Mr. Adam Stockmaster  
TM Associates Management, Inc.  
1375 Piccard Drive #150  
Rockville, Maryland 20850

Dear Mr. Stockmaster:

Following is a market study which was completed for TM Associates Management, Inc., under the guidelines set forth by the Virginia Housing Development Authority. The subject is located at 1651 Maryland Avenue in Crewe, Virginia, and is an existing Rural Development and Low Income Housing Tax Credit elderly development. The subject consists of five one-story garden buildings containing 49 units, a meeting room, laundry facility, office and maintenance area. The buildings have siding exterior and asphalt shingle roofs. Unit amenities include a refrigerator, range/oven, carpet, vinyl, blinds, ceiling fans, coat closet, patio, pull cords and safety bars. Project amenities include a meeting room, picnic area, laundry facility, on-site management, on-site maintenance, gazebo and asphalt parking areas with approximately 42 parking spaces.

The purpose of the following market study is to determine if the community has a need for the subject units. To do so, the analyst, Jonathan Richmond, utilized data from the U.S. Census Bureau, ESRI Business Information Solutions and various other demographic resources. Community information and opinion was also utilized. This information was collected during a field survey conducted by Jonathan Richmond while visiting the site on February 19, 2020. An attempt was made to survey 100 percent of all housing in the area.

I certify that there is not now nor will there be an identity of interest between or among the applicant, contractor, architect, engineer, attorney, interim lender, subcontractors, material suppliers, equipment lessors or any of their members, directors, officers, stockholders, partners or beneficiaries without prior written identification to Virginia Housing Development Authority and written consent to such identity of interest by Virginia Housing Development Authority. All recommendations and conclusions are based solely on the professional opinion and best efforts of the analyst. This statement is given for the purpose of inducing the United States of America to make a loan as requested in the loan pre-application or application of which this statement is a part.

CERTIFICATION

This is to certify that a field visit was made by the market analyst or one of his associates and information was obtained from publications of federal, state and local agencies. Interviews were held with apartment owners or managers, local officials and others as appropriate who may be knowledgeable of the housing market in Crewe.

In accordance with Virginia Housing Development Authority, I hereby certify that the information provided in this Market Study was written according to Virginia Housing Development Authority's market study requirements and is truthful and accurate to the best of my knowledge and belief. The estimates of demand for family housing made by this report are based on the assumption of a free market situation, unencumbered by local mores, affirmative fair housing marketing or prejudice toward the site location.

This is to affirm that I will receive no fees which are contingent upon approval of the project by Virginia Housing Development Authority, before or after the fact, and that I will have no interest in the housing project.

IDENTITY OF INTEREST

I understand and agree that Virginia Housing Development Authority will consider an identity of interest to exist between the loan applicant as the party of the first part and general contractors, architects, engineers, attorneys, interim lenders, subcontractors, material suppliers or equipment lessors as parties of the second part under any of the following conditions:

1. When there is any financial interest of the party of the first part in the party of the second part;
2. When one or more of the officers, directors, stockholders or partners of the party of the first part is also an officer, director, stockholder or partner of the party of the second part;
3. When any officer, director, stockholder or partner of the party of the first part has any financial interest whatsoever in the party of the second part;
4. When the party of the second part advances any funds to the party of the first part other than an interim lender advancing funds to enable the applicant to pay for construction and other authorized and legally eligible expenses during the construction period;
5. When the party of the second part provides and pays on behalf of the party of the first part the cost of any legal services, architectural services or interim financing other than those of the survey, general superintendent or engineer employed by a general contractor in connection with obligations under the construction contract;
6. When the party of the second part takes stock or any interest in the party of the first part as part of the consideration to be paid them; and
7. When there exists or comes into being any side deals, agreements, contracts or undertakings entered into thereby altering, amending or canceling any of the required closing documents or approval conditions as approved by Virginia Housing Development Authority.

I certify that there is not now nor will there be an identity of interest between or among the applicant, contractor, architect, interim lender, subcontractors, material suppliers, equipment lessors or any of their members, directors, officers, stockholders, partners or beneficiaries without prior written identification to Virginia Housing Development Authority and written consent to such identity of interest by Virginia Housing Development Authority. This statement is given for the purpose of inducing the United States of America to make a loan as requested in the loan pre-application or application of which this statement is a part.

There is no identity of interest between the loan applicant and the Market Analyst or Gill Group.

## EXECUTIVE SUMMARY

## Executive Summary

It is the opinion of the analyst that a market exists for the proposed rehabilitation of a 39-unit development designed for seniors ages 55 and older and that there is no need for alterations of any kind. This recommendation is made based on the information included in this report and assuming that the project is completed as detailed in this report. Any changes to the subject could alter the findings in this report.

## Project Description

The subject, Deerfield Apartments, is an existing Rural Development and Low Income Housing Tax Credit multifamily development that contains 39 rental units. The property is applying for an allocation of Low-Income Housing Tax Credits which will set the income eligibility to individuals earning 40, 50 and 60 percent of the area median income, or below and \$29,100 considering subsidy and between \$13,620 and \$29,100 not considering any subsidy.

Deerfield Apartments is comprised of five one-story garden buildings containing 39 units and a meeting room, laundry facility, office and maintenance area. The buildings are of frame construction with siding exterior and asphalt shingle roofs.

The following chart lists the subject's current unit mix:

Unit Type	# of Units	Square Footage	Total Square Footage
1/1	39	577	22,503
	<b>39</b>		<b>22,503</b>

The following chart lists the subject's proposed unit distribution by unit type, size and rent structure.

MAXIMUM LIHTC RENTS AND UTILITY ALLOWANCES							
Unit Type	# of Units	Avg. Square Feet	% of Median Income	Maximum LIHTC Rent	Gross Rent	Utility Allowance	Net Rent
1/1	4	577	40%	\$454	\$745	\$121	\$624
1/1	16	577	50%	\$568	\$745	\$121	\$624
1/1	18	577	60%	\$681	\$745	\$121	\$624
1/1	1	577	60%	\$681	\$681	\$121	\$560

\*The maximum rents exceed the maximum gross rent. However, of the subject's 39 units, 38 units contain Rental Assistance. Therefore, these tenants will not be required to pay more than 30 percent of their income or the maximum LIHTC rent.

## Income Averaging

The developer is not electing to use the income-average minimum set-aside option.

## Housing Profile

The rental housing stock in the market area is comprised of single-family homes and market-rate and subsidized/income-restricted apartment complexes. The current vacancy rate in surveyed subsidized/income-restricted apartment complexes is 0.4 percent. The current vacancy rate in surveyed market-rate apartment complexes is 3.2 percent.

The development does not have an adverse impact on the market area. There were six income-restricted developments confirmed in the market area. Peele Manor and Magnolia Place Apartments are the most similar to the subject since they contain one-bedroom units, contains subsidy for its units and are elderly. In addition, the majority of the comparables contain a waiting list. Therefore, the market area is not saturated.

**Market Feasibility**

The following tables contain the capture rates for the entire property as well as for the vacant units only at the property.

<b>CAPTURE RATE BY INCOME LIMITS - WITH RENTAL ASSISTANCE</b>				
	<b>All Units @ 40% (\$0 - \$19,400)</b>	<b>1BR Units @ 50% (\$0 - \$24,250)</b>	<b>All Units @ 60% (\$0 - \$29,100)</b>	<b>Project Total (\$0 - \$29,100)</b>
<b>Income Restrictions:</b>				
All Units at Subject	0.3%	0.9%	1.0%	2.1%
Vacant Units at Subject	0.0%	0.0%	0.0%	0.0%

<b>CAPTURE RATE BY INCOME LIMITS - WITHOUT RENTAL ASSISTANCE</b>				
	<b>All Units @ 40% (\$13,620 - \$19,400)</b>	<b>All Units @ 50% (\$17,040 - \$24,250)</b>	<b>All Units @ 60% (\$20,430 - \$29,100)</b>	<b>Project Total (\$13,620 - \$29,100)</b>
<b>Income Restrictions:</b>				
All Units at Subject	0.3%	4.1%	6.1%	4.7%
Vacant Units at Subject	0.0%	0.0%	0.0%	0.0%

Overall the market shows a net demand of 1,877 units for proposed units at or below 60 percent of the area median income when considering subsidy. The subject is an existing development that contains 39 units. The overall capture rate for all units at or below 60 percent is 2.1 percent. However, as the property is existing and the tenants are likely to remain after rehabilitation, the capture rate including only the vacant units is 0.0 percent.

Overall the market shows a net demand of 686 units for proposed units at or below 60 percent of the area median income when not considering subsidy. The subject is an existing development that contains 39 units. The overall capture rate for all units at or below 60 percent is 5.7 percent. However, as the property is existing and the tenants are likely to remain after rehabilitation, the capture rate including only the vacant units is 0.0 percent.

When only the vacant units are considered, the overall capture rate for the property, is 0.0 percent, which is considered good. Therefore, it is the opinion of the analyst that a market exists for the rehabilitation of a 39-unit development.

After researching the vacancy rates of the existing units in the area, it is firmly believed that the rehabilitated development will satisfy a portion of the demand for the units within the market. It is believed that the property will continue to meet the demand for affordable housing in the market area.

**Evaluation of Project**

The subject is located at 1651 Maryland Avenue. Therefore, the subject has average visibility and easy access. The subject's site plan and project design are similar to competing apartment developments. The subject's unit mix of one-bedroom units is suitable in the market. The subject's unit and project amenities are competitive with the surveyed comparables. The subject's rents will provide a good value to prospective tenants.

### Positive/Negative Attributes

**Strengths:** The subject's location is comparable to other developments in the market area. Its in-unit and common area amenities are competitive with the other developments in the market area. When these factors are taken into consideration, the subject's proposed units provide a good value to prospective tenants.

**Weaknesses:** There are no apparent weaknesses.

### Conclusion

The subject can retain its required share of the market area for the following reasons:

- The subject's design and amenities are competitive with other existing projects. Therefore, no modifications to the subject are necessary.
- Deerfield Apartments is an existing 39-unit Low Income Housing Tax Credit complex. The development is currently 100 percent occupied. An absorption period was established as if the development were a vacant Low Income Housing Tax Credit Development. After researching the vacancy rates of the existing units in the area, it is firmly believed that the proposed development will satisfy a portion of the continued demand for the units within the market. It is estimated that a 95+ percent occupancy level can be achieved in six to eight months. Our interviews with apartment managers substantiate the absorption rate. It is believed that the subject will absorb five to seven units per month; therefore, reaching a stable occupancy level within six to eight months. However, it has no vacant units. Therefore, the effective absorption rate is zero months.
- According to the past, present and future demographic and economic trends within the primary market area, it is the opinion of the analyst that the existing development is suitable for the market area. Given the current acceptable vacancy rates for affordable properties, the development will not have an adverse effect on the existing rental comparables and the anticipated pipeline additions to the rental base.

## INTRODUCTION AND SCOPE OF WORK

## Introduction and Scope of Work

The Scope of Work Rule requires us to gather and analyze information about those assignment elements that are necessary to properly identify the problem to be solved. According to the Standards Rule 1-2, identification of the problem to be solved requires us to identify the following assignment elements.

- Client and any other intended users: The client and developer for this market study assignment is TM Associates Management, Inc. The intended users of the report are TM Associates Management, Inc. and Virginia Housing Development Authority. No other users are intended.
- Intended use of the analyst's opinions and conclusions: The intended use of this market study is to apply for Low Income Housing Tax Credits through Virginia Housing Development Authority.
- Effective date of the analyst's opinions and conclusions: The effective date of the rental estimate is February 19, 2020.
- Subject of the assignment and its relevant characteristics: The subject property is an existing 39-unit apartment complex to be known as Deerfield Apartments. It is located on Maryland Avenue, which is located west of Birch Island Road. Its physical address is 1651 Maryland Avenue.
- Assignment conditions: Assignment conditions include assumptions, extraordinary assumptions, hypothetical conditions, supplemental standards, jurisdictional exceptions, and other conditions that affect the scope of work. The following assumptions are used in this market study assignment:
  - An environmental audit was not provided. I am not qualified to complete an environmental audit. The stated opinion of rental rates is predicated on the assumption that no hazardous substances or conditions materially affect the subject property.
  - The Americans with Disabilities Act (ADA) became effective January 26, 1992. No specific compliance survey or analysis of the identified property has been made to determine whether it is in conformity with the various detailed requirements of the ADA. It is possible that a compliance survey of the property together with a detailed analysis of the requirements of the ADA could reveal that the property will not comply with one or more of the requirements of the Act. If so, this fact could have an adverse impact upon the value of the property. Since there is no direct evidence relating to this issue, it is assumed that no substantial immediate outlays will be mandated by governing authorities to meet ADA requirements.
- The building improvements meet all governing codes, unless otherwise noted in this report.

---

An **extraordinary assumption**<sup>1</sup> is defined as:

An assignment-specific assumption as of the effective date regarding uncertain information used in an analysis, which, if found to be false, could alter the appraiser's opinions or conclusions. Uncertain information might include physical, legal or economic characteristics of the subject property; or conditions external to the property, such as market conditions or trends; or the integrity of data used in an analysis.

An extraordinary assumption may be used in an assignment only if:

- It is required to properly develop credible opinions and conclusions;
- The analyst has a reasonable basis for the extraordinary assumption;
- Use of the extraordinary assumption results in a credible analysis; and
- The analyst complies with the disclosure requirements set forth in USPAP for extraordinary assumptions.<sup>2</sup>

The following extraordinary assumptions are used in this market study consultation assignment: *The market study was written under the extraordinary assumption that the property will be rehabilitated as indicated in the Scope of Work.*

A **hypothetical condition**<sup>3</sup> is defined as:

A condition, directly related to a specific assignment, which is contrary to what is known by the appraiser to exist on the effective date of the assignment results but is used for the purpose of analysis. Hypothetical conditions are contrary to known facts about physical, legal, or economic characteristics of the subject property; or about conditions external to the property, such as market condition or trends; or about the integrity of data used in an analysis.

A hypothetical condition may be used in an assignment only if:

- Use of the hypothetical condition is clearly required for legal purposes, for purposes of reasonable analysis, or for purposes of comparison;
- Use of the hypothetical condition results in a credible analysis; and
- The analyst complies with the disclosure requirements set forth in USPAP for hypothetical conditions.<sup>4</sup>

The following hypothetical condition are used in this market study consultation assignment: *The market rents in the need and demand analysis were determined under the hypothetical condition that the subject will be unrestricted or conventional and not subject to any rent restrictions.*

<sup>1</sup> Uniform Standards of Professional Appraisal Practice, 2020-2021 Edition (The Appraisal Foundation, 2020), pg. 4

<sup>2</sup> Uniform Standards of Professional Appraisal Practice, 2020-2021 Edition (The Appraisal Foundation, 2020), pg. 14

<sup>3</sup> Uniform Standards of Professional Appraisal Practice, 2020-2021 Edition (The Appraisal Foundation, 2020), pg. 4

<sup>4</sup> Uniform Standards of Professional Appraisal Practice, 2020-2021 Edition (The Appraisal Foundation, 2020), pg. 14

---

This market study was completed in accordance with the requirements set forth in Virginia Housing Development Authority's 2020 Market Study Guidelines.

Janice F. Gill, MAI, a State Certified General Real Estate Appraiser, oversaw and supervised all data collection and analysis and performed the research. The following actions were taken to complete this appraisal.

- On February 19, 2020, Jonathan Richmond, Market Analyst, conducted an interior and exterior inspection of the subject property to determine the property's physical and functional characteristics. Jonathan Richmond inspected common areas, mechanical rooms, exterior grounds and the following units: Unit 11 and 37. He measured the units and/or viewed the plans to verify unit sizes. He interviewed Michael Severe to determine the rental rates, services and amenities offered to the tenants of the subject property.
- The purpose of this market study is to determine if the community has a need for the subject units. To do so, the analysts utilize data from the U.S. Census Bureau, Nielsen Claritas and Ribbon Demographics and various other demographic resources. Community information and opinion was also utilized. The research retrieved data from several of the following: internet sites, local newspapers and rental publications, town records, owners and managers of local apartment properties, local real estate brokers, fellow analysts and the analyst's office files.
- During the week of February 19, 2020, Jonathan Richmond inspected the exterior of each comparable property used in the analysis. When available, Jonathan Richmond inspected the interiors of the comparable properties. Unit sizes were measured when an interior inspection was available, or from floor plans (excluding balconies/patios and mechanical areas) if available.
- During the verification process, Jonathan Richmond, or one of his associates, talked with the managers or leasing agents of the comparable properties, to confirm all data and to collect additional information about each comparable, including size, age, amenities, occupancy rates and general market information. Whenever possible, floor plans and brochures were obtained, which describe the comparable properties unit size, feature and amenities.

**PROPERTY DESCRIPTION**

### Property Description

Project Name: Deerfield Apartments  
Location: 1651 Maryland Avenue  
Crewe, Virginia  
Project Type: Elderly 55+  
Construction Type: Acquisition/Rehabilitation  
Developer: AS Squared Development, LLC  
Area Median Family Income: \$58,500

The subject, Deerfield Apartments, is a proposed Rural Development and Low Income Housing Tax Credit multifamily development that contains 39 rental units. The property is applying for an allocation of Low-Income Housing Tax Credits which will set the income eligibility to individuals earning 40, 50 and 60 percent of the area median income, below \$29,100 considering subsidy or between \$13,620 and \$29,100 when not considering subsidy. The developer is not electing to use the income-average minimum set-aside option.

The subject is 100 percent Rural Development. The current tenant population is restricted to individual and families whose incomes do not exceed 115 percent of the area median income. In addition, restrictions of rents plus tenant paid utilities are in place which may not exceed 30 percent of the 115 percent of the area median income as well as the average rent for the project including utilities may not exceed 30 percent of the 100 percent of the area median income. Due to the fact the subject property is currently under such rent restrictions and will remain under these restrictions, it is believed the development will not exceed rent restrictions set forth by the RHS 538 program.

### Project Design

Deerfield Apartments is comprised of five one-story garden buildings containing 39 units a meeting room, laundry facility, office and maintenance area. The buildings are of frame construction with siding exterior and asphalt shingle roofs. The property is not a scattered site development.

### Unit Features

Each unit contains the following amenities: refrigerator, range/oven, carpet, vinyl, blinds, ceiling fans, coat closet, patio, pull cords and safety bars.

### Common Amenities and Services

The property will provide the following project amenities: meeting room, picnic area, laundry facility, on-site management, on-site maintenance and gazebo.

### Parking

The complex contains open asphalt parking areas with approximately 42 parking spaces. This parking ratio is slightly higher than one space per unit; however, it is an elderly development for 55 and older and the need for a vehicle is less than with a family development. Therefore, this does not appear to have a negative impact on the subject property.

**Utilities**

The following table describes the project's utility combination.

UTILITY SCHEDULE		
Utility	Type	Who Pays
Heat	PTAC	Tenant
Air Conditioning	PTAC	Tenant
Hot Water	Electric	Tenant
Cooking	Electric	Tenant
Other Electric	Electric	Tenant
Cold Water/Sewer	N/A	Landlord
Trash Collection	N/A	Landlord
Cable/Satellite	N/A	Tenant
Internet	N/A	Tenant

The following table describes the project's proposed utility combination.

UTILITY SCHEDULE		
Utility	Type	Who Pays
Heat	Central Electric	Tenant
Air Conditioning	Central Electric	Tenant
Hot Water	Electric	Tenant
Cooking	Electric	Tenant
Other Electric	Electric	Tenant
Cold Water/Sewer	N/A	Landlord
Trash Collection	N/A	Landlord
Cable/Satellite	N/A	Tenant
Internet	In Unit and Common Area Wi-Fi	Landlord

**Unit Mix, Size and Rent Structure**

The following chart lists the subject's existing unit distribution by unit type, size and rent structure.

Unit Type	# of Units	Square Footage	Total Square Footage
1/1	39	577	22,503
	<b>39</b>		<b>22,503</b>

The following chart lists the subject's proposed unit distribution by unit type, size and rent structure. Upon completion of its rehabilitation, the subject's unit mix will be slightly changed.

MAXIMUM LIHTC RENTS AND UTILITY ALLOWANCES							
Unit Type	# of Units	Avg. Square Feet	% of Median Income	Maximum LIHTC Rent	Gross Rent	Utility Allowance	Net Rent
1/1	4	577	40%	\$454	\$745	\$121	\$624
1/1	16	577	50%	\$568	\$745	\$121	\$624
1/1	18	577	60%	\$681	\$745	\$121	\$624
1/1	1	577	60%	\$681	\$681	\$121	\$560

\*The maximum rents at exceed the maximum gross rent. However, of the subject's 39 units, 38 units contain Rental Assistance. Therefore, these tenants will not be required to pay more than 30 percent of their income or the maximum LIHTC rent.

The subject property will attract residents with incomes below \$29,100, annually when considering subsidies and between \$13,620 and \$29,100 when considering subsidies.

LIHTC INCOME LIMITS			
Person in Households	40%	50%	60%
1	\$16,960	\$21,200	\$25,440
2	\$19,400	\$24,250	\$29,100
3	\$21,800	\$27,250	\$32,700
4	\$24,240	\$30,300	\$36,360
5	\$26,160	\$32,700	\$39,240
6	\$28,120	\$35,150	\$42,180

Source: HUD

### Tenant Services

The subject will not offer any tenant services.

### Scope of Rehabilitation

The property will undergo a substantial rehabilitation and will be in good condition. The proposed scope of work is comprehensive and includes replacement of appliances, kitchen cabinets, bath vanities and medicine cabinets, windows, interior and exterior doors, hot water heaters, air conditioning units, toilets and baths, flooring and structural elements such as exterior brick and wall supports, roofing and re-grading and striping of the parking lots. In addition, a dishwasher will be added to each unit, and common area Wi-Fi will be added to the accessory building. The total estimated cost of rehabilitation is \$1,899,180, or \$48,697 per unit. The rehabilitation is anticipated to begin in July 2021 and end in April 2022.

### Location/Site Characteristics

The property site contains approximately 182,691 square feet, or 4.194 acres. According to the Town of Crewe, the subject is zoned C-1, Commercial District. The subject is a legal, non-conforming use. According to Brian, the subject has been grandfathered in. He stated that the owner would have to follow the zoning code if the property were destroyed. According to the code, if a nonconforming structure is destroyed or damaged to the extent that the cost of restoration to its condition before the occurrence shall exceed 50 percent of the cost of reconstruction the entire activity or structure, it shall be restored only if such uses complies with the requirement of the ordinance. The subject is located on one single site, and it is not a scattered site development. The subject is located in Census Tract #0003.00.

The neighborhood is comprised primarily of single-family residences. Vacant land is located north of the site. Vacant land is located south of the site. Vacant land and single-family residences are located east of the subject. Vacant land is located west of the subject. The neighborhood is 75 percent built up. Approximately 35 percent of the land use is made up of single-family residences. About 25 percent is comprised of vacant land. Another 20 percent of the land use is made up of multifamily dwellings. The remaining 20 percent is commercial properties. The area is mostly suburban. The subject is located along Maryland Avenue. Therefore, the subject has average visibility and easy access.

## SITE EVALUATION

---

### Project Location

The existing development contains 39 elderly units in Crewe, Virginia. Crewe is located in the southern portion of the State of Virginia. Nearby cities include the following: Burkeville, Blackstone, Ford, Petersburg and Richmond.

The primary market area consists of Nottoway, Prince Edward and Amelia Counties. The market area has the following boundaries: North – Appomattox, Buckingham and Cumberland Counties; South – Lunenburg and Brunswick Counties; East – Chesterfield and Dinwiddie Counties; and West – Charlotte County. This is the area from which the subject would normally draw its applicants.

Crewe is served by U.S. Highways 360 and 460 and State Highways 40, 46, 49, 153, 615 and 618. The subject is in the northwestern portion of the town. The subject is located along Maryland Avenue.

### Summary of Site Strengths and Weaknesses

Strengths – The site has average visibility and access. The site is close to employment centers, health care services, government and public services.

Weaknesses – The site has no apparent weaknesses.

PRIMARY MARKET AREA

## Delineation of Market Area

Following is a list of considerations used when determining the market area:

- **Population and Households Counts:** The number of households in a market area is directly proportionate to its geographic size within an individual market. Total householders residing in a market area can greatly influence demand calculations.
- **General Demographics:** The socio-economic composition of a market area including income, household size and tenure can be largely influenced by the erroneous inclusion or exclusions of non-comparable areas.
- **Demand:** Too large of a market may result in overstating demand for a proposed development. Conversely, too conservative of a market area may discount the demand for new product, especially if a lack of quality housing currently exists.
- **Supply Analysis:** While a larger market area generally includes higher household totals, it likewise may include a higher number of directly comparable units. If using demand methodologies that net out recently constructed and comparable rental units from the demand estimate, the increase in the number of comparable units can outweigh the increase in demand.
- **Competitive Stock:** The existing rental stock surveyed for a market study is dependent on the number of rental properties in a given market and therefore the boundaries of a primary market area. If existing developments are going to be used as “comparables”, they should be located in the primary market area, if possible.
- **Attainable Rents:** If the market area includes non-comparable areas, the analysis may use comparables projects that suggest that a project can achieve rents that area significantly higher or lower than the rents its micro location will support.
- **Location of Competitive Properties:** A primary consideration in defining a market area is identifying those locations that offer alternative opportunities to a potential renter for a subject site. The managers of existing comparable properties near the site are excellent sources in determining those competitive locations.
- **Accessibility:** Available transportation linkages including both traffic arteries and mass transit options can influence the size of the market. Mass transit can have a significant impact on projects addressing very low income households for which transportation options may be limited.
- **Natural Boundaries:** Natural boundaries including rivers and mountains can restrict the mover-ship within a market due to a lack of accessibility.
- **Housing Project Characteristics:** The availability of a unique structure type such as a high rise may alter the typical draw of a potential project.
- **Market Perceptions:** Whether grounded in reality or not, market perceptions can be a significant determinant of market area boundaries. Social stigmas often exist within sub-markets, with residents from one side of a submarket may not move to a close by neighborhood, regardless of housing opportunities. The construction of a new, attractive rental community may not necessarily relieve this perception.
- **Commuting Patterns:** The time spent commuting and employment destination could often reveal distinct patterns. High percentages of workers with long commutes or working in neighboring counties are often indicators of a lack of affordable housing options near employment centers.
- **Target Market:** Proposed developments targeting a special needs population such as seniors generally draw from a larger geographic region. Given the smaller pool of qualified householders, the location and quantity of comparable stock is of additional importance. An acceptable market area for a family oriented rental community will often be too conservative for a rental community targeting senior rental householders.
- **Jurisdictional Boundaries:** Differences in the quality and services provided by school districts, municipalities, or counties often influence consumer location choices.
- **Local Agency Service Boundaries:** The geographic areas covered by local agencies, such as housing authorities, senior citizen centers, community-based organizations, or churches can be a strong indicator of market area boundaries, especially when the project has a community-based sponsor or co-sponsor.

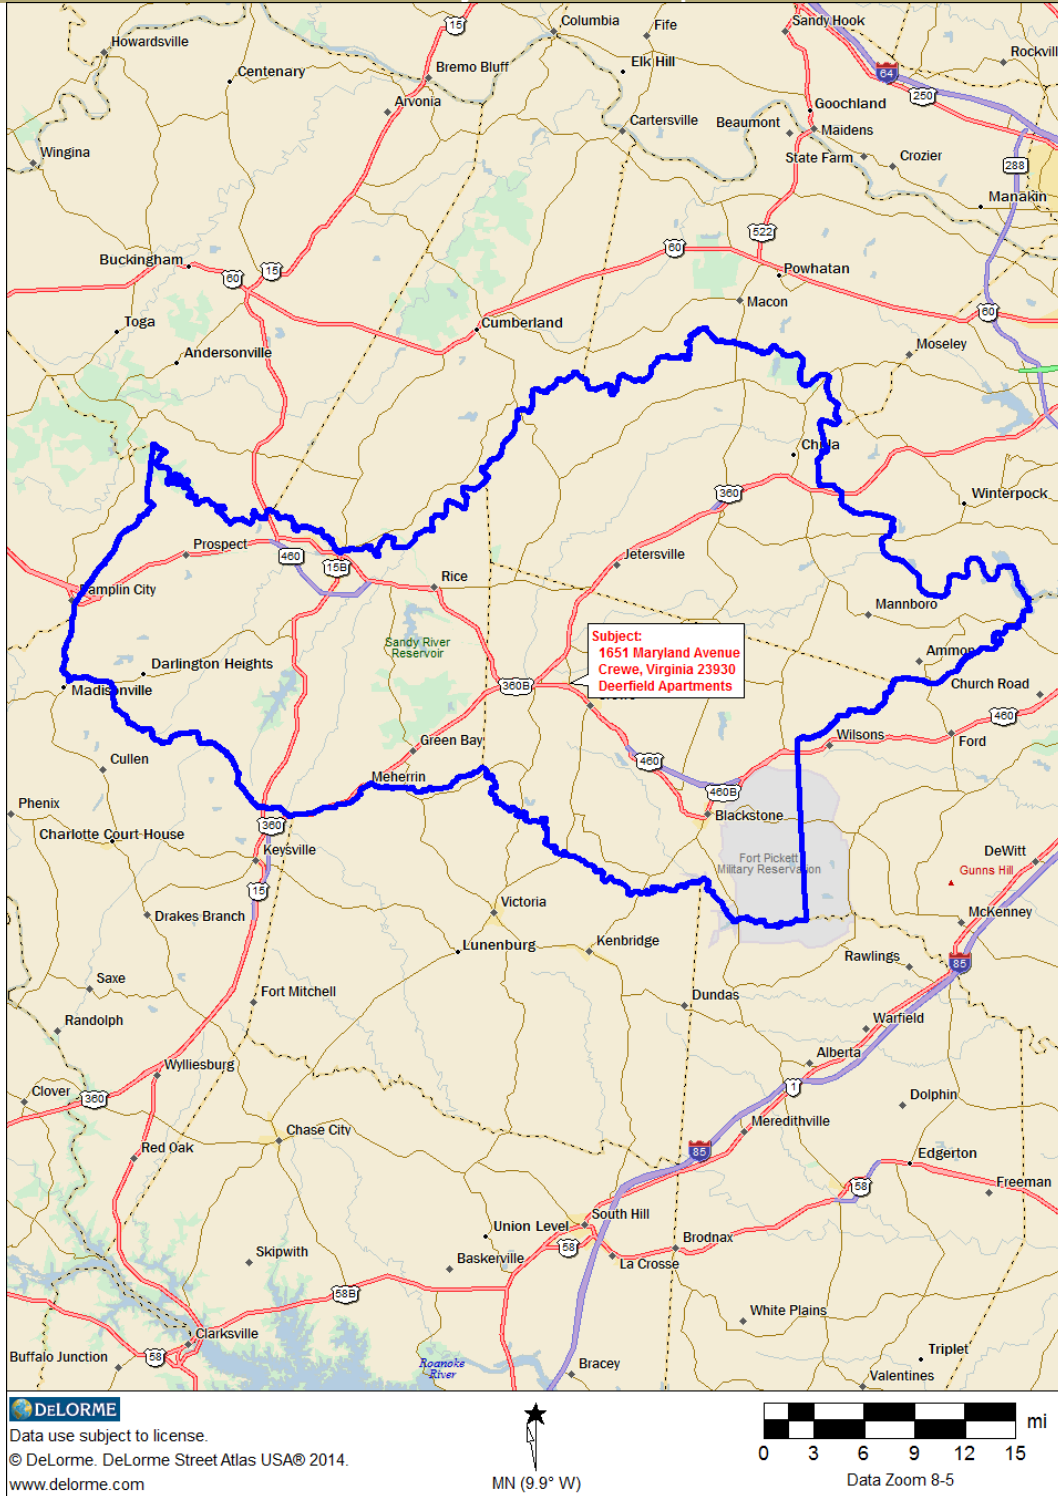

- 
- Non-Geographic Factors: Employees who might be expected to reside in a development as a result of planned or existing job opportunities and special needs households who are served by a multi-jurisdictional agency that covers communities that are clearly distinct market areas.

The determination of the market area is based on the boundaries between governmental units. In such a method, county, division or town boundaries become the boundaries of the market area. The primary market area for the subject consists of Nottoway, Prince Edward and Amelia Counties. The market area has the following boundaries: North – Appomattox, Buckingham and Cumberland Counties; South – Lunenburg and Brunswick Counties; East – Chesterfield and Dinwiddie Counties; and West – Charlotte County. This is the area from which the subject would normally draw its applicants.

Primary Market Area Map

## MARKET AREA EMPLOYMENT TRENDS

**Employment and Economy**

The economy of Crewe is based on construction; manufacturing; retail trade; transportation, communication and utilities; professional and related services; and educational, health and social services sectors. Each of these categories has experienced reasonable growth within the past few years.

Unemployment in the county reached a high of 8.0 percent in 2009 and was at its lowest in 2018 with 3.1 percent. The rate for Nottoway County in December 2019 was 2.5 percent. The number employed has increased 1.1 percent per year since 2005.

### Summary of Employment Trends in Market Area

Households who have between one and two persons and annual incomes below \$29,100 are potential tenants for the units at the subject property when considering subsidies and between \$13,620 and \$29,100 are potential tenants for the units at the subject property when considering no subsidies. Major employers shown on Page 51 are included in the retail trade; education and health services; professional and business services; and public administration sectors. The available employment is well-suited to the targeted population of the existing development.

**MARKET AREA DEMOGRAPHIC DATA**

**Population and Households Trends and Analysis**

The housing market area for the proposed apartments is an area in which people could locate their residences and have fairly equal access to the same job market, community services and amenities and be in the socio-economic community they choose.

The primary market area consists of Nottoway, Prince Edward and Amelia Counties. The market area has the following boundaries: North – Appomattox, Buckingham and Cumberland Counties; South – Lunenburg and Brunswick Counties; East – Chesterfield and Dinwiddie Counties; and West – Charlotte County.

In 2000 this geographic primary market area contained an estimated population of 46,845. By 2010, population in this primary market area had increased by 5.7 percent to 49,512. In 2020, the population in this market area increased by 4.2 percent to 51,598. It is projected that between 2020 and 2025, population in the market area is expected to increase.

### Housing Market

The demand for additional housing in a market area is a function of population growth, household formations and, also, a replacement of units lost through demolition and extreme obsolescence. Also, within the overall demand are segments of the market asking for more or less expense (related to income) and for ownership or rental.

Some of the demand has been, or will be, satisfied by units which have been built, or will be built, by the time the project is renting. The difference between demand and supply, the residual, is the total market of which the project's market will be a share.

The "tenure" of existing housing will be examined first as a guide to the future proportion of ownership and rentals; then characteristics of the housing stock will be noted.

The most important analysis is that of demand, supply and residual demand which follows. Its product is the number of type rental units which will be demanded.

### Tenure

The percentage of renters in Nottoway County in 2020 was 33.8 percent and is expected to slightly increase to 33.9 in 2025. For the primary market area, the percentage for 2020 was 32.1 percent and expected decrease slightly to 31.9 percent in 2025. For the Town of Crewe, the percentage for 2020 was 37.9 percent and is expected increase slightly to 38.3 percent in 2025.

The following table shows significant characteristics of the market area housing stock in 2010. In 2010 there were 12,837 single-family housing units, 1,718 multifamily housing units and 3,258 mobile homes in the market area. Of the 3,258 mobile homes in the market area, 1,084 were rental mobile homes. The data in the following table also shows that there were 92 rental units lacking complete plumbing and 161 rental units that are overcrowded. There were 697 units built prior to 1939. According to the U.S. Census Bureau, there were 747 rental units built since 2000.

**DEVELOPMENT-SPECIFIC DEMAND ANALYSIS**

**Household Income Trends and Analysis**

Income is a key characteristic in analyzing housing markets. The table on Page 63 shows household incomes for the market area for elderly 55+ households. However, we are primarily concerned with incomes of renters within the target incomes below \$29,100, or 53.3 percent, of income eligible households and for the units receiving Rental Assistance. For the units without Rental Assistance, we are primarily concerned with incomes of renters between \$15,566 and \$29,100 of income eligible households. There is a total of 1,263 renters, or 53.3 percent, within the target income range when considering subsidies and a total of 626 renters, or 26.4 percent, within the target income range when not considering subsidies. Target incomes for the different unit types are derived by the analyst. For the low end of the range, the maximum allowable LIHTC rent for an income limit (i.e. 60% AMI) for each bedroom type is divided by 40 percent as required by VHDA for elderly units. The resulting number is then multiplied by 12 to derive an annual income ( $\$454 / 40\% = \$1,135 \times 12 = \$13,620$ ). This process is based on the premise that a tenant should not pay more than 40 percent of his annual income on rent. The units receiving subsidies, no minimum income is required. For the high end of the range, the analyst consults the income limits set by the state housing authority. For example, if the largest unit in an income limit (i.e. 60% AMI) is a two-bedroom unit, the analyst multiplies this number by 1.5 (this is due to the LIHTC program being based on the premise that 1.5 persons per bedroom will occupy rental units) to find how many people could reside in that unit. The analyst then consults the state income limits to set the high end of the range (2 bedroom x 1.5 = 3 people/unit; therefore, the 60% 3-person maximum income would be used). However, as the subject is designated for the elderly, a two-person maximum is used.

### Sources of Demand

The potential tenants for the development include households who now live within the market area. It will appeal to potential tenants who have adequate incomes to pay the proposed rents and find the development more attractive in terms of price, unit features and project amenities than other available rental units. It also will attract households that the market area gains between now and when the development is ready for occupancy.

### Required Unit Mix

The LIHTC program is based on the premise that 1.5 persons per bedroom will occupy rental units. We expect that five percent (5%) of one-person households will occupy efficiency units. Forty-five percent (45%) of one-person households and 25 percent of two-person households will occupy one-bedroom units. We expect that 50 percent of one-person households, 75 percent of two-person household and 50 percent of three-person households will occupy two-bedroom units. We expect that 50 percent of three-person households, 90 percent of four person households and 90 percent of five person households will occupy three-bedroom units. We expect that 10 percent of four-person households and 10 percent of five or more person households will occupy four- bedroom units.

The following table illustrates the ratio of units required by each household size. These occupancy patterns suggest that efficiency units should account for 2.0 percent of the renter housing demand; one-bedroom units should account for 42.8 percent; two-bedroom units should account for 25.8 percent; three-bedroom units should account for 27.3 percent, and units with four or more bedrooms should account for 2.1 percent of the renter housing demand in the market area.

### Eligible Households

Landlords evaluate a potential tenant's income and credit to decide if applicant can pay the required rents. Commercial underwriters and owners of conventional market rate developments generally require that the monthly contract rent should not exceed one-third of a tenant's income. This is increased to 35 percent for multifamily tenants in the LIHTC program.

The following table uses the tax credit income limits to determine the upper range of eligibility for each LIHTC unit.

INCOME-ELIGIBLE RENTER HOUSEHOLDS - WITH RENTAL ASSISTANCE					
	Gross Rent	Lower Range	Upper Range	% Income Qualified	Income-Eligible Households
All Unit Types (All)	\$681	\$0	\$29,100	53.3%	1,263

**Penetration Rate**

There are no planned or under construction developments that will directly compete with the subject. There was one vacant LIHTC unit in the market area. The subject is an existing Rural Development and Low Income Housing Tax Credit property that contains 39 units; none of which are vacant. Therefore, the total affordable inventory would be one unit. The chart below indicates a penetration rate of 0.1 percent for the market area, when considering the subject's subsidies.

REQUIRED PENETRATION RATE - WITH SUBSIDY	
Income Eligible Renter Households	1,263
Existing Vacant LIHTC Units	1
LIHTC Units Planned	0
Vacant Units in Subject	0
Total Inventory	1
Penetration Rate	0.1%

The chart below indicates a penetration rate of 0.1 percent for the market area, without considering the subject's subsidies.

REQUIRED PENETRATION RATE - WITHOUT SUBSIDY

## Demand Analysis Summary

Overall the market shows a net demand of 1,877 units for proposed units at 60 percent of the area median income. The subject is an existing development that contains 39 units. The overall capture rate for all units at or below 60 percent is 2.1 percent. However, as the property is existing and the tenants are likely to remain after rehabilitation, the capture rate including only the vacant units is 0.0 percent.

**New Rental Households:** The demand from new elderly 55+ household growth is calculated by taking the new elderly rental households projected between 2020 and 2025 divided by five years as the subject is an existing property. This resulted in a new household growth total of 34. The new household growth number of 34 was then multiplied by the percent of income qualified tenants in the market area and percent plan to rent ( $34 \times 53.3 \times 32.1\% = 6$ ). The subject will attract tenants with incomes below \$29,100. The percent of income qualified can be seen on Page 62. The demand from new household growth is 6 for all units at or below 60 percent of the area median income.

**Existing Households – Rent Overburdened:** The total number of rent overburdened elderly households is 1,767 for units at or below 60 percent. The appropriate household size percentage was applied this number to derive the existing households – rent overburdened shown on the demand chart on the previous page.

**Existing Households – Substandard Housing:** The total number of substandard elderly 55+ households in the market area was 124. The appropriate household size percentage was applied and the resulting number of substandard households as shown on the demand chart on the previous page.

**Existing Qualifying Tenants Likely to Remain After Renovation:** The property is currently a rural development and tax credit property at 60 percent of the area median income. The property will remain a rural development property as well as be tax credit property at 40, 50 and 60 percent of the area median income. As a result, the tenants should remain income qualified and could remain after renovations. As the subject currently contains no vacant units, a total of 39 was added as shown on the demand chart on the previous page.

The elderly households likely to convert to rental housing was also considered. However, as there are no quantifiable numbers to account for this selection, this was not included.

**Supply:** There is one vacant unit in the comparable properties in the primary market area. In addition, there are no planned or recently completed comparable properties in the primary market area.

**Total Net Demand:** Overall the market shows a net demand of 1,877 units for units at or below 60 percent of the area median income. The subject is an existing development that contains 39 units and is currently 100 percent occupied. The overall capture rate for all units at or below 60 percent is 2.1 percent. As the property is existing and the tenants are likely to remain after rehabilitation, the capture rate including only the vacant units is 0.0 percent. Based on the occupancy rates of apartment complexes in the market area, the existing waiting lists, the projected population and household growth and the economic factors, it is believed that property will continue to be viable within the market area.

**Absorption Period:** Deerfield Apartments is an existing 39-unit elderly complex. The development is currently 100 percent occupied. An absorption period was established as if the development were a vacant Low Income Housing Tax Credit Development. After researching the vacancy rates of the existing units in the area, it is firmly believed that the proposed development will satisfy a portion of the continued demand for the units within the market. It is estimated that a 95+ percent occupancy level can be achieved in six to eight months. Our interviews with apartment managers substantiate the absorption rate. It is believed that the subject will absorb five to seven units per month; therefore, reaching a stable occupancy level within six to eight months. However, it has no vacant units. Therefore, the effective absorption rate is zero months.

**Capture Rate Analysis**

The following tables contain the capture rates for the entire property as well as for the vacant units only at the property.

<b>CAPTURE RATE BY INCOME LIMITS - WITH RENTAL ASSISTANCE</b>

## SUPPLY ANALYSIS

**Housing Profile**

**Market Area Overview**

The rental housing stock in the market area is comprised of single-family homes as well as market-rate and restricted apartment complexes. The majority of the housing stock was built in the 1990s.

**Housing Inventory**

From 2005 through December 2019, permit issuing jurisdictions in Nottoway County estimated 660 single-family and multifamily dwelling permits. Multifamily units were estimated at 11.5 percent of the planned construction activity.

<b>BUILDING PERMITS ISSUED</b>			
<b>YEAR</b>	<b>SINGLE-FAMILY</b>	<b>MULTIFAMILY</b>	<b>TOTAL</b>
2005	74	0	74
2006	63	29	92
2007	51	7	58

**Projects under Construction**

According to Nottoway County and the Virginia Housing Development Authority, there are no units under construction located within the subject's primary market area.

**Planned Projects**

According to Nottoway County and the Virginia Housing Development Authority, there are no units in the planning stages located within the subject's primary market area.

**Unit Condition**

The market area's rental housing stock is in varying condition. Overall the developments are well maintained.

### Unit Types

Single-family homes comprise 50.2 percent of the rental units, while multifamily units comprise 30.1 percent of the rental units.

RENTER HOUSING UNITS BY UNIT TYPE		
TYPE	NUMBER	PERCENT
Single-Family	2,757	50.2%
Multifamily	1,655	30.1%
Mobile Homes & Other	1,084	19.7%
<b>TOTAL</b>	<b>5,496</b>	<b>100.0%</b>

Source: U.S. Census Bureau

### Age of Rental Units

Rental housing construction in the market area increased in the 1960s and then began declining again in the 2000s.

AGE OF RENTAL UNITS		
YEAR BUILT	NUMBER	PERCENT
2005 or later	100	1.8%
2000-2004	647	11.8%
1990-1999	724	13.2%
1980-1989	642	11.7%
1970-1979	775	14.1%
1960-1969	1,016	18.5%
1950-1959	542	9.9%
1940-1949	353	6.4%
1939 or earlier	697	12.7%
<b>TOTAL</b>	<b>5,496</b>	<b>100.0%</b>

Source: U.S. Census Bureau

### Unit Size

The average size of the units in the surveyed developments is 662 square feet for one-bedroom units. The subject's unit sizes are smaller than the average unit size; however, the property has no units vacant, with a historical occupancy rate ranging from 97 to 100 percent since 2016. Therefore, it is believed the smaller unit sizes do not have a negative impact on the subject's marketability.

AVERAGE APARTMENT SIZE OF COMPARABLE APARTMENTS					
Unit Type	COMPARABLES			Subject (SF)	Subject's Advantage
	Minimum (SF)	Maximum (SF)	Average (SF)		
1 BR	550	800	662	577	-12.8%

### Rental Vacancy Rates

According to the U.S. Census Bureau, the national vacancy rates in the fourth quarter 2019 were 6.4 percent for rental housing and 1.4 percent for homeowner housing. The rental vacancy rate of 6.4 percent was not statistically different from the rate in the fourth quarter 2018 (6.6 percent), but 0.4 percentage points lower than the rate in the third quarter 2019 (6.8 percent). The homeowner vacancy rate of 1.4 percent was not statistically different from the rate in the fourth quarter 2018 (1.5 percent) and virtually unchanged from the rate in the third quarter 2019.

The fourth quarter 2019 rental vacancy outside Metropolitan Statistical Areas (7.4 percent) was higher than the rate in the suburbs (5.9 percent), but not statistically different from the rate in principal cities (6.7 percent). The rental vacancy rates in principal cities, in the suburbs, and outside MSAs were not statistically different from the fourth quarter 2018 rates.

The fourth quarter 2019 rental vacancy rate was highest in the South (8.2 percent) followed by the Midwest (6.8 percent), the Northeast (5.2 percent), and the West (4.4 percent). The rental vacancy rates in each region were not statistically different from the fourth quarter 2018 rates.

RESIDENTIAL VACANCY RATES

800 Virginia Street	4	0	0.0%
<b>Totals</b>	<b>313</b>	<b>10</b>	<b>3.2%</b>

#### Lease Terms and Concessions

The typical lease is twelve months. At the time of the writing of this report, no property was offering rent concessions that effect the rental rates.

#### Turnover Rates

The comparables indicated a range of 8.0 percent to 21.0 percent, with an average of 19.7 percent. Apartment managers in the market area reported that the turnover rates were stable throughout the year. Therefore, the analyst selected the annual turnover rate of 15.3 percent.

TURNOVER RATES	
Property Name	Avg. Annual Turnover Rate
Peele Manor	17.0%
Country Estates	8.0%
Nottoway Manor	21.0%
Magnolia Place Apartments	15.0%
<b>Average Annual Turnover</b>	<b>15.3%</b>

#### Likely Impact of Existing Development on Rental Occupancy Rates

The existing development will not have an adverse impact on the market area. Its one-bedroom units are suitable in the market. Additionally, all facilities in the market area have stabilized occupancy rates. Therefore, it is believed the existing development does not have an adverse impact on the market area.

**Existing Comparables**

The following table summarizes the existing affordable housing complexes within the primary market area and the immediate vicinity. There were two elderly properties in the market area. Therefore, will directly compete with the subject. Additional information for the all restricted properties can be found on Page 78.

### Market Rent Analysis

---

The market analyst researched rental housing in the market area and identified several apartment communities in and around the market area of the subject. The analyst identified the market-rate communities in the area that would directly compete with the subject. These comparables were then compared to the subject and adjusted for differences in amenities. These differences include, but are not limited to, location, structure, condition, unit size, number of bedrooms, number of baths, unit amenities (range/oven, refrigerator, microwave, dishwasher, etc.), project amenities (parking, storage, clubhouse, meeting room, pool, recreation area, etc.) and utilities provided. The adjustments made were based on the experience of the analyst, interviews with local officials, apartment managers and residents and information received from third-party sources (rent-to-own facilities, utility providers and housing authorities.) Additional adjustments were also determined using paired rental analysis. The paired rental analysis ranges are determined by comparing comparables with different numbers of bedrooms and factoring out any other differences (amenities, utilities provided, etc.) The resulting difference is assumed to be attributable to the differing number of bedrooms. The results are grouped together in a range. The adjustment is selected based on where the majority of the results fall within the range. If there is no majority, a conservative adjustment at the low end of the range is selected.

(exp. 04/30/2020)

Public reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. This information is required by the Housing Appropriation Act of 9/28/1994. The information is needed to analyze the reasonableness of the Annual Adjustment Factor formula, and will be used where rent levels for a specific unit type, in a Substantial Rehabilitation or New Construction Contract, exceed the existing FMR rent. The information is considered non-sensitive and does not require special protection. This agency may not collect this information, and you are not required to complete this form, unless it displays a currently valid OMB control number.

## ***Explanation of Adjustments and Market Rent Conclusions – As Complete***

### **Deerfield Apartments**

#### **Primary Unit Types – One-Bedroom Units (577 SF)**

**Please note:** Minor adjustments in the \$5 to \$10 range are based on the appraiser's evaluation of the overall market as well as typical responses indicated by existing tenants. In addition, this is standard industry practice when there is insufficient market data present to support adjustments. It is also considered an acceptable practice by HUD as indicated in the Section 8 Renewal Guide Chapter 9-12 (C) (3) which states: "For minor adjustments (generally in the \$5 to \$10 range), the appraiser may state his/her subjective evaluation of why the observed differences would affect rent."

Rent comparability grids were prepared for the primary unit types with 577 square feet. Comparable apartments used include the following: Churchill Apartments (Comparable 1), Poplar Forest Apartments (Comparable 2), Blackstone Lofts (Comparable 3), Medallion Manor Apartments (Comparable 4) and Lofts at Worsham School (Comparable 5).

**Structure/Stories** – The subject is located in one-story garden-style buildings. Comparable 2 is similar. All remaining comparables are located in walk-up two-story buildings. All units at the subject are easily accessible without having to utilize stairs. For senior tenants such as those that occupy the subject property, it can be difficult to navigate stairs due to limited mobility issues. Therefore, units on the ground floor are preferred to units on the second or third floor in walk-up buildings. It is the appraiser's opinion that all units on the ground floor would rent for a premium when compared to units not on the first floor. However, there is no market data available for specific floor level pricing. Due to the lack of specific market data for structure differences, only a nominal adjustment of \$10 was selected for comparables located in walk-up structures.

**Project Occupancy** – The subject is currently 100 percent occupied. The occupancy rates of the comparables range from 88 to 100 percent. No adjustment was needed.

**Concessions** – The subject is not currently offering concessions. None of the comparables are currently offering concessions. No adjustment was needed.

**Year Built/Year Renovated** – The subject was constructed in 1992. It will undergo a substantial renovation and will be in good condition. Comparable 1 was built in 1967 and renovated in 2008, and Comparable 2 was constructed in 2000. Comparable 3 was built in 1930 and renovated in 2011. Comparable 4 was constructed in 1965 and renovated in 2006. Comparable 5 was constructed in 2010. Once rehabilitation is complete, the subject will be superior to all comparables. As a result, a \$50 adjustment was added to each comparable to account for the rehabilitation.

**SF Area** – The subject and the comparables vary in square footage. Typically, all other variables being equal, a larger unit is more desirable than a smaller unit. However, the value of the additional square footage is mitigated to some degree by the similarity in perceived unit function. There is a diminishing return of value for additional square footage as each additional square foot does not necessarily equal additional functionality. Additionally, the units at the subject are measured as part of the scope of this assignment. However, the contacts at the comparables are often unwilling to allow interior inspections of the units. Therefore, it is necessary to rely on published unit sizes or verbal confirmation of unit sizes from the property contacts. As such, it is impossible to verify the accuracy of this data. In addition, the subject unit sizes are paint-to-paint measurements, while the contacts often report the "marketing" unit size which is sometimes the gross exterior square footage. Therefore, the unit sizes at the comparables are not always a direct comparison to the unit sizes at the subject. For the purpose of this report, a range of comparable rents per square foot was derived. To determine this adjustment, each comparable's dollar

per square foot rental rate was determined for each bedroom type. From these results, a median dollar per square foot rental rate is determined. The median dollar per square foot was then multiplied by 25 percent for each comparable to derive an adjusted dollar per square foot rental rate. The 25 percent was used to account for the diminished return of the larger unit sizes and the potential differences in reported unit sizes of the comparables versus the subject. Next, the difference in square footage between the subject and each comparable is determined. The difference is multiplied by the determined adjusted dollar per square foot rate to arrive at the adjustment for each comparable. The selected dollar per square foot for the one-bedroom comparison is \$0.25. The result was rounded to the nearest \$5. No adjustments were made to comparables within 25 square feet of the subject because there is no difference in perceived unit function with 25 square feet. The adjustments are reflected on the HUD-Form 92273-S8, which is attached.

**# of Bedrooms** – The subject contains one-bedroom units. All comparables are similar. No adjustments were needed.

**# of Baths** – The subject contains one bath in all unit types. All comparables are similar. No adjustments were needed.

**Balcony/Patio** – The subject and Comparable 2 contain balconies and/or patios. The remaining comparables do not contain any of these features and were adjusted upward \$5 per month. Although there is little market data available concerning units with these features versus those without these features, the added amenity is an enhancement to the unit. Therefore, the nominal adjustment was deemed reasonable.

**Parking** – The subject and all comparables contain parking lots with no additional fee. No adjustment is needed.

**AC: Central/Wall** – The subject contains central air conditioning as do all comparables. No adjustments were needed.

**Range/Refrigerator** – The subject and all comparables contain both amenities. No adjustments were needed.

**Garbage Disposal** – The subject does not contain a garbage disposal in the units. All of the comparables except Comparables 3 and 4 contain garbage disposals. Since there is no market data concerning units with this feature, no adjustment was given.

**Microwave/Dishwasher** – The subject will contain dishwashers. Comparables 1 and 4 do not contain either of these features. Comparables 2, 3 and 5 contain dishwashers. Comparable 3 also contains microwaves within the units. Microwaves are a relatively inexpensive item and are unlikely to be a deciding factor when a tenant decides which unit to lease. However, because the included amenity is considered an enhancement to the unit, it was considered appropriate to adjust a nominal \$5 per month for microwaves. Dishwashers are more expensive and are more likely to factor into a tenant's decision on which unit to lease. Therefore, it was considered appropriate to adjust \$10 per month for dishwashers.

**Washer/Dryer** – The subject contains a laundry facility. Comparables 1 and 4 are similar to the subject. Comparables 2, 3 and 5 contain washers and dryers. Units with these amenities provided are preferred over units without these features as these appliances are expensive purchases for a prospective tenant. Although there is little market data available concerning units with these features versus those without these features, the amenities are an enhancement to the unit. In addition, local appliance rental companies that cater to apartment complexes were contacted. Appliance Warehouse serves the City of

---

Colonial Heights and offers washers and dryers for a starting price of \$32.95 per month. After considering all factors, washers and dryers were valued at \$35 per month. Laundry facilities on-site are valued at \$5 per month. Therefore, units with washers and dryers will rent for \$30 more per month than units in properties with laundry facilities (\$35 for washer/dryer - \$5 for laundry facility = \$30).

**Carpet** – The subject and all comparables contain carpet or wood floor coverings. Therefore, no adjustments were needed.

**Drapes** – The subject and all comparables contain window coverings. No adjustment was needed.

**Pool/Recreation Areas** – The subject contains a picnic area and gazebo. Comparables 1, 3, 4 and 5 do not contain these features. Although there is little market data available concerning units with these features, the added amenities are an enhancement. Swimming pools are typically considered a more desirable feature than other recreation features. Therefore, a \$10 adjustment was determined for swimming pool, and a \$5 adjustment per feature was determined for each additional recreation area. Comparables 1, 3, 4 and 5 were adjusted upward \$10 per month (\$5 for subject's picnic area + \$5 for subject's gazebo). Comparable 2 was adjusted downward \$30 per month (\$10 for swimming pool + \$5 for exercise room + \$5 for picnic area + \$5 for playground + \$5 for basketball court + \$5 for fishing pond + \$5 for internet café - \$5 for subject's picnic area - \$5 for subject's gazebo = \$30).

**Heat** – The subject does not have this utility provided. None of the comparables, except Comparable 5 have this utility provided. Therefore, Comparable 5 was adjusted downward \$26 based on the Allowances for Tenant-Furnished Utilities and Other Services provided by Virginia Housing Development Authority. The amount was substantiated through local utility providers.

**Cooling** – The subject does not have this utility provided. None of the comparables, except Comparable 5 have this utility provided. Therefore, Comparable 5 was adjusted downward \$7 based on the Allowances for Tenant-Furnished Utilities and Other Services provided by Virginia Housing Development Authority. The amount was substantiated through local utility providers.

**Cooking** – The subject does not have this utility provided. None of the comparables, except Comparable 5 have this utility provided. Therefore, Comparable 5 was adjusted downward \$4 based on the Allowances for Tenant-Furnished Utilities and Other Services provided by Virginia Housing Development Authority. The amount was substantiated through local utility providers.

**Electricity** – The subject does not have this utility provided. None of the comparables, except Comparable 5 have this utility provided. Therefore, Comparable 5 was adjusted downward \$15 based on the Allowances for Tenant-Furnished Utilities and Other Services provided by Virginia Housing Development Authority. The amount was substantiated through local utility providers.

**Hot Water** – The subject does not have this utility provided. None of the comparables, except Comparable 5 have this utility provided. Therefore, Comparable 5 was adjusted downward \$13 based on the Allowances for Tenant-Furnished Utilities and Other Services provided by Virginia Housing Development Authority. The amount was substantiated through local utility providers.

**Cold Water/Sewer** – The subject will not provide cold water and sewer. Comparable 2 is similar to the subject. Comparables 1, 3, 4 and 5 provide these utilities and were adjusted downward \$49 based on the Allowances for Tenant-Furnished Utilities and Other Services provided by Virginia Housing Development Authority. The amount was substantiated through local utility providers.

**Trash** – The subject provides this utility. All comparables are similar. No adjustment was needed.

**Extra Storage** – The subject does not contain extra storage. None of the comparables, except Comparable 2 contain storage. Although there is little market data available concerning units with these features versus those without these features, the added amenity is an enhancement to the unit. Therefore, extra storage was given a nominal \$5 adjustment per month.

**Location** – The subject’s neighborhood is rated average, with easy access to all services available within the village limits. In order to determine if adjustments were needed for differences in location between the subject and the comparables, eleven factors were compared. Those factors include livability, amenities available, cost of living, crime factors, employment factors, housing factors, schools in the area, walkscore, population counts, median rent levels and median income levels. The comparison between the subject and comparables is shown in the following table:

Location Characteristics			
	Crewe	Farmville	Blackstone
<b>Livability</b>	67	73	72
<b>Amenities</b>	D	A	B
<b>Cost of Living</b>	B	B	B
<b>Crime</b>	C	B	F
<b>Employment</b>	F	F	D
<b>Housing</b>	F	F	C
<b>Schools</b>	B	B	B
<b>Walkscore</b>	51	62	46
<b>Population</b>	2,629	8,562	3,517
<b>Median Rent</b>	\$704	\$764	\$797
<b>Median Income</b>	\$40,566	\$35,084	\$38,350

The data shown in the table was verified through [www.areavibes.com](http://www.areavibes.com) and [www.walkscore.com](http://www.walkscore.com). Each category was given a rating of 1 to 5, with 1 being the worst and 5 being the best. The ratings for each category were added together for each comparable, and the total sum was compared to the combined sum for the subject and a percent difference from the subject was determined. The results are shown in the following table:

Location Weighting Table			
	Crewe	Farmville	Blackstone
<b>Livability</b>	4	4	4
<b>Amenities</b>	2	5	4
<b>Cost of Living</b>	4	4	4
<b>Crime</b>	3	4	1
<b>Employment</b>	1	1	2
<b>Housing</b>	1	1	3
<b>Schools</b>	4	4	4
<b>Walkscore</b>	3	3	2
<b>Population</b>	1	1	1
<b>Median Rent</b>	3	3	3
<b>Median Income</b>	3	2	2
<b>Total</b>	<b>30</b>	<b>33</b>	<b>31</b>
<b>% Different</b>	---	<b>-10.0%</b>	<b>-3.3%</b>
<b>50% Difference</b>	---	-5.0%	-1.7%

Despite adjusting for the differences between the comparables, it is not always possible to fully account for the differences in rent between comparables as some is due to renter perception or management practices and is not due solely to differences in location. Therefore, it is not appropriate to adjust the full

percentage amount determined in the previous analysis, and an adjustment factor of 50 percent was applied to the percentages determined in this analysis. The result is shown in the previous table. The percentage was applied to the unadjusted rent level of the comparables. The result was applied to the comparables for differences in location. The following table shows the calculation for each comparable requiring an adjustment:

Comparable 1			
Bedroom Type	Unadjusted Rent	% Difference	Adjustment
1 BR	\$650	-5.0%	-\$33
Comparable 2			
Bedroom Type	Unadjusted Rent	% Difference	Adjustment
1 BR	\$785	-5.0%	-\$39
Comparable 3			
Bedroom Type	Unadjusted Rent	% Difference	Adjustment
1 BR	\$825	-1.7%	-\$14
Comparable 4			
Bedroom Type	Unadjusted Rent	% Difference	Adjustment
1 BR	\$525	-5.0%	-\$26
Comparable 5			
Bedroom Type	Unadjusted Rent	% Difference	Adjustment
1 BR	\$995	-5.0%	-\$50

The comparables were adjusted on each rent grid as indicated in the previous table (rounded to the nearest \$5).

**Security** – The subject does not contain security features. None of the comparables, except Comparable 3 contain security features. Comparable 3 contains intercom/electronic entry and video surveillance. No complex in the market area shows a rent differential based on security features. However, security features are an enhancement to an apartment complex, particularly security that limits access to the building or grounds. All security features will provide added protection for residents at the properties. Intercom/electronic entry limits access to the buildings. Therefore, properties with intercom/electronic entry are considered superior to properties with video surveillance which do not limit access. Consequently, intercom/electronic entry are considered \$5 superior to video surveillance. After considering all factors, Comparable 3 was adjusted downward \$15 (\$10 for intercom/electronic entry + \$5 for video surveillance = \$15).

**Clubhouse/Meeting Room** – The subject contains a meeting room. Comparables 1, 3, 4 and 5 do not contain these features. Comparable 2 contains a clubhouse. No complex in the market area shows a rent differential based on these particular items; however, the added amenities are an enhancement. Apartments with these features can command a higher rent in the market area. Therefore, properties with these features were adjusted \$5 per feature compared to properties without any of these features.

**Special Features** – The subject contains pull cords and safety bars and will contain in-unit internet. Comparable 1 contains ceramic tile and in-unit internet. Comparable 2 contains common area Wi-Fi. Comparable 3 contains ceramic tile. Comparable 4 does not contain any of these features. Comparable 5 contains granite countertops and in-unit internet. The market did not indicate a rent differential based on safety bars or ceramic tile. In addition, safety bars are an amenity that properties are generally willing to provide if needed. Therefore, no adjustments were needed for these features. Special features such granite countertops will typically command a higher rent in the market. Tenants are typically willing to pay a higher premium for these features. Typically, when these features are included in the units, they are considered luxury items, and units are assessed an up-charge from the rent that would be charged if unit did not contain these features. After considering all factors, a \$25 adjustment was applied for granite

countertops. Common area wi-fi is a convenience to the property. This feature is valuable to residents as it allows access to the Internet without having to deplete data from personal accounts which are typically accompanied by data caps and limits. There is no data for these features that could be extracted from the market area. However, an adjustment was needed for the convenience of the on-site amenity. Therefore, an adjustment of \$10 was selected. In order to determine an appropriate adjustment for in-unit internet, internet fees for local internet providers were researched. The following table shows the internet providers contacted and the fees for each provider.

Provider	Fee/Month
CenturyLink	\$45.00
Viasat	\$49.99
HughesNet	\$49.99
EarthLink	\$39.95

The costs for internet range from \$39.95 to \$49.99 per month. The adjustment is selected based on where the majority of the results fall within the range. If there is no majority, a conservative adjustment at the mid-point of the range is selected. As there was no majority for this analysis, an adjustment of \$45 per month was selected.

**Business Center/Neighborhood Network** – The subject does not contain this feature. None of the comparables contain this feature. No adjustments were needed.

**Conclusion of Market Rents – As Complete**

The adjusted rents range from \$700 to \$826 for the one-bedroom comparison. All comparables were given consideration. The appraiser concluded the market rent for the units at the subject as follows:

- **577 SF One-Bedroom Units - \$775**

The developer is proposing affordable rents as follows: \$624. In addition, the maximum net tax credit rents are \$333, \$447 and \$560, respectively. These rents are at or below the achievable rents determined on the rent grids and above the maximum net tax credit rents. However, as all the units contain Rental Assistance, tenants will never be asked to pay more than 30 percent of their gross annual income for rent. Therefore, the proposed rents were utilized in the restricted analysis.

- **577 SF One-Bedroom Units - \$624**

The developer is proposing the affordable LIHTC rents as follows:

MAXIMUM LIHTC RENTS AND UTILITY ALLOWANCES							
Unit Type	# of Units	Avg. Square Feet	% of Median Income	Maximum LIHTC Rent	Gross Rent	Utility Allowance	Net Rent
1/1	4	577	40%	\$454	\$745	\$121	\$624
1/1	16	577	50%	\$568	\$745	\$121	\$624
1/1	18	577	60%	\$681	\$745	\$121	\$624
1/1	1	577	60%	\$681	\$681	\$121	\$560

**Evaluation of the Development**

**Project Design**

Deerfield Apartments is comprised of five one-story garden buildings containing 39 units a meeting room, picnic area, laundry facility, office and maintenance area. The buildings have siding exterior and asphalt shingle roofs.

**Project Amenities**

The property will provide the following project amenities: meeting room, playground, laundry facility, on-site management, on-site maintenance and gazebo. The subject’s project amenities are competitive with the comparables in the market area.

**Parking**

The complex contains open asphalt parking areas with approximately 42 parking spaces. This parking ratio is slightly higher than one space per unit; however, it is an elderly development for 55 and older and the need for a vehicle is less than with a family development. Therefore, this does not appear to have a negative impact on the subject property.

**Unit Mix**

The subject’s unit mix of one-bedroom units is suitable in the market area.

**Utilities**

The subject will contain central electric heating and cooling. Cooking and hot water are electric. Trash collection services will be provided by the landlord. All remaining utilities are paid by the tenant. This arrangement is inferior to the comparables in the market area.

**Unit Amenities**

Each unit will contain the following amenities: refrigerator, range/oven, dishwasher, carpet, vinyl, blinds, ceiling fans, coat closet, patio, pull cords, safety bars and in-unit Wi-Fi. The unit amenities are competitive with the comparables in the market area.

**Tenant Services**

The subject will not offer a service coordinator. The surveyed comparables did not offer these services. Therefore, the subject will be competitive with the comparables in the market area.

### Impact of Existing/Planned Rental Housing

The market area exhibits sufficient demand for the existing property. Based on the occupancy level of the subject and the apartment complexes in the market area, the existing waiting lists, the projected population and household growth and the economic factors, it is believed that when the rehabilitation is completed, the property will have no adverse impact on the existing and/or planned market-rate rental housing properties in the market area.

### Summary of Developments Strength and Weaknesses

#### **Strengths**

- The subject's site plan and design are competitive with the surveyed comparables.
- The development will be superior to most of the comparable developments in condition upon completion of its rehabilitation.
- The subject's unit and project amenities are competitive with the comparables in the market area.
- The subject's proposed LIHTC rent will provide a good value to prospective tenants.

#### **Weaknesses**

- There are no apparent weaknesses.

## LOCAL PERSPECTIVE AND INTERVIEWS

---

## Local Interviews

### **Zoning Department**

Brian Thrower, Town Manager of Crewe, the subject is zoned C-1, Commercial District. The subject is a legal, non-conforming use. The subject has been grandfathered in. He stated that the owner would have to follow the zoning code if the property were destroyed. According to the code, if a nonconforming structure is destroyed or damaged to the extent that the cost of restoration to its condition before the occurrence shall exceed 50 percent of the cost of reconstruction the entire activity or structure, it shall be restored only if such uses complies with the requirement of the ordinance. The telephone number for the Towne of Crewe is 434-645-9453.

## RECOMMENDATIONS AND CONCLUSIONS

## Recommendations and Conclusions

### Project Description

The subject, Deerfield Apartments, is an existing Rural Development and Low Income Housing Tax Credit multifamily development that contains 39 rental units. The property is applying for an allocation of Low-Income Housing Tax Credits which will set the income eligibility to individuals earning 40, 50 and 60 percent of the area median income, or below and \$29,100 considering subsidy and between \$13,620 and \$29,100 not considering any subsidy.

Deerfield Apartments is comprised of five one-story garden buildings containing 39 units and a meeting room, laundry facility, office and maintenance area. The buildings are of frame construction with siding exterior and asphalt shingle roofs.

The following chart lists the subject's current unit mix:

Unit Type	# of Units	Square Footage	Total Square Footage
1/1	39	577	22,503
	<b>39</b>		<b>22,503</b>

The following chart lists the subject's proposed unit distribution by unit type, size and rent structure.

MAXIMUM LIHTC RENTS AND UTILITY ALLOWANCES							
Unit Type	# of Units	Avg. Square Feet	% of Median Income	Maximum LIHTC Rent	Gross Rent	Utility Allowance	Net Rent
1/1	4	577	40%	\$454	\$745	\$121	\$624
1/1	16	577	50%	\$568	\$745	\$121	\$624
1/1	18	577	60%	\$681	\$745	\$121	\$624
1/1	1	577	60%	\$681	\$681	\$121	\$560

\*The maximum rents exceed the maximum gross rent. However, of the subject's 39 units, 38 units contain Rental Assistance. Therefore, these tenants will not be required to pay more than 30 percent of their income or the maximum LIHTC rent.

### Income Averaging

The developer is not electing to use the income-average minimum set-aside option.

### Housing Profile

The rental housing stock in the market area is comprised of single-family homes and market-rate and subsidized/income-restricted apartment complexes. The current vacancy rate in surveyed subsidized/income-restricted apartment complexes is 0.4 percent. The current vacancy rate in surveyed market-rate apartment complexes is 3.2 percent.

The development does not have an adverse impact on the market area. There were six income-restricted developments confirmed in the market area. Peele Manor and Magnolia Place Apartments are the most similar to the subject since they contain one-bedroom units, contains subsidy for its units and are elderly. In addition, the majority of the comparables contain a waiting list. Therefore, the market area is not saturated.

### Market Feasibility

The following tables contain the capture rates for the entire property as well as for the vacant units only at the property.

CAPTURE RATE BY INCOME LIMITS - WITH RENTAL ASSISTANCE				
	All Units @ 40% (\$0 - \$19,400)	1BR Units @ 50% (\$0 - \$24,250)	All Units @ 60% (\$0 - \$29,100)	Project Total (\$0 - \$29,100)
<b>Income Restrictions:</b>				
All Units at Subject	0.3%	0.9%	1.0%	2.1%
Vacant Units at Subject	0.0%	0.0%	0.0%	0.0%

CAPTURE RATE BY INCOME LIMITS - WITHOUT RENTAL ASSISTANCE				
	All Units @ 40% (\$13,620 - \$19,400)	All Units @ 50% (\$17,040 - \$24,250)	All Units @ 60% (\$20,430 - \$29,100)	Project Total (\$13,620 - \$29,100)
<b>Income Restrictions:</b>				
All Units at Subject	0.3%	4.1%	6.1%	4.7%
Vacant Units at Subject	0.0%	0.0%	0.0%	0.0%

Overall the market shows a net demand of 1,877 units for proposed units at or below 60 percent of the area median income when considering subsidy. The subject is an existing development that contains 39 units. The overall capture rate for all units at or below 60 percent is 2.1 percent. However, as the property is existing and the tenants are likely to remain after rehabilitation, the capture rate including only the vacant units is 0.0 percent.

Overall the market shows a net demand of 686 units for proposed units at or below 60 percent of the area median income when not considering subsidy. The subject is an existing development that contains 39 units. The overall capture rate for all units at or below 60 percent is 5.7 percent. However, as the property is existing and the tenants are likely to remain after rehabilitation, the capture rate including only the vacant units is 0.0 percent.

### Evaluation of Project

The subject is located at 1651 Maryland Avenue. Therefore, the subject has average visibility and easy access. The subject's site plan and project design are similar to competing apartment developments. The subject's unit mix of one-bedroom units is suitable in the market. The subject's unit and project amenities are competitive with the surveyed comparables. The subject's rents will provide a good value to prospective tenants.

### Positive/Negative Attributes

**Strengths:** The subject's location is comparable to other developments in the market area. Its in-unit and common area amenities are competitive with the other developments in the market area. When these factors are taken into consideration, the subject's proposed units provide a good value to prospective tenants.

**Weaknesses:** There are no apparent weaknesses.

### Conclusion

The subject can retain its required share of the market area for the following reasons:

- The subject's design and amenities are competitive with other existing projects. Therefore, no modifications to the subject are necessary.

- 
- Deerfield Apartments is an existing 39-unit Low Income Housing Tax Credit complex. The development is currently 100 percent occupied. An absorption period was established as if the development were a vacant Low Income Housing Tax Credit Development. After researching the vacancy rates of the existing units in the area, it is firmly believed that the proposed development will satisfy a portion of the continued demand for the units within the market. It is estimated that a 95+ percent occupancy level can be achieved in six to eight months. Our interviews with apartment managers substantiate the absorption rate. It is believed that the subject will absorb five to seven units per month; therefore, reaching a stable occupancy level within six to eight months. However, it has no vacant units. Therefore, the effective absorption rate is zero months.
  - According to the past, present and future demographic and economic trends within the primary market area, it is the opinion of the analyst that the existing development is suitable for the market area. Given the current acceptable vacancy rates for affordable properties, the development will not have an adverse effect on the existing rental comparables and the anticipated pipeline additions to the rental base.

**MARKET STUDY ANALYST STATEMENT OF EXPERIENCE**

---

### Qualifications of the Analyst

Gill Group is a nationwide marketing and real estate consulting firm specializing in market studies and real estate appraisals for low-income housing developments. For more than 30 years, Gill Group has been performing market research and appraisals on all types of properties. Primary data from field inspectors, analysts and appraisers is used. Our inspectors, analysts and appraisers personally inspect and examine every property included in the reports. Additional data is obtained from the U.S. Census Bureau, local public officials and reliable market data research companies such as ESRI Business Information Solutions. Gill Group's market studies have been used by clients in the Low Income Housing Tax Credit program and in obtaining and renewing state and federal subsidies for low-income housing developments, senior housing and multifamily rental housing. Jonathan Richmond and Janice F. Gill, MAI, have been active in the U.S. Department of Housing and Urban Development's Multifamily Accelerated Processing (M.A.P.) and Mark-to-Market programs.

**EXPERIENCE  
(1991 TO PRESENT)**

Primary provider of HUD Mark-to-Market Full Appraisals for mortgage restructuring and Mark-to-Market Lites for rent restructuring and has worked with HUD in this capacity since inception. Completed approximately 350 appraisals assignments under this program.

Provider of HUD MAP and TAP appraisals and market studies for multiple lenders since its inception. Completed approximately 350 appraisal assignments under this program.

Contract MAP quality control reviewer and field inspector for CohnReznick and HUD. Have completed approximately 350 reviews under this program. Have completed approximately 100 field inspections under this program.

Currently approved state reviewer for HUD Rent Comparability Studies for Section 8 Renewals in Alabama, California, Connecticut, Florida, Hawaii, Illinois, Indiana, Iowa, Kansas, Louisiana, Minnesota, Nebraska, New Mexico, North Carolina, Oregon, Utah, Virgin Islands, Virginia, Washington, West Virginia and Wisconsin. Completed approximately 500 reviews under this program.

Provider of HUD Rent Comparability Studies for contract renewal purposes nationwide. Completed approximately 400 rent comparability studies.

Provider of tax credit financing analysis and value of financing analysis. Completed approximately 300 appraisal assignments and market studies under this program.

Provider of multifamily appraisals under the RD 515 and 538 programs. Completed approximately 200 appraisal assignments under these programs.

Partial list of clients include: Colorado Housing Finance Agency, CreditVest, Inc., Foley & Judell, LLP, Kentucky Housing Corporation, Kitsap County Consolidated Housing Authority, Louisiana Housing Finance Agency, Missouri Housing Development Agency, New Mexico Mortgage Finance Authority, Ontra, Inc., Quadel Consulting Corporation, CohnReznick, L.L.P., Group, Siegel Group, Signet Partners and Wachovia Securities.

**DEVELOPMENT/OWNERSHIP/  
MANAGEMENT EXPERIENCE  
(2006 TO PRESENT)**

For the past 10 years, he has owned three separate companies that develop, own and manage commercial, multifamily, residential, agricultural and vacant land properties.

In his portfolio are over 100,000 square feet of commercial space, over 1,000 units of multifamily, 200 acres of farmland, and 10 parcels of developable commercial and multifamily lots, all in the Midwest.

---

I affirm that I have made a physical inspection of the site and market area. I also affirm that the appropriate information has been used in the comprehensive evaluation of the need and demand for the proposed rental units. To the best of my knowledge the market can support the demand shown in this study. I understand that any misrepresentations in this statement may result in the denial of participation in the Low Income Housing Tax Credit Program in Virginia as administered by the Virginia Housing Development Authority. I also affirm that neither I nor anyone at my firm has any interest in the existing development or relationship with the ownership entity. In addition, I affirm that neither I nor anyone at my firm nor anyone acting on behalf of my firm in connection with the preparation of this report has communication to others that my firm is representing VHDA or in any way acting for, at the request of, or on behalf of VHDA. Finally, I affirm that compensation for my services is not contingent upon this development receiving a reservation or allocation of tax credits.

A handwritten signature in black ink, appearing to read 'J. Dickerson', written over a horizontal line.

*Income Expense Analysis: Conventional Apartments and Income/Expense Analysis: Federally Assisted Apartments* published by Institute of Real Estate Management

Information used in the market study was obtained from various sources including: the U.S. Census Bureau, Nielsen Claritas, Ribbon Demographics, U.S. Bureau of Labor Statistics, interviews with local area and government officials and interview with local property owners or managers.

**ADDENDUM B – MARKET STUDY TERMINOLOGY**

**Absorption Period**

The period of time necessary for a newly constructed or renovated property to achieve the Stabilized Level of Occupancy. The Absorption Period begins when the first temporary or permanent certificate of occupancy is issued and ends when the last unit to reach the Stabilized Level of Occupancy has a signed lease. Assumes a typical pre-marketing period, prior to the issuance of the certificate of occupancy, of about three to six months. The month that leasing is expected to begin should accompany all absorption estimates.

**Absorption Rate**

The average number of units rented each month during the Absorption Period.

**Acceptable Rent Burden**

The rent-to-income ratio used to qualify tenants for both income restricted and non-income restricted units. The Acceptable Rent Burden varies depending on the requirements of funding sources, government funding sources, target markets, and local conditions.

**Affordable Housing**

Housing where the tenant household pays no more than 30 percent of its annual income on Gross Rent.

**Amenity**

Tangible or intangible benefits offered to a tenant at no fee (with the exception of day care), typically on-site recreational facilities or planned programs, services and activities.

**Annual Demand**

The total estimated demand present in the market in any one year for the type of units proposed. Annual demand estimates factor in tenure, tenant age, income restrictions, family size and turnover.

**Area Median Income (AMI)**

One-hundred percent of the gross median household income for a specific metropolitan statistical area, county or non-metropolitan area established annually by HUD.

**Assisted Housing**

Housing where the monthly costs to the tenants are subsidized by federal, state or other programs.

**Attached Housing**

Two or more dwelling units connected with party walls (e.g., townhouses or flats).

**Basic Rent**

The minimum monthly rent that tenants who do not have rental assistance pay to lease units developed through the USDA-RD Section 515 Program, the HUD Section 236 Program and HUD Section 223 (d)(3) Below Market Interest Rate Program. The Basic Rent is calculated on the rent required to operate the property, maintain debt service on a subsidized mortgage with a below-market interest rate, and provide a return on equity to the developer in accordance with the regulatory documents governing the property.

**Below Market Interest Rate Program (BMIR)**

Program targeted to renters with income not exceeding 80 percent of area median income by limiting rents based on HUD's BMIR Program requirements and through the provision of an interest reduction contract to subsidize the market interest rate to a below-market rate. Interest rates are typically subsidized to effective rates of one percent or three percent.

**Capture Rate**

The percentage of age, size, and income qualified renter households in the Primary Market Area that the property must capture to achieve the Stabilized Level of Occupancy. Funding agencies may require restrictions to the qualified households used in the calculation including age, income, living in substandard housing, mover-ship and other comparable factors. The Capture Rate is calculated by dividing the total number of units at the property by the total number of age, size and income qualified renter households in the Primary Market Area. See Penetration Rate for rate for entire market area.

**Census Tract**

A small, relatively permanent statistical subdivision delineated by a local committee of census data users for the purpose of presenting data. Census tract boundaries normally follow visible features but may follow governmental unit boundaries and other non-visible features; they always nest within counties. They are designed to be relatively homogeneous units with respect to population characteristics, economic status, and living conditions at the time of establishment. Census tracts average about 4,000 inhabitants.

**Central Business District (CBD)**

The center of commercial activity within a town or city; usually the largest and oldest concentration of such activity.

**Community Development Corporation (CDC)**

Entrepreneurial institution combining public and private resources to aid in the development of socio-economically disadvantaged areas.

**Comparable Property**

A market-rate or Affordable Housing property that is representative of the rental housing choices of the subject's Primary Market Area and that is similar in construction, size, amenities, or age. These Comparables and Competitives are generally used to derive market rent.

**Competitive Property**

A property that is comparable to the subject and that competes at nearly the same rent levels and tenant profile, such as age, family or income.

**Concession**

Discount given to a prospective tenant to induce the tenant to sign a lease. Concessions typically are in the form of reduced rent or free rent for a specified lease term or for free amenities which are normally charged separately (i.e., washer/dryer, parking).

**Condominium**

A form of joint ownership and control of property in which specified volumes of space (for example, apartments) are owned individually while the common elements of the property (for example, outside walls) are owned jointly.

**Contract Rent**

1. The actual monthly rent payable by the tenant, including any rent subsidy paid on behalf of the tenants, to the owner, inclusive of all terms of the lease (HUD & RD).
2. The monthly rent agreed to between a tenant and a landlord (Census).

**Demand**

An estimate of the total number of market households that have both the desire and the ability to obtain the product and/or services offered. These households must be of the appropriate age, income, tenure and size for a specific proposed development. Components of demand vary and can include household growth; turnover, those living in substandard conditions, rent over-burdened households, and demolished housing units. Demand is project specific.

**Difficult Development Area (DDA)**

An area designated by HUD as an area that has high construction, land, and utility costs relative to the Area Median Gross Income. A project located in a DDA and utilizing the Low Income Housing Tax Credit may qualify for up to 130 percent of eligible basis for the purpose of calculating the Tax Credit allocation.

**Detached Housing**

A freestanding dwelling unit, typically single-family, situated on its own lot.

**Effective Rents**

Market Rents less concessions.

**Elderly or Senior Housing**

Housing where (1) all the units in the property are restricted for occupancy by persons 62 years of age or older or (2) at least 80 percent of the units in each building are restricted for occupancy by households where at least one household member is 55 years of age or older and the housing is designed with amenities and facilities designed to meet the needs of senior citizens.

**Extremely Low Income**

Person or household with income below 30 percent of Area Median Income adjusted for household size.

**Fair Market Rent (FMR)**

The estimates established by HUD of the Gross Rents (Contract Rent plus Tenant Paid Utilities) needed to obtain modest rental units in acceptable condition in a specific county or metropolitan statistical area. HUD generally sets FMR so that 40 percent of the rental units have rents below the FMR. In rental markets with a shortage of lower-priced rental units, HUD may approve the use of Fair Market Rents that are as high as the 50<sup>th</sup> percentile of rents.

**Family**

A family consists of a householder (i.e., one who occupies or owns a house/head of a household) and one or more other persons living in the same household who are related to the householder by birth, marriage or adoption. Not all households contain families since a household may comprise a group of unrelated persons or one person living alone. (Source: U.S. Census)

**Garden Apartments**

Apartments in low-rise buildings (typically two to four stories) that feature low density, ample open-space around the buildings, and on-site parking.

**Gross Rent**

The monthly housing cost to a tenant which equals the Contract Rent provided for in the lease plus the estimated cost of all Tenant Paid Utilities.

**High-rise**

A residential building having more than ten stories.

**Household**

All the persons who occupy a housing unit as their usual place of residence. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements. (Source: U.S. Census)

**Household Trends**

Changes in the number of households for a particular area over a specific period of time, which is a function of new household formations (e.g., at marriage or separation) and decreasing average household size.

**Housing Unit**

House, apartment, mobile home, or group of rooms used as a separate living quarters by a single household.

**Housing Choice Voucher (Section 8 Program)**

Federal rent subsidy program under Section 8 of the U.S. Housing Act which issues rent vouchers to eligible households to use in the housing of their choice. The voucher payment subsidizes the difference between the Gross Rent and the tenant's contribution of 30 percent of adjusted income (or 10 percent of gross income, whichever is greater). In cases where 30 percent of the tenants' income is less than the utility allowance, the tenant will receive an assistance payment. In other cases, the tenant is responsible for paying his share of the rent each month.

**Housing Finance Agency (HFA)**

State or local agencies responsible for financing housing and administering Assisted Housing programs.

**HUD Section 8 Program**

Federal program that provides project based rental assistance. Under the program HUD contracts directly with the owner for the payment of the difference between the Contract Rent and a specified percentage of tenant's adjusted income.

**HUD Section 202 Program**

Federal program which provides direct capital assistance (i.e., grant) and operating or rental assistance to finance housing designed for occupancy by elderly households who have income not exceeding 50 percent of Area Median Income. The program is limited to housing owned by 501(c)(3) nonprofit organizations or by limited partnerships where the sole general partner is a 501(c)(3) nonprofit organization. Units receive HUD project based rental assistance that enables tenants to occupy units at rents based on 30 percent of tenant income.

**HUD Section 811 Program**

Federal program which provides direct capital assistance and operating or rental assistance to finance housing designed for occupancy by persons with disabilities who have income not exceeding 50 percent of Area Median Income. The program is limited to housing owned by 501(c)(3) nonprofit organizations or by limited partnerships where the sole general partner is a 501(c)(3) nonprofit organization.

**HUD Section 236 Program**

Federal program which provides interest reduction payments for loans which finance housing targeted to households with income not exceeding 80 percent of area median income who pay rent equal to the greater of Basic Rent of 30 percent of their adjusted income. All rents are capped at a HUD approved market rent.

**Income Band**

The range of incomes of households that can pay a specific rent but do not have more income than is allowed by the Income Limits of a particular housing program. The minimum household income typically is based on a defined Acceptable Rent Burden percentage and the maximum typically is pre-defined by specific programmatic requirements or by general market parameters.

**Income Limits**

Maximum household income by county or Metropolitan Statistical Area, adjusted for household size and expressed as a percentage of the Area Median Income for the purpose of establishing an upper limit for eligibility for a specific housing program. Income Limits for federal, state and local rental housing programs typically are established at 30, 50, 60 or 80 percent of AMI. HUD publishes Income Limits each year for 30 percent median, Very Low Income (50%), and Low-Income (80%), for households with one through eight people.

**Infrastructure**

Services and facilities including roads, highways, water, sewerage, emergency services, parks and recreation, etc. Infrastructure includes both public and private facilities.

**Low Income**

Person or household with gross household income below 80 percent of Area Median Income adjusted for household size.

**Low Income Housing Tax Credit**

A program to generate equity for investment in affordable rental housing authorized pursuant to Section 42 of the Internal Revenue Code, as amended. The program requires that a certain percentage of units built be restricted for occupancy to households earning 60 percent or less of Area Median Income, and that the rents on these units be restricted accordingly.

**Low Rise Building**

A building with one to three stories.

**Market Advantage**

The difference, expressed as a percentage, between the estimated market rent for an apartment property without income restrictions and the lesser of (a) the owner's proposed rents or (b) the maximum rents permitted by the financing program for the same apartment property.

**Market Analysis**

A study of real estate market conditions for a specific type of property.

**Market Area**

A geographic area from which a property is expected to draw the majority of its residents.

**Market Area, Primary (PMA)**

The most likely geographic area from which a property would draw its support.

**Market Area, Secondary (SMA)**

The portion of a market area that supplies additional support to an apartment property beyond that provided by the primary market area.

**Market Demand**

The number of units required in a defined market area to accommodate demand (i.e., households that desire to improve the quality of their housing without significantly increasing their economic burden). Market demand is not project specific and refers to the universe of tenure appropriate households, independent of income. The components of market demand are similar to those used in determining demand.

**Market Feasibility Analysis**

An analysis that determines whether a proposed development can attain its target rents, taking into account the development's characteristics (location, size, unit mix, design and amenities), the depth of its target market, and the strength of its appeal in comparison to other existing and planned options available to potential consumers.

**Market Rent**

The rent that an apartment, without rent or income restrictions or rent subsidies, would command in the open market considering its location, features, amenities. Market rent should be adjusted for concessions and owner paid utilities included in the rent.

**Market Study**

A comprehensive review of the housing market in a defined market area. A market study can be used to determine the demand for specific proposed development or to examine the overall condition of an area's housing market. Project specific market studies are often used by developers, syndicators, and government entities to determine the appropriateness of a proposed development, whereas market specific market studies are used to determine what housing needs, if any, exist within a specific geography. At a minimum, market studies include a review of location, economic conditions, demographics, and existing and proposed housing stock.

**Marketability**

The manner in which the subject fits into the market; the relative desirability of a property (for sale or lease) in comparison with similar or competing properties in the area.

**Market Vacancy Rate – Physical**

Average number of apartment units in any market which are unoccupied divided by the total number of apartment units in the same Market Area, excluding units in properties which are in the lease-up stage.

**Market Vacancy Rate – Economic**

Percentage of rent loss due to concessions and vacancies.

**Metropolitan Statistical Area (MSA)**

A geographic entity defined by the federal Office of Management and Budget, for use by federal statistical agencies, based on the concept of a core area with a large population nucleus, plus adjacent communities having a high degree of economic and social integration with that core. Qualification of an MSA requires the presence of a city with 50,000 or more inhabitants, or the presence of an Urbanized Area (UA) and a total population of at least 100,000 (75,000 in New England). The county or counties containing the largest city and surrounding densely settled territory are central counties of the MSA. Additional outlying counties qualify to be included in the MSA by meeting certain other criteria of metropolitan character, such as a specified minimum population density or percentage of the population that is urban.

**Mid-rise**

A building with four to ten stories.

**Mixed Income Property**

An apartment property containing (1) both income restricted and unrestricted units or (2) units restricted at two or more Income Limits (i.e., Low Income Tax Credit property with income limits of 30, 50 and 60 percent).

**Mobility**

The ease with which people move from one location to another.

**Moderate Income**

Person or household with gross household income between 80 and 120 percent of Area Median Income adjusted for household size.

**Move-Up Demand**

An estimate of how many consumers are able and willing to relocate to more expensive or desirable units, such as tenants who move up from Class C properties to Class B; and Class B tenants that move up to Class A properties; and tenants that move from Class C and B properties to a new superior Low Income Tax Credit property. For purposes of demonstrating move-up demand both changes in Class Construction Type and changes in Quality Classification of five or more may be considered (Reference the Virginia State Board of Equalization Assessor's Handbook Section 531, January 2003, pages 4-5 for definitions of Class and Quality Classifications.)

**Multifamily**

Structures that contain two or more housing units.

**Neighborhood**

An area of a city or town with common demographic and economic features that distinguish it from adjoining areas.

**Net Rent (also referred to as Contract or Lease Rent)**

Gross Rent less Tenant Paid Utilities.

**Penetration Rate**

The percentage of age and income qualified renter households in the Primary Market Area that live in all existing and proposed properties, to be completed within six months of the subject, and which are competitively priced to the subject that must be captured to achieve the Stabilized Level of Occupancy. Funding agencies may require restrictions to the qualified households used in the calculation including age, income, living in substandard housing, mover-ship and other comparable factors. See Capture Rate for property specific rate.

**Pent-up Demand**

A market in which there is a scarcity of supply and vacancy rates are very low.

**Population Trends**

Changes in population levels for a particular area over a specific period of time – which is a function of the levels of births, deaths, and net migration.

**Primary Market Area**

See Market Area

**Programmatic Rents**

The proposed rents for a Tax Credit or other income restricted property relative to comparable market rate properties and rents being achieved at another Low Income Housing Tax Credit or other income restricted properties in the market. Can be no greater than maximum rents permitted by the Low Income Housing Tax Credit or other program regulations.

**Project Based Rent Assistance**

Rental assistance from a federal, state or local program that is allocated to the property or a specific number of units in the property and is available to each income eligible tenant of the property or an assisted unit.

**Public Housing or Low Income Conventional Public Housing**

HUD program administered by local (or regional) Housing Authorities which serves Low- and Very-Low Income Households with rent based on the same formula used for HUD Section 8 assistance.

**Qualified Census Tract (QCT)**

Any census tract (or equivalent geographic area defined by the Bureau of the Census) in which at least 50 percent of households have an income less than 60 percent of Area Median Income or where the poverty rate is at least 25 percent. A project located in a QCT and receiving Low Income Housing Tax Credits may qualify for up to 130 percent of eligible basis for the purpose of calculating the Tax Credit allocation.

**Redevelopment**

The redesign or rehabilitation of existing properties.

**Rent Burden**

Contract Rent plus Tenant Paid Utilities divided by the gross monthly household income.

**Rent Burdened Households**

Households with rent burden above the level determined by the lender, investor or public program to be an acceptable rent-to-income ratio.

**Restricted Rent**

The maximum allowable rent under the restrictions of a specific housing program or subsidy.

**Rural Development (RD) Market Rent**

A monthly rent that can be charged for an apartment under a specific USDA-RD housing program, that reflects the agency's estimate of the rent required to operate the property, maintain debt service on an un-subsidized mortgage and provide an adequate return to the property owner. This rent is the maximum rent that a tenant can pay at an RD property.

**Rural Development (RD) Program**

Federal program which provides low interest loans to finance housing which serves low- and moderate-income persons in rural areas who pay 30 percent of their adjusted income on rent or the basic rent, whichever is the higher (but not exceeding the market rent). The Program may include property based rental assistance and interest reduction contracts to write down the interest on the loan to as low as one percent.

**Saturation**

The point at which there is no longer demand to support additional units.

**Secondary Market Area**

The portion of a market area that supplies additional support to an apartment property beyond that provided by the Primary Market Area.

**Single-Family Housing**

A dwelling unit, either attached or detached, designed for use by one household and with direct access to a street. It does not share heating facilities or other essential building facilities with any other dwelling.

**Special Needs Population**

Specific market niche that is typically not catered to in a conventional apartment property. This population should exhibit certain criteria, which can be well defined, in order, for example, to assess the need and demand from this source. Examples of special needs populations include substance abusers, visually impaired person or persons with mobility limitations.

**Stabilized Level of Occupancy**

The underwritten or actual number of occupied units that a property is expected to maintain after the initial rent-up period, expressed as a percentage of the total units. For TCAC projects these percentages are equal to a physical occupancy rate that will generate 90 percent of aggregate restricted rents for SRO and Special Needs units and generate 95 percent of aggregate restricted rents for all other types of units.

**State Data Center (SDC)**

A state agency or university facility identified by the governor of each state to participate in the U.S. Census Bureau's cooperative network for the dissemination of the census data.

**Subsidy**

Monthly income received by a tenant or by an owner on behalf of a tenant to pay the difference between the apartment's Contract Rent and the amount paid by the tenant toward rent.

**Substandard Conditions**

Housing conditions that are conventionally considered unacceptable which may be defined in terms of lacking plumbing facilities, one or more major systems not functioning properly, or overcrowded conditions.

**Target Income Band**

The estimated Income Band from which the subject will likely draw tenants.

**Target Population**

Market niche a development will appeal or cater to. State agencies often use Target Population to refer to various income set asides, elderly v. family, etc.

**Tenant**

One who rents real property from another.

**Tenant Paid Utilities**

The cost of utilities necessary for the habitation of a dwelling unit, which are paid by the tenant. Tenant Paid Utilities do not include costs for telephone or cable service.

**Tenure**

The distinction between owner-occupied and renter-occupied housing units.

**Townhouse (or Row House)**

Single-family attached residence separated from another by party walls, usually on a narrow lot offering small front and back-yards; also called a row house.

**Turnover**

An estimate of the number of housing units in a Market Area as a percentage of total housing units in the Market Area that will likely change occupants in any one year. Only turnover in the primary market area rental market (i.e., number of rental housing units as a percentage of total rental housing units that will likely change occupants) shall be considered for purposes of constructing demand estimates. See Vacancy Period.

**Unmet Housing Need**

New units required in the Market Area to accommodate household growth, homeless households, and housing in substandard conditions.

**Unrestricted Rents**

The recommended rents for the market rate units at a Mixed-Income Property.

**Vacancy Period**

The amount of time that an apartment remains vacant and available for rent.

**Vacancy Rate – Economic**

Maximum potential revenue less actual rent revenue divided by maximum potential rent revenue. The economic vacancy rate should be used exclusively for project rent proformas, and not for reporting the vacancy rate of rent comparables.

**Vacancy Rate – Physical**

The number of total habitable units that are vacant divided by the total number of units in the property. The physical vacancy rate shall be used when reporting comparable vacancy rates.

**Very Low Income**

Person or household whose gross household income does not exceed 50 percent of Area Median Income adjusted for household size.

**Zoning**

Classification and regulation of land by local governments according to use categories (zones); often also includes density designations.

**ADDENDUM C – NCHMA INDEX**

## NCHMA Market Study Index

**Introduction:** Members of the National Council of Housing Market Analysts provide the following checklist referencing various components necessary to conduct a comprehensive market study for rental housing. By completing the following checklist, the NCHMA Analyst certifies that he or she has performed all necessary work to support the conclusions included within the comprehensive market study. By completion of this checklist, the analyst asserts that he/she has completed all required items per section.

		Page Number(s)
<b>Executive Summary</b>		
1	Executive Summary	11-13
<b>Scope of Work</b>		
2	Scope of Work	15
<b>Project Description</b>		
3	Unit mix including bedrooms, bathrooms, square footage, rents, and income targeting	19-21
4	Utilities (and utility sources) included in rent	20

ADDENDUM F – FLOOD DATA

# National Flood Hazard Layer FIRMette

## Legend

SEE FIS REPORT FOR DETAILED LEGEND AND INDEX MAP FOR FIRM PANEL LAYOUT

SPECIAL FLOOD HAZARD AREAS		Without Base Flood Elevation (BFE) Zone A, V, A99
		With BFE or Depth Zone AE, AO, AH, VE, AP
		Regulatory Floodway
OTHER AREAS OF FLOOD HAZARD		0.2% Annual Chance Flood Hazard, Areas of 1% annual chance flood with average depth less than one foot or with drainage areas of less than one square mile Zone X
		Future Conditions 1% Annual Chance Flood Hazard Zone X
		Area with Reduced Flood Risk due to Levee. See Notes. Zone X
		Area with Flood Risk due to Levee Zone D
OTHER AREAS		Area of Minimal Flood Hazard Zone X
		Effective LOMRs
GENERAL STRUCTURES		Channel, Culvert, or Storm Sewer
		Levee, Dike, or Floodwall
OTHER FEATURES		Cross Sections with 1% Annual Chance Water Surface Elevation 20.3 17.6
		Coastal Transect
		Base Flood Elevation Line (BFE)
		Limit of Study
		Jurisdiction Boundary
		Coastal Transect Baseline
MAP PANELS		Digital Data Available
		No Digital Data Available
		Unmapped

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards.

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 2/6/2020 at 5:57:26 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.
