlier in this report). Our analysis is summarized below:

Our analysis suggests the following relationship between rent levels and fill rates: At the developer's proposed rent we anticipate a 8-month absorption period; at 100% of achievable rent we anticipate a 9-month absorption period; at 75% of achievable rent we anticipate a 6-month absorption period.

VHDA DEMAND ANALYSIS

Overview

In this section we evaluate demand for the subject property using the VHDA demand methodology. For purposes of this analysis, we define VHDA demand as the number of new income-qualified and existing income-qualified overburdened and substandard 55+ renter households that would qualify to live at the subject property at the lesser of achievable rents or the sponsor's proposed rents. Our analysis accounts for any rent subsidies for the subject property.

Our analysis begins by developing a breakdown of the number of renter households, by income, by size as of the date of market entry for this development. This breakdown, which utilizes demographic data presented earlier in this report, is presented below:

	2020	\$		2020

The next step in our analysis is to tally up total demand for the subject property. Our estimates are found below.

				Total Demand				
	Sub	30%	40%	50%	60%	70%	80%	Mkt
 Tot				113	189			

The next step in our analysis is to tabulate the number of vacant competing & pipeline units in the market area by unit/income type. This information will be used to further refine our capture rate estimate for the subject property. A table showing the distribution of vacant competing & pipeline units is found below.

			Vacant Co	mpeting & Pip	eline Units			
	Sub	30%	40%	50%	60%	70%	80%	Mkt
Tot					1			

The next step in our analysis is to subtract the number of vacant competing & pipeline units from total demand to arrive at a net demand estimate for the subject property. Our estimates are found below.

Net Demand (Total Demand - Vacant Competing & Pipeline Units)

		Hot Bollian	a (Total Bollia	la vacante	sinpoling a r ip			
	Sub	30%	40%	50%	60%	70%	80%	Mkt
Tot				113	188			

The next step in our analysis is to compute the capture rate for the project. For purposes of this computation, we define capture rate as the total number of subject property units divided by net demand. Underwriters often utilize capture rate limits of 10 to 20 percent using this methodology. Our estimates are presented below:

Capture Rates (Subject Property Units / Net Demand)

	Sub	30%	40%	50%	60%	70%	80%	Mkt
Tot				9.7%	26.7%			

Our findings are summarized below.

Project-Wide Capture Rate - LIHTC Units	20.3%
Project-Wide Capture Rate - Market Units	
Project-Wide Capture Rate - All Units	20.3%
Project-Wide Absorption Period (Months)	8 months

Please note: Project-wide capture rate estimates do not account for income band overlap at the project level.

Rent reflects special of \$200 off 1st month for available units. Property operates with the "LRO" rental rate program which determines the rental rate with supply and demand. Contact was unable to give rent rates for floorplans unless available or coming available. Rent range due to unit location (lower floors - higher rates). Total property unit

Quarter Mill Apartments is an existing multifamily development located at 3000 Quarter Creek Lane in Richmond, Virginia. The property, which consists of 266 apartment units, was originally constructed in 1990. This property is currently operated as a rent restricted property. The property currently stands at 95 percent occupancy.

STATEMENT OF ASSUMPTIONS & LIMITING CONDITIONS

- The title to the subject property is merchantable, and the property is free and clear of all liens and encumbrances, except as noted.
- No liability is assumed for matters legal in nature.
- Ownership and management are assumed to be in competent and responsible hands.
- No survey has been made by the appraiser. Dimensions are as supplied by others and are assumed to be correct.
- The report was prepared for the purpose so stated and should not be used for any other reason.
- All direct and indirect information supplied by the owner and their representatives concerning the subject property is assumed to be true and accurate.
- No responsibility is assumed for information supplied by others and such information is believed to be reliable and correct. This includes zoning and tax information provided by Municipal officials.
- The signatories shall not be required to give testimony or attend court or be at any governmental hearing with respect to the subject property unless prior arrangements have been made with the client.
- Disclosure of the contents of this report is governed by the By-Laws and Regulations of the Appraisal Institute.
- The legal description is assumed to be accurate.
- This report specifically assumes that there are no site, subsoil, or building contaminates present resulting from residual substances or construction materials, such as asbestos, radon gas, PCB, etc. Should any of these factors exist, the appraiser reserves the right to review these findings, review the value estimates, and change the estimates, if deemed necessary.
- The Americans with Disabilities Act (ADA) became effective January 26, 1992. We have not made a specific compliance survey and analysis of this property to determine whether or not it is in conformity with
- This analysis specifically assumes that the subject property is operated as described in this report.
- This analysis specifically assumes that the subject property is constructed/rehabilitated as described in this report.
- This analysis specifically assumes that the subject property is financed as described in this report.
- This analysis specifically assumes the timing set forth in this report.
- As of today's date (April 23, 2020) much of the United States is under a COVID-19 lockdown. The effects associated with this are enormous, but have not yet worked their way through the marketplace. The long-term effect of COVID-19 is not yet known. We could be looking at a strong V-shaped recovery. We could be looking at a long, slow recovery. That said, the reader is cautioned that the opinions presented in this report do not reflect any of these effects.

CERTIFICATION

I certify that, to the best of my knowledge and belief:

- The statements of fact contained in this report are true and correct.
- The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
- I have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved.
- I have performed no services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.
- I have no bias with respect to the property that is the subject of this report or to the parties involved with this assignment.
- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of the appraisal.
- The reported analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the requirements of the Uniform Standards of Professional Appraisal Practice.
- I made a personal inspection of the property that is the subject of this report.
- No one provided significant real property appraisal assistance to the person signing this certification. Debbie Rucker (Allen & Associates Consulting) assisted in compiling the data used in this report.
- The reported analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the requirements of the Code of Professional Ethics and Standards of Professional Appraisal Practice of the Appraisal Institute.
- The use of this report is subject to the requirements of the Appraisal Institute relating to review by its duly authorized representatives.
- As of the date of this report, I have completed the Standards and Ethics Education Requirements for Members of the Appraisal Institute.
- I am presently licensed in good standing as a Certified General Real Estate Appraiser in the states of Delaware, Georgia, Maryland, North Carolina, South Carolina, Virginia, and West Virginia, allowing me to appraise all types of real estate.

Respectfully submitted: ALLEN & ASSOCIATES CONSULTING, INC.

Jeff Carroll

VHDA CERTIFICATION

I affirm the following:

1) I have made a physical inspection of the site and market area.

2) The appropriate information has been used in the comprehensive evaluation of the need and demand for the proposed rental units.

3) To the best of my knowledge the market can support the demand shown in this study. I understand that any misrepresentation in this statement may result in the denial of participation in the Low Income Housing Tax Credit Program in Virginia as administered by the VHDA.

4) Neither I nor anyone at my firm has any interest in the proposed development or a relationship with the ownership entity.

5) Neither I nor anyone at my firm nor anyone acting on behalf of my firm in connection with the preparation of this report has communicated to others that my firm is representing VHDA or in any way acting for, at the request of, or on behalf of VHDA.

6) Compensation for my services is not contingent upon this development receiving a LIHTC reservation or allocation.

NCHMA MARKET STUDY INDEX

Introduction: Members of the National Council of Housing Market Analysts provide the following checklist referencing various components necessary to conduct a comprehensive market study for rental housing. By completing the following checklist, the NCHMA Analyst certifies that he or she has performed all necessary work to support the conclusions included within the comprehensive market study. By completion of this checklist, the analyst asserts that he/she has completed all required items per section.

	Executive Summary	
1	Executive Summary	Executive Summary

ALLEN & ASSOCIATES CONSULTING

Real Estate Advisory Services

QUALIFICATIONS

Allen & Associates Consulting is a real estate advisory firm specializing in affordable housing. Practice areas include low-income housing tax credits, tax-exempt bond transactions, HUD assisted and financed multifamily, USDA-RD assisted and financed properties, public housing, historic tax credits, conventional multifamily, and manufactured housing. Services include development consulting, rent comparability studies, market analysis, feasibility studies, appraisals, capital needs assessments, and utility studies.

Allen & Associates Consulting and its sister organization Allen & Associates Appraisal maintain offices in Charlotte, North Carolina and Detroit, Michigan, respectively. Allen & Associates is approved to provide its services throughout the United States.

The following is a listing of key personnel for Allen & Associates Consulting:

Jeffrey B. Carroll

Jeffrey B. Carroll is President of Allen & Associates Consulting. Since 2000, Mr. Carroll has completed over 3000 development consulting assignments in 46 states. Major projects include:

- *Market Feasibility* Completed market studies for 13 proposed tax credit apartment developments on behalf of the Georgia Department of Community Affairs. The portfolio included 5 family and 8 senior communities. Our analysis identified the 4 best deals for the housing finance agency to consider funding.
- *Valuation* Developed a disposition plan for a 30-property portfolio of apartments on behalf of a private owner. The 921-unit portfolio (located in MD, DE, PA and VA) was valued at \$23 million. Our client relied on our valuations and advice to maximize sales proceeds for the portfolio.
- *Capital Needs Assessments* Completed capital needs assessments for an 8property portfolio of RD-financed apartments on behalf of a private developer. The portfolio (located in FL) included 6 family and 2 senior communities. Our client utilized our assessments to develop a scope of work for the proposed acquisition and renovation of the 214-unit portfolio.
- *Utility Allowance Studies* Completed utility allowance studies for a portfolio of tax credit apartments on behalf of a large national owner/developer. The portfolio (located in CT, DC, IL, IN, MA, NC, OH, PA and VA) included 31 properties. Our client utilized our research to maximize rents and net operating income for the portfolio.
- *Underwriting* Conducted a financial review on behalf of a local housing authority for the proposed redevelopment of a vacant historic textile mill into loft apartments. Our client had been asked to issue \$4 million in tax-exempt bonds for

the \$15 million project. Our assistance in underwriting the transaction resulted in the green light for the development.

Mr. Carroll is a certified general appraiser, licensed to appraise real estate in the states of Delaware, Georgia, Maryland, North Carolina, South Carolina and Virginia. Mr. Carroll is also a designated member of the Appraisal Institute (MAI).

Mr. Carroll is a peer-reviewed member of the National Council of Housing Market Analysts, where he served on the Executive Committee and chaired the Data and Ethics Committees.

In addition, Mr. Carroll has also served as a market study reviewer for the Georgia and Michigan housing finance agencies.

Mr. Carroll has written articles on affordable housing, development, property management, market feasibility, and financial analysis for <u>Urban Land</u> magazine, <u>The Journal of Property Management, Community Management</u> magazine, <u>Merchandiser</u> magazine, <u>HousingThink</u>, and a publication of the Texas A&M Real Estate Research Center known as <u>Terra Grande</u>.

Mr. Carroll has conducted seminars on affordable housing, development, property management, market feasibility, and financial analysis for the American Planning Association, <u>Community Management</u> magazine, the Georgia Department of Community Affairs, the Manufactured Housing Institute, the National Association of State and Local Equity Funds, the Virginia Community Development Corporation, and the National Council of Affordable Housing Market Analysts.

Mr. Carroll is also an experienced developer and property manager. His experience includes the development of tax credit apartment communities, conventional market rate apartments, manufactured home communities, and single-family subdivisions. He has also managed a portfolio of apartment complexes and manufactured home communities.

The following is a summary of Mr. Carroll's relevant educational background:

Clemson University, Bachelor of Science Degree Major in Engineering	1002
Minor Concentration in Economics	1983
Harvard University, Master's Degree in Business Administration Major in General Management	
Minor Concentration in Economics and Real Estate	1988
Appraisal Institute Qualifying Education for Licensure Continuing Education for Licensure & MAI Designation	2001 2020
ASTM International	
Property Condition Assessments E2018.01	September 2006

The Institute for Professional and Executive Development Tax Credit Property Disposition	October 2007
National Council of Affordable Housing Market Analysts Semi-Annual Meeting & Continuing Education	2002 - 2014
U.S. Department of Housing and Urban Development Utility Allowance Guidebook MAP Training & Certification	September 2007 September 2007
USDA Rural Development Capital Needs Assessment Provider Training Accessibility Standards Training	September 2007 September 2007

Mr. Carroll, who was awarded a scholarship on the Clemson University varsity wrestling team, has served as an assistant coach for a local high school wrestling team. Mr. Carroll resides in Charlotte, North Carolina with his wife Becky and his two children, Luke and Brittany.

Debbie Rucker

Debbie Rucker is an analyst with Allen & Associates Consulting, coordinating market research for the company. Mrs. Rucker has worked on over 2000 assignments and has conducted over 40,000 rent surveys.

Mrs. Rucker was also responsible for compiling the database of detailed information on of every tax credit and tax-exempt bond transaction in Virginia, North Carolina, South Carolina, Georgia, Florida, and Texas since 1999.

The following is a summary of Mrs. Rucker's relevant educational background:

National Council of Affordable Housing Market Analysts	
Semi-Annual Meeting & Continuing Education	September 2005
Semi-Annual Meeting & Continuing Education	October 2006
Carolinas Council for Affordable Housing	
Spectrum C ³ P Certification	October 2008

Mrs. Rucker is active in her church and helps run a local judo club. Mrs. Rucker is the mother of three and resides in Weddington, North Carolina.

Michael W. Lash

Michael W. Lash is President of Lash Engineering, an engineering firm located in Charlotte, North Carolina that works closely with Allen & Associates Consulting on utility allowance studies and other specific engagements. Since 1981, Mr. Lash has completed hundreds of assignments including the design of industrial, commercial, multifamily, and single family developments. Mr. Lash is an expert in the design of utility systems, including wastewater and storm water treatment facilities. Mr. Lash is a certified professional engineer, licensed in the states of Kansas, Louisiana, North Carolina, South Carolina, and Virginia. Mr. Lash graduated from Louisiana Tech University in Civil Engineering in 1981 and has conducted seminars on advanced wastewater treatment, storm water quality treatment and automated engineering drafting and design with Eagle Point Software.

Mr. Lash is active in his church and volunteers his time teaching karate at a local martial arts academy. Mr. Lash resides in Charlotte, North Carolina with his wife and three children.

FY 2019 MTSP Income Averaging Limits Summary

Hanover County, Virginia is part of the **Richmond**, **VA MSA**, so all information presented here applies to all of the **Richmond**, **VA MSA**.

Hanover County, VA is part of the Richmond, VA MSA, which consists of the following counties: Amelia County, VA; Caroline County, VA; Charles City County, VA; Chesterfield County, VA; Dinwiddie County, VA; Goochland County, VA; Hanover County, VA; Henrico County, VA; King William County, VA; New Kent County, VA; Powhatan County, VA; Prince George County, VA; Sussex County, VA; Colonial Heights city, VA; Hopewell city, VA; Petersburg city, VA; and Richmond city, VA. All information here applies to the entirety of the Richmond, VA MSA.

Fair Market Rent Calculation Methodology

Show/Hide Methodology Narrative

Fair Market Rents for metropolitan areas and non-metropolitan FMR areas are developed as follows:

1. 2013-2017 5-year American Community Survey (ACS) estimates of 2-bedroom adjusted standard quality gross rents calculated for each FMR area are used as the new basis for FY2020 provided the estimate is statistically reliable. For FY2020, the test for reliability is whether the margin of error for the estimate is less than 50% of the estimate itself and whether the ACS estimate is based on at least 100 survey cases. HUD does not receive the exact number of survey cases, but rather a categorical variable known as the count indicator indicating a range of cases. An estimate based on at least 100 cases corresponds to a count indicator of 4 or higher.

If an area does not have a reliable 2013-2017 5-year, HUD checks whether the

area has had at least minimally reliable estimate in any of the past 3 years, or estimates that meet the 50% margin of error test described above. If so, the FY2020 base rent is the average of the inflated ACS estimates.

If an area has not had a minimally reliable estimate in the past 3 years, the estimate State for the area's corresponding metropolitan area (if applicable) or State non-metropolitan area is used as the basis for FY2020.

- 2. HUD calculates a recent mover adjustment factor by comparing a 2017 1-year 40th percentile recent mover 2-bedrooom rent to the 2013-2017 5-year 40th percentile adjusted standard quality gross rent. If either the recent mover and non-recent mover rent estimates are not reliable, HUD uses the recent mover adjustment for a larger geography. For metropolitan areas, the order of geographies examined is: FMR Area, Entire Metropolitan Area (for Metropolitan Sub-Areas), State Metropolitan Portion, Entire State, and Entire US; for non-metropolitan areas, the order of geographies examined is: FMR Area, and Entire US; for non-metropolitan Portion, Entire State, and Entire US; for non-metropolitan Portion, Entire State, and Entire US. The recent mover adjustment factor is floored at one.
- 3. HUD calculates the appropriate recent mover adjustment factor between the 5-year data and the 1-year data and applies this to the 5-year base rent estimate.
- 4. Rents are calculated as of 2018 using the relevant (regional or local) change in gross rent Consumer Price Index (CPI) from annual 2017 to annual 2018.
- 5. All estimates are then inflated from 2018 to FY2020 using a trend factor based on the forecast of gross rent changes through FY2020.
- 6. FY2020 FMRs are then compared to a State minimum rent, and any area whose preliminary FMR falls below this value is raised to the level of the State minimum.
- 7. FY2020 FMRs may not be less than 90% of FY2019 FMRs.

The results of the Fair Market Rent Step-by-Step Process

1. The following are the 2017 American Community Survey 5-year 2-Bedroom Adjusted Standard Quality Gross Rent estimate and margin of error for Richmond, VA MSA.

Area	ACS ₂₀₁₇ 5-Year 2-Bedroom Adjusted	ACS ₂₀₁₇ 5-Year 2-Bedroom Adjusted	Ratio	Sample Size Category	Result
------	--	--	-------	----------------------------	--------

	Standard Quality Gross Rent	Standard Quality Gross Rent Margin of Error			
Richmond, VA MSA	<u>\$945</u>	\$8	\$8 / \$945=0.008	6	0.008 < .5 $6 \ge 4$ Use ACS ₂₀₁₇ 5-Year Richmond, VA MSA 2-Bedroom Adjusted Standard Quality Gross Rent

Since the ACS_{2017} Margin of Error Ratio is less than .5, the ACS_{2017} Richmond, VA MSA value is used for the estimate of 2-Bedroom Adjusted Standard Quality Gross Rent:

Area	FY2020 Base Rent		
Richmond, VA MSA	\$945		

2. A recent mover adjustment factor is applied based on the smallest area of geography which contains Richmond, VA MSA and has an ACS_{2017} 1-year Adjusted Standard Quality Recent-Mover estimate with a Margin of Error Ratio that is less than .5.

Area	ACS ₂₀₁₇ 1-Year Adjusted Standard Quality Recent- Mover Gross Rent	ACS ₂₀₁₇ 1-Year Adjusted Standard Quality Recent-Mover Gross Rent Margin of Error	Ratio	Sample Size Category	Result
Richmond,					0.041 < .5 6 ≥ 4 Use ACS ₂₀₁₇
VA MSA – 2 Bedroom	<u>\$980</u>	\$40	0.041	6	1-Year Richmond, VA MSA 2-Bedroom Adjusted

Area	ACS ₂₀₁₇ 1-Year Adjusted Standard Quality Recent- Mover Gross Rent	ACS ₂₀₁₇ 1-Year Adjusted Standard Quality Recent-Mover Gross Rent Margin of Error	Ratio	Sample Size Category	Result	
					Standard Quality	
					Recent-Mover	
					Gross Rent	

The smallest area of geography which contains Richmond, VA MSA and has an ACS_{2017} 1-year Adjusted Standard Quality Recent-Mover estimate with a Margin of Error Ratio that is less than .5 and with a sufficient number of sample cases is Richmond, VA MSA.

3. The calculation of the relevant Recent-Mover Adjustment Factor for Richmond, VA MSA is as follows:

ACS ₂₀₁₇ 5-Year Area	Percent Standard	5-Year 40th ile Adjusted Quality Gross Rent	ACS ₂₀₁₇ 1-Year 40th Percentile Adjusted Standard Quality Recent-Mover Gross Rent			
Richmond, VA MSA – 2 Bedroom	<u>\$945</u>		<u>\$980</u>			
Area	Ratio	Recent-	Mover Adjustment Factor			
Richmond, VA MSA	\$980 / \$945 =1.037	1.037 ≥ 1.0 Use calculated Recent-Mover Adjustment Factor of 1.037				

4. The calculation of the relevant CPI Update Factors for Richmond, VA MSA is as follows: HUD updates the 2017 intermediate rent with the ratio of the annual 2018 local or regional CPI to the annual 2017 local or regional CPI to establish rents as of 2018.

	Update Factor	Туре
CPI Update Factor	<u>1.0299</u>	Region CPI

5. The calculation of the Trend Factor is as follows: HUD forecasts the change in

national gross rents from 2018 to 2020 for each CPI area and Census Region. This makes Fair Market Rents "as of" FY2020.

Trend Factor	Trend Factor Type
<u>1.0513</u>	Region

6. The FY 2020 2-Bedroom Fair Market Rent for Richmond, VA MSA is calculated as follows:

Area	ACS 2017Recent- Mover5-Year EstimateAdjustment Factor		Annual 2017 to 2018 CPI Adjustment	<u>Trending</u> <u>1.0513</u> <u>to</u> <u>FY2020</u>	FY 2020 2-Bedroom FMR	
Richmond, VA MSA	\$945	1.0370	1.0299	1.0513	\$945 * 1.037 * 1.0299 * 1.0513=\$1,061	

7. In keeping with HUD policy, the preliminary FY 2020 FMR is checked to ensure that is does not fall below the state minimum.

Area	Preliminary FY2020 2-Bedroom FMR	FY 2020 Virginia State Minimum	Final FY2020 2-Bedroom FMR
Richmond, VA MSA	\$1,061	<u>\$714</u>	\$1,061 ≥ \$714 Use Richmond, VA MSA FMR of \$1,061

8. Bedroom ratios are applied to calculate FMRs for unit sizes other than two bedrooms.

Click on the links in the table to see how the bedroom ratios are calculated.

FY 2020 FMRs By Unit Bedrooms										
	<u>Efficiency</u>	<u>One-</u> <u>Bedroom</u>	Two- Bedroom	<u>Three-</u> <u>Bedroom</u>	<u>Four-</u> <u>Bedroom</u>					
FY 2020 FMR	\$899	\$932	\$1,061	\$1,410	\$1,686					

9. The FY2020 FMR must not be below 90% of the FY2019 FMR.

Before using the numbers from the Rent & Income Limit Calculator©, we strongly recommend that you check with the applicable state housing agency to verify that the state agrees with the numbers. The numbers round down to the nearest \$1.

This Rent & Income Limit Calculator© does not calculate low-income housing tax credit (LIHTC) limits greater than 50% LIHTC or 60% LIHTC limits, depending on the minimum set-aside elected with the IRS on Form 8609 in accordance with Internal Revenue Code Section 42(i)(3)(A). In other words, if the 20/50 minimum set-aside was elected then 50% LIHTC is the maximum rent calculated and allowed to qualify as a tax credit unit; or if the 40/60 minimum set-aside was elected then 60% LIHTC is the maximum allowed to qualify as a tax credit unit.

<u>Revenue Ruling 89-24</u> require that the LIHTC rent & income levels start their calculations with the HUD published very low-income (VLI) amounts because the HUD published VLI amounts include certain HUD adjustments, such as high housing cost for high FMR areas to increase income, and state non-metropolitan median income to provide a floor for income limits. The result is that many counties have VLI amounts that are different than 50% of the AMI published by HUD (the 4-person AMGI we have shown above). The Novogradac Rent & Income Calculator© starts by default with the HUD published VLI amounts in accordance with <u>Revenue Ruling 89-24</u>.

⁽¹⁾ The rent and income limits for each year are effective beginning with the effective date shown above. There is a grace period for 45 days to implement the new rent and income limits, which means that the old limits can be relied upon for 45 days after the effective date of the new limits. For example income limits effective 12/04/2012, can be relied on until 1/17/2013. For more information, see <u>Revenue Ruling 94-57</u>.

IRS LIHC Newsletter #48 and IRS LIHC Newsletter #50 clarify that for projects placed in service during the 45-day grace period, the owner may choose the new or the old income limits. For example, if a project was placed in service on 1/8/2013 and the 2012 income limits are higher than the 2013 income limits, an owner may use the higher income limits from 2012 to income qualify tenants and set rents accordingly because the project was placed in service with the 45-day grace period.

Please note, the Rent & Income Limit Calculator does not apply a 45-day grace period automatically. The user needs to indicate that the placed in service date and/or gross rent floor date occurred 45 days earlier (in the prior HUD Fiscal Year) if they want to apply the 45-day rule under <u>Revenue Ruling 94-57</u> that allows owners to rely on the prior year. Therefore, projects that were placed in service during the 45-day grace period, and want to use the prior year, should select that they were placed in service as of the prior year. For example, if a project placed in service on 1/8/2013, and the project wanted to use the 45-day grace period, the user should select that their project was in service prior to 12/4/2012. Similarly, projects that have a gross rent floor effective as of the carryover allocation date (or reservation letter date for bond projects) during the 45-day grace period, and want to use the prior year, should select that the gross rent floor was effective as of the prior year. For example, if a project received a carryover allocation letter on 1/8/2013, and the owner did not elect placed in service date as the gross rent floor, and the project wanted to use the 45-day grace period, and want to use the prior year, should select that the gross rent floor was effective as of the prior year. For example, if a project received a carryover allocation letter on 1/8/2013, and the owner did not elect placed in service date as the gross rent floor, and the project wanted to use the 45-day grace period, the user should select that their gross rent floor was effective prior to 12/4/2012.

⁽²⁾ For HUD FY 2013 HUD originally issued income limits on December 4, 2012 then issued revised income limits on December 11, 2012. In <u>IRS LIHC Newsletter #50</u>, the IRS has stated that the effective date for the revised FY 2013 income limits is December 4, 2012. Based on this guidance, the Rent & Income Limit Calculator© uses December 4, 2013 for the effective date for the revised FY 2013 limits. Please see <u>IRS LIHC Newsletter #50</u> for more detail.

⁽³⁾ An area may lose its rural area status. There is no clear guidance that a project is held harmless at the national nonmetropolitan income limits when an area loses its rural status. The Rent & Income Limit Calculator© assumes that a project that is not indicated as rural in the current year was also not rural in the prior year, and therefore, does not receive hold harmless treatment based on the prior year national non-metro amount.

Please consult your state agency and tax advisor for further clarification.

⁽⁴⁾ USDA may change their determination of what projects qualify as rural during the course of a year. Please periodically check with USDA to determine the continued rural eligibility of your project.

The national non-metropolitan median income has been adjusted for household size based on the family size adjustments outlined in the HUD Briefing Materials and as shown in each year's <u>HUD FAQ</u>. The IRS did not specify whether or not to round to the nearest \$50, however, the Rent & Income Limit Calculator© will round to the nearest \$50 in accordance with the methodology referenced in HUD Briefing Materials.

⁽⁵⁾ A project uses HERA Special if income was determined prior to 1/1/2009 and the project is in a HERA Special county. A project's income limits are held harmless at the prior year income limits if income was determined in the prior year or earlier and the income limits have decreased. Please note that the IRS has informally indicated that the definition of "determined" for purposes of the HERA Special and MTSP Hold Harmless income limits means that a project was placed in service. Please see IRS LIHC Newsletter #35 for more information about "determined" and

projects with buildings that were placed in service before and after HUD income limit effective dates. Therefore, projects placed in service prior to 1/1/2009 are generally eligible for HERA Special. Please see footnote 7 for information about acquisition/rehabilitation projects.

⁽⁶⁾ Internal Revenue Code Section 142(d)(2)(i) indicates that hold harmless applies on a calendar year. The Rent & Income Limit Calculator© assumes that "calendar year" in the hold harmless rule means the HUD Fiscal Year. For example, the 2009 calendar year means the HUD Fiscal Year from 3/19/2009 through 5/13/2010. In other words, the Rent & Income Limit Calculator© assumes that "calendar year" in the hold harmless rule means the highest income level achieved during any HUD Fiscal Year.

The Rent & Income Limit Calculator© assumes that a rural project will receive hold harmless treatment at the national non-metro amount based on the prior year national non-metro amount if the national non-metro median income were to fall from year to year. If a rural project qualifies for HERA Special and the HERA Special is higher than the national non-metro, then the HERA Special amount will be used. Please note that the IRS has not issued guidance that specifically allows hold harmless treatment at the national non-metro amount for rural projects, however, Internal Revenue Code 42(g)(4) by reference to Internal Revenue Code 142(d)(2)(E) implies that hold harmless treatment would apply at the national non-metro amount for rural projects. Please consult your tax advisor for further clarification.

⁽⁷⁾ Please note that for acquisition/rehabilitation projects, the IRS guidance indicates that income and rent limits are determined at the later of the acquisition date or when management begins income-qualifying households in the project. For example, if a project was acquired in 2011, the rehabilitation was placed-in-service in 2012, and management began income-qualifying households in 2011 then the project would be considered placed in service in 2011, for income and rent purposes. If a project was acquired in 2011, the rehabilitation was placed-in-service in 2012, and management began income-qualifying households when the rehabilitation placed-in-service in 2012, then the project would be considered placed in service in 2012, and management began income-qualifying households when the rehabilitation placed-in-service in 2012, then the project would be considered placed in service in 2012 for income and rent purposes. Please see <u>IRS LIHC Newsletter #35</u> for more detail. Please consult your tax advisor for further clarification.

⁽⁸⁾ <u>Revenue Procedure 94-57</u> gives guidance on the gross rent floor election.

Tax credit projects without bond financing:

"The Internal Revenue Service will treat the gross rent floor in section 42(g)(2)(A) as taking effect on the date an Agency initially allocates a housing credit dollar amount to the building [generally referred to as the 42M letter] under section 42(h)(1). However, the Service will treat the gross rent floor as taking effect on a building's placed in service date if the building owner designates that date as the date on which the gross rent floor will take effect for the building. An owner must make this designation to use the placed in service date and inform the Agency that made the allocation to the building is placed in service."

Tax credit projects with bond financing:

"The Service will treat the gross rent floor as taking effect on a building's placed in service date if the building owner designates that date as the date on which the gross rent floor will take effect for the building. An owner must make this designation to use the placed in service date and inform the Agency that issued the determination letter to the building no later than the date on which the building is placed in service."

⁽⁹⁾ The Rent & Income Limit Calculator© assumes all buildings in a project have a rent floor effective date under <u>Revenue Procedure 94-57</u> in the same HUD Fiscal Year. However, if your buildings have rent floor effective dates under <u>Revenue Procedure 94-57</u> in different HUD Fiscal Years, then you should run the calculator separately for each group of buildings in a particular HUD Fiscal Year.

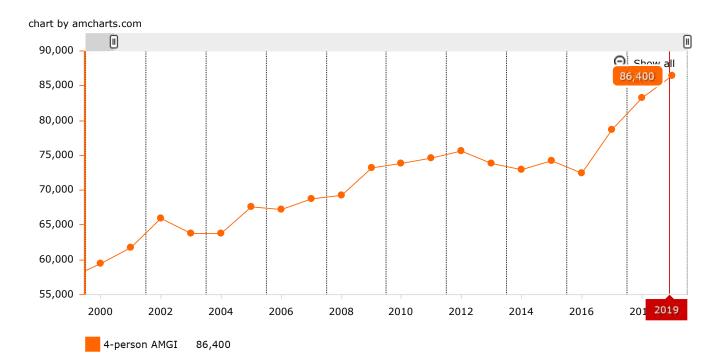

The Rent & Income Limit Calculator© assumes that different AMGI limits (40%, 35%, 30%, etc.) chosen by the user will also have a rent floor election under <u>Revenue Procedure 94-57</u> from the same HUD Fiscal Year that applies to the federal level of 50% or 60%.

⁽¹⁰⁾ The Consolidated Appropriations Act of 2014 changed how the 30% income limits is calculated. The 30% limit, which is now called the extremely low income limit, is determined by taking the greater of the 30% income limit as calculated by HUD or the poverty level as determined by the Department of Health and Human Services, which is then capped at the 50% Very Low Income Limit ('VLI') published by HUD. HUD has only published the data up to 8 people. For household sizes above 8 people please visit the following website: https://www.huduser.gov/portal/datasets/mtsp.html
