Virginia Housing is running a BETA test of new EUR calculations that will be considered for implementation in 2022. These points are only a test and will not be used for scoring purposes in 2021. Please contact taxcreditapps@virginiahousing.com with questions or comments.

Credit Points:

If the Combined Max Allowable is \$500,000 and the annual credit requested is \$200,000, you are providing a 60% savings for the program. This deal would receive all 200 credit points.

For another example, the annual credit requested is \$300,000 or a 40% savings for the program. Using a sliding scale, the credit points would be calculated by the difference between your savings and the desired 60% savings. Your savings divided by the goal of 60% times the max points of 200. In this example, (40%/60%) x 200 or 133.33 points.

Using Current E-U-R method (u	p to 200)		99.84
Using proposed method:			
Combined Max	\$765,298		
Credit Requested	\$733,801		
% of Savings	4.12%		
Sliding Scale Points			13.73
		Difference	-86.11

Cost Points:

If the Applicable Cost by Square foot is \$238 and the deal's Proposed Cost by Square Foot was \$119, you are saving 50% of the applicable cost. This deal would receive all 100 credit points.

For another example, the Applicable Cost by SqFt is \$238 and the deal's Proposed Cost is \$153.04 or a savings of 35.70%. Using a sliding scale, your points would be calculated by the difference between your savings and the desired 50% savings. Your savings divided by the goal of 50% times the max points 100. In this example, (35.7%/50%) x 100 or 71.40 points.
